When any topic was under discussion referring to China, Japan, or Cochin China, Sir John Bowring, ex-Governor of Hong Kong, John Crawfurd, Esq., F.R.S., ex-Governor of the Straits Settlements, and Mr. Samuel Mossman, late Editor of the *North-China Herald*, took part in it. The latter named of these representatives of the Far East at this meeting also read a paper on the climates of China and Australia, with a view to show that the atmosphere of the globe does not universally commingle, as generally supposed, on account of the great ærial currents, and that there is a difference in the volume of oxygen and carbonic acid gas, as its vital constituents, in the north and south hemispheres. He contended that the phenomena of the N. E. and S. E. trade-winds restricted the air to each hemisphere, and that the equatorial belt of calms neutralizing the currents prevented their amalgamation. Hence the organic conditions of the land on each side of the equator, tending to exhaust the vital elements of the atmosphere, from the earliest fossil period, had reduced their volume more in the north than in the south, in consequence of the greater extent of land containing carboniferous deposits, and the preponderating presence of the animal creation. While quoting the various analyses of the atmosphere by Humboldt, Dr. Priestly, and others, Mr. Mossman showed that not one had been made in the southern hemisphere, or further east than the African coast on the Mediterranean; and that was brought to Europe in bottles. In his paper, which is of some length, he suggests that it would be interesting, and further the elucidation of this important medical question, if some of the skilful physicians at Shanghai would make a series of experiments, especially in the summer months, to ascertain if the vital constituents in the air are less in the eastern than they are in the western hemisphere.

The following extracts refer to the climatology of China:—

"*For the human subject to enjoy all the conditions of climate in their highest degree, it is necessary that the atmosphere he breathes contains the largest proportion of the vital and deodorizing gases (oxygen and carbon) that support life and health.* Where these are deficient, I contend that the most robust individual cannot fully enjoy all the changes in the atmosphere that sensibly affect his organs, as stated by Humboldt.

"In looking abroad on this atmo-terraqueous globe for data to illustrate in its most vivid manner this part of my subject, it is not in this comparatively small patch of its surface that the natural philosopher can observe the great climatic operations of Nature in her atmospheric laboratory. However great and powerful this Island of Great Britain is in its moral, political, and commercial influence throughout the world, yet in its limited geographical area it is of lilliputian dimensions in determining meteorological phenomena. Nor does even the Continent of Europe furnish the most striking illustrations of climatology in the northern hemisphere to compare with the regions of the Far South. It is in Asia, especially in the Far East, where the multitudinous Empire of China supports one-third of our breathing humanity, that we find the extremes of malaria and disease, caused by the condition of the atmosphere. On the other hand, Australia presents a territory nearly two and a-half times the superficies of China, revelling in the pure oxygenised heavens of the south—a land that may be considered the grand sanitarium of this vitiated earth. Having breathed the airs of these two regions for many years, and studied practically their physical geography during a long residence and many thousand miles of travel, I flatter myself that I am no mean authority on their climatology.

"A greater contrast does not exist on the globe than in the physical condition of mankind, as affected by climate, than between China and Australia; and the existence of the human race in vitiating the atmosphere, proportionately to their numbers. In the eighteen provinces of China proper, the estimated area of land and fresh water is 1,297,999 square miles, or about one-third of Europe, with a population of 414,686,994—according to the latest authorized computation in 1842. So that if Europe was as densely populated as China it would contain 1,200 millions, or the whole human race; while at present, by the last census drawn up in 1851, its inhabitants do not count, in round numbers, more than 260 millions. It will be readily conceived that this enormous population, crowded within a limited territory compared with this and other civilized countries, even if it possessed a milder climate and its cities and towns enjoyed the sanitary improvements of modern times, yet would it be a pestilential overcrowding of the land. But this is abundantly manifest when we consider the following local features in its geographical conformation, atmospheric phenomena, climate, and hygiene:—

"1st.—On reference to any ordinary map of China it will be seen that although the country is open to the east and south along the sea-board of 3,350 miles, yet on its western and northern boundaries it is hemmed in by the mountain chains of Tartary and Thibet.

"2nd.—This geographical conformation prevents the currents of air from Western Asia sweeping along its vast intermediate plains, and confines the atmosphere within a defined locality, however great in extent; while the monsoon winds, which blow alternately from the south-west and north-east during the year, six months at a time, are seldom relieved by the great westerly current of air in the temperate zone, and rarely or ever by a direct east wind from the North Pacific Ocean.

"3rd.—The effect of this atmospheric phenomena is to localise, as it were, the winds that sweep across that region, where it becomes highly charged with malaria arising from the land lying under a scorching sun, with a humid atmosphere of saturated intensity; rendering its climate during the summer season insupportable to the European constitution.

"4th.—But that which, of all other causes, in my opinion, assists in vitiating the air in that region, and, to a large extent, exhausting its vital oxygenous element, is the multitudinous people who now inhabit it; their ejectamenta, and the remains of a thousand generations buried in the land. From my own knowledge of several provinces, and constant inquiry made by me of the intelligent natives and foreign travellers from those I had not visited, I do not exaggerate when I state that not less than 3 per cent. of the cultivated lands are covered with tombs, besides the cemeteries everywhere built in the mountains. So that in all probability it would be found by further inquiry on this point that one-twentieth, at least, of this immense territory is the receptacle of the dead; where the human remains are interred in strong coffins and metal sarcophagi, built into brick tombs almost hermetically sealed. Within these vaults are buried, perhaps, not less than a hundred thousand millions of human beings, who, in their time, exhausted the oxydizing principle of the air, and now absorb in a solid form the carbonates and phosphates necessary for the health of the living generation. Moreover, in their time, during the lapse of a hundred centuries, they have denuded the land of its trees and shrubs that formed the primeval forests, and gave it the ancient name of Chung Hwâ Kwŏ, signifying the 'Great Flowery Kingdom;' the effect of which has been to lessen the generation of oxygen from the foliage—which is rarely to be seen on the bare mountains' sides, or in the cultivated valleys and plains. Instead of these life-giving plants covering the land with their sweetness, the cultivated fields everywhere exhale the most pestiferous odours, poisoning the air with the mode of culture, and yielding but an infinitesimal production of oxygen gas from their leaves.

"The Chinese Kingdom is facetiously denominated the *Celestial Empire*; which, if applied in derision, will create a smile upon the lips, and tingling sensation of the nostrils among those who know the country; but if seriously spoken is the greatest fiction of the land, that is, if the term signify all that is pure and heavenly. Man in that country proves himself to be the dirtiest of animals; and his habits, pursuits, social condition, and even his religion, in the terse language of our great dramatist, are of 'the earth,—earthy.' The cities, suburbs, and cultivated lands, are strewed and saturated with the rejectamenta of the living, and the remains of the dead. This vast empire is a great dunghill and graveyard, befouling and poisoning the sultry air."

Naval and Military.

The Tamar screw troopship, Capt. Stirling, is under orders to proceed on troop service to Kingstown and convey thence the 86th Regiment to Gibraltar. From Gibraltar she will take the 2nd Battalion of the 8th Regiment to China, and from China she will transport the 67th Regiment to the Cape of Good Hope. From the Cape she will return to China with the 2nd Battalion of the 11th Regiment, to relieve the 99th Regiment, which the Tamar will convey to the Cape on her way to England.

The Vulcan was at St. Vincent, Cape de Verds, on the 20th Sept. She was from China with invalids. The Spanish men-of-war Berenquella and Blanca were at Rio on the 8th, on their way to the Pacific, and the Russian man-of-war Alma was there also, on her way to the Amoor.

The *Army and Navy Gazette* states that "all difficulties, financial and otherwise, between the Imperial and the Indian Governments respecting the arrangement for the transport of troops *via* Egypt, have been finally settled. Five new transports of nearly 4,000 tons each will be built for the service, and it is understood that three of them will be employed on the Suez, and two on the Alexandria side. The former will of course be available for the transport of troops between England and Ireland, the Mediterranean, and American colonies, when they are not employed for the Indian service; and we may presume that the latter will, in like manner, be available for the reliefs between Ceylon, China, and Australia. We may thus congratulate the service on what we hope will turn out to be a fleet of *Himalayas*. As a necessary consequence, the formation of a transport board, under the Admiralty, may be expected before long."

We regret to announce a fatal accident on board Her Majesty's ship Phaeton. On the 19th of August, on the passage from Fortress Monroe to Jamaica, Lieut. C. Paget, third son of Lord W. Paget, was officer of the first watch, when the maintopsail-tye was carried away in making sail, and he was struck on the head by the flyblock. The blow fractured his skull and he fell insensible and died in ten minutes. He was buried next day with the usual honours, deeply deplored.

The London & China Telegraph.

LONDON, SATURDAY, OCT. 8, 1864.

ASKING FOR THE ROD.

Scarcely could our readers have had time to peruse the interesting intelligence from Japan contained in the last issue of the *London and China Telegraph*, than its purport was confirmed by a telegram from Paris, acquainting us that the French mail steamer, arrived at Suez, had brought news of "two English vessels being fired into by a battery belonging to Prince Choshiu." It appears that we must wait for the next English mail steamer from the Far East for the details of what has occurred. The bare fact was brought to Hong Kong by the *Dumbarton* steamer, from Shanghai; and there also it had in like manner arrived by a merchant steamer from Japan. The *Dumbarton* met the *Cadiz*, the mail steamer from Japan, going up the Shanghai River as she was coming down; so that a telegraphic summary of whatever has happened may be looked for from Alexandria almost every hour. The mere brief report in the Hong Kong journals is to the effect that the *Barossa* alone had been fired into in the Inland Sea by Choshiu's (or Tsiosiu's) batteries. We incline to the belief that the statement of the Paris telegram that *two* vessels had been so attacked is the correct one; because, as reported in our last number, two of Her Majesty's ships, the *Barossa* and the *Cormorant*, had left for the quarter named, with the purpose of communicating to the Prince of Nangato, which is the title borne by the turbulent Daimio referred to, certain despatches from the representatives of the European Powers. That he would fire upon vessels coming to his port for the express purpose of warning him that he had already merited chastisement by hurling his shot against the vessels of first one and then the other of nearly all the nations authorised by treaty to navigate the Inland Sea, is no more than was expected from his antecedents, and, there is reason also to believe, no more than was hoped for by his suzerain, the Tycoon. We trust, therefore, we shall be spared on this occasion any outburst of horror and lamentation about "another war with the Japanese." Let it at once be understood that if the Prince of Nangota has been fool enough to shut his eyes to the fact that the Tycoon has dug for him a pit of the very same fashion that was contrived for Satsuma, and so, after wilfully blindfolding himself, perversely walks into it, if he should dash himself to atoms in the fall, his blood must be on his own head. The Dutch, the Americans, the French, and the English have all in turn been made the marks for the guns that line this madman's batteries. He has been accused more than once of conspiring against the authority and even the life of his own native Sovereign. That monarch has no force competent to deal with this really independent feudatory, whose extensive territories are far away from the central seat of Government. As in the case of Satsuma, the Tycoon's heart will swell with delight to see his ambitious vassal brought on his knees by the military science and perfected weapons of the foreigners, at no outlay of money or life to the Court of Yedo. Choshiu, though conscious that the rod was uplifted—though aware, from the example of Kagosima, that the blow fell heavy when inflicted—has persisted in asking for its application. There need be no sympathy when he is beheld wincing and writhing at the chastisement he has probably by this time received.

CORONATION OF THE KING OF CAMBODIA.

By the coronation of the new King of Cambodia at Udong, on the 4th of June last, the French have not only inserted the "thin end of the wedge" into the Indo-Chinese territory, but they have successfully opened up political relations with the King of Siam and his old dependency of a nature that in times not far distant may lead to the ancient kingdom of Cambodia being subject to their sway. The proposition to raise the Viceroy Ong Phra Naradom, appointed by his Siamese Majesty, to the throne was a master-stroke of policy, which other European nations may take a lesson from, if they are in quest of an East Indies. Certes! it has been the coolest and most impudent piece of diplomacy performed in modern times. In the first instance, when the matter was broached by the French Consul at Bangkok, the relations between Siam and France were of a distant, if not of an unfriendly nature. So that the Governor of Saigon, in hastening the ratification of the treaty recently concluded, under circumstances bordering on intimidation, ignored the legitimate power of the Siamese suzerain over the Viceroy of Cambodia, which produced a remonstrance from H.S.M. Phra Paramendr to M. Drouyn de Lhuys, the Minister for Foreign Affairs. This remonstrance of the King of Siam was deemed so important by the French Government that a *Charge d'Affaires*, better skilled in the subtleties of French diplomacy than his predecessor, was sent to Bangkok as special envoy to the Viceroy of Cambodia. On his arrival at Siam, he addressed the King in the most conciliatory manner, and made profuse professions of amity and peace on behalf of his Imperial master, declaring that there was not the slightest attempt on his part to seek for territorial acquisitions in Cambodia, beyond the necessary land grants at Udong and other towns to erect suitable dwellings and offices for diplomatic agents. At the same time he informed the King that the Emperor of the French considered the tributary rights of Tu-Duk, King of the Annamese, had fallen to his lot by the conquest of a portion of Cochin China. Moreover, France had no desire to interfere with the accustomed tribute sent annually to Siam, provided that her influence in the affairs of Cambodia were recognised. Every step taken by M. Aubaret, backed by a show of cool determination to enforce them, if necessary, by strong measures, so worked upon the fears of Phra Paramendr, that he acquiesced in the new order of things with the best grace possible, and ultimately agreed that his Viceroy of Cambodia should be installed King.

The success of these negotiations, without having recourse to harsh measures, emboldened the French to take the leading part in the ceremony of crowning Ong Phra Naradom, whether it was pleasing or not to the King of Siam and his representatives. Accordingly, we learn from a simple but graphic narrative of the journey of Phya Montri Suriywongse, the King's envoy, drawn up by him on the occasion, that a delegate from Admiral de la Grandiere, the Governor of Saigon, assumed the chief post during the ceremony, and usurped the rights of the lawful Sovereign, as will be seen in the following extract from the *Straits Times*:—

On Tuesday, 6th moon, 11th of the waning (31st May), one of the French military officers invited me to go to the temporary abode for consultation. The Commandant sent six soldiers bearing guns, and one bugler, in all 7 men to stand in line at his gate, salute and conduct me to the Commandant. I asked the Commandant, "You sought and consulted with Phra Naradom, about the coronation, what was the result?" The Commandant replied, during the consultation they came to nothing definite; I replied, "I was empowered and ordered by His Majesty the King of Siam to crown Ong Phra Naradom, and at present I was the bearer of two important things, the gold plate with his title engraved, and the crown. These I must deliver to Ong Phra Naradom." The Commandant replied, "It cannot be, what has been brought must be delivered beforehand." That he could not consent to their delivery at the time of the general assembling. I replied, "Other things might be delivered beforehand, but the gold plate with the engraved title, and the crown, must be delivered at the time of the general assembling. The Commandant replied, "If so, then let the Siamese officers sit in one row, and the French officers in another row; let the Gold Plate, with the engraved title, and the crown be placed upon a table. When the time arrives let Ong Phra Naradom take them himself if he could not consent to my delivering them into his hands." I therefore replied, "If they were not delivered from my hands it would be contrary to usage." The Commandant replied, "You may deliver the Gold Plate, with the engraved title;" but the Crown, the Commandant begged to deliver to Ong Phra Naradom. I replied, "This Crown His Majesty the King of Siam had sent out, I must be deliverer of it." The Commandant replied, "His Imperial Majesty the Emperor of France, and His Majesty the King of Siam were intimate friends, and what belonged to His Imperial Majesty the Emperor of France was the same as what belonged to His Majesty the King of Siam." With reference to the discussion, I received the Commandant as the nobleman of a great country; he begged to receive the crown which had been graciously sent, and deliver it to Ong Phra Naradom. He was determined, and should I refuse, there

Digitized by Google

would be no conclusion of the matter, I therefore consented. Further, I informed the Commandant that ONG PHRA NARADOM wished him to come out, and be one of the parties to sprinkle him. The Commandant inquired, "Is the sprinkling a custom;" I replied, "It was? "The Commandant said if it was so, he would sprinkle him also. Friday, 6th moon 14th of the waning (3rd June), year of the Rat, 6th of the decade 14th of the reign of our Sovereign 8 A.M. the Commandant and three French officers came to my temporary abode. With twenty soldiers I and the Siamese noblemen, and the French noblemen, both parties dressed in full uniform went together, and performed the ceremony of Coronation upon ONG PHRA NARADOM, Brahmboriiaks Maha Uparat, Viceroy of the capital of Cambodia.

During the ceremony the French plenipotentiary is reported, by the *Courrier de Saigon*, to have delivered an address to the KING elect, of which the following is a translation :—

"France holds out her powerful hand to kings and peoples "who walk in the way of civilisation and who seek what is "right. If her intentions are for a moment misconceived, "soon her noble word removes the obstacles and dissipates the "error.' The presence of the Siamese Ambassador at this "Cambodian ceremony is a proof of this. This high personage "has travelled in Europe. He has seen France, and he com- "prehends that, while recognising the former relations between "Siam and Cambodia, we have the right to hold here the first "place, as much by the force of arms, as by the genius of our "civilisation. Such are the ideas of eminent men worthy of "governing. Sire! place this crown on your head without "fear; it will be secure there if you are loyal towards France. "Let the KING and Chiefs recollect these words; the Admiral, "the friend of this kingdom, charged me to speak them."

Well! we cannot help commenting on the *sang froid* and polite audacity of this Envoy Extraordinary. Not only did he usurp the ancient formula of the Kings of Siam, but he actually spoke as if the gold crown placed on the head of PHRA NARADOM had been manufactured in Paris, and paid for out of the Imperial treasury, whereas it was made at Bangkok from the King of SIAM'S gold. With what a patronising air he recognises the presence of the Siamese Ambassador; and pats the new King of CAMBODIA on the head and tells him to be a good boy while he wears the crown, and to be loyal towards France, if he wants to secure it. Be it remembered also, that this arrogant speech was delivered after he had made use of threats, implying a breach of peaceful negotiation, to withdraw from the ceremony, or prevent its consummation, unless his demands were agreed to. It was adding insult to injury. After this shall we be told that no intimidation was used on the occasion, as at the signing of the treaty? Bah! the flimsy expressions of impartiality without any desire to acquire territory or power in Cambodia, which the French despatches, echoed by the press, are continually harping upon, are imply subterfuges patent to all the world.

What next? is the question that arises to the mind of the inquiring reader. We think the celebrated American answer, "Why annexed, of course," is the correct one. We must confess that notwithstanding the apparent acquiescence of the native Princes to this assumption of power and patronage on the part of France, there is lurking behind a feeling of insult that will ere long burst out into open warfare, in which it is probable that the pacific King of SIAM may be involved. It is idle to argue the question of French ambition in these regions. In fact it would be better for themselves to declare at once their intention of annexing and protecting the whole Indo-China States, and form them into a French East Indies. It will come to this in the end, and we may see the day when the Kings of ANNAM, SIAM, and CAMBODIA will be subjects of the French EMPEROR. Many people who have been in these parts think that this would be better than the existing state of affairs, or what has been. We think otherwise, especially as regards Siam, which under the mild sway of its present ruler bids fair to reach a position of political and commercial importance in the Far East that will compare favourably with those of China and Japan; under these circumstances it would be a public calamity to the commerce of Eastern Asia if by some quarrel the French declared war against Siam. It is the duty, therefore, of all Governments friendly to that State, especially England, to shield her from any embroilment of the kind, that might lead to further complications on our Indian frontiers. We trust that the question is commanding the attention of Her MAJESTY'S Ministers, and that satisfactory steps will be taken by the SECRETARY for FOREIGN AFFAIRS to secure the favoured nation clauses in the French treaties with those countries. Sir ROBERT SCHOMBURGK is now in England, and, doubtless, will post up the Government on all matters essential for the maintenance of relations in their full strength and integrity with Siam and Cambodia.

THE GREAT SILK DIFFICULTY.

THE silk trade seems to be as hard up as the cotton trade for its raw material, and to be making as great efforts to obtain supplies. We referred some time since to certain expeditions made and projected with this view. It will be remembered perhaps that four Italians were imprisoned at Bucharest some time since; we have now the particulars of this affair. The travellers were Count LITTA, MEAZZA, an artist, Dr. GAVAZZI, and an interpreter named TESSIERES, and their avowed object was to study the country and to obtain silkworms' eggs for the Italian cultivators, who have suffered sadly from disease amongst the worms for two or three years. They had the imprudence to start without letters of recommendation for the Government of the country to which they were going, but, with £8,000 in their pockets, reached the capital of the Khanat with no more precautions than if they had been going to Turin, Paris, or London. They at once commenced purchasing silk, and their mode of proceeding, so unlike that of the natives, caused them, we are told, to fall under the suspicion of being English. They went about the place asking all kinds of questions and making sketches of whatever struck them as interesting, and the consequence was they were suddenly arrested, thrown into prison, and all their property confiscated. As soon as the news of their imprisonment reached Turin the Italian Government having never had any previous relations with the Emir of BUCHAREST, despatched a special envoy, M. BONHOMME, with a letter for the EMIR, to obtain their release. M. BONHOMME armed himself with letters to all kinds of people, and started by way of India and Afghanistan; in passing through Egypt he obtained a letter from the VICEROY, but on arriving at Calcutta the Indian informed him that any European attempting to enter Bucharia would do so at the risk of his life, in consequence of the hostility of that Government towards England. Warned by this information, M. BONHOMME went to Teheran with the intention of getting to Bucharia, through Persia, but there he was met with similar warnings being told in fact that his appearance would only cause the death of his compatriots and of himself on the instant. He therefore addressed a letter to the EMIR, which was forwarded by the authorities of Teheran, but the former did not even deign to reply to the missive.

Supported by the recommendations of his friends at Teheran, M. BONHOMME resolved to attempt to make his way through Russia, the only European nation having commercial and friendly relations with the EMIR. Arrived at Orenburg, the Governor-General of the province wrote four letters to his high mightiness of Bucharia before a reply was obtained to the effect that :—"The fate of the four *Englishmen*, as they pleased "to consider the Italians, did not deserve all the fuss made "about them, and their not being put to death already was "simply the result of consideration for Russia." Still baffled, yet determined, M. BONHOMME set out for St. Petersburg, with the view to consult with the Italian Minister there. In passing through Moscow the envoy encountered M. P. A. KLONDOFF, a Russian merchant, who went into Bucharest and succeeded in getting the interpreter out of prison on the plea that he was Russian by election, having lived in that country for many years, and speaking the language perfectly; at first the EMIR was suspicious, but being present and hearing M. KLONDOFF and the prisoner talk fluently in Russian, the latter was released. Unfortunately, the fate of the other prisoners still remains doubtful; there was a report a fortnight since that they had been set at liberty, but it has not been officially confirmed. It had been said that the three remaining prisoners had been executed, but the last advices from M. BONHOMME discredit this report, which is believed to have arisen from the fact that the unfortunate Italians had been removed to a prison from which it is said no prisoner ever yet issued alive. The last positive news received bore date the 28th May last, when the poor captives managed to inform their late companion M. TESSIERES that they were still living, and to beg him to communicate the fact to their families.

The demand for silks in Paris has increased considerably since the autumn set in. The raw material at the same time has become scarce in the south of France, and were it not for the large supply received from the East many mills would have been closed. There was scarcely any raw silk offered for sale at the last markets of Romans and Valence. The little that was exhibited sold for from 68f. to 72f. the kilogramme. The millowners in the departments of the Drome and the Ardeche are working chiefly with silk imported from Broussa-Bengal and China. Five hundred kilogrammes of cocoons from Cala-

Digitized by Google

mata were sold at Marseilles at 22f. the kilogramme, and four bales of spun silk from Syria at 85f. the kilogramme.

THE CUSTOMS RETURNS.

The following analysis of the Customs returns is from the *Friend of China*. It will be observed that the manner of doing so is quite in character with the paper, viz., "original":—

We have been favoured by the Inspector General of Customs, presently residing at Peking, with separate returns of the China Import and Export Trade during 1863, as carried on under foreign flags at the eleven Consular Ports of Canton, Swatow, Amoy, Foochow, Ningpo, Shanghai, Chinkiang, Kiukiang, Hankow, Chefoo and Tientsin—the only Consular ports not noticed being those of Newchwang, Tai-wan (Formosa), and that other port on the island of Hainan.

It is satisfactory to receive these returns connectedly—all, excepting Canton's, being printed, as the covers show, at the office of Mr. A. H. Carvalhoe, Shanghai.

In brief, these returns exhibit as follows:—

	IMPORTS. Value.		EXPORTS. Value.
Canton	$9,505,285	....	$16,083,062
Swatow	7,326,739	....	3,385,077
Amoy	8,430,991	....	1,092,574
Foochow	10,723,890	....	18,543,492
Ningpo	16,073,285	....	6,981,934
Shanghai	103,740,000	....	48,700,000
Chinkiang	5,800,000	....	800,000
Kiukiang	4,032,000	....	9,250,000
Hankow	12,565,000	....	16,130,000
Chefoo	775,000	....	45,800
Tientsin	8,376,000	....	1,156,000
	$187,348,190	....	$125,117,000
At 5 sh. per dollar	£46,837,047	....	£31,280,000

In framing this abstract of values we have had to assume arbitrary figures; because some of the tables are made in Mexican, some in Carolus Dollars, and some in Taels converted into sterling at different rates.

Returns made by.		Coinage.
Canton (not stated)	Mexican Dollars at 4 „ 9½ and 4 „ 9¾	
Swatow	H. D. Williams, *Acting Commissioner.*	Mexican at 4 „ 8
Amoy	Geo. Hughes, *Commissioner.*	Spanish at 4 „ 10½
Foochow	Baron de Meritens, *Commissioner.*	Mexican at 4 „ 10½ [to 4 „ 10¾
Ningpo	James Brown *Assistant in charge.*	Mexicans
Shanghai	Thos. Dick, *Commissioner.*	Taels at 6 „ 4½
Chinkiang	C. Kleczkouski, *Commissioner.*	Shanghai Taels
Kiukiang	I. K. Hammond, *Assistant in charge.*	Taels.
Hankow	A. McPherson, *Acting Commissioner.*	Taels.
Chefoo	C. Hannen, *Commissioner.*	do. at from 6 „ 3 [to 6 „ 6
Tientsin	J. Mackey, *Assistant in charge.*	Taels.

In converting taels into dollars we have employed the Shanghai mean for 1863, *viz.*, 79—and think that five shillings per dollar is a fair average between the 4 „ 8 of the South, and the higher figure in this quarter. In some succeeding articles we shall give a few illustrations of the grand commercial facts disclosed by these Custom-house returns; as a basis for comment and comparison being the following extract from an article in our issue of the 22nd of June, 1861, published at Canton.

While ready to accord a good deal of praise to those officers of H.I.M.'s Customs who drew up the China import and export tables of which we gave a partial analysis in our last number, we can but express the hope that, for the current and future years, the chief commissioner will arrange a form by which the returns of each port may be made alike; the labour of the working statist in ascertaining aggregates, as the present tables stand, being no light matter; to-wit, of the eleven returns cited in our last, three are prepared half-yearly, one quarterly, and the rest yearly.

It seems to us, again, that it would be exceedingly easy to give the import or export values under each tonnage heading; instead of, as now, in general total columns. In the several offices where these forms are prepared, such books are kept as a matter of course, though no use has been made of them in the returns before us, and the consequence is that, unless prepared to devote about a week to the preparation of such tables of values, the only mode by which we can arrive at an idea of the worth of each nation's trade with China is by a rule of three sums, such as we will exhibit presently. Each nation, we said. Not that, either. Only English, American, and French are honoured with separate columns in these import and export tables. All other nations on the face of the earth come under the small and very general designation of "sundry."

With regard to the table in our last issue of the respective values of import and export at the several ports, no account was taken by us of the statements of re-export, and yet they should hardly be overlooked if we would obtain a clear idea of what is really Chinese, and what is Japan trade; for, speaking generally, it is only from one Chinese port to another—or from China to Japan, that the re-exports go; excepting, by the way, that very remarkable case of Indian Cotton re-exported from Canton to England and America. We have heard, too, that it would pay to buy up Manchester goods in Shanghai, and re-export to the Straits, India, or even England! Perhaps this has been done, too, though we cannot learn the fact from any of the details under notice.

Before proceeding to a consideration of the re-exports, we will first endeavour to estimate the value of each nation's trade; by the same process of calculation eliminating the value of the quantity actually re-exported, and, consequently, forming no part of China's legitimate trade. The rule of three sum we speak of is this:—By the table in our last paper we showed that the total value of imports for 1863 was $187,348,190. Well, by the table to be found below, the total tonnage engaged in this import was $2,316,921; *ergo*, each ton imported was worth over, or say, for convenience of counting, $80. So that we have, in round numbers as follows:—

Great Britain	85 millions
America	53 „
France	½ „
All other countries	47 „

IMPORTS. 1863.	BRITISH. Tons.	AMERICAN Tons.	FRENCH. Tons.	SUNDRY. Tons.	STEAM CANTON. Tons.	NINGPO BOATS. Tons.
Canton	21,355	3,369	...	12,632	181,973	...
Swatow	78,775	13,091	...	38,770	...	...
Amoy	94,874	5,071	...	69,429	...	...
Foochow	94,493	31,294	...	13,361	...	...
Ningpo	107,796	28,724	5,386	80,047	...	7,920
Shanghai	485,014	257,917	...	141,824	..	...
Chinkiang	39,036	27,449	...	15,607	...	...
Kiukiang	42,988	164,362	50	819	...	...
Hankow	45,125	132,919	418	...	...	...
Chefoo	30,582	5,185	...	...	...	...
Tien-tsin	19,108	6,558	...	10,610	...	...
	1,058,946	678,929	5,854	383,090	181,973	7,920

Continuing our investigation of the Custom-house returns for 1863, we find as follows:—

From Canton the re-exports amounted to $404,581, or, say, one twenty-fourth of the whole import.

From Swatow there was no re-exportation.

From Amoy, $382,447, also about a twenty-fourth part of the whole import.

From Foochow $291,728, or, say, a thirty-eighth part of the import.

From Ningpo $219,674, or about a seventy-fifth part of the import.

From Shanghai the re-exports amounted to the immense value of forty-five millions of dollars, or 43 per cent. of the import.

From Chinkiang there was no re-export.

From Kiukiang $161,750, or about a twenty-fifth part of the import.

From Hankow $250,000, or, say, a fiftieth part of the import.

From Chefoo $104,500, or a seventieth of the whole import.

From Tientsin $434,000, or about a twentieth of the import.

Of the forty-five millions of re-exports from this port we may feel safe in concluding that the following imports formed a part:—

Chinkiang $5,800,000.

Kiukiang, less re-exports, $3,870,250.

Hankow do. $12,315,000.

Say, in all, $21,985,250; or not far from half of the 45. Of the net $670,900 at Chefoo, and net about eight millions at Tientsin also, a very large proportion will have gone hence. Not all, however. Sugar from the south of China and Straits produce figuring somewhat largely in the imports at the ports mentioned. Perhaps if we take six millions as the amount of re-export hence to Tientsin and Chefoo, and add it to the

Digitized by Google

imports at the riverine ports, we shall not be far out in assuming 28 out of the 45 millions of re-export hence as the correct figures—so leaving the balance of 17 millions for the trade with Japan.

Taking into consideration the fact that the imports at the riverine and ports north of Shanghai do not amount to the aggregate of re-exports from the other ports, in estimating the value of the China trade, only imports at the ports south of and including Shanghai should form a basis; and assuming this as a proper principle to act on, we have as follows:—

—	Imports.	Re-exports.	Net Import.
Canton	$9,505,385	$404,581	$9,104,704
Swatow	7,326,739	—	7,326,739
Amoy	8,430,991	382,447	8,048,544
Foochow	10,723,890	291,728	10,432,162
Ningpo	16,073,285	219,674	15,853,611
Shanghai	103,740,000	45,000,000	58,740,000
	155,800,190	46,298,430	109,505,760

Say, real value of imports in sterling (re-exports assumed to be distributed as above-mentioned), thirty-nine millions of pounds.

Before proceeding to a notice of the chief articles of import, we may dispose of the export, which, including riverine and northern ports, amounts in the aggregate, as shown in our issue of the 28th ult., to £31,280,000. On the same principle, however, of rejecting a part of the riverine and northern imports, so will we reject a portion of the export, the difference then being as follows:—

Chinkiang	$800,000
Kiukiang	9,250,000
Hankow	16,130,000
Chefoo	45,000
Tien-tsin	1,156,000
	$27,381,000
Proportion assumed as sent over sea without touching at Shanghai	3,381,000
Balance	$24,000,000

or in sterling six millions; which, taken from £31,280,000, leaves a total export from China of twenty-five and a quarter millions of pounds sterling, against an import of thirty-nine millions. If the imports were sold, we should hence have to assume that China paid us in 1863, in hard coin, no less a sum than twelve millions and three quarters of pounds sterling.

But we do not assume anything of the kind, and incline with Mr. Cobden to believe that goods have been thrust upon the China market without the slightest prospect of their going off for years, or if vended, vended at a loss almost parallel with the figures exhibited as the balance of trade—viz., 13 against 39, or 33 per cent.

It would take too much time were we to attempt a closer analysis of the import returns than to ascertain the details of more than two or three leading articles. Say Manchester goods and woollens, opium and cotton. These we find to be about as follows, the estimated value of opium stored at this port being based on the figures 500 taels for Malwa, 400 for Patna:—

—	Cotton Goods &c.	Opium.	Cotton.
Canton	$2,453,600	$2,280,549	$742,000
Swatow	690,360	2,681,000	—
Amoy	692,900	2,211,000	1,048,121
Foochow	914,500	4,963,900	125,861
Ningpo	730,000	2,050,000	—
Shanghai	8,432,000	22,500,000	—
	13,913,300	36,686,449	1,915,982

The extraordinary sum of twenty-two and a half millions of dollars worth of opium into Shanghai alone, is perfectly startling, and lest our readers should think we have made a mistake, we give the quantities as specially set forth in a particular table:—

Malwa, 29,987 piculs at 500 Taels per picul.
Patna, 6,864 „ at 400 „ „

The amount of duty actually paid on opium in Shanghai for 1863 was over $900,000. Of the opium so brought to Shanghai 10,415 chests of Malwa were re-exported and 191 chests of Patna, so leaving, as for use in this quarter, about 12 millions of dollars worth of Malwa and two and a half of Patna. We should mention, though we have not thought worth while to notice it specially, that among the imports there is an item of twenty thousand dollars as value of native opium.

In our last number we pictured the difference between the present position of Englishmen in China, and the position which they held at various periods of the current century. But it was a meagre relation; and to be more complete we should show the increase of our trade at the various stages—the improvement in religious and social intercourse—and the altered position of the ruling powers.

As regards trade, the increase has been truly wonderful. In the year 1814, the total value of both imports and exports on British account was five millions and three quarters sterling. Twelve years later and the value had increased to seven millions and a third; while, for the last five years of the East India Company's monopoly, the average value of company's and private imports and exports was only £150,000 short of ten millions.

And now what have we? Why, in thirty-two years, an increase of over three hundred per cent.—the total value of British imports and exports for the year 1856 (the year of the breaking out of the war) being twenty-one and a half millions; the value of the imports and exports of all nations in Canton alone last year being close, we take it, on seven millions, or the equal of the trade between Great Britain and all China in 1826—say a third of a century ago. Thus Canton, with all its drawbacks, is far from being in the desperate condition its antagonists would have it appear; and whatever may be the vaticinations of others regarding the injury to be inflicted by the diversion of trade to Hankow, we are not of the number who opine that the change will be great and speedy; but rather the contrary, and this for the reasons given in former articles, *viz.*, the presence here in the south of the great money establishments.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, OCTOBER 1.

It cannot be doubted that as soon as the Suez Canal is completed, which will be the case in a comparatively short time, a considerable direct trade between the ports in the Mediterranean and the Far East will necessarily spring up, and a new traffic be created. This was the leading idea of M. de Lesseps, and he anticipates great advantages for the port of Marseilles, which appears also to be fully alive to the chance of a great increase in the East India and China trade, to meet which in an adequate manner, docks and warehouses on a gigantic scale are now being constructed, and will be ready for public traffic when the new canal is opened. But there is another port in the Mediterranean—with enterprising merchants, excellent warehouse accommodation for goods, a safe and commodious harbour for shipping, and railway communication with the interior of Germany—that bids fair to become a formidable rival to Marseilles, and is equally bent on extending its commercial relations with China and Japan, when the barrier that has hitherto shut it out from the direct traffic—the Isthmus of Suez—shall fall, and open a direct and short route to the East.

I allude to Trieste. Seated at the very head of the Adriatic, with all the above-mentioned advantages and many more, among which may be reckoned well-built ships, manned by a hardy race of mariners, and commanded by captains second to no other nation for scientific education, and a full knowledge of their professional duties both theoretical and practical, she may well aspire to a great extension of her already very important trade; and it is even doubtful whether she may not eventually successfully compete with this city as far as regards the trade with the East—for the celerity of transport certainly, and, perhaps, when the railroad tariffs of Germany are somewhat reduced, also in cheapness.

From this point of view an agitation has already been commenced by some of the more enlightened and far-seeing merchants at Trieste; for the purpose of profiting eventually by their favoured geographical position, and making the needful preparations for this direct trade with the East. Hitherto that branch of commerce has been sadly neglected, and Austria has as yet taken no steps to secure protection for her merchants and their ships, by the conclusion of treaties of commerce with China, Japan, and Siam, and the right to appoint consuls in their ports as other maritime States of Europe have done. But now that the Danish war is over, the Austrian Government will be in a position to turn its attention again to the arts of peace and the extension of her foreign trade, now

Digitized by Google

that the subject is taken up and brought before her notice. I said above that the trade of Trieste with the East has been sadly neglected, but it is not altogether a nullity. During the last ten years, as I gather from official documents before me, the number of vessels that arrived at that port from the East was 40, of 15,380 tons, and with cargoes of the value of 7,948,955 florins. Of these, 12 came from Bombay, 2 from Calcutta, 7 from Ceylon, 10 from Singapore, 3 from Batavia, 1 from Manila, and 5 from Sumatra. The goods they brought to Trieste were 709,054 centners of cotton, 159,261 of pepper, 94,283 of coffee, 61,346 of sugar, 54,702 of hides, 29,500 of sapanwood, 11,820 of cassia lignea, 10,920 of cloves, 3,677 of indigo, and 1,295 of tea; making a total of 1,135,858 centners, or an annual average of 113,585 centners, equal to 6,274 English tons.

The Board of Trade in this city give official notice that the Hamburg Consulates at Akyab and Singapore are now vacant. Gentlemen wishing to accept the office are requested to send in their offers, accompanied by testimonials, to the above board on or before the 12th of March, 1865, when they will be placed on the list of candidates, from which the Senate will make their selection. The Hamburg Consuls receive no direct salary, but there are many fees and other emoluments, which make them generally much sought after by the most respectable and wealthy merchants in all countries of the globe; and perhaps there is no other State that can boast of such a numerous and efficient staff of consuls.

The captain of the Hamburg barque *Kali Maas*, in a letter to his owners in this city, reports having seen a new coral reef not laid down in any existing charts. As this reef lies in the direct track of many hundred valuable ships and cargoes, a knowledge of the danger cannot be too widely circulated. He writes:—"Whilst proceeding on my voyage from Sourabaya to Falmouth, on the 24th of April, at 8 o'clock A.M., whilst the crew were employed aloft in reefing, the vessel sailing with a smart breeze, we came quite close to a white reef or bank of coral about 30 ft. long, though in some parts of a darker colour, and as the sea was then running, about 5 or 6 ft. below the surface, but in calm weather, perhaps rather deeper. The ship was running eight knots at the time. I ascertained the reef to be situated in 25° 9′ south lat., and 58° 28′ east lon., from Greenwich, by a chronometer that not only went correctly on our departure from Sourabaya, but was found to do so on our arrival at St. Helena."

THE CAPTURE OF NANKING.

FOREIGN-OFFICE, SEPT. 30.

The despatch dated July 29, 1864, of which the following is an extract, has been received by Earl Russell, Her Majesty's Secretary of State for Foreign Affairs, from Mr. Adkins, Acting British Consul at Chinkiang:—

"I have the honour to inform you that the city of Nanking, so long the centre of disaffection in China, and the point from which so many bands of ruthless plunderers have started on their raids upon the peaceful and wealthy cities of Central China, has been captured by the Imperialist army, under the command of Tseng-kwo-chuen, the Governor of Che-kiang and brother of the Viceroy of the provinces of Kiang Nan and Kiang Su.

"The city was stormed on the 19th of this month through a breach, caused by a mine sprung under the wall, near the east gate. Rumours of its capture reached me on the day following the assault, but I paid no attention to them, having been so often deceived by reports of Chinese victories. On the 24th of this month, however, I obtained a copy of the memorial to the Throne formally announcing the capture.

"On the following day I started for Nanking in Her Majesty's ship *Slaney*, intending to congratulate the Chinese Commander-in-Chief on the auspicious termination of his two years' siege. I found his Excellency at his camp outside the south gate of the city.

"When the Imperialists made good their entrance into the city they found that the palace of the Tien Wang, the leader of the rebellion, and the claimant for many years past of Divine honours and attributes, had been burnt to the ground. It is said that the impostor and his immediate attendants lie buried in its ruins. I am inclined to credit this rumour, for the city has been closely blockaded since January last, and I think that nothing but a desperate sortie would have enabled him to get clear.

"But the most important fact of all is the capture of Chung Wang. This person has for many years been the most restless and determined of all the desperadoes Taiping-dom has sent forth. He it was who threatened Shanghai in 1860; he was Admiral Hope's antagonist in his operations near Shanghai; he fought against Colonel Gordon at Soochow. He tried to introduce the foreign element into his levies, and was said by rebel sympathisers to be the main hope of the Taiping cause in its declining days. After the assault he managed to leave the city with a few followers, but he was captured three days subsequently by a party of cavalry. I was much pressed to visit the Chung Wang in his confinement, but declined, as I had no personal acquaintance with him.

"On the day following my interview with the Commander-in-Chief I rode into the city and visited the breach. Words cannot describe the utter desolation of everything within the walls. The main thoroughfares traversed by me were the streets between the south-west and east gates, and those between the south-west and south gates. On either hand the houses left standing had the appearance of having been tenantless for years, while the gaudy gateways, denoting the residences of the Wangs or Princes, opened in most instances on to courts full of brickbats and charred timbers. As for the side streets, they were many of them overgrown with jungle four feet high.

"During my ride through the city I saw a great number of unburied bodies, and in many places the smell was so offensive that both myself and Lieutenant Lee, who accompanied me, were almost overpowered. But, on the whole, I came to the conclusion that the rebel force in the city at the time of its capture could not have been very large. The Imperialists, according to their own account, spared very few able-bodied males, so that the dead lying in the streets would be a fair criterion of the strength of the garrison. I estimate it at 10,000 men, against 50,000 under the Imperialist commanders.

"I think a ride through the streets of Nanking as they are at present would satisfy the most ardent advocate of the rebel cause of the dreadful hollowness of the system they support. Some eleven years ago the Taipings took Nanking, then one of the finest cities in China. Ever since its capture it has been their head-quarters. In it the chiefs of the movement built their tawdry houses, and from it they despatched their plundering bands in all directions. Meanwhile, the works of civil government and social organisation are entirely neglected, and when the city is retaken it is found to be a wilderness of empty houses."

THE CONFUCIUS SKULL SCANDAL.

The following appeared in *The Times*:—

SIR,—My attention has been drawn to a notice by your Shanghai correspondent of the absurd story that a skull which was disposed of at a recent sale of Chinese curiosities was none other than that of the revered moralist Confucius. Your correspondent very properly points out the preposterous nature of such an assertion; and I believe I am in a position to explain the actual history of this relic.

In the early part of the late Emperor Tao-Kwang's reign a rebellion of a serious character broke out in the Turkman regions, which were added to the Chinese colonial dominions by his illustrious grandfather, Kien-lung, but this rising was suppressed after an obstinate struggle. The leader, Jehanghir, known to the Chinese as Chang-ko-urh, was captured and carried a prisoner to Peking, where he was adjudged to death as an arch rebel, and condemned to suffer the extreme penalty of "slow mangling," the most terrible form of execution it is possible to conceive. He was executed, I believe, in 1829, and I was informed some years ago by a Chinese of position who was near the Court at the time that his skull had been presented to the Emperor and preserved in the Palace. This, doubtless, may have occurred in the case of other noted victims; but there is at least a strong probability that the skull in question was that of Jehanghir. If any lesion can be traced upon the forehead I should say the proof of identity would be complete.—I have, &c.,

Barnes, Sept. 30. W. M.

THE OVERLAND TELEGRAPH LINE TO RUSSIA.

The Western Union Telegraph Company, who, in conjunction with the Russian Government, have this great enterprise in hand, are actively engaged in fitting out an expedition under the immediate supervision of Captain C. S. Bulkley, United States army, for Oregon, the coast of Russian America and the country beyond Behring's Straits, to survey the route of the telegraph line and make other needful arrangements to put the whole extent of the line under contract the ensuing year.

FREIGHTS AND CHARTERS.

Outward freights still continue low, as but little goods are offering, in coal freights we have likewise no improvement to report. Homeward charters are difficult to procure, as business in this direction also is very quiet, but small vessels can be fixed from Ceylon and Singapore.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £38 and £1. 17s. 6d. For Shanghai: £48 to £50, and £2. 5s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £1. 5s. For Penang: £27. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have invited tenders for the conveyance of about 600 tons naval stores, including 104 tons porter and a few combustibles, from the River Thames to Hong Kong.

CASUALTIES.

The Kiandra, van Kuffeler, from Batavia for Amsterdam, which put into St. Helena leaky July 18, has been condemned there. The damaged portion of the cargo was sold, and a part of the undamaged was to be shipped by the Alexandrine, Capt. Dalrymple.

The Arab (ship), from Liverpool for Singapore, which put into Rio Janeiro July 22 leaky, and discharged her cargo, has been condemned and sold.

The Edinburgh Castle (ship), Inglis, of and from Glasgow for Singapore and Penang, which put back to Greenock Sept. 22 leaky, after being ashore, has gone into dock to discharge.

The "Glenlee," Dunn, arrived at Liverpool from Hong Kong, reports having experienced heavy N.W. gales off the Cape of Good Hope, from July 23, to August 6. On May 29 (ten days after leaving Hong Kong), Cape Varella, bearing S.W., by W., she passed a piratical "fast boat," with stinkpots strung to the mastheads.

At St. Helena.—Aug. 29, H.M.S. Ringdove, from China, and sailed, Sept. 1, for England; 30, Cyclone, Hossack, from Shanghai, and sailed for Liverpool; 31, Helvellyn, Dalison, from Shanghai, and sailed for Liverpool; Sept. 1, Gleam, Cameron, from Shanghai, and sailed, 2, for New York; Mayflower, Kerr, from Shanghai, sailed 2, for Liverpool.

At Table Bay.—Aug. 23, Dünelm, Robertson, from Sunderland for Singapore, crew refusing duty since July 12.

At St. Vincent, C.V., Aug. 21.—Foong Suey (s), Gray, sailed for China; 22, May Queen, Mundt, sailed for Batavia; 28, Anna Sophia, Hoekstra, from Batavia for Amsterdam.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, of all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot is 12, RUE RICHER, PARIS.

London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S OINTMENT.—AGONISING PAINS.—It is gratifying to hear sufferers recount the ease they derived when first they applied this Ointment to their ulcers, sores, or abscesses, with which they had been afflicted for years. Soon after its application to a bad leg or inflammatory ulcer, it restrains the excitement of blood vessels and nerves, and at once brings coolness and comfort, and furthers the gradual deposits of healthy materials to fill up the ravages caused by violence, debility, or disease. It expels all noxious matters, and heals all sores soundly. It gives ease to varicose veins, bad legs, and swellings of the feet and joints, when the agony is almost unremitting, and the pain too much for a giant's strength.—Sold at Professor Holloway's Establishment, 244, Strand, and by all medicine vendors throughout the civilised world.

31, Great St. Helen's, E.C.

FOR SHANGHAI (with immediate despatch), the well-known clipper ship GARRAWALT, A 1 fourteen years, 627 tons register, WILLIAM SHEPHERD, Commander; lying in the East India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to Phillipps, Shaw, and Lowther, 2, Royal Exchange-buildings, E.C.

HONG KONG and WHAMPOA, to sail 10th October, the splendid Dundee built clipper ship BENGAL, A 1 nine years; 784 tons register; H. P. BRUMELL, Commander; loading in East India the Docks.

For Freight or Passage apply to Gellatly, Hankey, and Sewell, 27, Leadenhall-street, E.C.

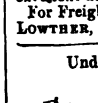
HONG KONG and WHAMPOA.—Now loading and will have quick despatch, the splendid new clipper BELTED WILL, A 1 fourteen years, 812 tons register, G. GRAHAM (late of the Banian), Commander; lying in the London Docks. This ship for speed and strength is unsurpassed by any afloat, and has on her first voyage with new teas (just completed) successfully competed with the most famous ships in the China trade.

Holmes, Knevitt, and Holmes, 3, Suu-court, Cornhill.

FOR HONG KONG and WHAMPOA, with immediate despatch, the well-known clipper FIERY CROSS, A 1 thirteen years, 659 tons register, RICHARD ROBINSON, Commander; lying in the West India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to Phillipps, Shaw, and Lowther, No. 2, Royal Exchange-buildings, E.C.

Under Engagement to H.M.'s Government.
Last Shipping Day 10th October.



FOR COLOMBO Direct, the regular trading clipper barque REGIA, A 1 ten years, newly coppered, 417 tons per register, ROBERT DAVIS, Commander: now loading in the West India Docks. This beautiful vessel is well known for speed and has excellent accommodation for cabin passengers.

For Freight or Passage apply to Suart and Simpson, 9, Clement's-lane, Lombard-street, London, E.C.

Mate's Receipts will be required before signing Bills of Lading for water-borne Goods.

To follow the "Regia."

FOR COLOMBO Direct, the fine new barque COLOMBO, A 1 nine years, 382 tons per register, WILLIAM LAWRENCE, Commander; now loading in the West India Docks. This ship, built for the trade, has only made one voyage, and delivered her cargo, from Ceylon, in fine order.

For Freight or Passage apply to Suart and Simpson, 9, Clement's-lane, Lombard-street, London, E.C.

Mate's Receipts will be required before signing Bills of Lading for water-borne Goods.

List of Passengers.

PASSENGERS INWARD.

Per P. and O. Company's steam ship Poonah, arrived at Marseilles Oct. 15.—From Hong Kong: General Valdes and lady, and European man servant, Mr. Elzinger, Mr. E. Elzinger, Mr. Strubing, Mrs. Schneider, Mr. Van Hoften.

Per P. and O. Company's steam ship Delhi, expected to arrive at Southampton 21st inst.—From Hong Kong.—For Gibraltar: Signor Hidalgo. For Southampton: Messrs. Robson, Deans, Owens, D. Milligan, D. Macpherson, S. Phillips, E. Stebbing, D. Hutton, E. Hughes, J. Anderson, J. Harrison, J. Gould, A. Coleman, W. Cockburn, W. Stone, W. Stafford, C. Edwards, M. Breen, J. Harris, P. Peterson, W. Ward, O. Smith, eight firemen; Mr. W. Hamilton stayed at Suez. From Shanghai: Mrs. Thomson, Mr Harvey. From Penang: Lieut. Broughton.

PASSENGERS OUTWARD.

Per French steamer Peluse, Oct. 19, from Marseilles.—For Hong Kong: Mr. E. B Petersin, Mr. M. G. Buchanan, Mr. T. R. Shillito, Mr. J. B. Endicott. For Shanghai: Mr. Geo. Sturgis, Mr. Scholfield. For Singapore: Mr. Crawford, Mr. J. C. J. Moller.

Per P. and O. steamer Ceylon, Oct. 20, from Southampton.—To Hong Kong: Mr. J. E. Stokes, R.N. From Marseilles, Oct. 28.—To Hong Kong: Mr. J. Tait. To Singapore: Messrs. W. and C. Degener, Mr. Vander Zweep.

Per P. and O. steamer Massilia, Oct. 27, from Southampton.—To Singapore via Bombay: Mr. Dunlop, Mr. Fenwick, Mr. M. Fenwick. To Shanghai via Bombay: Mr. Clark, Mr. H. and Mrs. Wilkinson, Mr. C. F. Jackson. To Hong Kong via Bombay: Mr. J. G. Glover. From Marseilles, Nov. 4.—To Singapore via Bombay: Mr. and Mrs. Weiderhold.

Per P. and O. steamer, Nov. 4, from Southampton.—To Hong Kong: Mrs. Swinhoe. To Shanghai: Miss Thompson. From Marseilles, Nov. 12.—To Shanghai: Messrs. W. Watson and W. Kking.

Per P. and O. steamer, Nov. 20, from Southampton.—To Hong Kong: Miss B. E. Collett, Miss Lee. To Singapore: Mrs. W. W. Willans and infant. From Marseilles Nov. 28.—To Hong Kong: Mr. T. F. Ballance, Mr. B. Macintosh, Mr. P. G. Lawrie To Shanghai: Mr. Hyslop. From Suez.—To Hong Kong: Mr. Caw.

Per P. and O. steamer, from Marseilles, Dec. 12.—To Singapore: Mr. and Mrs. H. W. Wood and lady friend.

Per P. and O. steamer, from Marseilles, Jan. 12, 1865.—To Hong Hong: Mr. M'Donald.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Intelligence from this port is to the 14th August. The London mail of the 10th June arrived out on the 3rd of that month.

Her Majesty's ships *Barossa* and *Cormorant* returned on the 10th August from the cruise on which they started on the 21st July. All the information to be obtained as to what befel them is as follows:—

"They arrived on the evening of the 27th July at Hima Sima, about thirty miles from Hangi, the residence of Nangato. The two Japanese who accompanied the expedition having donned the disguise of doctors, were landed, with a journey of thirty miles before them, and in great dread of Ronins on their road, and the reception that might await them on arrival. On the 1st August, steam was got up, and the *Cormorant* steamed down towards the entrance of the Inland Sea. As she approached, she easily discerned that a considerable number of new forts had been erected, on both sides of the channel. The *Barossa* anchored mid-channel of Hima Sima and the narrow entrance of the Inland Sea, and took soundings. On this occasion, so far as we can ascertain, nothing particular occurred, but on the 7th the *Cormorant* again went down to the entrance to the Inland Sea, and it was discovered that in the week's interval the forts had been further strengthened, having more guns than on her former visit. The Japanese fired shot and shell across the Straits on the approach of the *Cormorant*.

"On the same day, the 7th, the two Japanese envoys returned with the answer of the Prince Nangato,—the tenor of which we have not heard officially, but it is rumoured to be unfavourable. The two Japanese returned to the island, saying as they left that the Prince of Nangato would probably open the Straits in a little time.

"The people with whom intercourse was had are said to have been unusually uncivil—saying that they wished our ships would go away, they did not want us at all. They report that Nangato has some 16,000 *ronins* in his employ, independent of his regular army of 26,000."

The *Japan Herald* says, regarding the two subjects of Nangato referred to above:—"We had forgotten to mention previously that the two Japanese who accompanied the *Barossa* and the *Cormorant* were sent by Nangato with three others to England some year or more past. The other three now remain in London, studying civil engineering and mechanics. It is said that from what they saw in England they were so impressed with the futility of any endeavour on the part of their Prince to compete with our power, even so removed from home, that they determined, in the hopes of averting trouble from him, to acquaint him personally with the details of their experience, and they cast lots which two should return to Japan and advise with him. The arrival here of the two upon whom this duty thus chanced, fortunately was so opportune as to enable them to be made the channel of communication between the British authorities and their Prince."

A very untoward incident, trifling in itself, but capable at such a juncture of greatly adding to the difficulties of negotiation had occurred at Yedo. The American Minister had gone up there in the *Jamestown*, and it appears that some of the marines of that vessel, whilst marching through the city, met the norimon occupied by Matzdrira Oki-no-Nami, escorted by his retinue, and in consequence of the manœuvring, wheeling, clanging of arms, shouting of orders, and tramp of men, they were panic-stricken, and fled, leaving his Highness alone in the middle of the street in unbounded rage. Our Yokohama contemporary considers this one of the most unfortunate things that could have happened in the present condition of affairs,

Digitized by Google

and remarks "that the diplomacy and military operations of other nations in Japan will prove but the waste of so much ink and paper, blood, and treasure, if all the furious passions and enmities of its great Princes are to be thus aroused by the ostentatious building of palaces in Yedo for the representatives—and the display of the glitter of the bayonets and tramp of the men—of a nation which, for any indications he can at present observe, is not prepared to aid to any considerable extent the maintenance of the probably coming struggle, and which, by these very things, may be precipitated and prolonged."

On the 28th July the *Ta-kiang* brought a further accession to the British force, consisting of 167 rank and file of the 67th Regiment, sixty Royal Artillery, and six Royal Engineers. On the 1st August, the 20th Regiment kept the 105th anniversary of "Minden," trooping their colours in the morning, and being reviewed in the afternoon by Major-General Brown, in the presence of Sir Rutherford Alcock. The vastly improved condition of the 20th was very remarkable. On the 2nd there was a grand review of the Naval Brigade. They landed in beautiful order, and in less than fifteen minutes' time from leaving their ships they had landed and formed line on the Bund. The Brigade consisted of two battalions, 800 strong, and a battery; one battalion under command of Captain Alexander and Captain Boxer, the other commanded by Captains Moresby and Nott; the battery under command of Captain Hunter. On landing the battalion formed line, flanked by the batteries; fired a number of rounds, formed squares; prepared to resist cavalry; dismounted the batteries, taking the wheels and other gear of the guns inside the squares; fired a number of vollies of musketry; remounted the guns; formed column of companies, and marched off the ground through the settlement and then re-embarked.

The men-of-war in harbour were the following:—British: Euryalus, Tartar, Argus, Kestrel, Bouncer, Coromandel, Havock, Scylla (left for Nagasaki on the 13th August), Pelorus, Conqueror, Coquette, Racehorse, Leopard, Hesper, Barossa, Cormorant. French: Semiramis, Dupleix, Tancrede. Dutch: Medusa, Djambi, Metulen Kruis, Amsterdam. United States: Jamestown.

The *Commercial News* of the 10th August had the following important "Communicated," which, we trust, may prove authentic:—

"News is reported from Osaca to the effect that merchants there are preparing for the expected influx of foreigners; that several Daimios have given their countenance to the scheme, and that they will allow no more shipments to Yedo to be conveyed to Yokohama, being of opinion that the Tycoon has had trade with, and governed foreigners long enough to his benefit and to the detriment of the Daimios; that owing to the restrictions and vexatious exactions, &c., in bringing them to Yokohama, tea and silk have been lowered in price in the interior, so that you can buy them for one-third of what merchants are forced to charge to make any profit. It is also said that the Mikado has been petitioned by the wealthy merchants of Osaca to be allowed to trade with foreign countries, and that a favourable reply is anticipated. The duplicity and treacherous course of the Tycoon's Government has been understood, and, as predicted several years back, true friends will yet be found amongst the Daimios who, owning producing districts, will be forced to remain and become our best friends. It is a source of congratulation to all merchants and friends of foreign intercourse with Japan to see the feeling of hatred gradually giving way, and that the greatest and wealthiest port in Japan, Osaca, will shortly be ours, without the tender care and guidance of the Tycoon's officers, with their well-known hatred to foreigners."

The *Japan Herald*, too, expresses an opinion that of the two parties now dividing Japan, the one favourable to foreigners is the most numerous, and it gives the following weighty reasons for that opinion:—"The Japanese are wholly dependent upon rice for their living. The wealth of the Government and of the Daimios depends upon the crops they gather in during the season. For some time past the Government has levied heavy taxes upon the Daimios in order to fortify their country. At the same time the Daimios have been storing up their rice in case of hostilities breaking out. The natural consequence of these deductions is, that their income has been gradually decreasing, and at the present time they complain very bitterly against the Government. They say 'we have given you all you require of us, but we see no improvements. Japan is not fortified, and you tell us you are not ready for war." This scarcity of rice affects the working-classes also no less than the Daimios. In many places the former are almost starved. The lower officials also, after expending a large portion of their small income in clothing (for they are obliged always to appear in silk), find that they have barely sufficient left to provide themselves with daily food. There are some who attribute these difficulties solely to the Government. Others trace back the primary cause to the arrival of foreigners in Japan, saying that if foreigners had not come, there would have been no fear of a war, and consequently no reason for the Daimios to store up their rice. The former again argue that the policy pursued by the Japanese Government towards foreigners has been such as to justify a war, and, therefore, maintain that the Government is responsible for all the present difficulties. Again, the merchants and some few of the Daimios have gained so much money by their intercourse with European nations, that they are very desirous foreigners should remain in the country; and one or two of the latter have requested the permission of Government to open their ports to foreigners. They have in every case received the permission, but with a conditional clause, viz., that a Government Custom-house shall be established at such a port, and that all trade shall be carried on through the Government officials.

A meeting has been held on the subject of the obtaining a grant of land for a race-course, and other recreative purposes, and resolutions setting forth the necessity of such provision, the readiness of the community to pay for it, and for addresses to the Consuls and the appointment of a committee to work details, were passed with great unanimity. Before separating, Mr. Markham, of Shanghai, addressed a few words complimentary of the community for their movement in the matter, and on behalf of the Shanghai community promised a cup, value 100 guineas, to be run for at the first meeting upon the new course, if obtained, which evidence of the kindly feeling of our Shanghai friends was, of course, received with loud applause.

CHINA.

SHANGHAI.

The English mail of July 10 had not arrived out. The dates are now down to August 21. The *North China Herald* of the 20th has the following:—

During the past week the weather has been generally fine, while a considerable diminution in the temperature has been noticeable. Few incidents worthy of notice have occurred in Shanghai since the date of our last Summary, and news from the outports is also scanty. The following Consular cases have been decided. In the case of Shi-Yoktien tried at the U. S. Consular Court, *versus* T. L. Macready, judgment was given for the defendant, with costs. At H.B.M. Consulate, in the case of Messrs. Milner and Sons *versus* Messrs. Dalkas, Pearson and Co., claim for tls. 1,843.74 for balance of proceeds of goods consigned to defendants—judgment was given for the plaintiffs by default. In the case of A. R. Tilby and Co., for master and owners of the *Little Edith*, *versus* Messrs. Smith, Kennedy, and Co., at the same Consulate,—claim for taels 2,573.49 for balance of freight on 650 tons coals shipped per said vessel from England to Shanghai, and interest at 1 per cent. per month from July 6th to date of payment—the following was the judgment:—

1. Defendants to pay plaintiffs at once £850 in approved bills on England at 6 months' sight.
2. To allow one month's interest at 1 per cent. per month on the above mentioned sum of £850.
3. To pay costs of proceedings.

By recent advices from Ningpo we learn the death of Colonel Reynolds. He was wounded when the besieging force were recently compelled to retire from before Hoochow. This repulse, we are informed, took place after the besiegers had received a reinforcement of one 32, two 24, and two 12-pounders, besides two mortars and seven thousand men, despatched to their assistance from this province under the command of a high officer.

The 15th Aug. having been the anniversary of the French national fete, the occasion was celebrated by races and games on the French bund, the firing of salutes, and a display of fireworks. The ships in the harbour dressed for the occasion, and presented a most gay and animated spectacle. The proceedings passed off without a single contretemps.

The native officials have been kept busy during the past week by various anniversaries and religious services. The 13th having been the birthday of the Emperor's mother, they re-

Digitized by Google

paired at 4 A.M. to the Wan Shou Kung (Palace of Immortality), to perform the three prostrations and nine knocks. On the 14th, 15th, and 16th the Taotai and inferior officers visited three times each day Chên-hsiang-ko, the temple of the Goddess of Mercy, situated inside the old north gate, for the purpose of begging the Lung Wang or Dragon King to grant rain. The slaughter of animals and the sale of meat during these days were forbidden. Tuesday, the 16th inst., being the 15th day of the 7th month, the Great Spirit Day, known as Yu-lan-shen-huei, was celebrated in the usual manner, by processions of the gods, firing of guns and crackers and, salutation of ancestral tombs, while the 18th, having been the anniversary of a royal death, was kept as a day of mourning and retirement, no public business being carried on at the Yamens.

Advices from Soochow extend to the 14th, but with the exception of a long and somewhat uninteresting list of provincial appointments we note no items of importance. The old inhabitants are rapidly returning, and repairing the dilapidations caused by the rebel occupation.

HANKOW.

A correspondent at Hankow has sent us the following graphic account of the loss of the *Chekiang*, one of the S. S. N. Co.'s steamers.

The night of Sunday, the 7th of August, will long be remembered in Hankow for a spectacle such as has never before been witnessed at the usually quiet river ports, and will, it is to be hoped, not be soon again seen. Those only who saw the burning of the Cortes in Shanghai can realise the scene; and that conflagration, occurring as it did in open daylight, was far inferior as a display to its Hankow antitype. Two steamers, the Moyune, belonging to Messrs. Fletcher and Co., and the Chekiang, owned by the Shanghai Steam Navigation Company, both vessels of over 1,000 tons, left Kiukiang on Saturday morning, within three minutes of each other, for Hankow. They had raced up the whole way from Shanghai, having already been in collision on the bar off the Wong-poo, just after leaving Shanghai, by which the guards of each were considerably damaged. The Moyune arrived in Hankow at midnight on Saturday, beating the Chekiang by about forty-five minutes. The latter, as the Shanse, which was to leave Hankow at daylight on Sunday, was lying alongside the S.S.N. Co.'s wharf, anchored below the Concession, and on Sunday moved up to the berth vacated by the Shanse, and was moored to the wharf. The company's wharf consists of two large pontoons moored one below the other, alongside which the steamer lies. Just above and adjoining them is anchored Messrs. Olyphant and Co.'s hulk, which is also used as a wharf, being connected with the shore by a flying bridge. On Sunday, Messrs. Olyphant and Co.'s new steamer, the Kiukiang, lay alongside this hulk, moored to it; there being only a space of about 30 feet between the stern of the Chekiang and her stern. Below the Chekiang lay the Moyune at anchor; below her Messrs. Fletcher and Co.'s new twin screw steamer the Far East, loading teas for London; lower down were Messrs. G. Barnet and Co.'s steamer the Tunsin, Messrs. A. Heard and Co.'s Kiang-lung, and still farther down the English and French gunboats, Algerine and Kieu-shan. It being Sunday night, all the steamers, except the Chekiang which had had steam up during the day to move to the wharf, lay with their fires out and boilers blown off; and all with two anchors down, necessary to hold them against the 6-knot current that races by Hankow. The house next below Messrs. Russell & Co.'s, the agents for the S. S.N. Co., is now occupied by the Custom-house, and off it are moored two small pontoons to which the various lighters are brought for inspection. On Sunday night, or rather on Monday morning, at about a quarter to two, one of the two European watchmen remarked to the other, standing on the lower of these pontoons, that they were an unusual quantity of lights shining through the windows of the Chekiang. Before they had time to reach the upper pontoon, the steamer broke out in one vast blaze, giving the captain and crew only time to jump from their berths on the wharf, saving nothing whatever. Messrs. Olyphant and Co.'s hulk and the Kiukiang were so close that it was feared they must catch fire. The Chekiang was at once cut away from the wharf, and sheered out into the river. A moderate breeze is blowing up the river against the tide, and as she forges slowly away from the wharf, it is for a moment doubtful whether she will drift down on the Moyune with the tide, or up on the Kiukiang with the wind. After an interval, that seems an hour, of breathless expectation, she begins to move slowly down the river, a floating island of flame, her large funnel, gallows-frame and walking beam standing out grandly through the fire, that runs up and down the hog-frames like a living creature. All this time the captain of the Moyune is vigorously hailing the Far East to slip his cable, as he dare not slip his own for fear of drifting right athwart hawse of her. Now the Chekiang comes so near that he is obliged to go, and he drifts on to the huge iron ship that stands defiantly unmoving, and there hangs on across her bow till the Chekiang herself is brought up by the Far East's cables. Then the Moyune succeeds in getting clear, with the loss of a small portion of her upper house. For nearly five minutes the Chekiang hangs on to the Far East. The view from below is now magnificent. The latter looks enveloped in fire like a spectral ship, her iron masts and yards and rigging standing untouched by the flames that lick her hawse-holes and scuppers, vainly trying to force an entrance, and only succeeding in burning the paint from her iron sides. At length, finding her efforts fruitless, and seeing her former quarry gradually leaving her, the Chekiang moves away from the Far East and again drifts down in chase of the Moyune. The latter is bending and setting her jib and foresail, which delay her slightly until the wind fills them, and it seems as if she is again to be caught, when luckily they begin to draw, and she sheers gradually away into the middle of the river. Meanwhile the fire ship is pouring out volumes of steam, the fire having reached her boilers, in which steam was never generated so quickly before. And calmly through the flames the lamp at her mast-head and on her stern burns on, as though it were the steamer's soul unwilling to take wing. She drifts slowly down, her powder, which fortunately was loose, suddenly going off in one blaze: the Tunsin slips her cables and hauls into the bund; but foiled of the Moyune she passes by the other steamers, each of which slips one cable and takes a sheer as she comes by, unharming. Twice as she floats down the river she grounds, again slides off, and at last settles quietly on the shore, 12 miles from Hankow, leaving only her stern and blackened machinery to recall one of the finest steamers on the river. Some treasure which she had on board was completely melted and found mixed up with ashes, almost unrecognisable. The origin of the fire is still an open question. While the loss of so valuable a vessel is to be deplored, it is little short of providential that she involved no other in her fate.

The same journal, writing on the affairs of the Municipal Council, says:—

"It must be a source of great satisfaction both to the Municipal Council and to the general body of land renters, that a financial scheme for the ensuing year has at length been definitely agreed on. The extreme difference between the budget laid before the meeting held on the 16th April, and before that of the 18th August, cannot fail to create surprise in places other than Shanghai, where the exceptional construction of the settlement, and the peculiar difficulties which a government so constituted as the Municipal Council has to encounter, cannot be fully understood. The first project involved an expenditure of Tls. 457,000, and a taxation which should yield Tls. 511,000; whereas the second only contemplates an outlay of Tls. 221,000, and a revenue so little exceeding this sum that only Tls. 900 would remain in the hands of the Council at the end of the year, if their estimates turn out precisely and painfully correct. It was obvious that, with so trifling a theoretical balance, which might very well turn out to be a deficit, it was impracticable to carry out the desired Municipal arrangements satisfactorily; but rather than experience a second time the annoyance and trouble of revising their scheme, the Council carefully adjusted their estimates to produce this result, and made the demand for power to levy the additional taxes to give them a working balance, a supplementary measure. The large exodus of Chinese which has taken place since the fall of Soochow and gradual restoration of peace throughout the province, has of course furnished one powerful motive for the great reduction from the first to the last estimates; but the factious opposition of a few individuals, who were evidently determined to be dissatisfied with every thing, was sufficient to induce the Council to set down the lowest possible figures—lower than were necessary—in order to assure themselves of at length obtaining definite sanction to some settled scheme. By a judicious process of paring and wholesale expunction, they accordingly arrived at the conclusion that it would be barely possible to carry on the municipal duties with a revenue of tls. 221,000, and to have a balance of tls. 900 at the close of the year, provided every tax yielded the full amount calculated on; but they asked tls. 17,000 to be raised by additional taxation, to enable them to do rather more than live from hand to mouth, and to commence a reduction of the debt.

In the mercantile announcements we notice the following:—

Mr. Edward Charles Essex is authorised to sign our firm in China.—George Barnett and Co.

Mr. Walter Miller Norton is this day admitted partner in our firm.—Alt and Co.,—Nagasaki, July 1, 1864.

A contemporary writes:—"With the fall of Nanking the rebellion is simply at an end, the rest being merely a matter of detail, troublesome, probably, but still quite inconsiderable. The only formidable body of rebels now left is that at Woochoo, and they are holding their own with great spirit; but they cannot very well do much more, and must eventually succumb to the Imperial forces now at liberty from besieging Nanking or other places. The telegram published this morning announces that the city of Woochoo had been taken by the Imperialists."

HONG KONG.

The French mail of 17th July had not arrived. The dates are now down to the 28th August.

In our issue of the 8th inst. we noticed the impost of military expenses. We now give the proceedings of a meeting held to discuss the matter:—

Minutes of a public meeting held at the Court House, Hong Kong, the 23rd day of August, 1864:—

Present about 110 foreign residents, C. May, Esq., sheriff, in the chair. The chairman then read the notice above referred to, and declared the meeting duly opened.

Mr. C. W. Murray, subsequently followed by Messrs. E. H. Pollard and T. Sutherland, addressed the meeting at some length on the subject of the tax of £20,000 proposed to be levied on the colony.

Digitized by Google

It was then proposed by Mr. A. Turing, seconded by Mr. J. Whittall, and carried unanimously:—

"That this meeting views with extreme regret and dissatisfaction the demand that has been made upon the colony by Her Majesty's Government for an annual contribution of £20,000 towards the support of the troops at this station, and adopts to the fullest extent the arguments which have been brought before the Secretary of State for the Colonies by H. E. the Governor and Mr. Mercer in support of their assertion that the presence of troops here is unnecessary for any purely colonial object."

It was then proposed by Mr. E. H. Pollard, seconded by Mr. R. Brand, and carried unanimously:—

"That the demand for a military contribution, even if otherwise tenable, would be unjust to the Colony, not only in view of the important services which it renders to Imperial interests by its Gaol, its Courts of Justice, and its (intended) Mint, but also in consideration of the great extent of immensely valuable building ground that has been absorbed for military purposes, and whereby the comfort of the Colonists and the Revenues of the Colony are seriously impaired."

It was then proposed by Mr. T. Sutherland, seconded by Mr. H. B. Lemann, and carried unanimously:—

"That this meeting, whilst acquiescing generally in Mr. Mercer's despatch of the 2nd December, 1863, is unable to concur with that gentleman in the opinion (para. 33) that the residents of Hong Kong are lightly taxed. It admits that the existing taxes may be necessary, but denies that in amount they can be termed light. The expenses connected with a residence here have, it is well known, deterred many respectable Canton Chinese from trying their fortunes in the colony, and it is understood that very little is wanting to cause many who are here to leave. This meeting, therefore, looking to the best interests of the colony, earnestly deprecates the imposition of any further tax (see para. 11 of Sir Hercules Robinson' despatch of April 9, 1864), which is not required to meet an urgent and admitted want."

It was then proposed by Mr. T. G. Linstead, seconded by Mr. G. J. Helland:—

"That the previous resolutions be embodied in a Memorial to the Right Honourable the Secretary of State for the Colonies urging the relinquishment of the demand for military contribution; and that a petition, as numerously signed as possible, be presented to H. E. the Governor, praying that he will withdraw the item of £20,000 for military contribution from the estimates for 1865, pending the Secretary of State's reply."

It was then proposed by Mr. R. S. Walker, seconded by Mr. H. Noble, and carried unanimously:—

"That Messrs. J. Whittall, F. Chomley, E. H. Pollard, T. Sutherland, T. G. Linstead, and C. W. Murray, be and hereby are appointed a Committee for carrying out the object of the preceding resolution."

It was then proposed by Mr. Storey, seconded by Mr. Schmidt, and carried unanimously:—

"That the thanks of the community are due, and be hereby tendered, to his Excellency Sir Hercules Robinson, for the able manner in which he has conducted the correspondence with the Secretary of State for the Colonies with reference to the demand made for the contribution to the military of this colony."

A vote of thanks was unanimously carried to the sheriff for his conduct of the meeting, and to Mr. C. W. Murray for the attention and care he had given to the subject under discussion.

The meeting then separated.

(Signed) C. May, Sheriff of Hong Kong, Chairman.

BORNEO.

A correspondent writes on the 29th of July from Labuan:—

There are few, of our readers, I think, but would like to know something of the doings and mark the progress of events of the Labuan Coal Company's (Limited) collieries at Labuan. Landing at Port Raffles there is a very fine landing-stage, also a jetty of about 300 feet by 20 enclosed, depth of water at jetty sufficient to enable small vessels to get alongside to load from the rail coal trucks. The company is now prepared to load ships at the rate of 500 tons of coal daily; in loading the barges the rail is so constructed as to go immediately over them, the bottom part of the truck is then let fall, and the barge beneath receives two tons from each. The length of the rail is one mile with a gauge of 2 feet 4½ inches, and an incline of 90 feet. The distance is travelled by the waggons in 3½ minutes. About one hundred and fifty tons of coals are conveyed daily from the pits to coal-sheds alongside the jetty. There is an abundance of coal at present in firm working order, and proved sufficient to last forty years at the rate of 300 tons per day, and other pits are being opened. The only drawback is native labour. The veins now being worked are five in number, two of which are 4½ feet thick, another 3 feet, and one 11½ feet, which give the good steam and gas coal now being used for gas purposes at Singapore. The length of the largest vein is proved to be three miles, and it would appear that there is at the least twenty square miles of coal in this island.

Bricks of very superior kind are made by the company, the fire brick being of the finest quality, hard and firm, equal to any imported to this country.

It is the intention of the company to lay a line of rails from Port Raffles to Victoria, about seven miles distant, in order to enable ships to load at any season in that safe and commodious harbour. The line of route has been partially surveyed, and no obstacle of consequence has been at present discovered. There is every material on the ground wherewith to commence operations, and in the space of twelve months we shall have on this little island in the China Sea a locomotive running.

The company have some very fine English cattle, fifty head in all. They are in splendid condition, and would do credit to a home park. There are about 600 head of the best English cattle on the island. We have fruit in abundance, limes, pummeloes, jack-fruit, mangoes, oranges, and cocoanuts all the year round.

The steamer *Sterling* is chartered for five years by the company to run between Labuan and Hong Kong, conveying each trip 1,000 tons to the British Government. The time occupied in loading the *Sterling* is three and a half days. Great praise is due to Captain Henderson for the efficient manner in which he carries out the works of the company afloat.

The climate is good; there are no Europeans sick on the island, and only three or four natives.

Intelligence had been received at Batavia that the Dutch Military Commandant Colonel de Neve, the Resident, Mr. Wynen, and a number of women and children were shut up in the fort at Sintang, and so closely was it pressed by the Malay and Dyak insurgents that fears were entertained of its safety unless reinforcements were speedily sent. In the last engagement eighteen of the small garrison, including two officers, were wounded, and three killed. The steamer *Kapuas*, which, by her fire, materially protected the fort, had been left fast on the ground by the falling of the river Melawie, and as it was thought that she could not be successfully defended in such a position she was set on fire. The Government, on receiving these tidings, sent two steamers from Sourabaya with two companies of infantry to reinforce the small garrison at Sintang. It was doubted whether this was sufficient for the purpose.

The *Java Times* says:—"We are glad to see that Government has issued a resolution which prohibits the importation of gunpowder and munitions of war into the Kupheas country. Pangerang Mas Nata Widjaja seems to be the greatest leader of the movement; he has, it would appear, promised his followers the capture of the fort and the remaining steamer, which latter he avers it is his intention to sell to Rajah Brooke, though on what grounds he believes the Rajah inclined to purchase her is not distinctly stated. His followers fanatically credit his assertions. It is to be regretted that the name of the noble Rajah should be mixed up with these disturbances, and none will, we believe, be more aggrieved at the circumstance than the Rajah himself."

JAVA AND NETHERLANDS INDIA.

BATAVIA.

Advices hence are to the 31st August. We extract from the *Jevasche Courant* the following important official statement of the probable out-turn of this season's crops of the undermentioned articles as compared with those of 1863. Our readers will see that there is an enormous falling off in Coffee, Sugar and Tobacco. The cause of the failure is to be attributed to the very inclement weather which prevailed during the early part of the season.

GOVERNMENT CROPS.

	1863.	Probable out-turn 1864.
Coffee	1,100,891 pic.	591,879 pic.
Sugar	1,731,480 „	1,593,274 „
Tobacco	21,500 Amst. lb.	„

Indigo	206,646 Amst. lb.	215,900 Amst. lb.
Cochineal	16,000 „	

The state of the rice crops throughout the island is reported to be very favourable. At Pekalongan, however, no less than 17,775 *bouws* have failed.

It is said that the Dutch East Indiaman, *Nieuw Holland*, from Holland for Java, has been burnt at sea. No further particulars have come to hand.

The American ship *Mandarin*, J. B. Rennell master, has been lost on one of the Thousand Islands. Captain Rennell reports:—

August 19th, 1864.—At four P.M. a breeze sprang up from the northward. Shaped my course for North Island. At six P.M. up with N.E. island. We looked for the channel between N.E. Island and North Island marked in Horsburgh's charts as a safe and clear channel and showing no dangers. With all confidence we ran through, and when the islands were in proper bearing, according to the charts, bore away S.W. At seven P.M. we brought up on a reef of coral rocks, North Island bearing N.N.W., the small island to the eastward and northward of West Island bearing due west, and at daylight we saw the North Watcher, bore due north. These bearings put the ship nearly in mid channel of the charts. The ship thumped heavily all night. Every effort was made to heave her off without effect. I then sent to town for assistance. On Saturday, at seven A.M. the ship suddenly filled. At eleven the ship full of water to her cabin floor, and bilged. Sunday: The steamer *Ambon* came up at five P.M., transferred passengers and cargo to the steamer. Monday: Working at cargo, saving all possible. Tuesday: Steamer left the wreck with passengers and part of cargo, leaving three lighters with ship's crew to take away the remainder.

We have to report the decease of Mr. D. F. Schaap, of Batavia, whose intended retirement had been announced. He

Digitized by Google

died from the effects of a fall from his horse when in a fit of apoplexy. From deaths we are naturally led to disease. Cholera has again showed itself at Samarang, which town has from the commencement suffered most. This is doubtless owing to the humid climate consequent on periodical inundation.

Banca.—The British barque *Isle o'May*, of London, which we reported in a former issue as having been found, by the authorities of Banca, abandoned on a reef in the Straits of Lepar, has been got off and brought into the roads of Toboali, where she now lies to be claimed by parties concerned. The *Java Times* remarks:—"This is another instance of the little trouble taken by some British shipmasters to act for the interest of underwriters in cases of shipwreck, and it would be well if insurance companies would inquire better into the character of the parties in charge of the ships on which they take risks before doing so. We do not wish, by any means, to insinuate that the master of the *Isle o'May* neglected his duty in this case, as we are unacquainted with what may have been done by him to save his ship, but we must be allowed to infer from the fact that the ship has been got off that she might as well have been got off by those on board as by the authorities at Tomboali."

Macassar.—According to telegraphic despatches received *via* Sourabaya, the greatest portion of the inhabitants of Binamoe revolted on the 4th. Of the patrol sent out, four native soldiers were killed and two mortally wounded, one of whom died soon after. A native clerk and a policeman were murdered. The barracks at Djeneponto were afterwards attacked. We had no losses, but the enemy's killed is reported to have been fifty or sixty, with a large number of wounded. Reinforcements were immediately sent from Macassar, but the revolt was already suppressed before their arrival. The troops, therefore, returned to Macassar on the 14th.

Captain D. Moss, of the British barque *Borderes*, has written to the harbour-master of this port to inform him of his discovery of a reef between the island of Boero and the Boeton passage in lat. 4°. 12′ S., and lon. 124°. 42′ E.

The loss of the *Japonica* was noticed in the *London and China Telegraph* of the 28th September. Further particulars have now been received:—On the morning of the 30th July the English schooner *Japonica*, 211 tons, Capt. J. Lindsay, left this place for Macao with a cargo of tripang, green peas, rattans, hides, and ebony, valued at about 140,000f. At five P.M. the northernmost of the Three Brothers bore S.E. ½ E. about eight miles, course W.W.S.W. ½ S. and W.. with which it was expected to clear Pulo Dewaken, a fresh breeze blowing at the time. A strong southerly current, however, carried the ship upon a reef at midnight, and at daylight it was found that she had struck on the reef east of Pulo Dewaken. The night had been dark and misty, so that nothing could be seen of the island which is otherwise visible at about two English miles. The high sea running had thrown the ship high upon the reef, and ere long there were three to four feet of water in her hold, so that no hopes were left of saving her, though everything was tried to get her off. The captain arrived here yesterday afternoon (August 3) to report his loss and to procure assistance from the authorities. The Government cruiser No. 55 was immediately sent to her assistance and to protect her from pirates. Captain Lindsay returned to his ship with the cruiser. The *Japonica* and her cargo have been sold by auction for about 20,000f.

Celebes.—At Jeneponto the Bugis inhabitants had taken up arms to resist a requisition upon them to construct a road. Troops were sent to the spot, and after some days the revolt was suppressed, although not without bloodshed, some 40 or 50 of the Bugis being killed and wounded.

MALACCA STRAITS.

SINGAPORE.

Dates are to the 5th of September. The British steamer *Ta-pang-Nyo*, from Bombay, arrived on the morning of the 25th August, and left for Hong Kong on the 29th. H.M.S. *Adventure*, Captain Waddelove, from Plymouth April 29, arrived on the afternoon of the 27th.

The Singapore *Free Press* again complains of the conduct of the Dutch authorities as injurious to the interests of British commerce. It remarks, on the trade with Celebes:—

"A report has reached us that in the Bugis countries that have been annexed by the Dutch Government within the last few years, goods brought from Singapore are made to pay 24 per cent. duty, while similar articles imported from Java or other Netherlands India possessions only pay, half if so much. If this should turn out to be correct, it will afford the best argument that could be used in support of the complaints made by the merchants of the Straits against the occupation of the ports on the east coast of Sumatra by the Dutch, as we may expect to find them pursuing a similar line of policy these, with the object of driving the trade to their own ports. This is all very well on the part of our neighbours, but it is very improper in our Government to look idly on and see our trade injured in so many different directions. The non-arrival of prahus from the Bugis porrt last season was ascribed to the early setting in of the northerly monssoon but if this report about the imposition of differential duties should turn out to be well founded, we suspect the absence of our Bugis friends is likely to be permanent. The loss will not be a light one, as may be judged from what the Governor says in his Annual Report for 1863-4:—"It is estimated that in consequence of the few arrivals from the Celebes during the past year, the import and export trade has suffered to the extent of upwards of ten lakhs of rupees."

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

Blakiston—On the 9th Oct., at Shelton Lodge, near Stoke-upon-Trent, the wife of Matthew Folliott Blakiston, Esq., of a daughter.

Martin—At Grange Bungalow, Singapore, on the 28th August, the wife of Alex. M. Martin, Esq., of a son.

Medhurst—On the 8th Oct., at Bournemouth, the wife of Walter Henry Medhurst, Esq., H.B.M.'s Consul at Hankow, of a daughter.

Paterson—On the 13th Oct., at Sydenham-hill, the wife of William Paterson, Esq., of Singapore, of a daughter.

Reid—On the 8th Oct., at Greenock, the wife of James Reid, Esq., late of Ceylon, of a son.

Robertson—At Singapore, on the 2nd Sept., Mrs. Robertson, of a son.

MARRIAGES.

Annesley—Richards.—On the 11th Oct., at Christ Church, Upper Hyde-park-gardens, by the Rev. Frederick J. Richards, vicar of Bexley, Kent, cousin of the bride, assisted by the Hon. and Rev. Townshend Boscawen, the Hon. Algernon Sydney Arthur Annesley, only surviving son of the late Viscount Valentia, to Helen Sydney, younger daughter of the late Griffith Richards, Esq., Queen's Counsel.

DEATHS.

Chausse—On the 17th Aug., at his residence in Shanghai, H. Chausse, of Vervey, Switzerland, aged 35 years.

Dunn—At Ningpo, on the 8th Aug., of cholera, Henry William Frazer Dunn, aged 25 years, captain of the steamer William the Fourth.

Farrelmann—At sea, on July 29th, on board the Wilhelm, Captain L. Farrelmann, her commander, of dysentery.

Hamilton—At Hong Kong, on the 16th Aug., at the P. and O. S. N. Co.'s factory, at West Point, James Hamilton, engineer of the steamer Ganges.

Hamilton—At Yokohama, Japan, on the 12th Aug., while bathing, the Rev. Robert Hamilton, Chaplain of the Forces in China.

Inglis—On the 10th Oct., at Kirkcaldy, Andrew Lysaght Inglis, Esq., late harbour master at Hong Kong.

Smith—At the Central Police Station, Hong Kong, on the 16th Aug., Elizabeth Bridget, wife of T. W. Smith, overseer of Water Works.

Watson—At Singapore, on the 28th Aug., Mr. Robert Watson, late pensioned apothecary of the Madras Service.

COMMERCIAL REPORT.

CHINA EXPORTS.

Tea.—Canton.—Eight more chops of new Congous have arrived, two of which have been taken at previous rates. Tayshaans have been taken to a small extent at prices last quoted. Oolongs have been in request for shipment to New York. Scented Teas of fine quality are scarce, and have advanced, whilst the common kinds have receded. Canton Gunpowders of fine quality are scarce, and wanted at an advance. The medium and common kinds are as before.

Shanghai.—Black: A considerable business was transacted during the early part of the fortnight, at rates equal to previous quotations, but when the exchange opened at 6s. 8½d., holders refused to sell, unless at higher prices. The market is now quiet, but the last few settlements have been at a further advance of one tael. There are no fine Teas on offer, and the stock is almost entirely composed of medium and common second crop Oonahms and Oopacks. The settlements of the fortnight are reported at 12,600ch. Oopacks, Oonahms, Ningchows, Hohows, and Flowery Pekoes, whilst there have been transhipped on owners' account 30,300ch., making the total for the fortnight 43,000 chests, the total for the season to date being 192,700ch. The stock for sale and transhipment is 61 chops. The quotations are:—First and second crop Oopacks, 29 tls. to 34½; Ninchows, 29 tls. to 34½; Oonahms, 21 tls. to 29. Green: There has been more doing in this class during the past fortnight, but settlements have been entirely for the London market. Nine chops of Pingsuey have been settled at rates which show a decline of about one tael. There is now a considerable quantity of Shanghai-packed tea on the market, but only one small settlement is reported. The new Moyunes and Fochows are expected to arrive at the end of the month.

Hankow.—Transactions at the earlier part of the fortnight had been to a fair extent, but latterly the market had been very quiet. Teamen, however, were firm, and no reduction had been made on previous rates. Settlements amounted to 22 chops, and the stock was reduced to 20 chops. Third crop Oopacks had arrived, and were considered of superior quality to former years' growth, being well made and possessing both strength and briskness. The *Far East* (str.), *Camilla*, and *Dovercourt* were on the berth for London. Quotations: Oopacks, fair to good, tls. 25 to 29; common, tls. 22 to 24. Oonams, fair to good, tls. 19 to 24; common, tls. 15 to 17 per picul. Total settlements and shipments, 327 chops, against 398 chops last year.

Kiukiang.—Green Teas: Overland musters of one large chop of Fychow had been received, but the low state of the rivers in the up country districts will delay arrivals for some time. 600 packages of local packed had been shipped to Shanghai, and one or two chops of this class were on offer at 30 to 32 taels. Black Teas: Settlements are reported of 6 chops of medium Ningchows at 23½ to 24½ taels, and 2 chops of good to fine Hohow at 21 to 23 taels, which prices show no change on former rates. Stock 2 chops of Ningchow and 3 of Hohow. Quotations:—Ningchow: Fine, none; fair to good, 25 to 28 taels: medium, 20 to 24 taels; Hoohow: Fine, 21 to 23 taels per picul. Total settlements and shipments—108 chops or 58,484 chests, against 57,932 chests last year.

Digitized by Google

YOKOHAMA.—A good business in teas may be reported, but the demand for the American market being partially satisfied, the ruling prices have somewhat vacillated and declined about 4 dols. per picul from the highest point of the market. Supplies have come forward freely, but the teamen seemed disinclined to accept lower rates. A few musters of fine tea have found purchasers at about our quotations. Settlements we estimate at 4,500 piculs. Stocks: Ordinary, none. Good do., none. Common, none. Good do., 400. Medium, 3,200. Fine, 450. Finest, none. Quotations are as follows:—Good common, 14.00 dol. to 22.00. Medium, 23.00 dols. to 27.00. Fine, 28.00 dols. to 31.00. Finest, none. Of old teas only about 200 piculs remain on hand.

NAGASAKI.—The weather improved, and teas have been arriving more freely, the re-opening of the navigation of the Inland Seas, which there is now reason to hope will very soon be accomplished, would cause great improvement in the supply of produce of all kinds. There has been increased competition for the new teas, and prices are now fully $2 per picul above opening rates. The total export of tea, for the year ending 31st May last, is 3,594,079 lbs., of which to China is 2,887,600 lbs., Europe 606,879, New York 99,600.

RAW SILK.—SHANGHAI.—The activity noticed in last report has continued throughout the fortnight. The sudden material decline in the rate of exchange and the slightly more favourable political advices to hand by 27th June mail, gave operators more confidence, and the settlements have amounted to fully 2,500 bales. The advices from the interior report prices advancing there daily, and as the season advances the scarcity of good silk becomes more apparent. The dealers are therefore very firm in this market, and although they have succeeded in establishing quotations at a range of fully Tls. 20 per picul higher than last mail, there are still some holders who are unwilling to sell, being unable to replace there stock at present market rates. By the Japan mail about 450 bales of new silk came to hand, but as it has all been brought down under contract, no settlements have taken place in their market, and, therefore, no quotations can be given. The receipts since last steamer have been about 150 bales. The transactions of the fortnight are reported at 2,500 bales against 2,200 the corresponding fortnight of last season, and 6,500 of that the season before. The present unsold stock is 5,000 bales, against 14,500 same time last season, and 15,000 the season previous.

YOKOHAMA.—The same most unsatisfactory state of the market for this our principal staple, which we reported a fortnight ago, has continued until within the last few days, when some slight hope of a relaxation of the restrictions which have hitherto kept back supplies seemed held out by some 350 bales being brought down; these however were on contract supply, upon which, doubtless advances had been made, and they were not placed on the market. Prices and quality have not transpired. Further supplies are anxiously looked for. We have no data upon which to affix any quotations.

RAW COTTON.

HONG KONG.—The Market remained quiet until the 18th August, when the London mail arrived. The advices were considered favourable, Japan cotton being reported as worth 22½d. to 23d., the telegrams reporting a still further rise. This intelligence brought several purchasers forward, chiefly Indian firms, and about 13,000 bales have since been placed at the following quotations:—Shanghai, $32½ to 34. Ningpo, $34 to 35. Japan, 36.25 to 37. Stock are much reduced, being estimated at 7,000 bales, and holders are correspondingly firm.

SHANGHAI.—Transactions have only been on a moderate scale, the stock offering being small, and buyers generally are awaiting the arrival of the new crop, expected now in about three week. We quote No. 1 Shanghai, tls. 19.00 to 19.25; Hankow, tls. 18.00 to 18.50; Tien-tsin, tls. 19.00 to 19.50 per picul.

NINGPO.—1,000 bales of the new crop are said to have been contracted for at $26 per bale of 118 to 120 catties.

YOKOHAMA.—The market is steady at $27 to $28 for fine. The demand is not active, but prices are firm.

NAGASAKI.—No sales are reported. It is stated that the supply of the new crop will be double that of the preceding year.

CHINA IMPORTS.

COTTON YARN.—In the absence of any demand on the part of the Chinese dealers for this article of import, who state that prices are already much higher than they can afford to pay, the settlements of the fortnight have been restricted to 20 bales medium and higher numbers, and rates show a slight decline upon the quotations previously current. Some 39 bales of sea-damaged Yarn have also been moved off by public sale. Grey Shirtings: Have again met with an average amount of inquiry, but prices are quoted a shade below those ruling during the preceding fortnight. Settlements are estimated at 9,150 pieces, exclusive of 2,000 pieces of sea-damaged Cloths sold by auction. The sales reported from Foochow amount to 2,500 pieces, taken at $4.95 to $5.50 per piece for 7 to 8¼lb. goods. White Shirtings: Have likewise been in fair request during the past fortnight, and the settlements of these goods reported in this colony amount to 4,600 pieces, in addition to which 1,000 pieces damaged have been disposed of by public sale. T-Cloths: A further decline has been established in the quotations for these goods, which meet with no inquiry at the hands of the Chinese dealers, and the settlements which have been effected during the past fortnight have consisted almost entirely of purchases by foreign firms. 6,100 pieces (damaged) have been taken by the dealers at auction, and the sales of sound amount to 8,500 Pieces. American Drills: There are not any sales of these goods to notice. White Spotted Shirtings, Dyed do., Brocades, White, and Coloured: There have not been any transactions effected in this class of imports during the past fortnight, and prices remain without change. Stocks are by no means heavy, and are confined to a few hands. Damasks remain without inquiry or sales to notice. Chintzes: The sales of these goods reported during the past fortnight amount to 550 pieces, prices are quoted a shade lower. Handkerchiefs: There are not any sales of these goods to notice. Raw Cotton: The intelligence brought on by the mail steamer *Orissa*, which was confirmed by the telegrams of the 18th of July from London, announcing a further advance in the home markets of a halfpenny per pound for this staple, had an immediate effect here, and prices have advanced fully $2 per picul upon the quotations given under date of last report, the amount of business transacted has also been upon a larger scale than for some time past, amounting to 14,000 bales for the fortnight, and there is now but a few small parcels of desirable cotton remaining in first hands. About 2,400 bales of inferior growth have likewise found buyers at public auction. In the Canton market the transactions of the past fortnight aggregate 4,880 bales purchased at some advance in price.

WOOLLENS—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: The demand for these fabrics has continued to be on a moderate scale during the past fortnight, but quotations do not show as yet any improvement; the sales are put at 835 pieces of the first-mentioned, and 208 pieces of the other descriptions of goods. Long Ells: Have not been in any request, and the settlements reported do not exceed 60 pieces. Camlets: A fair amount of inquiry has been manifested for this class of woollen manufacture since the date of last report, and sales of about 1,400 pieces have been effected. There is not, however, any change noticeable in the value of the article. Lastings have also been in some demand at the prices previously current, and the sales of the fortnight amount to 650 pieces. Blankets: 450 pairs have found buyers.

METALS.—Iron, Flat, &c.: There has been a little more business transacted in Iron than during the preceding fortnight, and the sales reported amount to 2,000 piculs of Nail Rod, and 850 piculs of Bar placed at previous quotations; while from Canton settlements of 1,400 piculs are reported. Lead: 1,250 piculs placed in this colony and 700 piculs in Canton constitute the transactions of the fortnight. Tin: 100 slabs sold. Tin Plates: Without change to notice in value have found buyers in this market to the extent of 300 boxes.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6	months sight.	6s. 6½d. to 6s. 7d.	6s. 7d. to 6s. 8d.
At Foo-Chow-Foo (per dol.)	6	ditto	...	...
At Canton, At Hong Kong, At Macao	6	ditto	4s. 9¾d.	4s. 10d. to 5s. 0d.
At Singapore	6	ditto		
At Manila	6	ditto	4s. 6d.	4s. 6d. to 4s. 7d.

At Shanghai, Bills on India, Rs. 312 to 314 per 100 taels. At Hong Kong, Rs. 229 per $100. Bar Silver at Shanghai, 111 taels; at Hong Kong, 9 to 10 premium. Mexican dollars at Shanghai, taels 75 per 100, and Exchange on Hong Kong, 27 to 28 discount.

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN.—From London: Aug. 8, Satsuma.

At SHANGHAI.—From London: Aug. 3, Delhi. From Liverpool, July 31, Recife; Aug. 1, Patna and Maravi: 2, Mermaid, Anglia, and Agincourt; and 4th, Truro. From Cardiff: July 31, Dovercourt; Aug. 2 Countess of Yarborough, and 15, Pembrokeshire. From Sunderland: July 31, Queen of the East; Aug. 1, Carizal, and 6, Palawan. From Newport: July 30, Stanley. From Shields: July 31, Coeur de Leon; Aug. 13, Cleveland. From Newcastle: 2, Glimpse. From New York: July 28, Floretta; Aug. 4, Clara Babuyan.

At AMOY.—From Liverpool: Aug. 16, Morning Star.

At HONG KONG.—From Cardiff: Aug. 15, Areta. From Sunderland, 23, James Vinnicombe.

At MANILA.—From Antwerp: Aug. 4, Earl of Mar and Kelie.

At SINGAPORE.—From London: Aug. 20, W. Simpson; 23, Henry Darling; 31, Moneta. From Liverpool: Aug. 24, Hoang Ho; 25, Pladda; 27, Golden West and Conference; Sept. 1, King of Trumps; 2, Oceanica. From Cardiff: 23, Elise; Sept. 2, Mary Ann. From Plymouth: 27, H.M.S. Adventure. From Rotterdam: 29, J. Martinus. From Bordeaux: Sept. 2, David.

At PENANG.—None.

At NAGASAKI.—Aug. 2, Great Western, from Cardiff.

DEPARTURES.

From JAPAN.—For London: Aug. 6, Amoy. For Liverpool: 13, Jane and Isabella.

From SHANGHAI.—For London: July 28, Caractacus; 29, Gresham; Aug. 2, Assyrian; 3, City of Quebec; 5, Essex; 13, Zodiac. For Liverpool: July 29, Sea Snake; 8, Brockham; 18, Thomas Bell.

From FOOCHOW.—For London: July 29, Bride of the Seas; Aug. 1, Cumberland; 3, Canute; 11, Philomela.

From HONG KONG and CANTON.—For London: Aug. 11, Adriatic. For New York: Roslin Castle.

From MANILA.—For Liverpool: Aug. 11, Kathay; 16, Gondola; 18, Frederick. For Falmouth: 16, St. Paul, *via* Iloilo. For New York: 12, Franklin.

From SINGAPORE.—For London: Aug. 28, Tweed; 30, Eddystone. For Liverpool: Aug. 24, C. H. Soule. For Falmouth (for orders): Sept. 2, Queen Bee. For New York: Aug. 24, Panic.

From PENANG.—For London: Aug. 16, Marengo; Sept. 4, Spitfire. For Falmouth: Sept. 2, Frederick.

LOADING.

At JAPAN.—For London: Anna Maria, Lucknow, Fleda, and Little Edith. For Liverpool: Gyrn Castle and Vigil. For New York: Brilliant.

At SHANGHAI—For London: Capiolani, John Banks, Marchioness of Londonderry, Napoleon III., Queen of Nations, Sarah Newman, Solent, Waverley, Yaratilda, Claramont, Toftscomb, Southern Cross, Wild Deer and Stirlingshire. For Liverpool: David M'Ivor, Finzil, Southern Empire, Sea Snake and Providence.

At FOOCHOW.—For London: Horsa, John Temperley, Rajah of Cochin and Race Horse. Expected: West Derby, Ellenborough, Verbena, Southern Belle and Harkaway.

In CANTON WATERS.—For London: Cathaya, Ben Lomond, Yeaver.

Digitized by Google

ing Bell, Peterborough, England, Aboyne. For Liverpool: Everest Delhi, Samarang, Mount Stuart Elphinstone and Gitano.

At MANILA.—For London: Staffordshire. For Liverpool: Constance. For Falmouth: Ocean Express, and Valadora.

At SINGAPORE.—For London: Queen of India, and William Simpson. For Liverpool: Tigris, and Oceanica. For Boston: Borneo.

At PENANG.—For London: Golconda.

FREIGHTS AND CHARTERS.

JAPAN.—To England: Cotton and tea, £3 to £3. 10s.; silk, £4 to £4. 10s.

HANKOW.—To England, per steamer, £7; sailing ship, £4. 15s. per ton.

SHANGHAI.—The charters for home are:—The Waverley (999 tons), to London, at £3. 15s. per ton for tea; John Stanton, jun. (724 tons), to Liverpool or London, at £3; Camila (508 tons), Hankow to London, £4. 15s. To New York: The Mary (214 tons), at £3. 15s. per ton.

HONG KONG and CANTON.—The vessels on the berth for London and Liverpool are loading at £3 per ton.

MANILA.—The American ship St. Paul has been chartered at £2. 10s. per ton, to load a cargo of sugar at Iloilo for Falmouth. The English barque Earl of Mar and Kellie proceeds to Cebu to load a cargo of sugar and hemp for Liverpool, her rates being £4. 2s. 6d. for the former, and £4. 10s. 6d. per ton for the latter. These have been the only transactions, beyond some hemp engagements by the vessels loading for the United Kingdom at £4. 5s. and £4s. 2s. per ton.

SINGAPORE.—The tonnage in harbour is large, with little offering; rates, therefore, have declined, which are as follows:—Sugar, £2. 15s.; measurement, £3. 15s.

PENANG.—Rates remain unaltered. For England, the Golconda is the only vessel on the berth, with further tonnage in demand. The rates are £3 dead weight; £3. 10s. light freight, and £4 measurement.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—Aug. 9th, Prata, from Liverpool to Singapore; 10th, William Simpson, London to Singapore; 12th, Ceres, Scheidam to Batavia; 18th, Sir W. F. Williams, London to Shanghai; Medina, London to Japan; Star of the North, Liverpool to Hong Kong; Laurel, London to Hong Kong; 19th, Java, Cardiff for orders; Cambalu, London for Hong Kong; 20th, Dilkhoosh, London for China; Thomas Mitchell, Glasgow to Batavia; 21st, Melitor, Newcastle to Hong Kong; Wave, Shields to Hong Kong; Glenclune, Glasgow to Hong Kong; 26th, Eleanore, Hamburg to Hong Kong; Conchita, London to Manila; Chrysus, Liverpool to Hong Kong; 27th, Cesaria, Cardiff to Hong Kong.

From UNITED STATES to CHINA, &c.—August 8, Eastern Light, New York to Shanghai; 18, Moldavia, New York to Hong Kong; 19, Rocket, Boston to Batavia; 21, Lancaster, New York to Shanghai.

From CHINA, &c., to ENGLAND and CONTINENT.—August 15, Banian, Hong Kong to London; Prince Alfred, Singapore to London.

From CHINA, &c., to UNITED STATES.—August 21, Bengal, Manila to New York.

COMMERCIAL POSTSCRIPT.

The Commercial Bank of India and the East has declared a dividend for the six months ending the 30th of June last, at the rate of 12 per cent., with a bonus of 3 per cent., making 18 per cent. per annum, carrying the sum of £22,500 to the reserve fund.

The scheme of Mr. Gisborne for laying cables to connect Singapore, Java, China, and Australia, will be revived when monetary affairs are more settled.

TEA.—The chief business done since our last has been in New Season's Foochow Congous, ex *Robin Hood* and *Young Lochinvar*; and for these, former prices have in most instances been obtained. The *Min's* cargo was put forward yesterday, and many sales made, ranging from 1s. 9d., to up to 3s. 2d. per lb., the great bulk, however, being from 2s. to 2s. 3d. per lb. Some small shipping business has been done in Congous at 9d. for broken, and 1s. per lb. for leafy; also 1s. 1d. for good bold Amoy kind. The flavory sorts now attract very little attention, up to 1s. 6d. per lb., and beyond that there are few offering. Of new season's, ex *Robin Hood, Young Lochinvar* and *Min*, some have been sold at 1s. 9d.; but the bulk of the sales have been from 1s. 11d. to 2s. 5d. per lb., and some few up to 2s. 8d., and Pak Ling at 3s. 2d. per lb. Low black leaf kinds are heavy at 11d., and the better descriptions at from 1s. 4d. to 1s. 9d. are dull of sale. Of fine none have been put forward since the *Sea King*, and her cargo goes off but slowly, as buyers generally hold out for lower rates. Of Scented Teas the few new parcels have gone off well, but old stock is difficult to move. New Oolongs have been taken at 1s. 8d. to 2s. 3d., but these latter are not very fine. Of true Greens there has not been much assortment, and the business done has been very small. The Indian auctions took place on the 11th, when of 2,156 packages printed, 325 were withdrawn, all the remainder being sold. The Assam Company's went off briskly at extreme rates, and those of private growths slowly, at about previous prices. For the next sales of China teas, catalogues are at present out for 18,774 packages, and of these upwards of 18,000 are printed "without reserve." The United Kingdom Stock was on the 30th ultimo, 84,500,000 lbs., against 80,000,000 lbs. on the 30th September, 1863.

SILK.—Demand rather slacker, but prices firm at last quotations.

ARRIVALS NOT INCLUDED IN THE TABLES.—Oct. 14, at Liverpool from Singapore, Bombay from Shanghai, Cyclone, 15th Unrivalled, 14th from Hong Kong, Glencoe, from Rangoon, Alfred Lamont, 17 at Deal from Singapore, Athelstan, from Manilla, Albuera, at Gravesend from Shanghai Robert Lowe (str.), from Penang Akbar, at Falmouth from Akyab, Constantia.

DEPARTURES.—Oct. 12, from Sunderland, for Shanghai; Ethel, from London, for Singapore; West, for Kanagawa, Dora.

SPOKEN.—Canton, Japan to Liverpool, September 21, 34 N., 38 W.; Robur, Antwerp to Singapore,, July 28, 37 S., 8 W.; Bombay, Singapore to Liverpool, August 12, 31 S., 11 E.; Zirine, Liverpool to Penang, September 3, 12 N., 25 W.; Scholde (Dutch barque) Newcastle to Batavia, 32 days out,; Amazone, Cardiff to Singapore, September 9, 10 N., 25 W.; Julie (ship), Marseilles to Sumatra, August 25, 16 S., 36 W.; Kenderdyk, Rotterdam to Batavia, July 5, 2 N., 23 W.; Antelope (Hanover schooner), for Hong Kong, September 10, 11 N., 25 W.

At MAURITIUS—Sept. 10, Peeril of the Peak, from Iloilo; and sailed 13 for Liverpool; Fire Queen (s), from New York, for Singapore.

THE DISTURBANCES IN EASTERN CHINA.—Some time back, says the *Invalide Russe*, we announced the invasion of several towns in the the part of the world we have just mentioned. The following are some details concerning the country alluded to:—Rashcan, or Turkestan, known also by the name of the province Hiss, is bordered on the north by the mountains of Tian-Chanoum, on the west by Mount Bolor, and on the south by the mountains of Konim-Lunom. The Desert Gubi forms its Oriental frontier. This country presents the aspect of a sandy steppe watered by a number of rivers falling from the chains of mountains just named, and which nearly all get lost in the sands, with the exception of those which form the river Tarin-Gala, coming from Lob Nor, or the Sea of Stars. The country produces wine, cotton, grass, and pot-herbs; but, on account of its natural barrenness, and constant dryness, it can only be fertilised by artificial means. The mineral riches which are known consist of sulphur, saltpetre, alum, jasper, &c., and the mountains contain copper and gold. The population, of Turkish origin, numbers about 600,000 souls, concentrated in the towns of Kashkar, Outchourfou, Aksar, Jarneut, and in the neighbouring villages industry is little developed, and commerce is in the hands of foreigners, who form a unmerous and influential class in Kashkar, and who are principally o Khokan origin. The staple article is tea, brought from China, which i exchanged for cattle coming from the steppes. There are also to be seen n the markets some products of Russian manufacture, such as cloth, inen, and metal tools. The inhabitants profess Islamism, which was introduced into the country about the fourteenth century by a self-styled successor of Mahomet, named Hadgi, only the new religion very little changed the primitive customs, as the women of Kashkar enjoy entire liberty. About the middle of the eighteenth century, Kasckaria and Djoungaria were conquered by the Chinese, and the Hadgi retreated to Khokan; a few of these representatives of Islamism contrived to remain in the country and exercise a great political and religious influence over the populations which detest the yoke of the Chinese, and consider the Hadgis as their rightful masters. The Chinese sent an army of 15,000 men to occupy the country, but, not interfering with the administration of the country, they contented themselves with a tribute. We can say that their authority at Kashkar is weak, and that they would not have been able to remain there long but for the rivalry of two parties, which divide the country, and are known by the denominations of Black Mountain and White Mountain. The Khokans have gained no less influence than the Chinese by supporting the Hadgis. They have been the instigators of the rebellions against the authority of the Chinese. The first rebellion took place in 1826, and terminated by the expulsion of the Chinese, who, however, soon returned with fresh forces, taken from the interior of the empire, and frightened the populations by cruel punishments. They perceived that the Khokans were the real authors of the insurrection, and tried to make them leave the country, but the latter succeeded in maintaining their former position, and even, in 1830, forced the Chinese to conclude a treaty, which conceded to them the right of commerce, and even a considerable share in the government. Two other rebellions took place, in 1847 and 1857, under the direction of Hadgi-Vali-Khan-Thuré, who was at last abandoned on account of his ferocity, and obliged to fly, notwithstanding the victories he had gained. It was during the reign of this terrible chief that a European, by the name of Schlagentweit, attempted to visit these countries, but his audacity cost him dear – he was hanged.

COLONIAL STATISTICS.—The Colonial Blue-book for 1862 has only been issued recently from the Colonial office. The volume iucludes, perhaps, by an oversight of the censor, a despatch from the Governor of Queensland, in which that functionary states that having observed that the official reports from the Australian and American colonies are not published in London till they are eighteen months old, and thinking that they then look very like "an old almanack" he determined to put in force that part of the Queen's Colonial Regulations (chapter vii., section 4) which provides for the stoppage of the salary of any public officer who may neglect to furnish the returns during the first quarter of the year. The consequence was that the statistics were ready in good time, and the Queensland report on 1862 was despatched to London in May, 1863; and the Governor "ventures to submit" that the reports from all the colonies would be transmitted as soon if the Colonial-office would press the observance of the Queen's regulation. But Governor-General Sir G. F. Bowen bestirred himself in vain. His report of May 12, 1863, issued from the Colonial-office in the autumn, not of 1863, but of 1864. We may venture to submit that as long as colonial governors know that they may take their time, they will put off a duty that involves some thought and gives some trouble, and, perhaps, at last send such a letter as one which appears in the present volume, written by a North American lieutenant-governor, who has to say: "I have unfortunately too long delayed the transmission of the report (for 1862), and now (in 1864) am unable to devote to its preparation that time and care which the subject demands."

NEWS FROM PEKING.—The date of this letter is incorrect, as the mails with dates to August 21, is only in to-day. Perhaps the whole thing is in advance of the facts. The *Moniteur de l'Armee* has received a letter from its private correspondent at Shanghai of the 25th of August which states that the Court of Peking has appointed the Mandarin Konan, Governor of Nanking. It is said that he is well disposed to Europeans, and well versed in all matters relating to commerce and navigation. The Taipings experienced a serious loss by the capture of their capital, but they are not entirely destroyed. They are endeavouring to collect their forces in the provinces of Nyang-wei and of Kiang si. One of their armies, commanded by the lieutenant of Chau-Omang, defeated a numerous division of the Imperial army in a pitched battle on the 3rd of August. The Peking Government has consequently seen that it cannot dis-

Digitized by Google

band its army, and it has requested that the Franco-Chinese corps shall continue to serve. An arrangement had nearly been concluded for that purpose, and Lieutenant Aiguebelle, of the French navy, who commands that corps, had arrived at Shanghai to engage a number of European officers and non-commissioned officers, and to procure supplies. He has proposed to conclude contracts for that purpose for two years. Flying corps are moreover about to be formed in the Imperial army, which will scour the provinces traversed by the Yang-Tze-Kiang, to prevent any rebel bands being organized there.

Products and Trade of Peru.—Mr. Cocks, the British Acting Consul, states in his report this year:—The province of Loreto, in the north of Peru, is so extensive that it almost equals in surface all the rest of the departments put together. It produces the plantain, serving instead of bread, of which there is none. The sugar cane grows with the greatest luxuriance, and it is sufficient to plant it once to have constant yields from the roots. Coca yields six crops a year. This is a plant deserving to be more generally known on account of its extraordinary qualities. A Peruvian will endure the severest labour while chewing its leaves, and accompany a horse or mule for days together up hill and down, and through the deepest sand, with scarcely any other refreshment than chewing coca. Its effects are said to be truly surprising. Tea or a decoction of the leaves of this plant is a most wholesome, refreshing, and agreeable beverage. Tobacco is cultivated the whole length of the Hullaga, and yields magnificent crops, part of which is exported to Brazil. Cotton grows almost spontaneously in the neighbourhood of the houses, and serves the inhabitants; gray shirting is an article of exchange in this province. Coffee grows with extraordinary luxuriance, the branches being borne down with the weight of the numerous berries. The population of the province of Loreto, counting all the Indians reduced or submitted to the Government, is about 50,000, and there are 90,000 or 40,000 savages. Its commerce is yet in its infancy; the exports are almost wholly by the Amazon, the imports chiefly from the Pacific ports, owing to Brazilian import duties. In Moyobamba, the capital of Loreto, more than 3,000 women are occupied in spinning cotton, the clews or balls of which are current money. The Amazon, the Ucayali, and the Pachitea are navigable for a great distance. So stupendous is the mass of water which the monarch of rivers bears to the Atlantic Ocean that it exceeds that of eight great rivers of Asia, put together—namely, the Euphrates, Indus, Ganges, Oby Lena, Amur, Yellow River, and the Yang-tse in China. So deep is it, at least in its upper part, that no bottom has been found at a depth of 721 feet. Its declivity is so imperceptible and slow that were not its volumes of water so powerful, it would with difficulty flow. Scarcely is its descent in the space of 200 leagues 10½ feet—that is to say, 1-27th of an inch in 1,000 feet. From the Atlantic, as far as Jaen de Bracamoros—latitude 5 deg. 30 min. and longitude 75 deg. 40 min. west of Paris—it has no cataracts or currents which impede navigation. At that place its surface is 1,240 feet above the level at Para. The affluents of the Amazon form among themselves tens of thousands of leagues of navigable rivers, an immense net covering more than two-thirds of South America.

Charges at a St. Petersburg Restaurant.—A curious international case has just been decided by the Civil Court of the Seine. The plaintiff, one Vavasseur, is a Frenchman, settled at St. Petersburg, where he keeps the well-known restaurant Devaux; the defendant is a young Russian named Bazylewski, who had not only run up extravagant bills at his house, but borrowed money to the extent of £600 or £700. Bazylewski came to Paris, forgetting all about a bill of exchange he had given to Vavasseur, who quietly transferred the bill, and had his Russian client lodged in Clichy. The defendant admitted having borrowed money, but demurred to the "little account for suppers, &c." From M. Vavasseur's books, which were produced, it would appear that a dinner at Devaux's must be rather expensive. I subjoin a few items:—Supper and breakage, 470f. 40c.; 16th, supper for sixteen persons, with breakage 1,386f.; 19th, supper for fourteen persons, wines, and breakage, 1,092f. 80c.; July 7th, breakfast and breakage, 840f.; 15th, supper for twelve persons, 1,011f. 20c. The counsel for the defendant denounced these charges as an enormous imposition, and the Tribunal seemed to entertain the same opinion, for it declared that the plaintiff had not made good his additional claim, and gave a judgment condemning the defendant to pay the sum of 17,140f. only, at the same time fixing the term of imprisonment at eighteen months, in case of non-payment. I may add, that this Russian Lucullus is only twenty-two. It did not appear that he had been sued at home.

The "Royal Alfred."—In the launch of this frigate, which took place at Portsmouth on Saturday, the Admiralty have sent afloat another vessel that, when she has been clothed with her armour and fitted with her machinery, may be added to the list of England's ironclad fleet, and become one of the total number which now comprises some nine or ten descriptions of vessels varying in all the extremes of tonnage, speed, and mode of construction, which now form our somewhat heterogeneous collection of ironclads. The *Royal Alfred* is one of the Prince Consort and Royal Oak class, their frames designed and prepared as 92-gun screw line-of-battle ships, but afterwards cut down to a frigate's battery, altered in form at the bow and stern, and strengthened considerably in every part to carry the weight of 4½in. armour plating. The *Royal Alfred* was ordered to be built as a line-of-battle ship in October, 1859, of the following general dimensions:—Length between perpendiculars, 252ft.; length of keel for tonnage, 213ft. 9½in.; breadth extreme, 58ft.; breadth for tonnage, 57ft. 2in.; breadth moulded, 56ft. 4in.; depth in hold, 19ft. 10in.; burden in tons, 3,715 62-94.

Her Majesty's iron-clad frigate *Lord Clyde* has been launched. The *Lord Clyde* is a wooden ship, but plated completely round from stem to stern above her water-line with plates of enormous size and thickness. Hitherto all our vessels of war have been built with the great heavy rounded stem above the water, while every portion of the bow below the water has been sloped away, the consequence of which, as may be readily understood, is that all ships built on that principle plunge about in anything like a sea—a defect nowhere more observable than in the *Warrior* and others of the iron-clad fleet. In addition to this protruding bow, which is to be armed with a powerful cleaver-shaped steel weapon for cutting down any hostile ship, the designer of the *Lord Clyde* has carried the bow considerably beyond the upper deck, and this will be encased in armour throughout in order to contain a battery of four of the heaviest guns for firing right ahead.

The Anglo-Indian, China, and Australian Telegraph.—Sir Charles Bright, in a letter to *The Times*, states that in a few weeks will be completed another route from England to India, through Russia, by way of Tiflis to Teheran, thence to Ispahan, and Shiraz, and joining the Persian Gulf cable at Bushire. The Indian telegraphs are now advanced eastwards as far as Rangoon, and the routes thence to China and to Australia, by way of Singapore, Java, and Timor, are almost entirely in comparatively shallow water, so far as the submarine part of the line is concerned, and do not otherwise offer any difficulty which should prevent our having daily telegrams from Hong Kong, Melbourne, Sydney, Adelaide, and Brisbane, within three years from this day.

The Russian Telegraph Line.—The first working party connected with Captain Buckley's great expedition for the construction of the Russian and American Telegraph line left New York on the steamer *Golden Rule* for San Francisco, via Nicaragua. The party consists of Mr. Conway, telegraphic engineer, and a number of assistants, who, under the directions of Captain Buckley, will proceed to various points in British Columbia to make the necessary surveys preparatory to more active operations next spring.

The Straits Military Question.—The *Army and Navy Gazette* says:—"It is said that two more native corps are to be struck off the strength of the Madras establishment, as the Straits will hereafter be garrisoned by Europeans." We may add, what is the meaning of this? Garrison the Straits with Europeans at the expense of the Straits revenues! The thing is monstrous. The leaders of the "Straits Transfer" must not allow the change without protest. In any case they can obtain the same compromise that has been decided for Hong Kong, viz., pay one fifth of the cost of the garrison.

The Troopship "Tamar" for China.—The *Tamar* screw troopship, Capt. Stirling, sailed from Portsmouth on the 15th inst. on a long period of foreign troop service. This will comprise the transport of the 86th Regiment from Ireland to Gibraltar; the 2nd battalion of the 9th Regiment from Gibraltar to China; the 67th Regiment from China to the Cape of Good Hope; the 2nd battalion of the 11th Regiment from the Cape to China; and, should her services then not be required otherwise, the conveyance of the 99th Regiment from China to England.

Reception of English Volunteers at Brussels.—The *Independent Belge* thus describes the hearty reception given to the English volunteers who had crossed over to take part in the Brussels *fetes*:—"At 10 in the morning a battalion of the chasseurs-eclaireurs, accompanied by their band, and bearing with them the old colours of 1830, repaired to the Northern Station, where they awaited the arrival of the riflemen and the chasseurs-eclaireurs, who were to come from Antwerp, Bruges, Ghent, Liege, Louvain, and Tourain. After a short welcome, the column, increased by these new elements, re-formed, the riflemen, divided into companies, taking their place immediately behind the standard-bearers, and proceeded to the Hotel de Ville. Here the riflemen and the captains of the different detatchments were received by M. Anspach, the burgomaster, who addressed the English volunteers in a speech of welcome, the effect of which was the greater as it was spoken in their own language. This reception over, the column marched on to the Salle d'Orient, where a *dejeuner* of 400 covers had been prepared, under the superintendence of the Brussels chasseurs. The room, decorated afresh, and entirely transformed, presented an admirable *coup d'œil*. At the lower end the bust of the King and the portrait of the Queen of England, surrounded with garlands and green, showed the international character of the solemnity; whilst the British and Belgian flags crossed served to give the *fete* a patriotic significance. At the moment the riflemen entered the band of the chasseurs struck up "God Save the Queen." The *dejeuner* passed in an atmosphere of fraternity and enthusiasm. Major de l'Eau, the commander of the chasseurs-eclaireurs of Brussels, made an eloquent speech to the guests, both native and foreign, and expressed the pleasure which this fraternal meeting gave him—a pleasure increased still more by the presence of the representatives of a nation whose institutions were so closely allied with those of Belgium. He further remarked on what Belgium owed to England—the initiative in the practice of constitutional liberty—and on the feeling of admiration which that patriotic *elan* whence sprang the volunteer movement had excited throughout Europe. M. de l'Eau concluded by proposing the health of England and her Queen, which loyal toast was drunk with enthusiasm. The captain of the riflemen returned thanks, proposing in his turn the health of King Leopold and Belgium, a toast which gave rise to fresh storms of shouts and hurrahs. Other toasts succeeded, and at last—some English ladies having accompanied their husbands to this *fete*—a lieutenant of the Brussels Chasseurs proposed the health of the ladies, conforming thus to an English custom, the observance of which appeared greatly to please our guests. One of the ladies present, encouraged by her husband, a Volunteer officer, responded with a charming grace, heightened by a little natural timidity. The banquet finished, the chasseurs and riflemen re-formed, and marched off to where the national shooting was to take place. Before separating from their new friends, the chasseurs received an assurance from them that, next year, the British contingent should be much stronger, and that they would not forget in London the spontaneous feeling of brotherhood exhibited by Brussels. May this promise be realised."

American Blockade.—Halifax, Sept. 22.—The blockade runners the *Lady Sterling* and the *Armstrong*, cleared for Bermuda yesterday. The *Little Hattie*, which sailed a few days since, returned to-day. Havannah, Sept. 17.—The *Denbigh* arrived on the 15th from Galveston, and the *Susanna*, on the 12th, five days from Houston. The latter started with 325 bales of cotton, but reached this port with only 73, having thrown the balance overboard to facilitate her escape from a Federal cruiser off Cape San Antonio. The Federal steamer *Honeysuckle* reports the capture of the *Matagorda* (formerly the *Alice*), with 600 bales of cotton, and the arrival of the prize at Key West. The *Matagorda* was from Galveston for this port.

MELANCHOLY DEATH OF MR. GIBBS.

On Monday night the 10th inst. Mr. W. Carter, the coroner for Surrey, held a lengthened inquiry at the Wheatsheaf Tavern, Upper Tooting, on the body of Mr. Richard Gibbs, aged 74, for upwards of half a century one of the largest tea brokers and merchants in the city of London, who met with his death under the following melancholy circumstances.

Mr. Bonner appeared to watch the proceedings for the relatives of the deceased. The deceased gentleman was highly esteemed, and both in the city and in the neighbourhood of his residence, Elmwood, Tooting, he was most charitable to the poor. The jury, which was composed of the gentry of the district, having viewed the body of the lamented gentleman, which lay at the mansion, and the cistern into which he had fallen and perished, the following evidence was taken:—

Sarah Barton said: I was in the service of the late Mr. Gibbs, at Elmwood. It was my usual custom every morning to take water into his bedroom for him to use. I did so on Friday morning at half-past seven o'clock. I expected to see him in the room. He was not there, and I thought he had gone to the closet. Mrs. Gibbs was in bed, and she asked me what I was going to give Mr. Gibbs for his breakfast. I put the jug of water down and left the room. I came up again at a quarter-past eight with his tea to his bedroom, as it was my custom to do. I found that he had not returned to the room. My mistress became alarmed, and flew out of bed, and we commenced to search for him. We tried all the doors and found them right. A fellow-servant called my attention to a sliding door of a small apartment which contains a tank, on the second flight of stairs in the house. I was surprised to see the door open, and on looking up I saw my master's feet on the edge of the cistern. I knew it was his feet by his stockings. I screamed out that my master was in the cistern, and the footman and other assistance came, and he was got out. He was lying with his face downwards in the tank. He only had on his nightshirt, flannel drawers, and dressing-gown, and his clothes were wet. He was quite dead.

Coroner: Can you account for his being found in the cistern?—Witness: No, I cannot; except that he went to the water-closet and found that water would not flow through the valve, he might have gone to the cistern and endeavoured to remedy the defect, and by so doing overbalanced himself and fallen in. I have known him do that some short time ago. He could easily have got up from the stairs to the framework which supports the tank. The top of the tank is about 2½ft. from the stairs, and the depth inside is 5ft. I don't think anyone put him there, and I think it very improbable that he intended to throw himself in. I last saw him alive at half-past ten on the previous evening, and he was cheerful and happy. He had been to the City on the day previous, and he brought a little medicine from town. He said he thought he was not so well.

By the Coroner: He had left a memorandum, written in pencil, in his room. It was to the following effect:—"Brown, go at once for the cravats." He was a master who did not wish to give much trouble to his servants, and if he found the valve wrong in the closet he was very likely to attempt to remedy it at once without calling for the servants.

Alfred Prior, the footman, spoke to having got the deceased out of the cistern. Saw the deceased on the previous evening, and did not notice any change or peculiarity in his manner. He lived on very happy terms with his wife, and he was a very good master. If he could not have got any water in the closet, witness thought it very likely that he might have gone to the tank and endeavoured to reach the valve or the place out of order.

Mr. William Weston said the deceased gentleman was his senior partner, and they carried on the business of tea brokers at 24, Rood-lane, Fenchurch-street. He was 74 years of age.

Coroner: Do you think it likely that he was put in the cistern by anyone?

Witness: No, I do not. He was a very powerful man, and no two men could have put him in the well against his will.

Coroner: You know of nothing that could have operated on his mind—no pecuniary difficulties?

Witness: Most certainly not. He was in very affluent circumstances, and I know of nothing in business matters that could in any way affect his mind. I saw him in the city on the previous day (Thursday). He complained of a palpitation of the heart when he awoke, and he had consulted Dr. Sewell.

Coroner: How do you account for his body being found in the tank? Witness: I believe, as stated, that he had attempted to adjust something in the cistern to make the water flow, when he overbalanced himself and fell in. He was an active, energetic person, and if he found anything wrong he was just likely to go at once with a view of putting it right without troubling the servants. He has done so at our late place of business in White Hart-court. He was the last man, I should think, who would take his own life.

The jury, after a brief deliberation, returned a verdict to the effect "That the deceased had accidentally fallen into the cistern, and was suffocated and drowned."

Naval and Military.

THE CHINA MEDAL.

(To the Editor of the *Army and Navy Gazette*.)

Sir,—In 1862, a British force, consisting of some Artillery, the 31st and 67th Regiments, two companies of the 99th Foot, the 5th Bengal Native Infantry, the 22nd Punjaubees, and some 400 or 500 blue-jackets and marines; together with an equal force of the French (chasseurs, zephyrs, and marines), the Franco-Chinese, and the Ward Contingents, were employed in the vicinity of Shanghai against the Taiping rebels, with whom engagements took place at Cheapo and Nai-hsain in April, Kah-ding, Nai-hsain (2nd), Tsingpoo, Naijao, and Tso-lin May, Tsingpoo (2nd), in June, and Kah-ding (2nd), in October of that year; resulting, on each occasion, in severe loss to the Chang-mous, and in small loss to the allies, this latter being the result of the skilful disposition of the allied troops, and the patient and very effective use made of their artillery, the maxim of the commanders-in-chief being "Forty shells before one man." It is now two years since these operations terminated, and, as yet, "no sign" has been made by the authorities of bestowing an additional clasp for these services upon those of the combatants (that is, the British ones) who are already in the possession of the China medal, or of extending the grants of the medal to those who, like myself, were detatched at Hong Kong during the successful "raid upon Peking" in 1860, or upon those who arrived, as the reinforcements did (which left England in July, 1860), too late to participate in the glories of Tung-ku and Sin-ho, or even in the loot at Hoo si-woo, or Yuen-ming-yuen. It may be objected by some that the services rendered by the troops, under Brigadier-General Staveley, C.B., the Navy, under Sir J. Hope, K.C.B., and by the French, under the late lamented Admiral Protet, were not of that importance to justify the grant of a medal or clasp to those concerned. But let those who so object reflect but for a moment that an immense, rapidly increasing, and wealthy city, the trade of which is alone worth, to England, the colonies, and America—more than £17,000,000 sterling annually—was threatened with devastation by the merciless hordes of the Tien-Wang, whose "heavenly children" already possessed nearly the whole province, and those adjacent to it, and an impartial verdict, in favour of the decoration, will be the conclusion arrived at. The General Order dated in 1861, promulgating the bestowing of the China medal upon those who were engaged in 1857, '58, '59, and '60, needs only to be extended so as to embrace 1862, and the desired effect will be attained. Perhaps his Royal Highness the Field-Marshal Commanding-in-Chief is awaiting the outbreak and subsequent conclusion of a fourth China war, when all who will have been actively employed in that country since the end of the third war will be included in a comprehensive and gracious General Order. If so, the sooner the Celestials pluck out, hair by hair, the bushy beard, or spitefully and politically tweak the respectable nasal organ of his Excellency Sir F. Bruce, K.C.B., or commit some other equally internationally heinous offence, culminating in hostilities, and terminating in peace and the publication of the aforesaid graicous and comprehensive General Order, the better for us who are still

UNDECORE.

Her Majesty's sailing frigate Amethyst, 26, attached to the reserve at Chatham, which has been lent by the Admiralty to the Atlantic Telegraph Company to receive on board the Atlantic telegraph cable, for conveyauce to the Great Eastern steamship, in the Medway, left Chatham harbour, in tow of a private steamer, and without an Admiralty pilot, for the works o the company at Greenwich. There the first portion of the cable will be shipped, and conveyed to the Great Eastern. The consequence of allowing one of Her Majesty's ships to leave Chatham without the customary Queen's pilot on board, was that soon after the vessel had got clear of the harbour those in charge of her ran her ashore on one of the numerous shoals at Gillingham Reach, at the entrance to the harbour. No one in charge seemed to be aware of the intricacies of the navigation of the river at that spot, although these are perfectly familiar to the duly authorised Government pilots accustomed to the navigation of ships of war to and from Chatham. All attempts to tug the vessel off the bank on which she had grounded proved fruitless, and with a strong ebb tide under the bottom she soon settled down, straining herself, it is believed, very severely. At flood tide in the evening she was floated off, but the extent of the injury she has sustained, which, it is hoped, is not serious, cannot be fully ascertained until the frigate shall have been docked. The explanation given by the dockyard officials is that the vessel, having been handed over for temporary use to the Telegraph Company, they had virtually no further control over her subsequent movements.

The Vulcan, iron screw troopship, Captain Augustus C. Strode, arrived at Spithead on the 12th inst. from the East India and China station. She sailed from Hong Kong June 9; Singapore, June 23; and Mauritius, July 19. She arrived at the Cape of Good Hope on the 9th of August, and sailed thence on the 22nd August. She arrived at St. Vincent's on the 20th of September, and sailed again on the 22nd. She arrived at Madeira on the 30th of September, and sailed again on the 1st of October. Her Majesty's ship Ringdove, Commander Liardet, sailed from the Cape of Good Hope for England on the 18th of August. The Vulcan experienced very strong easterly winds from Madeira to the Isle of Wight. She had on board the following naval passengers:—Commander Belson, Conqueror, promoted; Lieutenant Denham, Havoc; G. C. C. Carter, Sub-Lieut., Valorous; and Lieut. Leeds R. M. A., Scylla, invalided; and ninety-two invalids. There died on the passage two naval and seven military invalids, and two children. There were two births. The following were her military passengers:—From Hong Kong: Major Stehelin, 67th Regiment; Lieut. Clements and Lieut. Maud, Royal Engineers; Lieut. Harvey, 99th Regiment; Rev. G. Wylde, Chaplain to Forces; Mrs. Wylde, Mrs. Stehelin, and Mrs. Thwaites. From Singapore: Captain Sanders, Madras Native Infantry, and Mrs. Sanders. From the Cape: Captain Marshall, 76th Regiment; Lieut. M'Kinlay; Lieut. Brome, and Lieut. Legge, 5th Regiment; Lieut. Salis, Military Train; Ensign King, 10th Regiment; 208 troops of various detatchments, time-expired men and invalids; five women and nine children.

The Whitworth guns, Storms's breech-loading rifles, shot, shell, sword-bayonets, and other warlike stores, recently supplied to the European Chinese force, and which have been brought back to this country, were sold by auction in London, and attracted a numerous attendance, amongst those present being agents from the Confederate and Federal States, who made large purchases on account of their respective Governments. The Whitworth 32-pounder rifle guns, with carriage, &c., complete, which cost £460 each, sold from £50 to £120 each; the 12-pounders, which cost £225 each, sold from £25 to £39 each; and the 1-pounders, which cost £111, from £8 to £12. The Storms's breech-loading rifles sold for merely nominal prices, and the shot, shell, &c. did not realise the value of the metal.

The Birkenhead "steam-rams," which have been re-named the Scorpion and the Wivern, now figure in the official Navy List. They are described as iron-cased cupola ships—each of 1,857 tons, and designed to carry four guns. The only other turret ship we have afloat is the Royal

Digitized by Google

Sovereign, which has just been laid up at Portsmouth after a singularly brief probation.

The Rev. H. Huleat, formerly in China, who during thepast three years has occupied the office of principal chaplain to the forces at Aldershott, has been transferred to Hounslow, to succeed the Rev. Mr. Hodges, appointed to the principal chaplaincy of Aldershott.

The iron screw troop-ship Urgent, Captain Samuel H. Henderson, arrived in Portsmouth Harbour from Quebec and St. John's, Newfoundland, with the second battalion of Scots Fusilier Guards on board, under the command of Colonel Stephenson. The Guards consist of 550 officers and men, and there are also on board 120 women and children belonging to the regiment. The troops took train for London from the dockyard.

The paddlewheel steam sloop Centaur, 6, is now at Keyham-yard, where her engines and machinery of 450-horse power will be taken out. She will then be conveyed to Devonport dockyard, where a number of labourers have just been entered for the purpose of breaking her up. The Centaur was built at Portsmouth in 1845, on lines laid down by Sir William Symonds, and was for many years in service in China. Her burden is 1,270 tons. She is 200ft. long, 37ft. broad, and 23ft. deep.

CONSULAR REPORTS.

The following reports have been received at the Foreign-office *via* Peking. In publishing the reports from Japan about two months since we noticed the absence of those from China, and it is now accounted for by their having gone to Peking for transmission to England. This appears to us a very unnecessary delay. It is of course quite proper that our Ambassador should be informed on all matters, but a copy of the report forwarded to the Embassy while the originals are on their way to England would be more rational. We are not rabid anti-redtapists, as a great deal is necessary to keep things from running counter, but we do not see that any risk can be run in this case. The first report we have to notice is from the senior Consul, D. B. Robertson, Esq., Canton, and considering that he is at a port which is very generally considered to have outlived its trade, we think a very fair statement is made out. Mr. Robertson thus premises the report of trade:—

THE FOREIGN TRADE AT CANTON.

These returns, like those of the preceding year, have been compiled from the Custom-house reports, and in so far may be considered as correct; but they must not be assumed as representing the actual trade of this portion of the Chinese Empire, from the fact that a very large business in foreign manufactures and opium is done at the British colony of Hong Kong, and the goods and produce there purchased are conveyed chiefly down the coast, and being landed at the numerous towns, or carried up the rivers, find their way into the interior in all directions. To obtain, therefore, a true estimate of the amount and value of foreign trade with this part of China would require returns from all these various places, which is simply impossible. The position may be shown in a very few words. On a coast line of nearly 700 miles, studded with bays, harbours, cities, and towns, and with rivers, such as that called the West River, penetrating far into the interior, there is one treaty port, Canton, and an open and free mart, the colony of Hong Kong. It is but reasonable, therefore, that if Chinese traders can purchase goods at Hong Kong, and land them on the coast, they will not pass them through the foreign Custom-house at Canton, but will ship them direct to their destination. The same may be said with regard to exports from these places. Hence it follows that no estimate can be formed of the foreign trade in this part of China from the published Canton Custom-house returns, for they represent a local trade only. A comparison of the returns of the past with the preceding year will show a decrease generally in the trade of the port, but by no means to the extent anticipated.

IMPORTS.

The total value in sterling for the year 1863 is estimated at £2,281,354 against £2,412,515 in 1862, showing a decrease amounting to the sum of £131,161 in the past year's trade. As regards the causes of this decrease, the falling off must be attributed as much to failure in supply as to failure in demand, the rise in piece goods, owing to the American supply of raw cotton ceasing, having brought the foreign into competition with the native manufactures, and as the Chinese prefer the latter, from being heavier and of more lasting qualities, they abandon the former the moment its price places it beyond the denomination of being a cheap article for clothing. Compare, for instance, the imports of cotton manufactured goods for the two preceding years:—

		1862.		1863.
American drills	pieces	30,965	..	2,196
Shirtings, grey	„	126,529	..	48,829
Ditto white	„	49,788	..	44,695
T-cloths, 36 yards	„	4,570	..	6,055
Ditto 24 „	„	20,601	..	28,802
Cottons dyed—				
Figured, plain	„	21,627	..	20,100
Damasks	„	3,667	..	3,006
Printed	„	11,382	..	15,812
Muslins	„	510	..	1,984
Handkerchiefs	dozens	28,057	..	27,121
Velveteens	pieces	1,711	..	4,813
Cotton velvets	„	1,060	..	2,625
Yarn	piculs	20,334	..	14,819
Cotton, Bombay raw	„	35,928	..	488

and a large deficiency in plain goods will appear, and particularly in the article of Bombay raw cotton, whilst in fancy goods the difference is rather in favour of 1863. This latter may be accounted for in the heavy stocks on the manufacturer's hands, which rendered their going off beneficial to the holders, and therefore the prices were not affected in a ratio proportionate to that of the plain manufactures. But take the imports of woollen manufactures—

		1862.		1863.
Blankets	pairs	3,510	..	3,849
Broad cloths	pieces	157	..	148
Camlets, English	„	3,993	..	4,331
Do. Dutch	„	610	..	697
Do. imitation	„	644	..	1,761
Habit and medium cloth	„	566	..	1,496
Flannels	„	271	..	352
Lastings	„	3,441	..	4,641
Long ells	„	8,660	..	11,863
Sp. stripes	„	9,007	..	7,448
Woollen and cotton mixtures	„	8,769	..	5,769

It will be seen that the balance is in favour generally for 1863, and this arises from the fact that wool has not been subjected to the fluctuations of raw cotton, or deficiency in supply, and therefore, if anything, there has been an improvement, and not a deficiency, in this branch of the import trade. The result of these comparisons tends to show that the decrease in the value of the import trade of 1863, namely, £131,161, is owing as much to foreign as to native influences; and that, under such circumstances, the past two or three years will afford no criterion of the capabilities of Canton as a mart for foreign manufactures. The import of opium in 1863, as compared with 1862, differs in amount but little. The temptation to smuggle so valuable an article, and the facilities the coast affords for that purpose are so great that in all probability what passes through the Canton Custom-house is for local consumption only, and so it will be until the Chinese authorities establish a preventive service.

EXPORTS.

The value of the export trade may be taken at £3,862,039, against £4,060,746 in 1862, showing a decrease of £198,707. This may chiefly be attributed to the short supplies of teas, the export of 1863 being less than in 1862 by at least 7,418,890lb.; but less though it be, it is more than was anticipated, the opinion being at the close of last season that little or no teas would come again to Canton. But notwithstanding this, not only did they come down, but the teamen held out for high rates, and generally obtained them. As regards silk, the export of the two years, 1862-63, is much on a par. Of a trade stationary as this is there is little to be said. Hong Kong is, doubtless, a formidable rival to Canton, because, as before observed, it is a free port, and a depot for the neighbouring coast of China; but Hong Kong produces nothing and consumes nothing, and it is to the interior provinces we must look for both. At present the disordered state of the empire paralyses its capabilities, and the necessity of raising a revenue to meet its war expenditure presses heavily on the people; but it is to be hoped, and, indeed, there is every prospect of an improvement in this state of affairs, and with internal peace will come a development of those mercantile energies which are now only in abeyance and not extinguished. For, seeing that the province of Kwan-tung alone comprises an area of seventy-nine thousand four hundred and fifty-six square miles, with a population of about twenty millions; the adjoining one of Kwang-si, seventy-eight thousand two hundred and fifty square miles, with a population of above eight millions; Sze-chum, bordering on the latter, one hundred and sixty-six thousand eight hundred square miles, and a population of twenty-two millions; and Hu-nan, immediately adjoining that of Kwang-tung, seventy-four thousand three hundred and twenty square miles, with a population of nineteen millions, showing a total of three hundred and ninety-eight thousand eight hundred and twenty-six square miles, and a population of sixty-nine millions of inhabitants, it may be safely assumed that our trade with these alone, independent of the other portions of this vast empire, is as yet undeveloped, and their capabilities of production and consumption unknown. It is true that the ports of Hankow and Foo-Chow have withdrawn from that of Canton the chief trade in teas, and on the other hand foreign events have swept away from it the great trade in raw cotton which formerly existed; but Canton has seen its worst, and what it is this year it will probably be next, neither better nor worse, unless peace in the west and peace in the empire follow, and then indeed there is a hopeful future before it, rich in promises and certain in results.—D. B. Robertson, Her Britannic Majesty's Consul.

British Consulate, Canton, June 20, 1864.

The tabular statement of shipping shows that 110 British vessels arrived at Canton, chiefly from Hong Kong, of an aggregate tonnage of 48,215 tons, and the departures consisted of 25 vessels of 15,244 tons to Great Britain, and 62 to Kong Kong, &c., of 32,239 tons. The arrivals from the ports in China, Manila, &c., consisted of 117 vessels of 49,960 tons, and the departures 113, of 60,402 tons. The total number of British and foreign vessels entered inwards from all ports was 867, of 300,520 tons, and the same number cleared out.

KIUKIANG.

Report by Mr. Vice-Consul Hughes, on the Trade of Kiukiang during 1863:—

SHIPPING AND NAVIGATION.

The year opened with favourable prospects for river steamers of a desirable class, there being few such vessels running at the time, and cargo offering freely. The rate of freight to Shanghai, during January and February, ranged from 7 taels to 9 taels per ton of 40 cubic feet, but during March, in consequence of lighter shipments, it fell to 4 taels. After that period, steamers of large carrying capacity were continually arriving from America, and these additions to the tonnage on the river led to farther reduction in rates. Accordingly, during the closing months of the year the rate varied from 2 taels to 2½ taels and 3 taels per ton. The preference for vessels built after the model of American river steamers is still manifested. The peculiar fitness of these boats for river work, to which reference was made in my report of last year, becomes daily more apparent.

Digitized by Google

So far as steamers are concerned, the English flag is now represented by only two vessels, one of which, the "Fusi-Yama," was built in Shanghai, but had her boilers, machinery, and fittings sent from America; the other, the "Express," was built in Glasgow, partly at least after the American model. The tonnage of British and American vessels which arrived at Kiukiang during the year 1863, amounted to 348,347 tons. There were also a few native-built boats under the French flag.

EXPORTS.

TEA.—The quantity of black tea exported during the year 1863, considerably exceeds that of the previous year. This increase does not arise from the growth of larger crops, but from the diversion from Hankow of teas grown in districts more easily accessible from this port. When the river was first opened to trade, the teas were sent to Hankow, because a greater number of foreign buyers were at that place, and in consequence it presented a larger market to the native dealers. The increase of resident merchants in Kuikiang has in turn attracted the teas to their natural port. It may reasonably be expected, that the Ninchow teas, for instance, will hereafter almost invariably find their way to Kuikiang, as also some of the tea which, though grown in the province of Hoopek (Oopak), is produced in districts easily accessible from this port. The crop of green tea is smaller this season (1863-64) than last. This result is attributable in part to unfavourable wheather during the packing season, but mainly to inroads of rebels from cities around Nanking into the Hwng-chow (Fychow) tea districts, which led to the destruction of a large quantity of leaf, and, in some instances, to the abandonment of extensive tracts covered with trees, until it was too late to pack the tea for this season. Compared with the tea season June, 1862, to June, 1863, it is expected that the season ended June, 1864, will shown a falling off, and this expectation has tended to raise prices; on the other hand, the export of the year, ending 31st December, 1863, exceeds that of 1862.

The following statement has been supplied by the gentleman in charge of the Chinese Customs at this port:—

AMOUNT OF TEA EXPORTED TO SHANGHAI DURING 1863.

Description.	In British vessels. lbs.	In American vessels. lbs.	Total. lbs.
Green	5,034,965 ..	10,689,149 ..	15,724,114
Black	4,903,728 ..	4,914,880 ..	9,818,608
Leaf	278,550 ..	606,684 ..	885,234
Total ..	10,217,243 ..	16,210,713 ..	26,427,956

Last year (1862) there were no foreigners engaged in the collection of the duties, and it was difficult to obtain accurate returns; the approximate estimate given in my report for 1862, I have since had reason to believe erred on the side of excess, so that the increase on the export of tea in 1863, as compared with 1862, may be safely set down as not less than five millions of pounds. Of the three kinds of tea enumerated, the black and green teas are intended for export to foreign countries from Shanghai, while the leaf is chiefly used for native consumption.

Paper continued to be largely exported during 1863. From the proximity of this place to the pottery districts, chinaware will always be one of its staple articles of trade. Hemp, tobacco, tallow, and dye colours are among the miscellaneous products frequently shipped to Shanghai. As the Customs' Returns, when completed, will furnish accurate statistics, merely approximate estimates need not now be given.

IMPORTS.

Upwards of 2,000 chests of Malwa opium were imported during 1863; transactions in cotton goods have been very unsatisfactory, in consequence of the extreme range of prices demanded by foreign merchants. In the beginning of the year, grey shirtings were quoted at 3 taels, they are now at 3 9-10ths per piece. But, in fact, the country surrounding Kuikiang, is still too poor to be a good market for foreign goods; it is only just commencing to recover from the devastations of the rebels, and of the Imperialist braves who infested this neighbourhood a few years since.

During the first six months of the year the imports of grey shirtings were:—

In English vessels	34,004 pieces.
In American „	34,882 „
	68,886

During the last six months none, it is believed, were imported in British vessels, and not much more than 13,000 pieces in American vessels. The falling off in the import of grey shirtings and other cotton manufactures, during the last half of the year, is attributable, in part, to the better position of the Shanghai market, and partly also to the greater demand which always exists for these goods during the spring and summer. The import trade in coast and Japanese products, such as sugar, seaweed, &c., is also increasing. Copper cash continued to be largely imported; the amount imported in 1863, in vessels under foreign flags, cannot have fallen far short of 2,500 tons weight.

CURRENCY, &c.—The tael weight of silver is the standard of value in commercial transactions here as elsewhere in China; dollars are not in favour. At present 95 43-100 Kiukiang taels are equal to 100 Shanghai taels; the taels used in the purchase of land is 2½ per cent. more than that used in ordinary commerce, and the Government tael, in which duties are paid, is of still higher value; 100 taels are equal to 106 31-100.

GENERAL REMARKS.

The total amount of duties received during 1863, at the Chinese Custom-house, under foreign management, is taels 868,747·173, which, at 7s. per tael, equal £304,061. 10s. 3d. The import duties, it may be remarked, are usually paid in Shanghai.

The general business of the port has greatly increased during the year. Ten British and three American firms have branch establishments here, and in addition there are three British local firms. Several large houses, godowns, &c., have been built within the British concession. The Chinese city and suburbs have also undergone a great change; numbers of handsome shops have been erected, and the Canton storekeepers, of whom several have established themselves, are doing some good to trade by popularising the taste for articles of foreign manufacture. The chief obstacles of development of foreign commerce offered by the Chinese authorities are their failure to carry out the Tariff Regulation respecting trade in the interior under transit passes, and their unwillingness to open the Poyang Lake.

With regard to the first of these obstacles, it is found that the authorities of the province of Hoopek, do not recognise passes issued in this province; consequently a merchant has to pay all local dues as if his produce belonged to a native, and applications have in vain been made to the Chinese authorities for a refund of the amount paid in excess of legal transit duty. Worse than this is the case in this province, and in that of Ganhwuy, where the passes are recognised, but before the tea is allowed to be put into the junks to be conveyed to Kiukiang from the tea districts, a tax of taels $1\frac{25}{100}$ per picul in some cases, in others of taels $1\frac{4}{10}$ is levied ostensibly upon the native dealer, but really on the foreign merchant, who has also to pay the transit duty of taels $1\frac{25}{100}$ per picul on the arrival of the tea at Kiukiang. The treaty transit passes are now practically abolished, as the merchant finds it his interest to have the tea brought from the place of production as Chinese property, or to give up trade in the interior altogether, and purchase produce at the ports of trade. Practically this state of things works well enough at present, but the objections to it are that it leave merchants to some extent at the mercy of the mandarins, and does away with the protection provided by treaty against extortionate charges in the interior upon goods belonging to British subjects.

Endeavours have been made by private individuals to induce the Chinese authorities to consent to the employment of steamers on the Poyang Lake, but without effect. There is no doubt but that the measure would be attended with the most beneficial results. The shallowness of the greater portion of the lake, and the narrowness of the navigable channels which traverse it, will always prevent the employment of any but very small steamers, which, though adapted for the short trip between places on the lake and Kiukiang, could not be employed with profit for direct communication with Shanghai. At present, boats laden with tea often remain windbound for weeks in the lake; if permission were given by the authorities, these boats could be towed to Kiukiang in a few hours. Rapid and direct communication with the green tea districts, and the potteries near the south-east border of the lake, and with Woo-ching would confer great benefits upon both the native and foreign trader. Woo-ching is the most important mart for foreign manufactures in this province. It is also the spot at which the Ningchow teas from one direction, and the Hokow teas from another are, when on their way to Kiukiang, transhipped into junks fitted by their size to cross the lake with safety.

The steam navigation of the lake has been noticed as a subject which well deserves attention in connection with the trade. The project which must sooner or later be carried into effect, seems to be the most natural and feasible means of increasing the prosperity of this port.

TAMSUY—FORMOSA.

Mr. Acting Vice-Consul Braune gives the following returns for 1863:—

IMPORTS IN BRITISH VESSELS.

		Value.
Opium	512 chests	$364,544
T-cloths and Shirtings	35 bales	8,650
Long Ells, &c.	—	8,424
Lead	—	1,850
Wood	—	1,500
Bricks and Tiles	20,000*	180,000
Sundries	—	17,284
		$582,262

* This must be an error in value or quantity.

IMPORTS IN FOREIGN VESSELS.

		Value.
Opium	53 chests	$38,690
Cotton Fabrics—Native ..	—	264,672
Foreign Cotton Yarns and Sundries	—	Unknown.

A Register is kept of the addresses of all persons connected with the Far East and reference can be made to the same by personal application at the office, or by letter.

Any information required by Subscribers, in reference to Commercial or General matters in China, Japan, Singapore, *and other parts of the* Far East, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

The London & China Telegraph.

LONDON, MONDAY, OCT. 17, 1864.

THE QUESTION OF "THE INLAND SEA."

The announcement received by telegraph this morning, under date of "Shanghai, Sept. 5," that "it had been determined the fleet at Yokohama should force a passage into the "Inland Sea," seems to follow in a natural order from the intelligence that will be found in our present issue under the head of "Japan." The nations of Europe, with Great Britain in the front, can in no way be accused of rushing hastily into war, or of wantonly outraging the weak, when that decision was come to. So long ago as the 20th July last year, it was resolved, at a formal meeting of the representatives of foreign nations accredited to the Tycoon, that "after discussion it has been agreed on as indispensable, for the maintenance of those rights consecrated by "the treaties concluded with Japan, to proceed immediately to "re-open the Inland Sea." We now know enough of the Island Empire of the Far East to be aware that the control of the Tycoon over the five or six great Daimios is nearly nominal. By himself he can do but little: it is only when the feeling of the other great feudatories is with the Sovereign that he is enabled to undertake the chastisement of one of their number. The arrival of the two Japanese who can testify, from their personal knowledge, to the resistless might of Armstrong guns, may be just in time to save the Prince of Nangato from persisting in his fatal blunder. Our advices state that unless some satisfactory assurance was received from that personage within ten days from the date—say, before the 24th August—an important demonstration would be made. But the two Japanese had intimated that the Inland Sea would be opened within a brief space. Nangato himself evidently has his misgivings; and is determined, it is said, to have the sanction of the Japanese Government for the course he may definitively resolve on. With this view he had despatched a high officer of his Court to Miako, with a stately and enormous retinue, to beg the Emperor's instructions. This envoy was said to be directed to use the utmost despatch in effecting his return, though the number of his suite would be calculated, one might suppose, to produce the very opposite result. Perhaps, indeed, delay may be the object of this embassy, and Nangato will plead for time, on the ground that he is still without orders from his Sovereign. At present, matters must be admitted to be progressing with some degree of regularity. England has no insult on her flag to avenge with a sudden and instant stroke of her thunderbolts. She has but to vindicate a right acquired by treaty. The mere firing across the bow of the *Cormorant* was simply the usual warning for her to proceed no farther, and may amount to nothing more than that Nangato considered the point unsettled. The people of England will certainly be unprepared to hear of any fort being attacked, of any attempt being made to force a passage through the Straits of Simonoseki, till it has been clearly and unmistakably ascertained that the right to pass through them is denied either by the Tycoon or Nangato. If the obstacle is raised by the former, then the war is with Japan as a State, and ships, and shot, and shell should be directed to some more vital aim than this distant strait. If by the latter, then care should be taken, before the blow is struck, to warn him of the consequences, and to let him know that he is to be held responsible, not only in his purse but with his life, for the slaughter he will bring upon his unoffending retainers. A lesson on the sanctity of engagements, and on the consideration due to human life thus enforced, one of their petty tyrants would win for England the respect and love of the unnumbered millions of the Japanese people.

RELATIONS OF THE ROMAN EMPIRE WITH INDIA AND CHINA.

It is surprising how the official and literary mind of France are drawn towards the Far East. The press teems with productions relating to Oriental Asia. In 1863 M. Reinaud, a member of the *Institut* of France, published a volume entitled "Political and Commercial Relations of the Roman Empire with "Oriental Asia during the five first centuries of the Christian "era, derived from Latin, Greek, Arab, Persian, Indian, and "Chinese sources," and now M. A. Pierron, a professor of the Lycée Louis Le Grand, makes M. Reinaud's work the text of an article in the official *Moniteur* on the subject. According to both these writers, and, indeed, all the French *savans* who have touched upon the subject, there existed a regular intercourse between the Roman Empire and Oriental Asia—Professors Lassen, of Bohn; Benjeg, of Gottingen; Charles Muller; A. Wobleer, of Berlin; Spiegel, of Erlangen; and many other eminent scholars are of the same opinion. M. Reinaud believes that the first treaty between the Romans and the Far East dates from the time when Mark Anthony represented Rome in the East, and before the battle of Actium. This is based on the fact that when a Buddhist temple on the banks of the Indus was pulled down by Allard, a French officer in the service of the King of Lahore, in 1830, there were found beneath it several coins of the last years of the Roman Republic, the more recent bearing the heads of Julius Cæsar and Mark Anthony:—"This tower, therefore," says M. Reinaud, "must have been erected between the death of "Julius Cæsar and the definite triumph of Augustus, during "the Eastern Government of Mark Anthony, and was, in fact, "an act of homage to the last-named hero, as well as an evi"dence of the good understanding established between the "two countries." Passages in the second book of Virgil's "Georgies" seem also to support the hypothesis.

The souvenirs of Kanichka, who built the tower alluded to, were fresh in the middle of the seventh century, when Hwuen-Thsang set out from China to visit the shores of the Indus and the Ganges, in order to collect information relative to the traditions of Buddha. It was during the reign of Augustus that the use of silk became known in the West, and that the Greeks and Romans had a name for the people of those lands whence silk came—the *Sères*. Virgil, Horace, and their contemporaries, often speak of the *Sères*. The cultivation of silk is still called *sericiculture*, or *sericulture*, in France.

M. Reinaud says that the Chinese knew nothing of India and Persia, or the latter of the former, till the last century which preceded the Christian era. The Chinese annals speak of the arrival of Chinese armies on the banks of the Jaxarte, between the years 87 to 49 before Christ; and it was some years afterwards that the Chinese began to be spoken of in the West, and the intercourse between the two was almost as rare and as difficult as that between England and the interior of Africa at the present day. The word *sères* has given rise to much discussion; one party supposes it to be compounded from that which signifies *silk* in China; Pansanius says it was derived from the name of the Chinese river *Ser*, which M. Reinaud believes to be the Yellow River, and he adds:—"It "should be known that this (the Hoang-Ho) is in fact the prin"cipal river of China, and, according to the most trustworthy "traditions, the valley which it waters was the cradle of Chinese "civilisation." According to this theory, the word *sères* would represent the inhabitants of the valley of the Hoang-Ho. If M. Reinaud be correct, the origin of the word Chinese is odd enough. Ptolemy used the word Thines, the name of a tribe in India, for that of the Chinese; this became Tchnia, whence our word, China and Chinese. M. Reinaud is now occupied in researches into the relations which existed between Europe and Eastern Asia to the end of the fifteenth century, when the Portuguese appeared in the Indian seas.

Literature.

The book announcements continue to show that the coming publishing season is to be a very busy one; and, as is usually the case, just on the brink of so much novelty, the new appearances of the past fortnight have not been numerous, though by no means deficient in interest. Mr. Consul Burton's *Mission to Gelele, King of Dahomey*, takes us to a part of the world which late incidents have brought once more into the foreground, and we find in it ample confirmation of a tale often

Digitized by Google

told, and as often discredited, that his African Majesty really does possess an Amazonian army. As Captain Burton was made by courtesy the colonel of one of the corps, he devotes considerable space to a detail of everything he learnt concerning this singular institution, which boasts of some antiquity. It appears the total number of these Amazons is now 2,500, of whom the fighting women number 1,700. A very full account is also given of those horrible Customs of Dahomey, a recital of the slaughter and barbarities attending which thrilled through Christendom a few years back. It seems that their horror was greatly magnified, and Captain Burton tenders many grounds of explanation, which, if but palliatives, at least relieve the darkest features of the picture.—Mr. J. E. Gorst's *Maori King; or, the Story of our Quarrel with the Natives of New Zealand*, is a narrative of the difficulties besetting the land question, in which the Maori side of the case is done full justice to. It is clear that we should be able to get along smoothly enough, if it could be discovered to whom the soil really belongs. One tribe has ousted another, turn after turn, till the whole country is one disputed title. *Apropos* to New Zealand, we may notice the *Selection from the Writings and Speeches of John Robert Godley*, who, it will be recollected was the originator of the Canterbury Settlement, and, after returning home, died in 1862 Assistant Under-Secretary of War. The collection bears the impress of the truthfulness, sagacity, and moderation that marked the mind of the author.—Our ancient times have been illustrated by the publication of three most acceptable additions to the public store in Mr Hart's *History and Cartulary of the Monastery St. Peter, Gloucester;* Mr. Cecil Monro's *Letters of Queen Margaret of Anjou and Bishop Beckington;* and Sir Andrew Agnew's contribution to family annals, illustrative of old Scottish Life, entitled *The Agnews of Lochnaw, a History of the Hereditary Sheriffs of Galloway*. The excitement caused in the antiquarian world by the discovery of the Letters of Margaret of Anjou will be divined when we are reminded that a law was passed in the reign of Edward the Fourth which decreed death against persons who might be found in possession of letters, or even of copies of letters, written by the Lancastrian Queen.

In fiction, the fortnight can boast of a work from the pen of one of our most popular novelists, Mrs. Henry Wood. The authoress has expended more than ordinary care on *Lord Oakburn's Daughters*, and has exhibited to advantage her faculty for constructing a strange and painful plot. In her present tale she opens in the old way with her usual dexterity. Ere the reader has got over a fourth of the first volume, the mind is tortured by at least a dozen exciting questions, anyone of which would cause a sleepless night to a sensitive brain.—Mr. C. H. Burton's *Abbots Thorpe; or, the Two Wills*, is ingenious in structure, finished in detail, and amusing, if not extraordinary, in its sketches of life and character, while many of the incidents are very striking. We have two more volumes of the "Select Library of Fiction"—Mrs. Trollope's *Mrs. Mathews*, and Miss Jewsbury's *Marian Withers*. Everything that the former published is worth reading, and though the fiction before us is not one of her best, yet there are so many traits of human weakness and strength developed in the volume under notice, that no one will regret its purchase at the amazingly moderate price of Messrs. Smith and Son's series. The second book named is, on the other hand, perhaps the most enchanting of all Miss Jewsbury's productions. The pages teem with characters, each interesting the reader by some different temperament, and each possessing its own marked individuality. We are treated in one page to a flash of bright genius that reveals the inmost recesses of the heart, and in the next to some epigrammatic reflection on everyday life and occurrences that would set a philosopher thinking, and pique the most careless reader into a moment's pause.

The *Chinese and Japanese Repository* for September opens with "Notes on Corea," by the Rev. Joseph Edkins, recapitulating what is known of a country entirely out of the track of travellers or merchants. "Historical Documents Relative to the Turks" is a Chinese account of all the transactions between the Turks and the Chinese, whether of war or diplomacy, and is but the commencement of an article which promises well. The history of "Takoo, a Chinese Lady of the Second Century," is the biography of a female of remarkable ability, learning, and virtue. The other most important piece in the present number is the conclusion of "The Science of the Chinese—Arithmetic." It seems that even at the present day some of the Chinese are applying themselves with great zeal to the subject of Logarithms, ignorant of the advances that have been made in the West since the days of Napier.—The *British Army and Navy Review* for October is not quite equal to the former numbers. Captain Chesney's "Second Year of Campaigns in Defence of Richmond," however, redeems the shortcomings of the rest of the contents. The "New French Cruisers" is brief but *apropos*. Contributions like "The Re, deemed" should be shut out. The one so designated is beneath the standard of any existing penny perpetrator of weekly balderdash.—*Macmillan's Magazine* for this month has a continuation of its two serials, "The Hillyars and the Burtons," and "A Son of the Soil," and the other papers are fully up to the high standard of this excellent periodical.

Among the announcements of works to be expected within the month is one specially referring to an important centre of commerce and political interest in the Far East. Messrs. Smith, Elder, and Co. will soon issue a descriptive account of Singapore, Penang, and Province Wellesley, from the pen of Mr. John Cameron, F.R.G.S., under the title of *Our Tropical Possessions in Malayan India*.

Mr. A. W. Bennett's series of works, illustrated by photography, will shortly be increased by an edition of Professor Longfellow's *Hyperion*, embellished by twenty-four photographs of the scenery of the Rhine, Switzerland, and the Tyrol, by Mr. F. Frith; and by a work on the Cathedrals and Ancient Structures of Normandy, by Mr. F. G. Stephens, with twenty-five photographic illustrations by Messrs. Cundall and Downes.

Foreign Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Oct. 6th.

The political discussions in the first Chambers of the States-General, about the projects of the addresses in answer to the Speech from the Throne, were very unimportant, while the Ministers, though they were present, abstained from the debate. The topic of the discussions (when there was one) was the colonial question. In the second Chamber both the parties repeated all that was said during the last Session, not one new idea was brought forward, and, after tiresome debates, the majority (36 against 35 votes) approved the liberal conduct of our Cabinet, and recommended our Minister of the Colonial Department to proceed with his just reforms. The victory was, undoubtedly, not very glorious. The annual speech of the Chancellor of the Exchequer, on introducing his Budget to the members of the Legislature, proved to be very satisfactory. According to his statements, perhaps in no other country are there so many evidences of financial and commercial prosperity, and nevertheless the budget inspired the oracle of the opposition, *het Dagblad*, with indignation, that only showed how disagreeable to it are the liberal measures and reforms, which Mr. Betz has introduced into his budget. In the meanwhile I hope that he will fulfil what he promised to introduce, which certainly he did not during the former sessions. Among other important measures Mr. Betz proposes again to abolish the newspaper stamp duty, and the system of *octrois*, that gives every municipality the right to levy taxes on all sorts of consumable produces; the latter provided for by an indemnity of the State, amounting to 10,000,000f., which is to bedistributed proportionally amongst the municipalities.

Mr. Betz calculates the total income for the year at 104,543,004f., against an expenditure of 104,138,719f. In the latter estimate the railways of the State are down for 14,500,000f., while 5,525,000f. will be added to the sinking fund of the national debt, which since 1850 has diminished by 243,743,557f. 36c. The Civil List is down, as usual, for 900,000f.; the Department for Foreign Affairs for 525,250f.; that of Justice for 2,951,045f. 28c.; the Home Department for 23,505,145f. 17c.; that of Marine for 8,886,309f. 30c.; the national debt (interest 28,486,637f. 39c., redemption 11,011,000) for 39,497,637f. 39c.; finance for 6,996,647f.; war for 12,675,000f.; the department of the colonies 5,150,528f. 72½c.; the Roman Catholic Church for 672,472f. 44½c.; and the Dutch Reformed Church for 1,747,972f. 58½c.

The Minister stated that a treaty of commerce is in course of negotiation with France, but that it is suspended until the Chambers shall have accepted the repeal of the municipal excise duties and the reduction of the tariff in the Netherlands Indies. This project of law is already laid before the members. The proposed modification is just as I told you in a preceding letter.

Digitized by Google

At the conclusion of his speech the Minister stated that an agreement had just been concluded between the Post-office authorities of England and Holland, by which a reduction was made from the 1st of October in the charge of post-paid letters between both countries from 8d. to 3d. Letters not pre-paid will be charged 3d. extra. The charges for letters from or for the Far East (*via* England) are reduced to 80c. for the East Indian Possessions; to 70c. for Banka, Palembang, and Riouw; to 70c. for Australia, Japan, and Singapore; to British India to 40c. In general, the letters must be post-paid.

The International Association for the Advancement of Social Science opened its third annual session on Monday the 26th, in the Royal Palace at Amsterdam, which our King had graciously placed at the disposal of the Association. The opening sittings were held in the beautiful ballroom, which was crowded in every part. Mr. St. E. J. Berg van Dussen Muilkerk, eschevin of the metropolis, in the absence through illness of the Mayor, welcomed the Association, thereupon Mr. Vervoort, the president, delivered the opening address in the French language, which was very short and full of oratorical generalities.

The Secretary-General then read a long report of the Society's proceedings, and on the labours of the different committees, of the council, &c. Reference was made to the sister association in England, and to the efforts that were being made in connection with the important subject of general averages and international maritime law. A warm encomium was passed upon Lord Brougham, when describing his long and useful life, on whom was conferred the title of honorary member. This title was conferred by the council on our eminent philanthropist, Mr. Swingar. After the reading of the report, a motion was made by the President, and carried unanimously, to name a committee to draw up and present an address of thanks to the King for his kindness in lending the palace for the use of the association. Thereafter the meeting broke up.

The five sections proceeded to business on the following day, and debated several important questions, concerning comparative legislation, education, art, and literature, public health and benevolence, and political economy; viz: Is it right to subject foreigners to special and exceptional laws; the education of the two sexes; the relative advantages of public and private education; the law of quarantine; the moral effect of charitable institutions; the relative advantages of private and Government saving banks; the amount of control to which the sale of alcoholic drinks should be subjected, &c. In the fifth section a passionate debate took place about the government and the position of colonial possessions. Messrs. Bake and Rochussen defended the system of our Government, that from 1852 to 1862 has given a profit to our exchequer of 329,000,000f., against the ultra-liberal systems of Messrs. van Soest, Charles Potvin, Paul Blanc, &c. Mr. Douwes Dekker (the well-known Multatuli) spoke, as he is accustomed to do, much about himself, and attacked both the Liberals and Conservatives in such vehement expressions, that they missed their aim. Mr. Potvin recommended for the emancipation of the Indians, that the Europeans should only marry black women. This proposal was met with hilarity, while one of the members proposed to the orator to himself give the first example.

The Rev. Mayboom proposed to create a sixth section for religion and philosophy, which proposal met with much disapprobation.

The congress ended with a monster banquet in the Crystal Palace. About 500 members with their ladies were present, amongst them was the Prince of Orange and several Ministers. The next meeting will be held either at Turin or at Liege.

H. M. the Queen will return within a few days from her trip to Switzerland. H. M. the King will start to-morrow to Het Loo.

The commission engaged at Paris considering a treaty for the approximation of the sugar duties existing in Holland, England, Belgium and France, has come to an understanding in the matter. The draft convention is drawn up and signed by the representatives of these four Powers.

After twenty years of labour, the dictionary for the Dutch-English and Japanese languages, compiled by Professor Hoffman, is now ready for being printed.

The chartered East India troop-ship Neptunus, Captain G. H. Lodewyks, embarked at Rotterdam 96 soldiers and the following officers: —Captain F. A. Stevert, Lieuts. W. Q. E. Vetter, W. A. Post.

The N.T.C. has chartered the Joan Melchior Kemper to convey engines to Japan; the Dionisia Catherina to convey coals from Birkenhead to Sourabaya, and the S. van Heel to transport 400,000 kilo coke to Sourabaya at f.20.90 per 1,000 kilo.

His Excellency the Chancellor of the Exchequer has received from the Sultan of Turkey the insignia of the order of Medjidiê.

H. M. has superseded, on his own request, the Resident of Samarang, Mr. C. D. A. Count van Hogendorp.

ROTTERDAM, OCT. 13.

The Members of Parliament are actively examining the Budget and the other Bills in the sections. Several reports are ready, which the Government will have to answer. The discussions, I expect, will begin within a few days. Rumour says that one of the leaders of the Opposition will bring forward a motion in the first sitting about the situation of our Indian possessions, which, according to the statement of Mr. Fransen van de Putte, should be regarded as satisfactory, but which (according to the news brought by the last mail) is very deplorable, in consequence of the war in Borneo, the cholera at Java, and the general feeling there.

One hundred and sixty members of the International Association for the Advancement of Social Science, at their late meeting at Amsterdam, signed, and forwarded by the American Consul, an address to President Lincoln, of the following tenor:—

From the beginning of the war between the energetic Federal citizens and the Confederate slaveholders, we have followed events with the greatest interest. Though we regret the human blood that has been shed, and the disasters that have been caused by the war, we congratulate you on the constancy and firmness with which you, and the great people that elected you, have defended justice and humanity. We are convinced that the people of the United States will be more powerful than ever after this trial, and we expect that when in future slavery shall no more exist, the holy cause of liberty will triumph. We are assured that the destination of the great republic will never be neglected by you.

The rumour that the Queen would remain during the winter at Venice is contradicted.

The provincial States of North Brabant have elected Mr. H. E. Verschoor, as member of the First Chamber of the States General.

Mr. S. Cool, member of Parliament for Amsterdam, died yesterday.

The Dutch Society of Fine Arts and Sciences has proffered a gold medal worth 300f. for the best original comedy. The pieces, written in the Dutch, German, French, or English languages, are to be delivered in before the 1st Jan. 1866, and addressed to Mr. L. G. Greeve, at Rotterdam.

The King has created corporals of the E. I. Army Th. Van Syngel and C. Casteels Knights of the Milit. William order 4th class.

His Majesty has at his own request superseded Jhr. H. C. van der Wyck, member of the council in the Netherlands Indies, and appointed in his place Mr. W. E. Kroesen, Colonel of the Infantry, Governor of Celebes.

The Government trade returns for the month of August were issued to-day. Our principal exports to Java consisted in:—China and earthenware, 27,000f. (and 7,000f. to Japan); vinegar, 12,000 litres; beer 171,000 litres; butter, 99,000 lb.; chemicals, 1,000f. (to Japan, 6,000f.); opium, 67,000f.; steam engines, 30,000f.; cotton yarn (spun), 41,000f.; spirits, 363,000 litres (British Indies, 72,000 litres); liquors, 3,000 litres; perfumery, 10,000 litres; window glasses, 5,000f. (Japan, 4,000f.); bottles, 5,000f.; glass works, 27,000f. (Japan 1,000f.); silverwork, 2,000f.; flour and meal, 24,000 lb.; leather, 7,000f.; iron, 56,000f.; iron-work, 33,000f.; nails, 37,000 lb. (British Indies, 31,000 lb.); coals, 2.820 lb.; copper (manufactured), 10,000f.; mercery, 37,000f.; lead, 76.000f.; white lead, 8,000f.; silk (manufactured), 43,000f.; cotton (manufactured), 591,000f.; do. coloured, 548,000f. (to Japan, 189,000f., to Brit. Ind., 61,000f.); wool, 70,000f. (to Japan, 17,000f.); made articles, 2,000f.; oil, 76,000f.; petroleum, 7,000f.; paper, 42,000f.; spelter, 5,000f.; steel, 1,000 lb.; marble, 10,000f.; segars, 4,000f.; carpets, 1,000f.; tar, 86,000 lb.; meat, 38,000 lb.; wine, 590,000 litres, do. in bottles, 18.000 litres; salt, 63,000 lb.

The principal imports from Java consisted of:—Drugs, 18,000f.; arak, 40,000 litres; hides, 25,000f.; indigo, 19,000 lb.; coffee, 3,293,000 lb.; pepper, 63,000 lb.; rice, 393,000 lb. (British Indies, 1,306,000 lb.); rattans, 147,000 lb. (British Indies, 8,000 lb.); cassia lignea, 1,000f.; cinnamon, 2,000f.; mace, 88,000f.; sugar, raw, 6,638,000 lb.; tobacco, 610,000 lb.; tea, 71,000 lb.; tin, 367,000 lb.

COMMERCIAL.

COFFEE.—Market unaltered; without transactions, except 1,000 b. Java ex Friesland, at prices that did not transpire.

TEA.—Business is confined to the execution of a few small orders for consumption.

SPICES.—The market has closed very heavily, and prices compared with those at the last auction show a considerable decline. At this reduction there is only a slight inquiry for cloves.

COTTON.—Very dull, in consequence of the Liverpool market.

HEMP.—Some parcels Manila were sold at auction at 62f., the rest retired at 60f.

RATTANS.—1,335 b. ex Australia only were sold.

TIN.—Before the Bank raised the discount to 6½ per cent. there was some speculative inquiry at the price of 61f.; this price, however, can no longer be obtained.

GUTTA PERCHA.—The 13,000 lb. offered at auction were partly sold at 54 to 115 c.

SUGAR.—Prices are quoted: Java, white, 37f. to 41f.; grey, 35f. to

Digitized by Google

36f.; light brown, 32f. to 34f.; brown, 27f. to 31f.; Manila, grey, 31f. to 36f.; brown, 26f. to 30f.

Hides.—Only 510 p. ex Johannes were sold.

Cochineal.—The 167 b. offered at auction by the N. T. C. were sold at 175 to 230 c.

Indigo.—The quantities offered at public sales were sold as follows:—172 ch. Bengal at 490c. to 605c.; 635 ch. Java at 310 to 760c.; 54 cer. Guatimala at 300c. to 420c. Market firm. The prices are, compared with those obtained in May, from 20c. to 40c. higher.

Money firm. Bank discount, 6½ per cent. for bills; 7 per cent. for acceptances; open market, 6½ per cent.; N.W.S., 2½, 59 1/16, 3 per cent., 71½; 4 per cent., 95 1/16; Handelmaalschappy, 135½. Change: London, 3 mo., f. 11.60; 2 mo., f. 11.69; short, f. 11.86. Paris, 3 mo., f. 45.95; 2 mo., f. 46.10; short, f. 46.75; Hambro, 3 mo., f. 34.50; 2 mo., f. 34.70; short, f. 35.10.

PASSENGERS INWARD.

From Batavia, at Rotterdam, per Marie, Capt. Bieshorst: Mr. Scheltema and family, Mrs. Junghuhn and family, Mr. Barker, Mr. Dunlop, jun., Mr. Beecher, sergeants of the E.I. Army Bruderlin and Bouhuys, and nineteen soldiers.

PASSENGERS OUTWARD.

From Amsterdam, to Batavia, per Henrietta Maria, Capt. Tjebbes: Messrs. O. J. de Haart and C. J. Speet, Mrs. Lochman von Konigsfeld and two children. Per Holland, Capt. Auffmorth: Mr. J. H. Joosten and family, Mr. P. Auffmorth, Mrs. Steur.

SHIPPING INTELLIGENCE.

Arrivals.—Oct. 7, at Brouwershaven, Watergeus, from Singapore; Marie, from Batavia.

Departures.—From Texel: Oct. 7, Henrietta Maria, Zeenimph and Holland, for Batavia; Celebes, for Sourabaya; 8, Koerier, for Sourabaya, *via* Birkenhead; 11, Dionysia Catherina, for Sourabaya, *via* Birkenhead.

Freights.—Unaltered.

Oct. 15.

The Bank has raised the discount to 7 per cent. This measure is only precautionary; the balance, compared with those of four weeks ago, shows only a trifling difference. Mr. Mees, the director of the Bank, has been in London some days. In the yesterday sitting of the States General Mr. van Lynden asked the Minister of the Colonies for some information about the late distressing news from Java. Mr. Fransen van de Putte stated, although he regretted that the small steamer *Kapoeas* was burned, that he had no fears that Sintang would be taken by the revolutionists. H.M. has superseded, on his own request, the Second Lieut. of the E. I. Army, C. C. U. T. de Man.

Commercial.—Vanille: 130 kilo Java were sold at auction at 2f. to 9½f.; 250 kilo Bourbon at 6½f. to 12f.

Shipping.—Arrivals: 14 Oct. at Hellevoet, Fop Smit, from Batavia; at Brouwershaven, St. Jan., Batavia. Ready to sail: At Brouwershaven, Jacob, for Batavia.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

Hamburg, October 8.

It has been currently reported that the Duke of Saxe Coburg's principal Minister and Privy Councillor, Herr Francke, whose services had been lent by the Duke to the Prince of Augustenburg, now residing at Kiel, had been recalled, as his leave of absence expired on the 1st of October, and he was seen in Altona the day before. Such, however, is not the case. The diplomatist in question was certainly in Altona on the 30th ult., but it was to take leave of his son, who, having served his time in the counting-house of Messrs. Christenson and Co. of that town, has just proceeded to China, having accepted an engagement in the mercantile establishment of Messrs. Pustau and Co. at Hong Kong.

COMMERCIAL.

Coffee.—Notwithstanding the pressure of the money market and the high rate of discount, the prices for all descriptions of coffee are well supported, and though the demand is not very active a sufficiency of orders arrive every day, which are all executed at full rates.

Sugar.—The raw article has continued to fall ever since last report, and is in a very depressed state. The only sale of East India descriptions to notice was one of 6,000 bags of unclayed brown Manila, at 17½ marks Banco. Refined goods are somewhat lower, but the decline is not to be compared with that of raw.

Rice.—A fair amount of business has been done in cleaned grain, both for local consumption and for conveyance to the interior. Of rough paddy there have been also several sales by private contract, among which may be noticed 8,650 bags of Akyab ex Veritas, 3,000 bags of Arracan in warehouse, and 5,500 bags of Bassein per Alexandra for delivery on arrival. The prices obtained for all descriptions were generally high, and the market closes in a satisfactory condition. A cargo of 7,500 bags has just arrived per Johannes from Moulmein.

Spices.—But little has been done worth recording in any article, with the exception of a few transactions in pepper, cloves, and cassia lignea, and there is no alteration in the values. Fine Ceylon cinnamon is worth 26 sch. bco., and cassia lignea 9½.

Spelter.—This article has also felt the pressure of the money market, and prices have somewhat receded, though not to any extent. Silesian in slabs both in loco and for delivery are worth 16 marks Banco buyers, but at this figure no large parcel could be sold.

SHIPPING.

Sailed.—From Cuxhaven, Sept. 16, Ino, Bannan, for Hong Kong and Macao; 30, Miranda, Woller, to Hong Kong; Oct. 3, Turandot, Meinert, to Singapore; 4, Che-foo, Bohl, to Macassar.

Loading at Hamburg.—For Singapore and China, Laura; for Manilla, Arizona; for Hong Kong, Dioscuren; for Calcutta, P. C. Kinch; Singapore, Nordstern.

October 13.

The Department for Commercial Statistics of the Board of Trade in this city have just published their usual annual tables for last year, which as far as they go are drawn up with elaborate care, perspicuity and comprehensiveness of detail. Those relating to the navigation of this port are quite perfect, giving as they do a return of the shipping inwards and outwards, with the particulars of tonnage, flag, number of crew, and loaded or in ballast. But to the statistics of trade the same amount of praise cannot with justice be given, because a great vacuum is unpleasantly felt; for though all that has reference to the import trade is given in the most satisfactory manner in these tables, not a single word is said about the exports. It is not to be supposed that this missing part of the general view of Hamburg commerce has escaped the attention of the public, but much as it is deplored by statisticians and even many of the merchants, yet the far greater part of the latter, who carry on a snug export business to a very considerable extent, object for the sake of what they are pleased to term idle curiosity to let other people look into their cards, and perhaps profit by their acquired experience. Only a few months ago a motion was made by a mercantile member of the Burgerschaft or legislative body to make it incumbent on exporters to give particulars of the goods they shipped, but after a sharp debate it was negatived by a large majority. As there is no export duty here, it is impossible to gain an insight into the value, description, and quantity of the goods exported, even by an examination of the ships' manifests; but merchants send off their casks and bales to the vessel without being bound to make any declaration. It is no doubt a great facility and saving of time and trouble in the way of business, but it is nevertheless to be deplored. Opponents pretend that it would be quite impossible to make up any reliable tables unless a duty was levied, but this is quite a mistaken idea, because at Trieste—which is a *Porto-franco* or free port in the fullest extent of the word, which Hamburg is not, there being here a trifling duty on imports—the tables of the exports are quite as perfect and comprehensive as those of the imports, both being official and published by the Government. But in the absence of the particulars of the exports, one can form a shrewd guess at their amount and value, for with the exception of the comparatively small quantity of raw goods used here for the local consumption of the 150,000 inhabitants, the whole quantity of commodities imported is re-exported to some other country. But as within the last few years a large number of manufactories have sprung into existence here, a vast quantity of raw materials are subjected to various mechanical processes, which of course greatly enhances their value when exported as they are in a manufactured state. For this reason it may fairly be assumed that, even after deducting the quantity of raw goods consumed here as such and in a manufactured state, the value of the exports exceeds that of the imports by at least 20 or 25 per cent.

The trade of Hamburg, then, for 1863 shows a greater amount of imports both in weight and value than in any previous year, the former being upwards of two millions of tons, whilst the latter are given at 738,665,510 marks Banco, or about £58,250,000, being an increase of 100 millions of marks, or £8,000,000 on the imports of 1862, equal to about 16 per cent.

The number of vessels that arrived from foreign ports oversea was 5,543 of 1,443,648 tons, and 55,125 men, crew, whilst the number that sailed was 5,548 vessels of 1,449,088 tons, and 55,086 men.

From the Far East came 37 vessels of 20,367 tons, of which 11 were from China, 4 from the Philippine Islands, 3 from Netherlands India, 18 from British East India, and 1 from the Sandwich Islands. On the other hand, the number of vessels that cleared out and sailed was 84, with an aggregate burthen of 41,682 tons, of which 47 were to China, 2 to Japan, 2 to the Philippine Islands, 5 to Netherlands India, 6 to British East India, 1 to Russia in Asia, 1 to the Navigator's Islands, and 16 to Australia. In my next letter I shall give your

Digitized by Google

readers some particulars of the special trade of this port with the Far East.

Overland accounts received at St. Petersburg from Siberia state that the coal found on the Island of Sachalin at the mouth of the Amoor is being worked with great energy and success, the quality being admirably adapted for the consumption of steamers. Already these coal mines not only supply sufficient fuel for the requirements of the Russian ships of war in the Pacific Ocean, but shipments have been made to Shanghai, from which port supplies of this article of fuel were hitherto derived for the use of the Muscovite squadron and the steamers on the Amoor and its tributaries.

Among the latest arrivals in this city from the Far East are the following:—Mr. and Miss Hesse, from Hong Kong; Mr. A. Koch, from Batavia; Mr. G. A. Remé, from Singapore; Mr. L. Lichtenberg, from Batavia; and Mr. Schreiber, from Singapore.

COMMERCIAL.

Coffee.—More activity prevails in this market, and prices of all descriptions, are well supported. The announcement of the company's sale in Holland and official advices of the unusually small crop in Java this year have tended to strengthen the good opinion entertained for the article here. Sales since last mail 12,000 bags.

Sugar.—Raw continues its downward tendency, and the sales reported, which were of no great extent, could only be effected by submitting to a further reduction of 4 to 8 sch. bco. Although Refiners were willing enough to sell, even at a trifle lower than last week, purchasers were shy, and the business done was of no great importance, not more than 10,000 loaves being sold.

Rice.—Some considerable transactions are reported in cleaned descriptions, for export at full prices, and as by them the stocks are reduced the maket is firm and looking up. Of rough there have been no sales, but prices remain steady.

Tea.—The business done has been tolerably lively, and considerable parcels of Congo, Souchong, and Pecco, have been taken both for export to the north of Europe and for local consumption. Among green teas country sorts are in most favour. Some few lots of Conton, Hyson, Imperial, and Gunpowder have also changed hands. On the whole, the market is firm. During the month of September the following were imported: 611 chests of Congo, 260 do. Souchong, 771 do. Pecco, 15 Hysonchin, 87 do. Tonkay, 172 do. Hyson, 289 do. Imperial, and 248 do. Gunpowder.

Spices.—No alteration to report in any description, and business confined to the execution of small orders for the trade. Singapore Pepper fetches 3⅛ to 4 sch. bco., Sumatra do. 3¼ to 3⅜.

Spelter.—The continual unfavourable advices from other markets have caused a depression in the prices here without creating much demand. Silesian in slabs may be bought at 15⅞ marks bco in loco. and 15⅜ for delivery. Arrived from the interior in September, 44,000 centners. Arrived from January 1 to September 30. 417,000 centners, against 149,000 in the same period last year; 230,000 in 1862, and 179,000 in 1861. Present stock, 24,000 centners, against 30,000 last year, 137,000 in 1862, and 54,000 in 1861.

SIR HERCULES ROBINSON.

(MONEY MARKET REVIEW.)

The next outward China mail will probably convey to Sir Hercules Robinson, the present Governor of Hong Kong, intelligence of his appointment to the Governorship of Ceylon, and to Mr. W. T. Mercer, Colonial Secretary at Hong Kong, his elevation to the post of Governor of that settlement. The pecuniary advantage gained from the exchange by Sir Hercules Robinson from Hong Kong to Ceylon will be an addition to his salary of £2,000 per annum, and a saving of £4,000 in yearly expenses. Unquestionably the reward is well merited, but foreign residents in China will view the transfer with regret, as Sir Hercules thus leaves to another the carrying out of the plans his Excellency had so fully matured and elaborated in connection with the establishment of a mint at Hong Kong. Whilst Sir John Bowring has the merit of suggesting that establishment, to Sir Hercules Robinson was left its practical application, and the devising of those arrangements which led the British Government to concede all that was required. The intimate acquaintance of Sir Hercules Robinson with the China trade will prove of essential service to Ceylon, which carries on an extensive and enlarging trade with the islands in the China seas. The exports of Ceylon in 1863 amounted in value to £4,000,000. This trade, we may remark, has been materially stimulated by the operations of the Chartered Mercantile Bank of India, London, and China, and the Oriental Bank Corporation.

A FLOATING DOCK AT KANAGAWA.

It is stated that a company is about to be formed for the construction of a floating dock at the port of Kanagawa, in Japan, the directors to be composed of foreign residents there, and several London merchants connected with the Japan trade. The anchorage of Kanagawa is on the lee-side of an extensive bay, and, therefore, does not at present afford the same facilities for the repair of shipping as Nagasaki for a great part of the year. The following were the arrivals of vessels at Kanagawa in 1863:—British, 100; American, 40; Dutch, 13; Prussian, 8; French, 7; Russian, 2.—*Ibid.*

TIMBER FROM JAPAN.

According to information furnished by the British Consul at Hakodadi, and lately in a Blue Book, a capital opportunity presents itself for the formation of a limited liability company in London for the importation into this country of timber from Japan. The Yedo oak is allowed to be equal in strength and durability to British oak; it might be obtained cheaply and in abundance, and would realise here from £12 to £14, or only £1 to £1. 10s. per load less than teak. This matter is worth attention, as good English and Dantzig oak is getting scarce, and teak costs now in India £6 to £6. 10s.—*Ibid.*

[It would not form the province of a company, but merchants should see to this.]

THE CONFUCIUS SKULL SCANDAL.

The following appeared in *The Times*:—

Sir,—My attention has been drawn to a notice by your Shanghai correspondent of the absurd story that a skull which was disposed of at a recent sale of Chinese curiosities was none other than that of the revered moralist Confucius. Your correspondent very properly points out the preposterous nature of such an assertion; and I believe I am in a position to explain the actual history of this relic.

In the early part of the late Emperor Tao-Kwang's reign a rebellion of a serious character broke out in the Turkman regions, which were added to the Chinese colonial dominions by his illustrious grandfather, Kien-lung, but this rising was suppressed after an obstinate struggle. The leader, Jehanghir, known to the Chinese as Chang-ko-urh, was captured and carried a prisoner to Peking, where he was adjudged to death as an arch rebel, and condemned to suffer the extreme penalty of "slow mangling," the most terrible form of execution it is possible to conceive. He was executed, I believe, in 1829, and I was informed some years ago by a Chinese of position who was near the Court at the time that his skull had been presented to the Emperor and preserved in the Palace. This, doubtless, may have occurred in the case of other noted victims; but there is at least a strong probability that the skull in question was that of Jehanghir. If any lesion can be traced upon the forehead I should say the proof of identity would be complete.—I have, &c.,

Barnes, Sept. 30. W. M.

Monetary and Commercial.

At a meeting of the Oriental Bank Corporation held on the 13th, an interim dividend of 8 per cent. for the half-year, or at the rate of 16 per cent. per annum, was declared payable on and after the 1st November. The profits of the bank during the half-year ending 30th June had been £126,000, against £115,000 in the corresponding half of the previous year, and after the payment of the dividend, £25,271 was carried over to the next half-year's account. The chairman, H. G. Gordon, Esq., stated that no loss had been incurred by the bank, and the amount of deposits had increased without an advance in the rate of interest allowed.

At the meeting of the Bank of India, Australia, and China, the profits for the half-year were stated to be equal to 18¾ per cent. on capital. A dividend for the half-year at 7½ per cent. was declared. The increase of banks in the Far East was noticed.

The bar silver by the last Mexican packet was sold, partly for the East and partly for the Continent, at 5s. 1d. per ounce, being ⅜d. fall.

The Messageries Imperiales Company, in consequence of the resolution of the shareholders in the general meeting of the 4th June last to do away with the difference previously maintained between the old shares and those of the Indo-China lines, calls on the holders of the latter shares to exchange them forthwith for new shares, and it declares that the provisional dividend of 1864, falling due in December next, cannot be paid until this is done.

COTTON EXPORTS TO INDIA AND CHINA.

The following is from Sam Mendel's table of exports from London, Liverpool, and Clyde, from Jan. 1 to Oct. 8, 1864:—

	Cottons. Yds.	Twist. lbs.
Calcutta.		
Month ending Sept. 30, 1864	15,878,539 ..	375,019
Previously this year	119,001,253 ..	6,177,528
For nine months, 1864	134,879,792 ..	6,552,547
For nine months, 1863	151,494,885 ..	8,134,032
Bombay.		
Month ending Sept. 30, 1864	13,270,376 ..	714,086

For nine months, 1863	4,062,152 ..	12,250

The Board of Trade returns for the month of August again present extraordinary totals. The declared value of our exports was £16,274,269, showing an increase of 15½ per cent. on those of August 1863, and of 27 per cent. on those of 1862. Of this increase nearly one-half was derived from cotton manufactures, which exceeded those of the corresponding month of last year to the extent of 23 per cent. in value, although only to the extent of 4 per cent. in quantity. Hence a very large part of the augmentation in the sterling amount of our trade is seen to be attributable to the extraordinary point to which the price of cotton was recently carried. In other branches of manufacture, however, a large improvement is also shown, and in these instances the increase is only in a moderate degree due to an advance in the price of the various staples. The Exports from the ports and countries eastward of India present the following results, as regards the articles separately enumerated :—

CHINA AND HONG KONG.

	1862.	1863	1864.
For the Month ended 31st August.			
Cotton yarn	147,600 ..	178.898 ..	155.911 lbs.
Cotton manufactures ..	6,069,235 ..	3,589.936 ..	8,110.857 yds.
Worsted stuffs	1,083,507 ..	991.356 ..	2,140.598 ,,
Woollen and worsted cloths	219,896 ..	162,556 ..	140.927 ,,
Lead	863 ..	875 ..	821 tons
Value for the Eight Months ended 31st August			
Cotton yarn	£174,625 ..	£90,555 ..	£172,021
Cotton manufactures ..	1,125.006 ..	689.886 ..	1,409,104
Worsted stuffs	257,101 ..	400.951 ..	644,165
Woollen and worsted cloths ..	189,779 ..	226.571 ..	199,322
Lead	132,815 .	229,287 ..	111,770

The Cotton Manufactures (yarn is not included under this title) exported to the other great centres of commerce in the Far East, are represented by the figures following :—

	1862.	1863.	1864.
For the Month ended 31st August.			
Java	2,184,775 ..	1,805,223 ..	512,815 yds.
Philippine Islands ..	2,544,974 ..	3,851,507 ..	4,323,889 ,,
Singapore	841,455 ..	5,134,637 ..	619,534 ,,
Value for the Eight Months ended 31st August.			
Java	£428.944 ..	£218,711 ..	£433.991
Philippine Islands ..	218,475 ..	252,515 ..	457,517
Singapore	483,450 ..	383,596 ..	522,914

Of Cotton Yarn, 87,810 lbs. were exported to Singapore in the month of August last, against 290,660 lbs. in August, 1863, and 30,400 lbs. in the same month of 1862; the value for the first eight months of the present year being £82,157, and for the similar period of 1863, £119,338, and for 1862, £85,170.

IMPORTS.

The quantity of Raw Cotton imported from China does not exhibit the same prodigious rate of increase during the month as was manifested in the preceding sections of the year. The following are the returns :—

	1862.	1863.	1864.
For the Month ended 31st August.			
Quantity	1,988 ..	49,183 ..	54,637 cwts.
For the Seven Months ended 31st July.			
Value	£8,302 ..	£994,425 ..	£4,216,584

Of Unrefined Sugar, the quantity imported from Java and the Philippine Islands during the month of August was—2nd quality (not equal to White, but equal to Brown clayed) 434 cwt. ; 3rd quality (not equal to Brown clayed, but equal to Brown Muscovado), 38,099 cwt. ; 4th quality (not equal to Brown Muscovado), 6,718 cwt. The effect of the new duties, which came into force on the 16th April last, will be seen from the return of the value of sugar from Java and the Philippine Islands imported during the seven months ended the 31st July, in the years named :—

	1862.	1863.	1864.
2nd quality (equal to Brown clayed)	£49,357 ..	£1,581 ..	£2
3rd (not equal to Brown clayed)..	264,651 ..	557,458 ..	41,205
3rd (equal to Brown Muscovado)..	— ..	— ..	26,006
4th (not equal to Br. Muscovado).	— ..	— ..	66,078

The quantity of Hemp imported from the Philippine Islands during the eighth month of the present year was 12,120 cwt. ; against 21,605 cwt. in 1863, and 14.590 cwts. in 1862. The value of the import for the seven months ended the 31st July is set down at £176,932 ; while that for the similar periods of 1863 and 1862 was, respectively, £249,293 and £118,617.

The Declared Value of British and Irish Produce and Manufactures exported from the United Kingdom to the ports and countries named below, for the seven months ended the 31st July, as compared with the corresponding periods of the two preceding years, is presented by the figures following :—

To	1862.	1863.	1864.
Singapore and Eastern Straits ..	£791,620 ..	£650,202 ..	£840,926
Hong Kong	739,095 ..	689,326 ..	1,021,284
China (exclusive of Hong Kong)	1,359,819 ..	1,357,953 ..	1,693,039
Netherlands India (Java, &c.)..	561,181 ..	302,777 ..	567,248
Philippine Islands	259,227 ..	233,116 ..	441,854
Siam	3,968 ..	10,586 ..	11,513
Cochin China, Camboja, and Tonquin	— ..	35,000 ..	—
Japan	— ..	49,320 ..	214,316

The amount of bullion by the P. and O. Company's steamer *Baroda*, from Southampton on the 4th inst., was—in gold : To Alexandria, £200 ; to Galle, £1,027 ; to Madras, £1,876. In silver : To Alexandria, £200 ; to Galle, £1,750 ; to Madras, £20,001 ; to Calcutta, £34,100 ; to Singapore, £16,750 ; to Hong Kong, £10,885 ; to Shanghai, £20,694. Total—in gold, £6,903 ; in silver, £103,130.

ARTICLES OF IMPORT.

SUGAR.—In the early part of the week, undiminished heaviness prevailed in the market, and only limited sales were practicable at a further reduction of 6d. to 1s. per cwt., since when, however, an improving inquiry has been experienced, and buyers having operated more freely towards the close, a slight reaction in prices has been established. Indeed, on Friday the decline at the opening was fully recovered, and in some instances an advance on last week's rates established. Privately sales have been effected of 15,000 bags, two lots of each, Clayed Manila at 30s. 6d. to 31s.

COTTON.—Sales in London from the 7th to the 13th. 90 bales China, 12⅝d. to 13d., for fair, and 14¼d. for fine; 50 bales Japan, 15½d. for fine. The public sales on Thursday went off at very irregular prices, the greater part being withdrawn. 240 bales water-packed China, on account of whom it may concern, sold at 8⅞d. to 9⅞d. ; also 110 bales China pickings, at 7d. to 8d. Stock of China and Japan in London, on the 14th, 25,677 bales, against 3,022 last year. From Liverpool the report of the week is that East India has continued to be much pressed for sale, and has been very irregular in price, in many instances 1½d. to 2d. decline, having been submitted to. The reduction attracted the notice of buyers, and more business was done on Thursday

Digitized by Google

at the extreme decline. China is irregular, and generally ½d. to 1d. per lb. lower.

Coffee.—Somewhat firmer rates have been obtained for Plantation Ceylon. At public sale, 265 casks, 200 bags plantation, consisted chiefly of grey sorts, the bulk of which was bought in, while the colory qualities were sold at former rates; a trifling quantity good ordinary Native went at 65s: 1340 cases Neilgherry and Tellicherry were greater part withdrawn; 454 bags good ordinary Mysore were realized at 64s. 6d., and 243 bags common Singapore at 51s. to 52s. 6d.

Rice.—The demand is still very limited, and the sales reported amount to only 12,000 bags at about previous prices, low red cargo Bengal 8s. 3d. good middling white 11s. 3d., Larong 8s., and Nakrenzie 8s. 9d. 7,915 bags of the latter, at public sale, were chiefly withdrawn, only the damaged (1,500 bags) selling at 7s. to 8s. 3d. On Friday 4,132 bags Bengal, offered by auction, were mostly sold, middling Ballam 9s. 6d. to 10s., good 11s., and middling to good middling white 10s. 3d. to 11s.; 9,365 bags Arracan, nearly all damaged, which were taken at 7s. 3d. to 8s. 3d., a small part sound weevily 8s. 3d.

Cassia Lignea.—378 cases (broken bundles), from Singapore, at public sale, were sold at fair prices, common quality 82s. to 86s. 40 boxes Cassia Buds were held firmly, and withdrawn.

Tapioca.—In public sale, 638 bags Penang were principally withdrawn, the small part sold being good white at 3d.; 150 barrels fine Rio were taken in at 5d. per lb.

Spices.—At public sale 299 bags Zanzibar Cloves, from New York, sold at 3⅝d. to 3¾d. Six cases brown Nutmegs realised full rates, selling at 10d. to 1s. 9d.; one lot superior, 3s. 3d.

Shellac.—40 chests sold at £6 to £6. 2s. 6d. for second orange.

Pepper.—The bulk of 2,116 bags Black Singapore, in auction, was damaged, and was mostly withdrawn, only part of the sound portion being sold, common to good, 3⅞d. to 3⅞d., but 2nd class, 3½d. to 3⅝d. Sales was afterwards dispo ed also been made by private contract, Singapore, 3¾d. to 3½d., and Penang, 3⅝d. to 3½d. On Friday, 819 bags Singapore Black were bought in at 3½d.; but 266 bags Penang realised 3⅝d. to 3¼d.; and 129 bags middling Penang white, 5d. to 5¼d.

Sapanwood.—8 tons sold at £8 to £8. 2s. 6d.; inferior, £6.

Terra Japonica.—Gambier has been dull, and quoted 24s. to 24s. 6d. Some first-class sea-damaged realised 23s. Cutch quiet.

Manila Hemp.—670 bales by auction were bought in at £28 per ton.

From Penang.—At London: Empress, Marengo, and Sunium. At Falmouth: Schlosser. At Cork: Ceylon. At Bordeaux: Sophia.

From Bangkok.—At New York: Eastward Ho.

FREIGHTS AND CHARTERS.

Outward freights still continue low, as but little goods are offering, in coal freights we have likewise no improvement to report. Homeward charters are difficult to procure, as business in this direction also is very quiet, but small vessels can be fixed from Ceylon and Singapore.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £38 and £1. 17s. 6d. For Shanghai: £48 to £50, and £2. 5s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £1. 5s. For Penang: £27. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have invited tenders for the conveyance of about 600 tons naval stores, including 104 tons porter and a few combustibles, from the River Thames to Hong Kong.

CASUALTIES.

The Balder Sjoberg, from Batavia, for Rotterdam, which put into Mauritius, August 23, leaky, having experienced very heavy weather three days after leaving the Straits of Sunda, was taken into dry dock.

At Mauritius.—August 23, from Batavia, for Rotterdam, Balder Sjoberg, leaky; 31, Compeer Black, from Singapore; Sept. 1, Independent Laborg, from Singapore; 5, Casilda Oakes and Juverna Harley, both from Singapore; 8, Jeannie Douglas, Donaldson, for Shanghai.

At Reunion.—August 19, Otavie, Warnick, sailed for Batavia.

Wholesale Only.

DINNEFORD'S PURE FLUID MAGNESIA has been, during Twenty Five years, emphatically sanctioned by the Medical Profession and universally accepted by the public, as the best remedy for acidity of the stomach, heartburn, headache, gout, and indigestion, and as a mild aperient for delicate constitutions, more especially for ladies and children. When combined with the acidulated lemon syrup, it forms an agreeable effervescing draught, in which its aperient qualities are much increased. During hot seasons, and, above all in hot climates, the "regular" use of this simple and elegant remedy has been found highly beneficial. It is prepared (in a state of perfect purity and of uniform strength) by DINNEFORD and Co., 172, New Bond-street, London, and sold by all respectable Chemists throughout the World.

TRUSTEES.

Hon. F. Chomley, Esq. (Messrs. Dent and Co.).
A. F. Heard, Esq. (Messrs. Augustine Heard and Co.).

BANKERS.

The Commercial Bank of India.

This Company has been formed for the purpose of purchasing a site in the colony of Hong Kong for Docks, and constructing docks and erecting suitable premises thereon for carrying on the business of building or docking and repairing steamers and sailing vessels, and for the purchase of the Docks now owned and carried on at Whampoa by Messrs. T. Hunt and Co., with the appurtenances, plant, and goodwill of the docking business of that firm.

It is proposed to register the Company as one of Limited Liability, either under the Imperial Act or under any Ordinance which the local legislature may pass enabling local companies to do so, the property of the Company in the meantime being vested in the trustees; and the deed of settlement of the Company, now in course of preparation, is being framed in accordance with this intention.

The very considerable increase in the number of vessels employed in what may be termed local trade, or in voyages that either originate or terminate, at Hong Kong, in addition to the great quantity of tonnage visiting the port from all quarters of the world, afford ample scope for the [illegible] operations of dock companies in addition to those which are already in existence.

Application has been made to Her Majesty's Government with reference to obtaining a site for the proposed docks in the colony, and the project has been favourably entertained, steps being in progress to facilitate this object, the necessary preliminary investigations as to the suitable character of the proposed site having been conducted and satisfactorily reported upon by Mr. S. B. Rawling.

Liberal support has been promised to the undertaking, which, it is contemplated, must necessarily prove a very remunerative one.

Further applications for shares can, till further notice, be addressed to the undersigned, from whom forms of application and all particulars can be obtained.

EDWARD H. POLLARD, Counsel for the Company.
Hong Kong, August 24, 1864.

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,

METALLIC PEN MAKER TO THE QUEEN

BEGS to inform the Commercial World, Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street, New York, and at 37, Gracechurch street London

REDUCED PRICES—FIRST QUALITY.

IMPORTANT

TO PERSONS RESIDING IN HOT CLIMATES.

ASH'S PATENT "PISTON" FREEZING MACHINE AND WINE COOLER is the FIRST REALLY EFFECTIVE APPARATUS for TROPICAL CLIMATES.

It will produce PURE BLOCK ICE, FREEZE and MOULD DESSERT ICES, and ICE WINES in any temperature. It is remarkably simple, will not corrode or get out of order, and can be worked by the most ignorant servant. The Freezing Salts employed are indigenous to the Indian Empire, easily and cheaply obtained. A *bonâ fide* Receipt for preparing them given with each Machine. It is not too much to say that the "Piston" Freezing Machine will rapidly become indispensable to all European residents in India.

PRICES:—For 1 Bottle, 1 Block of Ice 1 Dessert Ice £4 0 0
For 2 Bottles, 2 Blocks of Ice, 2 Dessert Ices 6 10 0
For 4 Bottles, 4 Blocks of Ice 4 Dessert Ices 11 5 0

If without fittings (merely as Wine Coolers):

For 1 Bottle £2 0 0
For 2 Bottles 3 0 0
For 4 Bottles 4 5 0

When Dessert Ices are never required, these Wine Coolers can be fitted with BLOCK ICE MOULDS, at 30s. for each Mould so fitted.

SOLE MANUFACTURER:

GEORGE SIMPSON, 315, OXFORD STREET, LONDON.

Recently published, scale 110 miles to an inch; size 40 inches by 27 inches.

CHINA AND JAPAN.—STANFORD'S MAP OF THE EMPIRES OF CHINA AND JAPAN,

WITH THE ADJACENT PARTS OF BRITISH INDIA, ASIATIC RUSSIA, BURMAH, &c.

Englishmen residing in China or Japan, or connected with those countries by trade, will find this the most complete work of the kind which has hitherto been published. Price, in sheets, 7s.; case 10s. 6d.

Scale, 110 miles to an inch; size, 65 inches by 58,

ASIA.—STANFORD'S LIBRARY MAP OF ASIA.

CONSTRUCTED BY A. KEITH JOHNSTON, F.R.S.E., F.R.G.S., &c.

This new and original work is uniform with Stanford's Library Maps of Europe and Australasia, already published. It exhibits the Empires and other States of the Oriental World with a stricter regard to their actual boundaries and divisions than any other publication has yet attempted. Although the size of the map extends to the limits of convenience, its scale of 110 miles to an inch serves to show how inadequate a small map must be for the representation of so large an area. In proceeding with this unequalled series, the publisher relies on the patronage of statesmen, merchants, and other important classes, whose pursuits induce them to appreciate and encourage geographical research. Fully coloured and mounted, in case, £3; morocco case, £3. 13s. 6d.; roller, varnished, £3; spring roller, £6.

E. STANFORD,

AGENT FOR THE SALE OF THE ORDINANCE MAPS, GEOLOGICAL SURVEY MAPS, AND ADMIRALTY CHARTS,

6, CHARING CROSS, LONDON, S.W.

GEORGE DYER, Goldsmith and Watchmaker, 90, Regent-street, London, in advertising the above Selections from his Printed Price Lists, does so to show the difference between the prices usually charged and those he executes orders at. Practical knowledge, combined with great experience in every branch of his trade, gives him advantages of manufacturing superior to all others who supply the markets of India, China, and the Colonies. Merchants, Shopkeepers, and Private Purchasers may rely on having their Orders (per remittances only) promptly executed to all parts of the world. Price Lists may be had of Messrs. Fogg and Co., Shanghai. Remittances can be made through the Agra and Masterman's Bank.

COOPER AND AVES

"EXCELSIOR" FAMILY SEWING AND EMBROIDERING MACHINE.

THESE MACHINES are far Superior to any others manufactured They are lighter and easier to operate, simpler to learn, quieter in action, and less liable to derangement. The range of work performed is greater than any. They run, tuck, hem, fell, gather, cord, quilt, braid, and embroider; sews from two ordinary spools, requires no re-winding, finishes its work where it stops, and the seam, if cut at every inch, will not rip. Price, Complete, from £6. 6s.

BARCLAY AND SON'S IMPROVED Enamelled Punkah Lamps for China,

AS SUPPLIED TO THE INDIA OFFICE.

(TRADE PB MARK.)

SHOW ROOMS,
170, REGENT-STREET, LONDON.

THESE Lamps are wrought into many beautiful designs, having on the surface a coating of the Patent Enamel. By this process the most beautiful marbles and stones—as Malachite, Lapis Lazuli, Brocatella, Pale Sienna, Jasper, and Pink Granite—are imitated to a nicety.

Advantages of these Lamps over ordinar India Lamps:—

1st.—They are unaffected by damp, heat, alkali, or oil.

2nd.—The more they are rubbed the better the polish: in this respect they are the reverse of bronzed or lacquered lamps.

3rd.—They offer no temptation to the natives to remove the outer surface; and were they to endeavour to do so they would signally fail.

4th.—They are free from liability to fracture.

5th.—The enamel never wears off, nor changes in colour or appearance.

PRICES, from £4 10s. to £5.

Ornamental Glasses, 7s. 6d. extra.

Ordinary Lamps, in bronze, bronze and relieved, and lacquered, from 38s.

May be obtained of the makers, BARCLAY & SON, or through the Cape, India, and China Agency, of whom Illustrated Prospectuses may be obtained. Orders sent direct must be accompanied by a remittance.

LAMPLOUGH'S PYRETIC SALINE.

EFFERVESCING AND TASTELESS, ITS CONSTANT USE IS ESPECIALLY CALCULATED TO MAINTAIN HEALTH.

HER Majesty's representative, the Governor of Sierra Leone, in a letter of request for an additional supply, states, "it is of great value; it should be in the hands of all Europeans visiting the tropics.' Is an agreeable effervescing remedy, of great efficacy in all kinds of Fever and Blood diseases, especially those occurring during hot weather. Dr. Gibbon, Staff-Surgeon in the Crimean war, states that European residents in hot countries find that the use of this refreshing beverage prevents exhausting perspiration and its alternative deadly fever. It acts by purifying and lowering the temperature of the blood, hence its great importance to all persons seeking to reside with safety and comfort in tropical countries subject to unusual heat.

The elegance, purity, and usefulness of the preparation has been certified by some of the most eminent physicians in the Army, Naval, and Hospital service of Great Britain.

Lieutenant-Colonel Murray, 1st West India Regiment, Sierra Leone. "I have enjoyed uninterrupted health since I have taken your Pyretic Saline."

Dr. Sparks, the Government Medical Inspector, port of London, bears cordial testimony to its efficacy in chronic forms of Gastric complaints and Febrile dyspepsia.

William Stevens, Esq., M.D., D.C.L., states in his work on West India fevers, that wherever the saline treatment is adopted the fatal yellow fevers are deprived of their terrors.

Testimonials and directions for its use in disease accompany each bottle. To be obtained from H. LAMPLOUGH, 113, Holborn, London, and any of the Agents of this Paper, in bottles at 4s. 6d., 11s. and 21s.

Dr. Curtis on Marriage, Nervous Debility, Spermatorrhœa &c, with Plates. Post free by the Author, 12 stamps; sealed ends, 20.
MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Infallible Lotion, the result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albermarle-street, Piccadilly, London.
REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.
"Curtis on Manhood should be in the hands of young and old. It is an ably-written medical treatise on diseases of error and effects of climate."—Sunday Times, March 23, 1856.
"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the source of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.
N.B.—Agents in India—Von Lintzgy, Loll Bazaar, Calcutta; Athenæum office, Madras; Hinnam, Queen's-road, Hong Kong, China; Observer office, Colombo, Ceylon; Esperance, Bombay; Times office, Malta, price half a dollar or one rupee. London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S PILLS are the most gentle, yet most effective aperients, and therefore better calculated for a family medicine than any other drug. They always set the stomach right, rouse the liver, stimulate the kidneys, and thoroughly cleanse the whole system. Holloway's Pills are most useful in chronic weakness of the stomach, induced by luxurious living, sedentary habits, or other causes. They have restored the emaciated to health after every other means had failed. While they are purifying they are strengthening, while regulating they are increasing nervous and muscular power. These Pills do not excite any violent action in the body; hence they are specially suited to the young and feeble, whose constitutions may be irretrievably injured by more powerful medicines.

Clark, Mr. and Mrs. D. Halkett, and European female servant, Mr. W. Eames, Miss Thurburn, Miss Dunnet, Mrs. Burr and two children, Mr. Kennedy, Mr. and Mrs. J. P. Kennedy, Major F. Grant, Mr. R. W. Trafford, Mr. and Mrs. E. O. Bradford, Capt. C. R. and Mrs. Shaw and infant, Mr. A. Rogers, Miss M. Fleetwood, Capt. Probart, Messrs. Fryer, R. Thomas, Robinson, and Freeman, Capts. Clay, and F. Cunliffe, Messrs. J. D. Gordon and Riddell, Rev. C. W. Calmsac, Major and Mrs. Freer, Capt. Shaw's native female servant, Sarah Mason, Mr. C. Tawney. To Madras: Capt. and Mrs. Haggard, Messrs. McGrigor, Overbury Fastnedge, and Gibson, Capt. Peyton, John Atkinson. To Ceylon: Mrs. Tatham To Alexandria: Messrs. J. Hartley, T. A. Walker, W. B. Bray, Dickson, and Elliott, G H. Betts Bey.

Per steamer P. and O. Massilia, Oct. 27, from Southampton.—To Singapore, via Bombay: Mr. Dunlop, Mr. Fenwick, Mr. M. Fenwick. To Shanghai, via Bombay: Mr. Clark, Mr. H. and Mrs. Wilkinson, Mr. C. F. Jackson. To Hong Kong, via Bombay: Mr. J. G. Glover. From Marseilles, Nov. 4.—To Singapore, via Bombay: Mr. and Mrs. Weideihold, Mr. M'Clelland. To Shanghai, via Bombay: Mr. A. G. Henry.

Per P. and O. steamer, Nov. 4, from Southampton.—To Hong Kong: Mrs. Swinhoe, Lieut. Stokes, R.N., Commander G. H. Forster, R.N. To Shanghai: Miss Thompson. From Marseilles, Nov. 13.—To Shanghai: Messrs. W. Watson and W. E. King. To Hong Kong: Mr. Wheely. From Alexandria.—To Singapore: Miss Cook.

Per P. and O. steamer, Nov. 12, from Southampton.—To Singapore, via Bombay: Mr. C. H. Harrison. To Shanghai, via Bombay: Mr. Holdsworth. From Marseilles, Nov. 20.—To Hong Kong, via Bombay, Mr. M'Clure, Mr. T. Jackson. To Shanghai, via Bombay: Mr. McCalman.

Per P. and O. steamer, Nov. 20, from Southampton.—To Hong Kong: Miss B. E. Collett, Miss Lee. To Shanghai: Messrs. E. Crace, and M. Hawtrey. To Singapore: Mrs. W. W. Willans and infant. From Marseilles, Nov. 28.—To Hong Kong: Mr. T. F. Ballance, Mr. B. Mackintosh, Mr. P. G. Lawrie. To Shanghai: Mr. Hyslop. From Suez.—To Hong Kong: Mr. Caw.

Per P. and O. steamer, from Marseilles, Dec. 12.—To Singapore: Mr. and Mrs. H. W. Wood and lady friend.

Per P. and O. steamer, from Marseilles, Jan. 13, 1865.—To Hong Hong: Mr. M'Donald.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Our dates are to the 26th August. The P. and O. steamer *Ganges*, with the London mail of the 27th June, reached Yokohama on the 19th August.

It will be recollected that at the moment of the departure of the preceding mail there was some reason to expect that the English fleet, accompanied by the war ships of other European Powers, would leave for the Inland Sea to force, if needful, the passage of the Straits of Simonoseki. Her Majesty's ships *Barossa* and *Cormorant*, sent to land two Japanese retainers of the Prince of Nangato, who had recently come back from England, and, possibly, also to reconnoitre the coast—returned to Yokohama on the 10th August, shot and shell having been fired across the bows of the *Cormorant* to warn her from proceeding further. It was at first reported that the two Japanese had expressed an opinion that the Prince of Nangato would probably open the Straits in a little time. Our present advices, however, affirm, on the contrary, that "they stated verbally, but distinctly in reply, that Choshiu (Prince of Nangato) had been instructed, both by the Mikado and Tycoon, to keep the Straits of Simonoseki closed." It is added that "the connection of the name of the Tycoon with that of the Mikado created no little surprise, and gave rise to serious suspicions of duplicity and complicity, which will have hereafter to be cleared up."

The Shanghai *Record* says that it was decided at a Council of War, held on board the *Euryalus*, that the combined fleets should sail for Simonoseki on the 24th August. This was agreed to. Orders were sent over to Shanghai for more troops; vessels were chartered to convey coal for the use of the squadron, and everything was prepared. On its side the *Japan Herald* of the 25th August informs us that "as the 20th instant drew nigh considerable bustle and activity were observable in all matters connected with the fleets. The stores were besieged with the mess-stewards preparing for the creature comforts of the officers and men on their projected cruize; the order had been given to prepare for sea; the marines were all in readiness for embarkation; and we believe all was actually prepared for the departure of all the British squadron but one corvette, one despatch-boat and two gun-boats; all the French and Dutch men-of-war; and an arrangement made that the United States sloop *Jamestown* (the commander of which had offered to send a landing party of marines per *Ta*

Digitized by Google

Kiang to take part in the proceedings), should remain here to assist in the protection of the settlement and ships in harbour; when, on Friday, the 19th, the P. & O. S. *Ganges* arrived with, to the great surprise of all, the returned Japanese Embassy to France, in consequence of a recall by their Government, and with the intelligence that before leaving they had made a convention with the Emperor of the French, by which the Tycoon had engaged to open the Straits of Simonoseki within three months of their return. It was at once surmised that this important event would have the effect of checking, at least for the moment, any operation of the combined forces; and so it proved. It soon became known that orders for immediate departure to sea had been countermanded, and believed that time would be afforded to see if the Tycoon's Government would ratify the agreement made by his ambassadors. At the same time it was evident that the unexpected return of the Embassy, without so much as a visit to the other European Courts, taken in connection with the peremptory refusal of all the Treaty Powers to enter upon negotiations for the cession of any of the important rights of the treaties, would, in all probability hurry forward events; and therefore, so far from the present delay of warlike proceedings against Choshiu having calmed the excitement, it has probably tended rather to increase it upon the question, 'What will be the next move upon this chequered board?' At present we have no knowledge of this—and probably shall not have until almost the last moment of time mentioned."

We will now take up the story from the Shanghai *Record*. That journal acquaints us that:—"At an interview with the French Minister, the Ambassadors laid before him a treaty arranged with France, in which it is stipulated to open the Inland Sea in three months. On the receipt of this intelligence the respective admirals were communicated with, and all orders previously issued for going to sea countermanded. The *Cormorant* was despatched to Shanghai, to meet, if possible, the *Perseus*, and stop the coal ships. The latter were stopped, but the former was at sea. This news came upon everyone with surprise, and that the French had outwitted us, seemed at the first blush of things to be the case. The mail steamer was due however so soon, that a reservation was made on any remarks. Yesterday, the 31st ulto., the *Ganges* arrived, with dates up to the 26th, and private advices a day later. The whole tide of affairs had turned. The Tycoon repudiated the acts of his Ambassadors, and said in consequence of their having exceeded their instructions, they must perform the *Hari-kari*. On this the French Minister interfered, and said if such were carried out, it would be considered as a declaration of war. Meanwhile, it soon became apparent that there was no intention on the part of the Gorojio to differ from the Tycoon, and the end is, that once more orders were made to prepare to go to sea. The marines were to embark on the afternoon of Thursday the 26th, and on the following Sunday the combined fleet were to proceed to their destination. The English squadron comprises the following vessels:—*Euryalus, Conqueror, Barossa, Tartar, Coquette, Cormorant* and *Bouncer*. The French:—*Semiramis, Dupleix*, and *Tancrede*. The Dutch:—*Medusa, Metulen, Kruis, Djambi*, and *Amsterdam*. In all, fifteen men-of-war. This imposing squadron, all in high order, ought to inflict most summary chastisement on this august Prince, and if the Tycoon is in league with him, then a general war with Japan will ensue. This must come sooner or later, and now when the irons are in the fire they ought to be kept in, for once taken out, nothing cools so soon."

It will be observed that our Shanghai contemporary contradicts himself in the above. If he had private advices to the 27th August, he would have known whether the marines did embark on the 26th or not. The "irons" are not so "hot" as all that, and we can state positively that no fleet had sailed from Yokohama, or was, perhaps, likely to sail under any circumstances, before the arrival there of the next English mail.

The *Japan Commercial News*, of the 24th August, makes the following important statement on, as it says "information from an authentic source":—

"The Dutch Consul-General left yesterday for Yedo in advance of the Legation. Sir Rutherford Alcock, Monsieur Roches, and General Pruyn leave to-day, having agreed upon a programme which is likely to bring matters to an early issue with the Japanese Government. We are not at liberty to give publicity to more than merely to announce the immediate departure of the Ministers to Yedo."

The men-of-war in harbour were the following:—British: *Euryalus, Tartar, Argus, Kestrel, Bouncer, Coromandel, Havock, Pelorus, Conqueror, Coquette, Racehorse, Leopard, Hesper* (was to leave for Hong Kong on the 25th) *Barossa*. French: *Semiramis, Dupleix, Tancrede*. Dutch: *Medusa, Djambi, Metulen, Kruis, Amsterdam*. United States: *Jamestown*.

On the 24th August General Brown reviewed the 20th Regiment upon the open space near the German Cub. The regiment formed in line and received him with a general salute; after the usual evolutions—marching past in slow and quick time, and the manual platoon and bayonet exercise,—square was formed inwards, and the General, accompanied by the Colonel and staff, rode into its centre, when, visibly affected by the occasion, he addressed Colonel Brown and the battalion. The General, in a few brief sentences, recalled to mind the long period with which, as general, he had been associated with the Twentieth; he very highly eulogised them for their consistent good behaviour at home and abroad, and assured them of the great pleasure he should have when meeting H.R.H. the Duke of Cambridge, to tell him that, whether in China or Japan, his "favourites" were ever the same, and if dropped at Aldershott would be found "*Nulli secundus*." He then stated that his entire service was drawing to a close, but that should he ever be able to aid a Twentieth man he had known, he had only to apply and feel sure of sympathy and assistance from an old soldier, whom they would ever find a true friend. The Commandant having suitably thanked the General, the battalion gave him three hearty British cheers, showing their love and respect for their old General, under whom, with a short interval, they have served since 1861. Having formed column and line the battalion advanced in review order, halted, and gave a general salute, after which they returned to barracks. General Brown had taken a berth on board the *Ganges*, which brought the present mail to Shanghai.

The *Commercial News* of the 24th remarks:—"The weather at Yokohama has undergone a great change for the better. A few days since the weather was hot and sultry, the thermometer standing at 90 deg. in the shade. Copious showers of rain have recently fallen and reduced the temperature to 78 deg. We hope our hot sultry season is now past. The health of the settlement continues good, of that of the troops we have not heard any complaints. We hope their wants will be attended to, as there appears no likelihood of their services being required for some time at least, unless the Tycoon repudiates the acts of the late Embassy to France, in which case an early movement of the fleet may be expected. As the services of the Marines are not likely to be wanted for three months, we hope they will be provided with more suitable accommodation than they have at present in those uncomfortably small tents."

The death of the Rev. R. Hamilton recorded in the "Obituary" in our last issue is thus adverted to in the journal last quoted:—"It is our melancholy duty to have to report by the present mail the death of the Rev. R. Hamilton, late Chaplain to H.M.'s forces, Shanghai, sincerely regretted by a numerous circle of all classes for his urbanity and invariable kindness of disposition. He came over here from Shanghai on sick leave, and his health was greatly improved. He seems to have been seized with a fit whilst bathing, from the effects of which he never rallied, although every medical assistance was rendered. The funeral took place with military honours on the 16th August, attended by a large concourse of naval officers and civilians."

The *fête* day of the Emperor of the French, the 15th of Aug., was kept as a great festival by all the French residents. *Te Deum* was celebrated in the Catholic Chapel, and in the evening his Excellency the French Minister gave a state dinner party, at which were present Sir Rutherford Alcock, K.C.B.; General Pruyn, American Minister Resident; D. de Graeff von Polesbroek, Consul-General of the Netherlands; the English and French Admirals, General Brown, Lieut. Col. Browne, and a large company of officials. Madame Van der Voo represented Madame Leon Roches. The toast of the evening—the health of the Emperor of the French—was given by Sir Rutherford Alcock, and the French Minister gracefully gave "The Sovereigns or chief rulers of the other Powers." The two several bands of the Twentieth Regiment, and H.I.M.S. *Semiramis*

Digitized by Google

were stationed in the grounds and played throughout the evening. At night there was a grand illumination.

A formal regulation has been issued by which the British Consul will be enabled to levy a monthly tax on each slaughtering establishment kept by a British subject, to cover the expense of removing refuse, &c.

The *Japan Herald* contradicts the statement it made in a previous number, and which was reproduced in our last issue, that a *fracas* had occurred in the streets of Yedo between the Marines of the United States man-of-war *Jamestown* and the attendants of one of the great Daimios.

Mercantile Notices.—The interest and responsibility of Mr. V. Blanc in the firm of Remi, Schmidt, and Co. ceased on the 1st of August. The interest and responsibility of Mr. P. J. Batteke in the firm of Textor and Co. ceased on the 1st of July, and Mr. W. H. Aretz wss admitted a partner on the 1st of August. Mr. V. Blanc was admitted a partner in the firm of Constensoux, Ledermann, and Co., on the 1st of August. Mr. Frederick O. Wellmann is authorised to sign for the firm of Walsh, Hall, and Co., per procuration, from the 1st of August.

NAGASAKI.

The *Hong Kong Daily Press* has received the following from a correspondent at Nagasaki, dated the 31st of August:—It is a long time since I wrote you last; but there has been hardly anything worth while for me to write about. We are now on the alert looking for the Ronins. The Japanese say that as soon as Simonoseki is bombarded by the fleet, they will come here and make trouble. The Prince of Fizem, who or many years has always been a friend to foreigners, is reported to have joined Choishu. Fizem and "Ische Corzem" have the command of all the ports and barracks here, and have commenced destroying all the barracks and villages near the forts, for fear that they should be set on fire by the English shells, and have mounted guns where the barracks were. Their ideas are that the English fleet will get the worst of it at Simonoseki, and will be obliged to come here for repairs, so Fizem will fire upon them, and finish the fleet altogether. The Japanese are unmistakably proud, and a licking will do them a great deal of good. My opinion is that there will be no fighting whatever at Simonoseki, as Choshiu will give in immediately he sees the fleet near him; he is a great humbug, he dares not fight foreigners, as he knows it will only be his ruination. It is reported by the Japanese authorities that there has been hard fighting at Kioto (Osaca) with Choshiu, and that the latter got the worst of it.

The Japanese here are now fencing in all the hills rounds and about the foreign settlement; they say it is to prevent any assault of the Ronins, but my idea is that they are politely bringing old Decima ideas. It is a shame that the foreign Consuls here should allow it; we should be ashamed of ourselves, as we are only showing the Japanese that we are afraid of them. If the Ronins choose to come, let them come, and we are strong enough to defend ourselves until we can safely get on board ship. The Japanese Government have made a treaty, so they must abide by it, and be responsible for our lives and property. We have the *Scylla* here for our protection, and we have enough. We have also started a volunteer corps, which is called the "Nagasaki Armed Fire Brigade;" you will see particulars of it in the *North China Herald*. The "Imperial," "London," and "Northern" Insurance offices of London have sent out as a present to the corps a very handsome fire engine, by Shand and Mason, which is very acceptable, and we all thank them very much for their kindness. We have at present forty-eight members enrolled, and no doubt we shall have sixty in a few days, as more people are coming in every day; we require a good military man to put us in working order.

CHINA.

Peking.

A correspondent informs us that Sang-ko-lin-sin has been elevated to hereditary rank in consequence of the successes which have lately attended the Imperial arms. He has also received a despatch from the Emperor extolling his devotion, and commiserating the discomforts to which he subjected himself by prolonging a campaign into the middle of summer. His Imperial Majesty accordingly sends the Prince several packages of tea, and some cooling medicine. E-Ching Wang (the prince of Kung) has also been raised to hereditary rank, while his pay and allowances as a prince have been doubled. This latter mark of the Imperial favour he has, however, declined.

Shanghai.

The English mail of 17th July arrived out on the 2nd September. The dates are down to 4th.

The *North China Herald* notices the general dulness prevailing.

The weather has undergone a considerable change during the past fortnight; the long dry season which we have experienced having come to an end, and the September rains set in vigorously. The atmosphere has, in consequence, become cooled.

There is little local news of interest to record, even th Consular Courts having been unusually quiet. At the Ameri can Consulate General, on the 17th ult., in a cause in which the master and owners of the tug *Martin White* were plaintiffs, and the master and owners of the barque *Catalpa* defendants—claim for salvage—judgment was given for the plaintiffs to the amount of 22 per cent. on the vessel and cargo. A second shipping case was tried in the same court, on the 25th, arising out of a collision in which the schooner *Moosmie* was sunk by the steamer *Fire Dart* in the Yang-tze, on the morning of the 24th July. The owners claimed damages from the latter vessel to the amount of 10,000 tls., at which they rated the value of the schooner. Judgment was, however, given against them, as it was held the *Moosmie* rather than the *Fire Dart* was in fault.

Great dissatisfaction has been caused by the promulgation of an order by the Postmaster at Hong Kong, directing that no letters are in future to be received in the Shanghai Post-office unless pre-stamped. It is felt that Shanghai is not a colony, and that it is not fair that every rule held applicable to post-offices in Her Majesty's dominions should be imposed on residents here—especially as, in the present instance, no possible advantage is derivable from the innovation. The packe agent will find it more troublesome to weigh every lette posted, and sell the poster the requisite stamps, than was pre viously found in receiving a batch of letters at the window weighing and noting the amounts of postage at leisure, and placing them to the debit of the firm which sent the letters.

Hoochow.

This city fell into the hands of the Imperialists on the 28th August. We had previously learned from native reports that the rebels were rapidly sinking into the state of misery which heralded the approach of the fall of Nanking. Rice was scarce, but actual starvation had not as yet set in. The most serious want was that of firewood, of which there was not a particle to be found. Deserted houses had been pulled down and co[illegible] burned, and a general impression prevailed that the city could not hold out much longer, as supplies of every kind were cut off. At length, on the day mentioned, the garrison retired without beat of drum through a pass in the Thé Deu hills into the prov[illegible] Kiang-si. The disposition of the Imperial forces ordered in the *Peking Gazette* of August 1st would seem to have proved of no avail in stopping the retreat of the Hoo-chow garrison. What the course may be which they will now adopt—whether they will subside quietly into the ranks of the peaceful inhabitants, or whether they retain sufficient organization to attempt fresh conquests, may well become matter for speculation.

H.M.'s *Rattler* has arrived from Nagasaki with dates to 20th Aug. The natives state that, as soon as hostilities commence in the Inland Sea, Nagasaki will be inundated by Ronins—a by no means pleasant lookout for foreigners. The *Scylla* has been sent down to relieve the *Rattler*, which in turn has replaced the *Perseus*, which has left Shanghai to join the fleet at Yokohama. It seems rather hard on the officers and men of the *Rattler* to keep them a second time out of the chance of distinguishing themselves. Last year when the fighting at Kagosima was going on, the *Rattler* was stationed at Nagasaki, and she is now again sent out of harm's way. From the 14th to the 17th the annual ancestral festival was kept up by the natives. On the 14th the dead were supposed to revesit their former dwellings, where they remained until the night of the 16th. On that night a vast number of straw boats brilliantly illuminated were thrown into the bay for the purpose of re-conveying the spirits to their different localities. The following evening was spent in dissipation of every description. Freight was at a stand still. The three masted iron schooner *Cleopatra*, after having waited for six weeks for cargo, was obliged to leave in ballast for Kong Kong. Twenty-two merchant ships were in harbour.

The troops whose approaching departure for Yokohama we announced in our last, left in the *Chusan* on the 24th August, under the command of Captain Drummond, of the *Belooches*.

Digitized by Google

The excellent arrangements made by the captain and officers of the *Chusan* to secure the comfort of the troops deserve mention, and the well-known kindness and courtesy of the same gentlemen will, should the weather and fates be propitious, secure a pleasant passage for all on board. H.M.S. *Perseus* has left for the same destination, the *Rattler* having arrived from Nagasaki to relieve her. The latter vessel has been replaced at Nagasaki by the *Scylla*.

The *North China Herald*, in noticing the railway budget of Sir Macdonald Stephenson, says:—

"That the monetary support which Sir Macdonald Stephenson anticipates from the wealthy natives will be accorded, we have no doubt. The precedent afforded by the readiness with which they invest their money in steamers, amply justifies the presumption. And the singular facilities offered by the country for the construction of railways, especially in its richest provinces, leave little room for fear that his anticipations of their cheapness will be falsified when tested by the event. Proposals have, we are led to infer, been already laid before the Chinese Government, according to which the latter are to guarantee twelve per cent. on the capital employed, securing its due payment upon the customs revenues; and these proposals Sir Macdonald Stephenson has, he says, reason to believe will be eventually adopted. Whether or not this belief is well founded, we do not profess to offer an opinion; but confine ourselves to expressing a hearty hope that the event may justify it."

HANKOW.

A correspondent says that the news of the fall of Nanking has excited in the native residents great hopes of an increase in trade at the former port. A rise has, in consequence, already taken place in the price of oil-paper, and other commodities of the same class. The neighbourhood of Hankow is perfectly tranquil, and it is hoped that it may now continue so, as the fall of Nanking will probably place large bodies of troops at the disposal of the Hoopeh authorities, who will thus be enabled to hold the Nien-fei in that province in check. The death of H. E. Kuan Wen, Governor-General of the two Hu, is announced. It is said that Li Futai will fill the vacancy.

KIU-KIANG.

The Times correspondent at Shanghai writes on this port:—

One of the most flourishing and improving ports in China, and one of the best situated for trade, is that of Kiu-kiang. Its situation, near the point were the waters of the Poyang Lake join those of the Yang-tze, renders it the natural emporium of trade for the province of Kiangsi, as all the canals and rivers which intersect the northern portion of the province converge into that lake, and furnish excellent means of communication, by which the produce of the green tea districts can reach the foreign market. Thus it is from Kiu-kiang that nearly all the green tea which we import from China is brought. Fifteen and a half million pounds, valued at 4,250,000 taels, were exported during 1863. The export of black also was very considerable, having reached nearly 10,000,000 lbs., valued at 2,133,000 taels. Thus the total export of tea from Kiukiang during 1863 amounted to 25,500,000 lb., against only 21,000,000 lb. which were imported at Shanghai from the whole Yangtze river during the preceding year. Tea, of course, is the great staple of the Kiukiang trade, and all other exports sink into insignificance compared with it. Indeed, it represents six out of the seven millions of taels at which the total value of the export trade of the port is estimated. Towards the remaining 1,000,000 taels paper contributes 400.000 taels, and China ware 106,000 taels. Tobacco figures for 68,000 taels, rice for 53,000 taels, and "dried ducks" for 168 taels. Among the imports, opium, of course, takes the highest place, the estimated value of the 269,480 lbs. which entered the port being 1,075,000 taels, but of this 21,000 taels' worth was afterwards re-imported. The total value of absolutely foreign goods imported was 1,776,700 taels; in this amount are included shirtings, flannels, cloths, long ells, and every description of cotton goods. The value of shirtings alone was 400,000 taels, of long ells 78,000 taels, of Spanish stripes 49,000 taels, and of T-cloths 49,000 taels. The remaining half of the 3,200,000 taels, at which the total import trade of the port is estimated, is made up of very various items, principally contributed by other Chinese ports. Seaweed, for example, figures for 100,000 taels, and sugar for 160,000 taels. Nankeens contributed 66,000 taels, and silk piecegoods 96,379 taels. The Corea contributed 14,000 taels' worth of ginseng, which is highly esteemed in China as a medicine. The other imports are hardly of sufficient importance to be worth noticing; but, as a specimen of the kind of trade carried on among the natives, it may interest your readers to know that the value of bird's-nests imported into Kiu-kiang last year was 49,000 taels; that of sharks' fins 1,649 taels, and that of sheep-skins (to line clothes), 2,682 taels.

HONG KONG.

The English mail of 26th July arrived out on the 3rd Sept. The dates are down to Sunday morning 11th.

It appears that it is contemplated to enforce on the landholders the erection of a new Praya. The following notice is from the *Evening Mail*:—"We learn, incidentally, that a deputation of merchants have recently waited upon the Governor with regard to the Praya question. We have not heard what the result of the interview has been, and we do not think there is any great necessity for inquiring. Marine lot-holders will have to suffer for the inefficient work of the Government. Any, the commonest, workman could have laid down the Praya in a manner that would have been creditable to the masonic craft, but the Government of Hong Kong chose to retain in their employ a man who was either ignorant of the first principles of masonry or grossly careless of how he executed Government work. Our own opinion is that, to extreme ignorance the Surveyor-General added gross carelessness; and the result of such an unhappy combination is now to be seen in the present tottering bund, which the Governor of this colony has the *naivete* to suggest should be put to rights at the expense of those who have already paid handsomely for its misconstruction. We forbear to inquire into the results that have arisen from the deputation to the Governor. It would, in our opinion, be utterly idle to expect anything that transpired at a public meeting, or that was advanced by a deputation, to have the smallest effect upon such a Government as that now administered by Sir Hercules Robinson. We believe that a public meeting is called, or about to be called, with a view of expressing some opinions about the Praya question. Very few people will attend except the foreign marine lot-holders, and not even many of those.

The following is a report of the meeting of the Legislative Council on the subject of the military taxation:—

The Legislative Council met at noon, and there were present: His Excellency the Governor, the Hons. Colonial Secretary, Acting Chief Justice, Attorney-General, Auditor-General, Treasurer, Messrs. Murray, Whittall, and Chomley.

The minutes of the last meeting having been read and comfirmed,

The Governor moved the second reading of an "An Ordinance to apply a sum not exceeding $613,000 to the Public Service of the year 1865."—and the Council went into committee to consider it clause by clause. The Governor stated that the estimated cost of the mint was $238,711, the new gaol at Stone Cutter's Island $99,648, new Post-office $20,843, Police Barracks $61,759, new boat-house for Water Police $2,100 and head-quarters for the volunteers $2,500. It appeared that the military authorities could not let the volunteers have the room they had hitherto occupied in Murray barracks, and it being necessary that they should have an armoury, a shed for their guns and an orderly room, the above sum was necessary to be granted for the purpose of finding shelter for the public property.

On arriving at the item $92,000 military contribution,

Mr. Murray rose and opposed it. He said it was unnecessary for him to occupy the time of the Council with remarks, as the arguments against this military contribution were well known by all there, and had received the unanimous approval of the greater portion of the foreign community of the colony, and the despatches on the subject were in the hands of every member of the Council. He therefore moved that the item of $92,000 for military contribution be struck out.

Mr. Whittall seconded Mr. Murray's resolution.

The Colonial Treasurer voted for the obnoxious item being struck out of the estimate as he considered the demand both unjust and arbitrary.

The Auditor-General said he felt himself bound to vote for the contribution as being ordered by the Secretary of State.

The question was then put to the vote, when there appeared.

For Mr. Murray's resolution.....4.
Against " " .....4.

The Governor gave the casting vote against, and the item for military contribution was, therefore, ordered to remain in the estimates, which accordingly passed, and were numbered 8 of 1864.

The Colonial Secretary said that in order that the Secretary of State should not be misled by the vote of the Council, and to show him that its members had not voted according to their opinions, which were, in fact, in accordance with the general feeling of the public on the matter, he begged to propose the following resolution:—

Resolved, "That this Council is of opinion that the maintenance of troops in Hong Kong is not necessary purely for the protection of Colonial interests, or the security of the inhabitants, and that the Colonial Revenues cannot fairly be charged with any contribution towards the Imperial Military Expenditure in China and Japan."

The Acting Chief Justice had the gravest doubts whether the colony could be satisfactorily governed without the presence of troops, and thought that it was not for us to decide whether we could do without them or not.

The Attorney General said he should oppose the Colonial Secretary's resolution because he did not feel himself competent to decide whether we wanted soldiers or not.

The Governor considered the resolution of the Colonial Secretary a proper one. It rested with the Crown to decide whether we shall be taxed or not, but if the members voted for the tax in silence it would lead the Home Government to suppose that they voted according to their own wishes and those of the public. He thought it quite right to let the Secretary of State know that though the sum had been voted, the Council was opposed to it.

The Auditor-General seconded the resolution of the Colonial Secretary, which was ultimately carried by a majority of eight to one, the dissentient being the Attorney General.

His Excellency said it would become necessary then to consider how the sum for the military contribution should be raised, whether by loan or additional taxation. He thought the fairest way would be to have stamps for bills of exchange, cheques, bills of lading, &c., as in Singapore.

Messrs. Whittall and Rennie advocated raising debentures for the first year. It was resolved to defer the consideration of the subject to a future meeting.

Digitized by Google

The Governor then read some correspondence on the subject of a pension of £300 per annum to the Bishop of Victoria, application for which had been made by his lordship to the Secretary of State by whom it had been referred for the consideration of the Council.

Mr. Murray and Mr. Chomley both said a few words in favour of the grant, which will be discussed at the next meeting of the Council.

"An Ordinance for Compiling a New Edition of the Ordinances of this Colony" was read a second time, and passed, being numbered 9 of 1864.

"An Ordinance for Preventing Frauds upon Creditors, by Secret Bills of Sale of Personal Chattels," was also read a second time and passed, numbered 10 of 1864.

"An Ordinance for Incorporating and Winding-up Companies under the Limited Liability Act," was read a first time.

The Council then adjourned to Tuesday, the 13th September.

The Hong Kong Volunteer Artillery competition for the Challenge Cup, presented by his Excellency the Governor came off at Kowloong. The firing took place under an awning wisely provided by the forethought of the acting Adjutant. Thirty-one volunteers entered as competitors for the much-coveted privilege of being the first name inscribed on the cup, which remains the property of the corps. The winner, at the same time, gets a cup of inferior value, the palladium remaining in his custody for a year, or for so many successive years as he may continue to win it—an excellent arrangement, as the lapse of years will continue to prove; for a record of the champion gunners will be handed down to future generations of volunteer artillerymen, in a pleasing and durable form. The day was unusually hot, but this did not deter numerous spectators from attending the match. The band was present, and played several delightful airs, "General Jackson" being evidently the favourite. We question if any former volunteer turnout has ever been so thoroughly enjoyable as this. The firing was not much, if at all, inferior to that of the Royal Artillery.

The British ship *Langdale*, from England, reports that she experienced heavy south-west gales off the Cape, and light winds and calms up the China Sea. The British ship *Eastern Light*, bound to Shanghai, went upon the reef to the north end of Pulo Leat, in the Gaspar Channel, on August 15th. Her crew, with the assistance of the *Langdale* and *Henry Darling*, succeeded in getting her off the next day; but she was making water so rapidly that she had to be abandoned, and sank soon after. Part of the crew have come on in the *Langdale*, the rest, including the captain, stopping with the Resident of Billington Island, who was on board shortly after the catastrophe, rendering every assistance in his power. The *Langdale* signalled the British barque *Heroes of Alma*, from London bound to Shanghai, on August 17th, off Gaspar Island; and on August 28th, in lat. 12.47 N., long. 112.8 E., she spoke the British ship *Lord Dalhousie*, from Hong Kong bound to Liverpool.

H.M.'s transport *Adventure*, in entering the harbour, ran into the American ship *Mary Whitridge*, carrying away her own fore and main yards, and the American's fore top-gallant mast. She then crossed the Spanish brig *Gravina's* bow, carrying away her jibboom, next the British barque *Arrow's*, and finally was brought up by the British steamer *Arratoon Apcar*, whose bowsprit was taken off, with all the head gear. The *Adventure* has sustained considerable damage, having stove in her bulwarks and lost several of her boats.

JAVA AND NETHERLANDS INDIA.

The *K. der Nederlanden* arrived at Singapore from Batavia on the 18th September.

Since the publication of our last summary (says the *Java Times*), affairs at Singtang (Borneo) have taken a more favourable turn. Our "little war" has, if we may believe the statements of the official *Gazette*, come to an end. The fort at Sintang had been attacked by the rebels, but the assailants were beaten off with but trifling loss to the troops engaged, whilst the insurgent chief, Nata Widjaija, was gradually losing the influence he possessed on the minds of his followers, who, by the late repulse, have been taught to disbelieve his professions and assurances. The state of affairs was, therefore, much more satisfactory, and such being the case, the proclamation, by which the neighbouring country was declared to be in a state of war, has been revoked. The reinforcements sent arrived too late, and the honour of having vanquished the enemy is the unshared portion of Colonel de Neve's gallant little band. The steamer *Celebes*, it would appear, greatly aided in the defence of the fort, her projectiles carrying upwards of 3,000 ells. From this the wisdom of having river boats will be seen: a squadron of these kept continually on the broad rivers of the interior of Borneo, would be the best means of coercion.

The northern ports of Sumatra have been visited by several shocks of earthquake, which, however, happily did no damage. The incessant rains on the west coast had been very unfavourable for the paddy harvest. We are told that the Pulo Bay, the entrance to Bencoolen, is becoming rapidly so shallow that prows of the lightest draft experience difficulty in proceeding to the town. Trade and navigation, therefore, are fast declining, and Bencoolen, one a flourishing seaport, is now rarely visited by ships. The steamers which ply between Batavia and Padang, touching at Bencoolen, have to land their passengers and cargo at a great distance from the town.

On the 10th September, the first Government Sugar and Coffee sale of the season took place here. The prices realised were satisfactory. This sale brings to the treasury no less than some two millions three hundred thousand guilders.

Since the imprisonment, a few years ago, of Mr. Lion, the Editor of the *Handelsblad*, the press of Netherlands India had remained pretty free from Government persecution. Latterly, however, the Government have found it necessary to banish two gentlemen of the press for publishing seditious articles. Mr. Nosse, the Editor and publisher of the *Nieuwsbode*, will be obliged to leave Netherlands India, and Mr. Roorda van Eijsinga is ordered off to Banda (this gentleman being born in Batavia, the Government has no power to expel him from the colony). Both parties are Dutchmen.

The cholera is gradually disappearing. One of its last victims was Francisco Borghese Caiado, Esq., one of the commissioners deputed by the Portuguese Government of Timor to purchase *materiel* for the troops stationed at that place. The deceased was head of the Finance Department of the Timor Government, and an able and much respected personage.

MALACCA STRAITS.

SINGAPORE.

Dates are to the 19th September. The London mail of the 10th August arrived out on the 10th September.

The *Straits Times* expresses its satisfaction at being informed that the Bill for the Transfer of the Settlement from the administration of the Indian-office to the Imperial Government has been already drafted, and that it will pass through Parliament early next session as a matter of course.

A circumstance which has lately transpired brings the small independency of Johore into prominent notice. This native principality occupies the heel of the Malay peninsula, and is divided from the Island of Singapore only by a narrow strait some three miles to five miles in breadth; in Johore, large supplies of gambier, rattans, and other native products are produced, and they have hiterto been sold to Singapore buyers, and have formed a considerable item among our exports to Europe. The Rajah or Tumongong of Johore now, however, with the view probably to the development of his country, is making an effort to establish a market on his own soil, where the producers will receive a larger or at least a more competitive price for their products. The Singapore Chamber of Commerce asserts that pressure is to be laid upon the producers to prevent their sending their products to Singapore, and to compel them to dispose of them in Johore; and it has therefore petitioned the Governor to interfere. We do not know, but we scarcely think the Tumongong would care to jeopardise his best interest by the use of undue pressure; but whether he is about to do so or not, the *Straits Times* thinks the Chamber of Commerce will find it difficult in the absence of any treaty obligation, to dictate commercial regulations to a potentate not long ago declared in our court of justice, on the evidence of the representative of Government, to be the free ruler of a free State.

Singapore appears to be in want of amusement at present. The two amateur theatrical corps have apparently collapsed, and the old theatre in the Town Hall has been dismantled to make way for new fittings, which the Municipal Commissioners are very justly determined to provide for the public, independent of any particular corps or party. There are to be no Autumn Races; the horses at present there are too few in number, and it is expected that there will be all the better sport next spring, by allowing this autumn to pass.

A warrant of apprehension was issued on the 5th September at the instance of Captain Brown, of the British barque *Axelia* against five of the crew of that vessel for mutiny. The *Axelia* left for Hong Kong on the 3rd, and when at the entrance of Rhio Straits the men refused to work, and the captain apprehending a mutiny put back to Singapore. On

Digitized by Google

coming into harbour assistance was rendered by H.M.S. *Severn*, the Commodore ordering a boat's crew to take the men into custody. We are informed the men were under the influence of drink, a case of gin having been discoverd in their possession, minus eight flasks. The Marine Magistrate sentenced two men to twelve weeks' imprisonment in the House of Correction with hard labour, one to eight weeks' imprisonment, and two others to ten weeks' in the same quarter.

Two European gunners, respectively named Thomas Berry and James Forrest, belonging to the Royal Artillery, have absconded, and are understood to have got on board a vessel bound to Shanghai.

Captain G. Kunst, master of the Dutch barque *Louise Kron Prinses of Sweden*, reports having seen a new shoal not marked on his chart, bearing, Poelo Varalla or Brahalla W.N.W. per compass, three miles dis., with only twelve feet water on it.

A French gunboat has got the worst of it in an encounter with pirates. His Imperial Majesty's gunboat *Entrecasteaux*, says the *Siam Times*, was attacked by three piratical junks on July 10th. After two hours' hard fighting she was obliged to take shelter near Cape Verella. The junks were lashed together lengthways, and were heavily armed; but they suffered much damage from the gunboat's firing. During the fight the pirates manœuvered their boats with oars." After the gun-boat had been driven away, the *China Merchant* being in sight they made away after her, but a breeze springing up she escaped.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BRUCE—On the 18th Oct., at Duffryn, Aberdare, the wife of the Right Hon. R. A. Bruce, M.P., of a son.

DICKSON—On the 22nd Oct., at No. 27, Albany-street, Edinburgh, the Hon. Mrs. D. S. Dickson, of a son.

ELLES—On 19th Oct., at Wimbledon-common, the wife of Jamieson Elles, Esq., of a daughter.

GIBBS—On the 20th Oct., at Southampton Villa, Highgate, the wife of Richard Gibbs, Esq., of a daughter.

JONES—On the 30th Aug., at Shanghai, the wife of C. Treasure Jones, H.B.M.'s Consular Service, of a son.

LOGAN—On the 20th Oct., at Lingfield Cottage, Angell-road, Brixton, Mrs. William G. Logan, of a son.

MARRIAGES.

BRYANS—ANTROBUS.—On the 18th Oct., at Astbury, by the Rev. Francis Bryans, vicar of Backford, father of the bridegroom, the Rev. Francis R. Bryans, to Anna Maria, youngest daughter of the late Gibbs Crawfurd Antrobus, Esq., of Eaton-hall, Congleton.

GULICK—COUR.—On the 3rd Sept., at St. John's Cathedral, Hong Kong, by the Rev. J. J. Irwin, D.D., the Rev. John T. Gulick, of the Sandwich Islands, Missionary to North China, to Emily de la Cour, of Rochester, England.

KITSON—COFFIN.—On the 6th Oct., at Uffculme, Devon, by the Rev. F. Kitson, uncle of the bride, assisted by the vicar, the Rev. G. Marker, Edward Kitson, Lieutenant H.M.'s Indian army, son of the late Rev. Cartwright Kitson, to Henrietta Isabella, youngest daughter of the late Rev. J. T. Pine Coffin, of Portledge, Devon.

MARSH—SCOTT.—On the 20th Oct., at Lucan Church, by the Rev. J. George Scott, A.M., rector of Bray, assisted by the Rev. C. Ensell, incumbent, Major A. L. Marsh, late of the 55th Regt., son of the Rev. George Augustus Elliot Marsh, rector of Bangor, Flintshire, to Susan Agnes, daughter of the late General Sir Hopton Stratford Scott, K.C.B., and Lady Scott, of Woodville, Lucan.

PATMORE—ALLEN.—On the 7th Sept., at St. John's Cathedral, Hong Kong, by the Rev. J. J. Irwin, D.D., Colonial Chaplain, James Harry Patmore, commission agent, to Carolina Allen, of North Shields.

THURLOW—BRUCE.—On the 18th Oct., at Forres, in the St. John's Episcopal Church, by the Right Rev. the Bishop of Brechin, assisted by the incumbent, the Rev. Edward Owen, the Hon. Thomas John Hovell Thurlow, to the Lady Elma Bruce, eldest daughter of the late Earl of Elgin and Kincardine.

TOWSE—SILVERLOCK.—GRUGEON—SILVERLOCK.—On the 22nd Oct., at St. John's Church, Upper Lewisham-road, Deptford, by the Rev. C. F. S. Money, M.A., incumbent, assisted by the Rev. A. J. Myers, B.A., curate, William Beckwith Towse, Esq., of Fishmonger's Hall, to Rosetta, second daughter of Henry Silverlock, Esq., of Wicklam-road, New Cross; and at the same time, James Grugeon, Esq., of the London and County Bank, Sheerness, son of James Grugeon, Esq., of Woolwich, to Lauretta, third daughter of Henry Silverlock, Esq. No cards.

THOMAS—GROVES.—On the 26th Aug., at St. John's Cathedral, Hong Kong, by the Rev. J. J. Irwin, D.D., Colonial Chaplain, John Thomas, seaman of the British barque Euphrates, to Sarah Groves, of London.

DEATHS.

ASHTON—On the 31st Aug., at Fuhchau, Herbert Ashton, eldest son of J. K. Ashton, aged 1 year and 10 months.

BRANTWAITHE—On the 30th Aug., at the Seamen's Hospital, Hong Kong, Wm. Brantwaithe, seaman British ship Sir Isaac Newton.

BROWN—On the 21st Aug., at Honsque, Robert Brown, boat builder, aged 53 years.

BURT—At Shanghai, the infant daughter of W. Burt.

CROFT—On the 5th Sept., at Shanghai, on board the steamer Mercury, Francis Croft, aged 28, late of Messrs. Jardine, Matheson, and Co.'s employ.

DE CERCAL ANTONIO—On the 28th Aug., at Macao, of inflammation in the throat, Camila de Mello, daughter of the Baron de Cercal Antonio, aged 4 years and 11 months.

DODGE—On the 28th Aug., at the Civil Hospital, Hong Kong, J. Dodge, seaman.

FARREN—On the 23rd Aug., at Manila, John William Ferry Farren, H.B.M.'s Consul for the Philippines.

HIGGINS—On the 28th Aug., drowned in Hong Kong harbour, William Higgins, seaman British steamer Fusi-yama.

MACLEAN—On the 14th Oct., at his residence, Haremere Hall, Hurst-green, Sussex, Alexander Campbell Maclean, Esq. (late of Messrs Jardine, Matheson, and Co., China), in the 67th year of his age.

MOUL—On the 21st Oct., at St. George's-terrace, Dalston, John Moul, Esq., of 106, Fenchurch-street, aged 19.

MURRAY—On the 20th Oct., at The Whetmore, Onibury, Shropshire, Jane Isabella Erskine, eldest daughter of the late Hon. James Erskine-Murray, of Aberdour, Fifeshire, Grandaughter received from burns on Sept. 20.

MORRISON—On the 12th Aug., at Hankow, Allan Morrison, of the firm of Morrison and Watt, boat builders and proprietors of the Hanyang Marine Hotel.

MATHER—On the 15th Aug., accidentally drowned, Capt. N. W. Mather, late of the barque Ellen.

ROHL—On the 7th Sept., at Hong Kong, Adolphus Rohl, master of the ship Medora.

SOMERVILLE—On the 19th Oct., at Newbold Comyn, Leamington, Vice-Admiral Lord Charles Somerville, in the 77th year of his age.

SMITH—On the 30th Aug., on board the British ship Sea Nymph, Edward Smith, seaman.

WEBSTER—On the 12th Aug., George Harley Webster, aged 29 years.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

COMMERCIAL REPORT.

CHINA EXPORTS.

CANTON.—For Congous the market is firm. Three more chops have arrived from the country. The total supplies are not expected to exceed thirty chops this season. A fair business has been done in Tayshans at a reduction of 1 to 2 taels. In Scented Orange Pekoes the transactions have been small on previous terms. Scented Capers, extra fine, scarce and wanted; other kinds one tael cheaper. In Green Teas nothing has been done.

AMOY.—Transactions continued on a fair scale during the first three weeks of the past month, but since the departure of the Maggie Leslie, Bedford, and Samuel Russell, buyers have evinced a disposition to retire from the market, which consequently tends down.

FOOCHOW.—The extent of business transacted during the fortnight has been but moderate, low flavory and medium sorts have declined one tael. The teamen are rather anxious sellers of all kinds, except the few remaining chops of second class Kaisow, for which in consequence of scarcity they are asking slightly higher rates. Souchong, Oolong, Pekoe, and Scented Teas, are without alteration in quotations.

SHANGHAI.—Black: There is little business to report during the past fortnight. The news by the 10th July mail, which was generally considered unsatisfactory, counteracted the effect of the rapid fall in exchange, and a few settlements were made at previous quotations. Prices are now decidedly easier, in consequence of the recent advance in the value of sterling; and four chops were settled, which establish a decline of about one tael on last mail's rates. The stock, which consists of 66 chops, is almost entirely in foreign hands. The settlements of the fortnight are reported at 5,000 chests on the market, besides 13,700 chests re-shipped on owners' account—making the transactions for the fortnight 18,700 chests, and for the season to date 211,500 chests. The stock unsold and unshipped is 66 chops. Quotations are—first and second crop Oopacks, tls. 28 to 33; Ningchows, tls. 28 to 33; Oonahms, tls. 20 to 28; Hohows, tls. 20 to 22. Green: Little has been doing in this class during the past fortnight, and buyers for the American market are holding off for the arrival of the new Moyunes and Fychows, which are expected in about another week. Settlements have been 4 chops Pingsuey, at tls. 39 to 41, and one chop of Fychow, Ningpo packed, at tls. 38, which establish a decline of about one tael on previous quotations.

HANKOW.—Business during the past fortnight has again been limited, the teamen still remaining firm in their prices, and with the exception of a few chops sold under pressure, no alteration in prices can be quoted. About 20 chops 3rd crop have come to market, which are considered much superior to last year's growth, possessing both a good leaf and strength, and compare very favourably with the season's 2nd crop. Settlements since the 13th inst. are 44 chops, making the total settlements for the season 502 chops, and leaving a stock on the market of about 35 chops.

YOKOHAMA.—In consequence of large receipts and an accumulating stock, together with the unfavourable advices received from Europe, we note a decline upon former quotations of $3.50 per picul. Regardless of the firm rates still demanded by dealers for the finer sorts, a disposition to operate on American account has manifested itself the past fortnight, and settlements for the month may be estimated at 3,150 piculs.

NAGASAKI.—Considerable excitement has continued since the receipt of news of the intended opening of the Inland Sea, and our merchants have evinced great anxiety to quit their teas at a reduction of $1 to $1½ per picul on previous rates; prices still range however from $1½ to $2 over last year's. Intending purchasers are holding off for a further reduction, which is looked for so soon as the fleet commences active operations.

RAW SILK.—SHANGHAI.—The transactions of the fortnight are stated at 2,500 bales, against 2,150 bales corresponding fortnight of last season, and 5,900 do. the corresponding fortnight of the previous season. The unsold stock is estimated at 7,000 bales, against 15,000 last season and 11,000 the season before at the corresponding periods. The following are the current quotations. Tsatlees: No. 1 chops, tls. 480 to 490 per picul.

CANTON.—The advices from the country have not been encouraging, and the quantity of fine silk which has reached this being very small, prices have advanced $10 to $15 per picul. For London 8 bales tsatlee reel go forward on European account, which is the first shipment this season. Quotations are thus given, viz.:—Loon-Kong, No. 1, $460 to 465—18s. 5½d. to 18s. 8¼d., laid down in London; Loon-Kong, No. 2, $445 to 450—18s. 9½d. to 19s., laid down in London; Kow-Kong, $425 to 430—17s. 11¾d. to 18s. 2¼d, laid down in London; Canton tsatlee, $480 to 485—8 bales for Europe; Re-reeled Cumchuck (nett) $515 to 520, none for this steamer; waste silk, No. 1, $54 to 56; waste silk, No. 2, $41 to 44, about 150 bales settled.

YOKOHAMA.—We are unable to report any favourable change in this staple's market, nor indeed do we see any indication from which to judge of when such change may be expected. We hear that there are very considerable quantities continuing to come into Yeddo—the arrival of which to our market is most eagerly looked for.

NAGASAKI.—A muster representing a very small parcel of medium Tazima has been brought in, but the price asked by the holder is fully 50 per cent. over extreme valuations.

DRUGS—CANTON CASSIA LIGNEA.—1,800 piculs have been taken for shipment to the Continent at $15.10 to $15.50, showing an advance of 35 to 40 cents on previous rates. The stock, which is now reduced to 600 piculs is held at $15.40 to $15.60. The quality now sent to the Canton market is not better than that usually sent to Macao. Cassia Buds: 15 piculs have been taken for shipment to New York at the last quotation, say $52.50—a small supply of 20 piculs has increased the stock to 50 piculs again. China Galls: 100 piculs have been taken for shipment to the Continent at $12.75 being an advance of 50 cents. The present stock of 100 piculs is held at $13. Vermilion has declined $1.50 per box, being now offered at $41 per box of 50 catties. Rhubarb: The stock of 130 piculs is still held far above its value. Musk: No fresh supplies: the old stock of 50 catties mixed quality is still unsold. Galangal: No buyers; 200 piculs have been shipped to Macao for sale Essential Oils: None on the market.

CAMPHOR.—HONG KONG.—The stock on hand, amounting to about 900 piculs, noticed in our last has not yet been disposed of, holders not being willing to accept a lower price than $19 per picul, while purchasers only offer $18½. It seems, according to last advices, that the article is again becoming scarce and dear in Formosa, and the shortly expected supplies will not appear before some time.

RAW COTTON.

HONG KONG.—The French mail steamer arrived on the day of the departure of the last mail, bringing favourable advices (under date of 17th July) of the Liverpool market. These produced a corresponding effect here, and sales were effected of, medium Shanghai at $35, of do. Ningpo at $36, and Japan, which is very scarce, at $37 to $38. The London mail of 26th July arrived on the 3rd, bringing advices of cotton having fallen one penny. This intelligence did not affect the market, there being still buyers, and the stock being much reduced. During the last fortnight about 8,000 bags have been received from Chefoo. This description, though clean and white, is not adapted to the Liverpool market, being dull, coarse and defective in staple. The closing quotations are—Shanghai $35, Ningpo $36, Japan $38, Chefoo $32½ to $33½. The sales of the fortnight amount to about 10,000 bags. The stock unsold is computed at 13,000 bags.

AMOY.—Supplies having been full, the market is heavy. Sales are reported of 75 bags Chefoo at $33, quotations for that description having receded to $31¼ to $32½, Shanghai being quoted $32½ to 33½. The stock in foreign hands is stated at 700 bales, there being about 4,000 bales in the hands of Native merchants.

NINGPO.—Contracts have been effected in the interior at $28.70 per bale of 118 to 120 catties, to the extent of 3,000 bales; expense of transit to be borne by purchaser.

YOKOHAMA.—During the month this staple has received more attentions and the purchase, made have fully maintained previous rates, with steady arrivals. Settlements for the month amount to 6.150 piculs. Unsold stock 2,000 piculs. Rates may be quoted at $27.00 to $28.00 per picul.

	Exports from 1st July to date	Against season 1863-64	Against season 1862-63
England	... 4,759	41,714	1,269
America	... ——	574	——
Shanghai	.. ——	461	1,557
Hongkong ..	... 2,875	30,135	8,107
Total ...	bales 7,634	bales 72,884	bales 10,933

SHANGHAI.—A fair amount of business has been done, at an advance of one tael. The old crop is now nearly exhausted, and the new staple cannot arrive in any quantity under a month from this date. We quote No. 1 Shanghai, tls. 19.50 to 20.00 Hankow, 18.50, Tientsin, tls. 2.00 to 2.50 per picul.

CHINA IMPORTS.

COTTON YARN.—This article remains at the nominal quotations given in last report, but there have not been any transactions in it during the fortnight, if we except a small sale of 51 bales of sea-damaged yarn moved off by public auction. Grey Shirtings show an advance in value of fully 10 cents per piece, when compared with the rates ruling at the end of last month, and there has been a considerable amount of business (consisting principally of 8-4 to 8-6 lb. goods) transacted. The Chinese dealers, however, continue to exhibit much caution in making purchases, and both the rise in value and the amount of settlements reported must be attributed to the presence of foreign buyers in the market, whose purchases make up a large proportion of the business done. Sales are estimated at 15,000 pieces to the native dealers, and 30,000 pieces to foreigners. The business done in these goods at Foochow amounts to 8,250 pieces, which have found buyers at $5.50 per piece, for lbs. 8-2 to lbs. 8-4 goods. There has not been any business doing in Canton. White Shirtings: The demand for these fabrics runs principally upon the lower qualities, and the sales of the fortnight are put at 5,150 pieces, taken at about former quotations. T-Cloths: Continue to remain comparatively neglected, and although a moderate amount of business has to be reported, the settlements are principally on foreign account, and prices remain unchanged. Sales are estimated at 8,000 pieces, exclusive of 6,500 pieces damaged cloths sold by auction. American Drills: There are not any sales of these goods to notice. White Spotted Shirtings, Dyed do., Brocades, White and Coloured: Continue without any inquiry, quotations remaining in a great measure as before given. Chintzes: 800 pieces of these goods have found buyers. Handkerchiefs: 1,000 dozen have been sold.

WOOLLENS.—Spanish Stripes, Medium Clothes, Ladies' and Habit

Digitized by Google

Cloths: These goods have continued extremely dull of sale since the date of last report, and the only transactions reported consist of 120 pieces of Spanish Stripes, and about a similar quantity of medium cloths. Long Ells have met with a fair amount of inquiry, but prices are still extremely low; the sales reported for the fortnight amount to 1,200 pieces, exclusive of 80 pieces damaged goods moved off by public auction. Camlets: Continue in moderate demand, and the market for those fabrics is tolerably firm; the sales of the fortnight amount to 1,100 pieces. Lastings: A similar amount of lastings has found buyers, and prices remain without material change to notice. Blankets: The sales of the fortnight amount to 1,000 pairs.

Metals.—Iron, Flats, &c.: The market in this colony for all descriptions of iron has been extremely dull throughout the fortnight, and the only sale reported is the settlement of 900 piculs of nail rod. In Canton 300 piculs of the same description have found buyers. Lead: The price of lead has declined in this market during the past fortnight, and there are not any sales to advise. In Canton the settlements are put at 800 piculs. Tin: 450 slabs sold. Tin Plates: Are extremely low in price, the sales amount to 700 boxes. Steel: 100 tubs reported as settled.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6 months sight.		6s. 6¼d. to 6s. 8d.	6s. 7d. to 6s. 9d.
At Foo-Chow-Foo (per dol.)	6	ditto	...	...
At Canton, At Hong Kong, At Macao	6	ditto	4s. 10d.	4s. 10d. to 5s. 0d.
At Singapore	6	ditto	4s. 10¼d.	4s. 10¼d. to 5s 0d.
At Manila	6	ditto	4s. 6d.	4s. 6d. to 4s. 7d.

At Shanghai, Bills on India, Rs. 315 to 320 per 100 taels. At Hong Kong, Rs. 227 per $100. Bar Silver at Shanghai, 111 taels; at Hong Kong, 9 premium. Mexican dollars at Shanghai, taels 75 per 100, and Exchange on Hong Kong, 27 to 28 discount.

The circular of Mr. Sharp quotes:—

Gold.—The arrivals of gold during the fortnight amount to one hundred and ninety thousand dollars' worth; the shipments outward, including those by the last mail, and excluding those to leave by this, have amounted to the large total of four hundred and seventy thousand dollars, value. Owing to the inquiry both for India and for Manila, the market has been pretty well clean swept.

Silver.—About two lakhs and a quarter dollars' worth have been received; and the same amount exported. The only considerable transaction has been the Government sale of Sycee last week by tender. One million and ninety thousand dollars have come in, and one million and seventy thousand have gone out. Clean dollars stand very much as by last account.

Discounts and Mortgages.—Some heavy sums have been done at eight per cent. for a month, and at six per cent. for shorter time. For mortgages of house property and Chinese securities higher rates are demanded.

SHIPPING INTELLIGENCE.

ARRIVALS.

At Japan.—From London: Aug. 3, Alice.

At Shanghai.—From London: Aug. 20, Canadian, and, 21, Spirit of the Deep. From Cardiff: Sept. 1, Anna Welch.

At Hong Kong.—From England: Sept. 5, H.M.S. Adventure. From Liverpool: 6, Star of the North. From Cardiff: Aug. 31, Lord Macaulay. From Hamburg: Sept. 5, Albert Justice.

At Manila.—None.

At Singapore.—From London: Sept. 1, King of Trumps; 5, Maggie. From Liverpool: 2, Oceanica; 8, Simoon. From Glasgow: 5, Osprey. From Cardiff: 2, Mary Ann. From Shields: 15, Lancashire. From Birkenhead: 4, Hannover. From Swansea: 15, Northumberland. From Bordeaux: 2, David. From Rotterdam: 9, Louise Kron Prinses van Zweden. From Hamburg: 9, Helena.

At Penang.—From Liverpool: Sept. 15, Fairy Belle.

At Batavia.—From Liverpool, Cherokee. From Glasgow: Thomas Mitchell.

DEPARTURES.

From Japan.—For London, August 17, Anna Maria. For Liverpool, Jane Isabella, and 24, Vigil.

From Shanghai.—For London, August 22, Solent; 24, Wild Deer and September 1, Marquis of Londonderry.

From Foo-chow.—For London, August 18, Carausius; 27, John Temperley, and 29, Racehorse. For New York, 29, Cassiterides, and 30, Queensland.

From Amoy.—For New York, August 22, Maggie Leslie.

From Hong Kong and Canton.—None.

From Macao.—For London, Sept. 4, Aboyne.

From Manila.—For London, August 23, Constance; 30, Staffordshire. For Liverpool (via Zebu), 27, Royal Mint. For Falmouth, 21 Voladora; 24, Ocean Empress. For New York, 26, Julia Ambridge.

From Singapore.—For Liverpool, September 15, Tigris. For Falmouth, 1, Queen Bee.

From Penang.—For London, Sept. 4, Spitfire.

LOADING.

At Japan.—For London: Lucknow, Fleda, Little Edith. For Liverpool: Gyrn Castle. For New York: Brilliant.

At Hankow.—For London: Dovercourt, Camila, str. Far East.

At Shanghai.—For London: Avondhue, John Banks, Napoleon III., Queen of Nations, Sarah Newman, Maravi, Waverley, Yaratilda, Claramont, Toftscomb, Southern Cross. For Liverpool: David McIvor, Finzil, Southern Empire, Patna, Providence. For New York: Prince of Wales.

At Foo-chow.—For London: Horsa, Lord Raglan, Gauntlet, Rajah of Cochin, West Derby, Ellenborough, Verbena, Harkaway. For New York: Endeavour, Bedford, Samuel Russell, Ravensworth.

At Hong Kong and Canton.—For London: Cathaya, Ben Lomond, England. For Liverpool: Everest, Delhi, Samarang, Mount Stuart, Elphinstone.

At Singapore.—For London: Wm. Simpson, Warren Hastings, Northumberland. For Liverpool: Moneta, Simoon.

At Penang.—Golconda, Isabella.

At Batavia.—For England: Maria, Sawely Cludow.

FREIGHTS AND CHARTERS.

Japan.—To London: Cotton and tea, £3 to £4; silk, £5 per ton of 50 feet nominal.

Shanghai.—Little is offering, and the vessels on the berth are filling up but slowly at £3. 10s. to £4 for London, and £3 to £3. 10s. cotton to Liverpool.

Foo-chow.—To London, £3. 10s.; to New York, £3.

Hong Kong.—The following, from George Holmes's circular, will show the transactions of the fortnight:—Lord Raglan (753 tons), to Foo-chow for London, at £3. 5s.; Gauntlet (793), to Foo chow, on the berth for London, at current rates; Gitana (1,335), to Shanghai for London or Liverpool at £3. To Bangkok and back the rates are 40 to 45 cents per picul.

Manila.—To Liverpool: Wet sugar, £3 to £4. 2s. 6d. per ton; hemp, £4. 10s. per ton. To New York: Hemp, $15.

Singapore.—Tonnage in the harbour plentiful, with little freight offering. The rates for home are with difficulty maintained at £2. 15s. to £3 for dead weight, and £3. 15s. light cargo.

Batavia.—To Continent, for dead weight, £3. 17s. per ton. Shipping in harbour in excess of present requirements.

VESSELS PASSED STRAITS OF SUNDA.

From England and Continent to China, &c.—Aug. 26, Conchita, London to Manila, Eleanore, Hamburg to Hong Kong, Chrysees, Liverpool to Hong Kong; 27, Cesaria, Cardiff to Shanghai. Sept. 1, Brouwershaven, Rotterdam to Samarang; 2, Vanban, Bourbon to Batavia, Landbauw, Rotterdam to Batavia, Willemina and Clara, Amsterdam to Batavia, Stad Middleburg, Middleburg to Batavia, Kinderdyk, Rotterdam to Batavia; 3, Isles of the South, London to Shanghai, Oriental Queen, Sunderland to Shanghai, Weymouth, London to Shanghai; 3, Juthib, Bordeaux to Singapore, Graafstroom, Rotterdam to Batavia; 5, Kosmopolist, Rotterdam to Batavia, Hector of Bremen, Nantes to Singapore; 7, Ystroom, Amsterdam to Batavia, North Sunderland, Swansea, to Singapore, Scottorse, Liverpool to Shanghai, Minerva, Newcastle to Shanghai; 9, Venezuela, Cardiff to Hong Kong; 28, Conchita, London to Manila, Peveril of the Peak, Phillip I., Swansea to Hong Kong, Hanover, Liverpool to Singapore; 29, Zingra, Cardiff to Shanghai, Rubicon, London to Amoy, Meggie, London to Singapore.

From United States to China, &c.—August 30, Anna, New York to Shanghai; September 5, Apollo, New York to Shanghai; 7, Carolus, New York to Hong Kong; Princess of Wales, New York to Shanghai; and 8, Maribelle, New York to Hong Kong.

From China, &c., to England and Continent.—August 28, Ajax, Sourabaya to Rotterdam; 30, Peeress, Batavia to Falmouth.

From China, &c., to United States.—September 3, Westward, Bangkok to New York; 7, Veltore, Batavia to Boston.

CASUALTIES.

NEWCHWANG.

The Bremen brig *Rio Plata* has been totally lost, on the Kae-chu Bank, Newchwang (during August).

The American barque *Phillipe de la Noye* has sustained material damage by striking on the bar at Newchwang, and will most probably be condemned.

COMMERCIAL POSTSCRIPT.

The engagements of Mr. T. W. Bradley, have been returned. He has, it appears, been engaged in some transactions with Messrs. Duckworth and Co., which involve disputed accounts.

The failure of Messrs. De Wolff, Shuck, and Co., general merchants, has been announced. The debts and liabilities will reach about £35,000 to £40,000.

Cotton.—The market yesterday in Liverpool was better, and prices have advanced about 1d. The sales comprised—300 American 20½d. to 23d.; 240 Pernam, &c., 20½d.; 10 Maranham, 26d.; 350 Maceio and Bahia, 19½d. to 20d.; 300 Egyptian, 12d. to 24d.; 30 Smyrna, 13d.; 13,770 Surat, 8d. to 16¼d.; Madras, 15d. to 16d.; Bengal, Scinde, &c., 6d. to 9¼d.; China, 11d. to 12½d.

Sugar.—Sales of Siam at 33s. 6d. to 36s. for yellow, and 38s. 6d. white.

Silk.—The market during the fortnight has been exceedingly quiet; the high prices, together with the unsettled state of monetary matters, having caused consumers to hesitate before increasing their stocks. No transactions of importance have taken place, and we make no change in our quotations, though there are a few parcels in second hands which might probably be bought at prices a trifle lower. Deliveries from 1st to 24th inclusive:—China, 2,441 bales; Japan, 1,081. Total, 3,522 bales.

Tea at New York.—An offering at auction was mostly withdrawn; prices bid for the first lot not being satisfactory.

Arrivals not Included in the Tables.—Oct. 21. at Havre, from Rangoon, Minerve; 25, at Deal, from Hong Kong, Aunt Lizzie; 25, off the Goodwin, from Batavia, Hollands Trouw; 24, at Portsmouth, from Hong Kong, &c., H.M.S. Ringdove, —; 25, at Falmouth, from Rangoon, Oxford.

Laid on at London.—For Batavia, Samarang, and Sourabaya, Emilie, for Shanghai, Challenger; for Hong Kong, City of Aberdeen.

The Saginaw, reported as having arrived at Deal from Akyab, should have been reported as having sailed for that port.

The Scotland, Manley, from the Clyde, for Batavia, put into Falmouth, 23rd Oct., leaky.

Spoken.—Gebroeders, Amsterdam to Batavia, Sept. 12, 8 N., 22 W.;

Digitized by Google

Koning Willem II., Sourabaya to Amsterdam, Aug. 13, 29 S., 42 E.; Sjofroken, Batavia to Amsterdam, Sept. 9, 35 S., 26 E.; Zeephire (?), Rotterdam to Batavia, July 11, 24 S., 30 W.; Christian, Batavia to Rotterdam, July 19, 10 N.; Fifeshire, Canton to London, Aug 13, 35 S., 27 E.; Osborne House, Shanghai to London, 150 days out, Sept. 21, 1 N., 21 W., and was supplied; Boni, Shields to Sourabaya, Aug. 30, 5 N.; Stad Leyden, Batavia to Amsterdam, 26 S., 50 E.; Shanghai to London, 10 S., 123 E.; Cornelis Smit, Batavia to Schiedam, Sept. 2, 26 S., 56 E.; Empress, Penang to London, Sept. 19, 33 S., 15 E.; Bothwell Castle (ship), Penang to London, Sept. 1, 28 S., 11 E.; Pilgrim (supposed) (Dut. barq.) Batavia to Amsterdam, 50 days out, Aug. 28, 35 S., 22 E.; Hendrina, Amsterdam to Batavia, Sept. 1, 16 N., 29 W.; Johore (str.) Newcastle to Singapore, Aug. 20, 26 S., 27 W.

Off Ascension.—Sept. 15, from Batavia, Konig Willem for Amsterdam; 21, from Shanghai, Rugat (?), for Liverpool; 30, from Hong Kong, Gundela, for London.

At St. Helena.—Sept. 11, from Batavia, Nereus, Planten, and sailed on the 13th for Rotterdam; 12, Sperwer, Opperman, and sailed 13th for Amsterdam; from Penang, Sea Wave, Warden, and sailed 13th for London; from Batavia, Nederland, and sailed 13th for Rotterdam.

At Algoa Bay.—Sept. 16, from Batavia for Liverpool, Alicia Annie.

Report of the Ship "Childers," A. Enright Com ander, from Foo-chow:—

1864.			
July	10th, sailed from Sharp Peak.		
Aug.	8th, passed through the Straits of Sunda	29	days out.
Sept.	3rd, rounded the Cape of Good Hope	55	do.
„	19th, passed St. Helena	65	do.
„	20th, crossed the Equator.....	72	do.
Oct.	8th, passed the Island of Flores	90	do.
„	19th, at 6 P.M., abreast of the Lizard.		
„	20th, passed through the Downs.		
„	21st, at 5 A.M., anchored in Gravesend, and docked on the 103rd day out.		

REMARKS ON THE OUTWARD PASSAGE.

Left Gravesend on the 24th December, 1863, and took the departure of the Lizard 29th, 1864:—

January 15.—Crossed the Equator, 17 days.

February 5.—Lat. 41½ S., and on the meridian of the Cape of Good Hope, 38 days.

February 18.—Passed the Island of St. Paul, 51 days.

March 6.—Entered the Straits of Sunda, 68 days.

March 30.—Arrived in Hong Kong, 92 days from the Lizard, and 97 from Gravesend.

SILK CULTIVATION IN JAVA.

(From the *Javasche Courant.*)

In the district of Buitenzorg, the culture of silk is proceeding tolerably well, especially on the estate Tjikema, where under supervision of the Cochin-Chinaman, André Loeas, about 25 Neth pounds of raw silk, and the same weight of flax will soon be had, enough to hold a sale of.

The experiments made by Mr. Weber on the estate Tjogrek, in the above-mentioned district, have been successful. The results induce him to proceed with the cultivation of silk; he is also busy extending his premises as far as his means permit. Some time ago Mr. Weber sold the silk he had thus obtained, at Batavia, for 13 f.—a Neth pound, raw, and for 252 f. per pound flax.

At the establishment for agriculture at Tjimoendoel, district Krawang, the planting of ten bouws with mulberry trees was almost completed. About five bouws had already reached the height of five or six feet, and the shrubs were in excellent condition. A commencement had been made with the building of the sheds and workshops, and the work would soon follow.

Mr. ter Meer, at Samarang, has not been successful in his undertaking. He must have suffered greatly by the inundations there, and does not appear to have succeeded in planting the mulberries properly either, on account of the unfitness of the ground he had chosen. As far as is known he has not yet brought any to market.

Mr. C. le Roy, at Sourabaya, is at present engaged planting mulberries in eight bouws of ground near the passar Keopang. The *magnanerie* Marcus at Malang, the property of Messrs. Marcus and van Isselmuden, is progressing slowly. The quantity of the produce obtained was none of the best, principally on account of the inexperience of the workmen. This induced Mr. Marcus to repair to Buitenzorg, accompanied by some of his men, in order to obtain instruction for himself and them from André Loeas, in the treatment of the worms and the spinning off of the cocoons or balls. He has since returned to Malang with his workmen.

At the establishment for agriculture at Banjoewangie not more than two bouws had been planted with mulberries, which may be ascribed to the difficulty they have there of obtaining seed. The overseer, Ponder, repaired with some workmen to Buitenzorg, accompanied by a few workmen to be instructed in the culture of silk at Tjibema, and was to have regulated the work on his return, according to the experience he had acquired. Unfortunately that official was attacked with cholera on the route to Sourabaya, so that it will be necessary to send another to take his place. This delay is to be deplored as, there being no one at Banjoewangie who can give the necessary directions, the work at the buildings and workshops that will be required must of a necessity be postponed.

Several persons at Samarang, Sourabaya, and Banjoemas have declared their intention to cultivate silk worms.

New colours for the 31st Regiment have arrived at Aldershott, and will shortly be presented. The regiment has seen much service in India, the Crimea, and in China. In 1860 it left India for China over 1,100 strong, and received during its stay in that country a draught of 102 men. It embarked from the latter place for England only 642 strong, having experienced a total loss of 588 of all ranks, or nearly one-half its strength, in the space of three years and a-half. It is not yet decided who will perform the pleasing ceremony of presenting the colours to the regiment, but is it thought probable that the wife of Major-Gen. Sir F. Lugard, K.C.B., will accept the office, the gallant major-genera lbeing the colonel of this distinguished corps. The colours at present borne by the regiment were presented at Dublin in May, 1848, by the then Major-Gen. Prince George of Cambridge.

OUR FINANCIAL AND COMMERCIAL RELATIONS WITH JAPAN.

(Money Market Review.)

We are not disposed to regard another display of febrile violence on the part of the rulers in Japan, directed against foreign settlers, as unfavourable to our financial and commercial interests in that quarter, provided the occasion be taken advantage of to define more clearly our national relations, and widen the basis of our trading transactions in accordance with the spirit and letter of Lord Elgin's treaty, the provisions of which have been continuously and systematically violated by the Tycoon's Government. This violation has come in the shape of official intervention to free intercourse, the placing of a wholly factitious value on Japanese goods, the withdrawal of merchandise brought to market, the turning back of produce on its way to consular ports, unreasonable exactions and duties, the encouragement given to the non-fulfilment of contracts on which money advances have been made, and the extreme and arbitrary variations in the rate of exchange of Mexican dollars for Japanese currency. Every disturbance affecting the power of the Tycoon shakes also those internal engagements by which that potentate endeavours to secure, as far as possible, the profits of our trade to himself—profits for which the Daimios are equally ravenous. The power of the Tycoon is confessedly on the wane, but it allows just that amount of cohesion between the native princes which will allow any arrangements with him on our part to obtain, in name at least, the force of general law. Now is the golden time for the revision of our commercial relations before the composite political structure falls to pieces. Our first object is, of course, the extension of our trade. There is nothing in the treaty to prevent our holding direct communication with the native Princes at ports in their own territories, instead of confining ourselves altogether to Government towns.* Although it is true that the Daimios would rob the native merchants quite as readily as the Tycoon, the way would be thus prepared for closer contact with the people; markets for our camlets and woollens would be multiplied, and Japanese exports would be increased both as to quantity and variety. The Prince of Shendai could supply us with timber that would compete successfully with India teak; the Prince of Matsmai could furnish us with manufactured copper to any amount; and Satsuma's agents would most probably fulfil the offers of trade they made subsequent to the bombardment of Kagosima. It is time that we should demand, too, as a portion of redress for any additional insult to our flag, an extension of commercial privileges. No concession would be more serviceable than the immediate opening of the remaining treaty ports, including Osacca, that great central market of the Empire, with its neighbouring entrepot of Hiogo. We may fairly assume that had we compelled the Japanese even to act up to the terms of the existing treaty, the value of the trade in goods at the consular ports in the present year would have reached £25,000,000, whereas it cannot exceed £4,500,000, involving, besides, a large balance in favour of Japan, which must be settled in silver specie and bullion. It is not to be expected that a country able to supply us with tea, silk, tobacco, oils, and increasing quantities of cotton and copper, with a variety of minor articles, including porcelain, lacquered ware and medicinal drugs, will absorb for some years our manufactured goods to the same value; but both imports and exports admit of immense development, and, were no artificial obstructions created, it is obvious that as suppliers of manufactures we should ultimately be the greatest gainers. Each succeeding season our trade appears to receive a new impulse; new firms spring up at the different settlements; the tone of the foreign community is improved; land increases in value; and tonnage, both for China and Europe, is enlarged. The establishment from time to time of new branch banks constitutes an additional sign of promise. What is now demanded is prompt action on the part of the Foreign-office in favour of the interests of our merchants and bankers, and, amongst other things, a settlement of the long-pending question of the Japanese currency. The key of access to the empire may be pronounced to be in Article X. of Lord Elgin's treaty, which provided for the exchange of foreign for Japanese coin, of the same sort, weight for weight, and for the general circulation of the foreign coin at a fixed rate or valuation.

We trust Sir Rutherford Alcock will be instructed to urge, among other things, on the Tycoon's Government the propriety of establishing the practice, now disallowed, of Japanese merchants submitting to a lien on their goods as security for advances. At present, the money advances of our merchants are made to irresponsible petty brokers, whose business it is to shield their principles when the fulfilment of the contract proves inconvenient. Merchants are ready and willing to give these liens, but they must not come to the knowledge of the Japanese officials. Here is a branch of business in which our banks will be enabled to perform most effectual service. Add to this the removal of existing obstructions, arising solely from the desire to limit trade by the Tycoon and to secure the main profits to himself; and it is easy to see that the face of the empire will be quickly changed, its available wealth be doubled, its resources utilised, and a new condition of things brought about in which the present conflicting political and national elements will disappear, or assume more favourable phases. We are in Japan simply as a trading nation, and it is the bounden duty of the Foreign-office to pursue henceforth an uncompromising course in the interest of commerce. By these means we shall soon secure in our dealings such a hold on the material interests of the country as will prove the best guarantee for a lasting and prosperous peace.

* The writer is in error, we think, in this respect. Unfortunately the treaty *does* prevent (as it now stands) our holding direct communication with the natives at ports belonging to independent princes; for in that treaty we acknowledge the Tycoon to be Sovereign Ruler of the whole Empire, and have agreed with him in that capacity, that we will trade at certain ports named by him *and no others*; he has taken care to name only such ports as are in Imperial territory.—Ed.

CHINESE PIRATES.

(MARITIME GAZETTE.)

The protest made by Captain Human and the first and second officers of the *Netherby*, as regards the very gallant and successful resistance offered by the Master, officers and crew of the ship against a horde of Chinese pirates in the Formosa Channel on her passage home from China confirms in every particular the reports formerly received, both as regards the position in which the ship was placed when attacked, the number of assailants, and the gallant manner in which they were repulsed. It was on the fourth day after leaving the Port of Foochoo, that the *Netherby* took the ground at the entrance of the Formosa Channel, and a short distance from the Pescador Islands. In the efforts made to get the ship clear all hands were busily employed, and it was not until a fleet of 100 sampans had collected, containing some 1,500 men, armed with large knives, hatchets, and other formidable weapons, that it became apparent to all on board that they were surrounded by a horde of Chinese pirates. The discovery was hardly made when night came on, and it became necessary for the safety of the ship to lighten her, and with that object to throw a portion of the cargo overboard. As this was done the jettisoned cargo was instantly picked up by the boats alongside, who had availed themselves of the darkness of the night to strip off the ship's copper wherever they could get at it, and to cut away the warp and kedge anchor, which had been carried out in the hope of working the ship off the reef. As the morning approached, the pirates, to the number of 1,000, emboldened, probably, by the impunity which had so far attended their operations, rushed on deck, and commenced simultaneously to plunder the ship and threaten the crew. Against this host ot assailants Captain Hulman could only bring to bear the efforts of himself, his officers, and the crew of twenty-six men, armed with bayonets, handspikes, and any other weapons which were at hand. With these—for it would seem no fire-arms were available—they contrived to kill or disable some fifteen of the pirates, and to keep the others at bay until, unhappily, the ship was got clear and sailed away from her pursuers. Had the *Netherby* remained a few hours longer on the reef, there can be no doubt that the pirates have returned to the attack in such numbers as to have utterly overwhelmed the ship's company. They had already cut every warp put out from the ship save one. Had they succeeded in severing that from the kedge, the last hope of the deliverance would have been lost, and the ship would have lain at the mercy of her savage assaliants, who would have plundered her to her last plank, and then have cruelly butchered every soul on board. From this fate the *Netherby*, her crew, and passengers were rescued, it would seem, mainly by the courage and self-possession of her commander and his officers, who, undismayed by such appalling odds against them, succeeded in resisting the efforts of a horde of sanguinary barbarians, and in saving the property of their employers and the lives of all on board from imminent destruction.

We are credibly informed that when the *Netherby* left Foochoo, only three days before she was boarded by these pirates, there was a force of British gunboats lying at their anchors in that port sufficient, if properly employed, to give an account of all the pirates in the waters of Formosa. The admiral on the China station should be apprised, if he does not already know it, that to make the Chinese waters safe for British merchantmen is of more consequence, under existing circumstances, than the giving safe conduct to trading junks up and down the rivers of the interior. A united effort on the part of the British and French men-of-war on the station, and would in a very short time clear the seas of these miscreants who are more feared by vessels in the coasting trade of China—and with very good reason—than they are by foreigners. An expedition such as that which, conducted by the Rajah Brooke and Captain Hall, of the *Nemesis*, cleared the waters of Borneo of the pirates which so long infested them, has become indispensable to rid the Chinese seas of a similar pest. The means of extermination are at hand; and why should they not be be employed? But, however Her Majesty's Government may be disposed to regard this matter, it has become the bounden duty of our ship owners engaged in the China trade, to see that their ships are adequately furnished with the means of resistance in the event of a surprise such as that which overtook the *Netherby*. It has already been suggested that our ships in the China trade should carry guns, and a certain number of naval reserve men, who could practice the gunnery drill at sea, and particularly, if the occasion offered, in the China Sea. Each ship should also be supplied with a sufficient stand of arms, and with good and reliable ammunition. Had the *Netherby* been thus prepared, she would have saved a good deal of property which unavoidably passed into the hands of her numerous assailants. We may add here, though we are quite sure, in most cases, the reminder is unnecessary, that by a well-known Act of the reign of Charles II., the "Mariners or inferior officers of any English ship laden with goods and merchandise" are compelled under pain of imprisonment with hard labour and the forfeiture of all wages due, to "fight and defend the ship when they shall be thereunto commanded by the master or commander thereof.', A Merchant ship, therefore, when there is occasion to be prepared, need never be left defenceless, but the duty of keeping the highways of Commerce clear of theives and pirates, is the plain duty of those Governments who have the disposal and distribution of the police of the seas—functions in the assumption of which the Government of this country has at all times, and with very satisfactory results to Commerce, taken the lead.

THE CHINA AND AUSTRALIA TELEGRAPH.

A correspondence has appeared in *The Times* on the subject of Sir Charles Bright's proposal that China and Australia could be connected in a period of three years. This communication appeared in our last issue. As the objections connected with the scheme are noticed in the following, we omit (for the sake of our space) the previous letters :—

(To the Editor of *The Times*.)

SIR,—Sir Charles Bright has made a show of replying to my letter, ut he has not answered it. He begins by saying that for the 1,000 miles which lie between Rangoon and Singapore his submarine cable is to lie in soft ooze, except at the landing-places. How can that possibly be when from the very necessities of the locality it must run through many places for half its course abounding in the coral reefs which are of the nature of these latitudes? The Indian Government had a cable made to connect the two places in question, but, discovering their mistake, abandoned the project. That very cable now connects Malta and Alexandria, and, although lying in soft ooze, has been repeatedly broken.

As to the route between Singapore and Hong Kong, your correspondent says that the utmost depth of the China Seas is not above fifty fathoms—a depth at which a cable "may be picked up and laid down again at pleasure." What! No difficulty in doing this, when for a great part of the year half a gale of wind blows persistently from one quarter with the occasional interlude of a typhoon? Sir Charles Bright's cable is, I now find, to have a resting station at Saigon. This will take it full 200 miles out of the straight course, and consequently the total length of this branch will be not 1,500 miles, as I stated, but 1,700. For the first 350 miles it must pass through or along islands with the same coral reefs which so often broke the Dutch cable to the west of the Malay Peninsula.

As to the cable between Singapore and Batavia, all that Sir Charles Bright says about it is that it is "to be laid on an even bottom," a quality of bottom which he alone has discovered, but how or where he says not. Sir Charles's submarine cable is, according to his statement, to be reduced by a land wire to pass through Banca. Now, the length of this island is 120 miles, and so the submarine line will be no more than 530 miles. Of the repeated rupture of the Dutch cable and its ultimate abandonment the engineer maintains a prudent silence.

We come next to the cable to be laid from Batavia, and which, passing through the Straits of Sunda, I made to land at Cape York, the whole distance being about 2,500 miles. From this distance Sir Charles Bright very properly deducts the land wire passing through Java, so that the distance which I gave for a submarine cable in this direction would be reduced to 1,900 miles; Sir Charles, however, seems now to give a preference to a new route, which is to begin with Java or the adjacent island of Madura, and proceed by Macassar, in the island of Celebes and the Portugese settlement of Dilli, in the island of Timur, and at the head of the Gulf of Carpentaria. The object of this route is to avoid a sea of impracticable depth. From Java or Madura to Macassar the distance is about 600 miles, and from Macassar to Timur it is not less than 780. In the first stage of this route the sea is not shallow enough for an electric cable, but in the last it is sometimes shallow enough; in others, towards Timur, of great depth, and always unequal, with abundance of the coral formation which is inseparable from these latitudes. From Timur to the head of the gulf of Carpentaria, making Port Essington and Wessel Islands intermediate stations, the distance seems to be about 1,260 miles, making the the total submarine cable 2,640 miles, or 140 miles longer than I made it from Batavia to Cape York. It might, indeed, be shortened by a wire across Timur, but this would reduce its length by no more than 50 miles, and the attempt might not be worth making, since most of the country to be passed through is in the possession of wild and mischievous tribes, who owe no allegiance to the Portuguese.

Sir Charles Bright tells us that there are but 70 miles of very deep waters, but from whom he has obtained this consolatory information he does not say. The distance from Timur to Port Essington is from 700 to 800 miles, and I understand almost every foot of it is water so deep that it has never been fathomed, and which, for what any one knows to the contrary, may be unfathomable: This broad and deep sea, distinguished from the comparatively shallow one to the north of it, forms the line of demarcation which separates two great geographical provinces of the earth's surface from each other, remarkable for the discordance of their vegetable and animal productions, man himself included.

Sir Charles Bright says that a telegraphic land communication is already established from Adelaide to Brisbane. By all means, therefore, let them be struck off the work to be done. Still there will remain the land wire from Brisbane to the head of the Gulf of Carpentaria, a distance of not less than 1,000 miles over a desert inhabited by roving savages, with nothing to eat beyond a chance kangaroo. As to the submarine line, the extent of cable which Sir Charles Bright proposes to lay down in three short years' time amounts to 3,878 miles, or about 130 miles short of the breadth of the Atlantic thrice told!

Sir Charles Bright reminds me that the scheme for connecting England and France by telegraph was thirteen years ago considered as chimerical as I now consider a connection of the same kind between England and Australia. On my part I must beg him to consider the difference as to facility of accomplishment of a cable 21 miles long and one which, passing by India cannot be less than 10,000 long. He admits that the cables which cross the narrow seas of Europe are "sometimes injured, but speedily restored to working order." No doubt they are easily repaired, but only because they are very short; and all the means and appliances, the material, and the skill close at hand. What can there be in common between such a case and an electric wire which extends to the Antipodes, and passes along the shores of barbarians and over wide seas which are seldom visited by the canoe of a savage? C.

SIR,—The key to the difference of opinion between your correspondent "C." and myself as to the feasibility of extending a line of telegraph from India to Australia and China may be found in the following paragraph in his last letter, referring to the depth of water between Timor and Port Essington :—

"Sir Charles Bright tells us that there are but 70 miles of very deep waters, but from whom he has obtained this consolatory information he does not say. The distance from Timor to Port Essington is from 700 to 800 miles, and I understand almost every foot of it is water so deep that it has never been fathomed, and which, for what anyone knows, may be unfathomable."

Upon this foundation a theory is built up that this "broad and deep sea" indicates the point of separation between two great portions of the earth and its inhabitants.

Your correspondent will find the information he seeks in the Admiralty chart of the northern portion of Australia and the adjacent islands published in March, 1862. He will there perceive that the whole of the sea between the Australian coast and Timor, with the exception of a portion

Digitized by Google

varying from 40 to 90 miles from the island, is under 80 fathoms in depth, the greater part varying from 30 to 50 fathoms. The proposed cable between Timor and Port Essington would, as I stated before, be laid in this comparatively shallow depth, with the exception of about 70 miles of its length, as to which we have no information; but there is no reason to anticipate very deep water, nor did I express any such belief. The same chart will acquaint your correspondent that the distance between Port Essington and the furthest point of Timor is 500 miles, the nearest point being 330 miles.

It is scarcely fair that "C." should occupy your space and my time in correcting these mistakes when the information can be so readily acquired from the most obvious sources.

In his former letter your correspondent asserted that the water between Hong Kong and Singapore was of "very considerable depth." In his letter published to-day he does not dispute the accuracy of my counter statement, that the depth is not more than 50 fathoms. He states, however, in reference to the section between Madura and Macassar, to which I referred as forming part of an alternative route between Java and Timor, that the depth is not shallow enough for an electric cable, and he gives the distance as 600 miles. I can only refer him to the English and Dutch charts, from which he will see that the depths in this section average 40 fathoms, which I consider a very suitable depth for a cable. The exact distance in a direct line is 330 miles, but this would probably be increased in laying the cable to 360 miles, in order to take the best course. Your corrrespondent again states that the Rangoon and Singapore line must be partly laid on coral. I repeat that although coral does exist in the sea proposed to be traversed, yet that the cable can be laid altogether clear of it, and that in the actual track laid out, the whole of the route is over a favourable bottom.

The destination of the present Malta and Alexandria cable was abandoned, not on account of any supposed difficulties between Rangoon and Singapore, but in consequence of one of the cable ships running ashore at Plymouth on her way out to Singapore; this caused the loss of the favourable season for laying, and rendered it necessary to change the destination of the cable, as it was unadvisable to incur the risk and expense of keeping it on board the vessels for another season.

Your correspondent refers again to the cable laid by the Dutch Government in 1859 between Singapore and Batavia. This was one of the earliest long submarine lines laid, and was altogether too slight. The outer iron covering was soon destroyed by the chymical action of the salt water, and the naked core was so frequently broken by anchors and currents that it was not worth repairing. It was laid, contrary to the advice of the contractor, between Sumatra and Banca, where the water is very shallow and where strong currents prevail.

The cables which are now proposed to be laid will be very much stronger, and different in many respects from those originally designed for long submarine lines.

In reference to the Australian land line between Brisbane and the head of the Gulf of Carpentaria, which "C." supposes will cross a desert, I may state that the intervening country is now settled to within 100 miles of the head of the gulf. The Government of Queensland has undertaken to construct this portion of the telegraph, and it may be assumed they have good reason to be satisfied as to its practicability.

Your correspondent, referring to the commencement of submarine telegraphy, begs me to consider the difference between laying a short cable in the English Channel and a long one in Eastern seas, and remarks upon the difference between repairing a cable crossing the narrow seas of Europe and the same operation in the parts under discussion. I look upon the connection of England with France by submarine telegraph, considering the state of our knowledge at the time, to have been a more difficult achievement then than the carrying out of the contemplated lines now, and so far as length is concerned, the longest proposed section will be shorter than one of the sections of the Malta and Alexandria line, while most of them are not longer than the cable connecting this country with Denmark.

With two steamers fitted with the necessary appliances for repairing cables (such as the steamer stationed on the Persian Gulf line), and a store of spare cable at the various stations, there would be no difficulty in maintaining the whole of the proposed lines in efficient and permanent working order.

I have the honour to be, Sir, your most obedient servant,

CHARLES T. BRIGHT.

1, Victoria-street, Westminster, Oct. 18.

SIR,—I observe that in "C.'s" letter, which appears in *The Times* of this morning, he states, with reference to the Rangoon-Singapore cable, that the Indian Government had a cable made to "connect the two places in question, but discovering their mistake abandoned the project. That very cable now connects Malta and Alexandria, and although lying in soft ooze has been repeatedly broken."

Now, Sir, as I was engineer to the Government for the cable in question, I am in a position to state that "C." is altogether wrong in the reason he assigns for the change in the destination of the cable.

The steamship *Victoria* sailed for Singapore with a portion of the cable on board in December, 1860, but was met by a violent storm in the Channel and had to put into Plymouth. This vessel was wrecked in entering the inner harbour. The delay thus occasioned caused the loss of the favourable season for laying a cable between Rangoon and Singapore, and Her Majesty's Government decided to change its destination, and to lay it between Malta and Alexandria rather than incur the expense and the risk of keeping it for several months on board the vessels. The termination of the China war about that time no doubt caused the change in the destination to be less regretted.

In my opinion, the depth and nature of the sea bottom between Rangoon and Singapore are more favourable for laying and maintaining a cable than between Malta and Alexandria.

It will throw light on the discussion with reference to the India, Australia, and China telegraph if I take this opportunity of shortly stating the results of over three years' experience of the working of the Malta and Alexandria telegraph, which is the first long submarine line which has proved permanently successful. The total length of cable laid between Malta and Alexandria is 1,330 knots, equal to about 1,550 statute miles. This cable was completed on the 23rd of September, 1861, and has therefore, been submerged more than three years. The first two sections—viz., Malta to Tripoli, and Tripoli to Benghazi, a total length of 860 statute miles, which have been laid three years and five months, have never for one moment ceased to work, or given the slightest cause for anxiety, but test at present as well as when first laid. The Malta-Tropoli section has a *maximum*, *minimum*, and mean depth of 420, 50, and 133, fathoms respectively. That of the Tripoli-Benghazi section 150, 25, and 71 fathoms respectively.

I regret I cannot speak so favourably of the last section—viz., that from Benghazi to Alexandria, representing a length of cable of 692 statute miles. The sea bottom over this section is much the most unfavourable of the three sections for a submarine cable, having, as the charts will show, a most irregular and uneven bottom, in places very rocky and exposed.

At the time this cable was laid it was moreover very imperfectly surveyed, although Captain Spratt did his utmost during the short time allowed him to give us proper surveys.

As engineer to the Government, I desired to have the cable laid over a uniform bottom of about 50 fathoms, but principally owing to the unavoidable absence of sufficiently detailed soundings this result was not attained on the section between Benghazi and Alexandria. This portion of the cable lies in the following depths—viz., *maximum* 115 fathoms, *minimum* 13 fathoms, mean 47 fathoms. This section has been subjected to three casualties, all occuring in very shallow water, where the cable lies, not as is described by "C." in "soft ooze," but on a hard, rough, and rocky bottom. These casualties occurred as follows:—June 16, 1863, repaired August 10, 1863—55 days out of working order; January 16, 1864, repaired March 19, 1864—62 days out of working order; Sept. 6, 1864, repaired Sept. 26, 1864—20 days out of working order; total, 137 days out of working in over three years.

Had a steamer been at hand ready and available for repairs, there is no reason why the total duration of the above interruptions should not have been reduced to about 30 days.

In conclusion, I may remark that the Malta and Alexandria cable is much lighter than the cable proposed to be laid in the India and China Seas, and has no external protection to protect the outside wires from corrosion.

I leave Sir C. Bright to deal with the other portion of "C.'s" letters, in which I feel he will have no difficulty, as "C." is evidently writing without having examined the very detailed charts of the seas in question.

Apologising for the length of this letter,

I remain your obedient servant,

6, Duke-street, Adelphi, Oct. 18. HENRY C. FORDE.

SIR,—The points at issue between your correspondent "C." and myself are now reduced to a very small compass.

The sea between Timor and Port Essington, "almost every foot" of which he asserted before to be "so deep that it has never been fathomed," is now admitted to be shallow, except for the distance of 70 miles, which, he says, is "so deep that even the skill of Captain Denham could not fathom it." This triumph over the powers of the marine surveyor is altogether imaginary, inasmuch as he did not attempt to take any soundings within 70 miles to the south of Timor. Should it prove that the depth of water in any part of this short space is greater than will admit of the cable being raised for repairs, the loss, in the event of a portion needing to be replaced, would be trifling; but, as I said before, there is no reason to expect any very great depth in this locality.

As regards the land line in Australia, the difficulties anticipated by your correspondent are now narrowed to the country between the head of the Gulf of Carpentaria and Brisbane; two-thirds of the length, between the latter place and Port Denison, are now under construction by the Queensland Government. The whole country in question is well known to be the best watered district in Australia, and cattle stations now exist throughout its length to within a short distance of the head of the Gulf.

In respect to the line between Singapore and Hong Kong, "C." has abandoned his assertion as to the great depths to be encountered, but states that, for the first half of the section between Singapore and Saigon, the cable must be laid "among islands, rocks, and coral reefs, for there is no possibility of avoiding them." This I dispute altogether, and an examination of the charts will be conclusive that the cable can be laid quite clear of any such imaginary dangers. Nor is the existence of coral any serious objection, except in very small depths and where very strong currents prevail.

Your correspondent appears to be determined not to consult the charts of the seas between Rangoon and Singapore, although he has derived so much information by taking my advice to do so in the case of the Australian section; if he would be prevailed upon to do this, he would find that the cable can be laid in a depth of about 40 fathoms over an even bottom of sand, shells, and ooze, as I stated before.

I am now described by "C." as an ardent admirer of some poet who is said to have annihilated space and time to meet his mistress. This is because I have corrected some extraordinary exaggerations on his part as to the depth and distance. My measurements have been scrupulously exact, as well as all my other statements in reference to this important subject.

The possibility of constructing the lines within three years is taken great exception to by "C." I can only tell him that the telegraph cable lately laid by the Indian Government between Kurrachee and the head of the Persian Gulf was manufactured at the rate of 50 miles a week, and at this rate the whole of the proposed cables could be completed, even if the contracts could not be divided among several manufacturers, within two years.

The laying of the different sections would proceed upon the completion of the several lengths, so that the last section could undoubtedly be finished within the time named.

I have the honour to be, Sir, your most obedient servant,

CHARLES T. BRIGHT.

LONDON, WEDNESDAY, OCT. 26, 1864.

THE SITUATION IN JAPAN.

The thunderbolts of war appear to be still suspended in the cloud of doubt that hangs over our relations with Japan. Our London contemporaries would, indeed, lead us to believe that the deadly order had been issued, and that the crash must have been heard long ere this. We are told that "the troops "were under orders to leave for Simonoseki on the 29th "August; the gentlemen of the Consular service appointed to "act as interpreters had been named; and that the design is "to enter the Straits, silence the Prince of Nangato's bat-"teries, and then land men to take the guns." It is curious that all this active military service is determined on at the very moment that Major-General Brown takes leave of the 20th Regiment at Yokohama in terms that make no mention of an approaching opportunity for displaying the good qualities he commends in them; and then he himself quietly takes his berth in the steamer that was to leave for Shanghai on the 26th, and turns his back on the fighting to commence on the 29th. We need not say, therefore, that we place very little confidence in these forebodings of immediate hostilities. The Treaty concluded at Paris with the Emperor of the French by the Japanese Ambassadors stipulated, we are told, that the Straits shall be opened within three months from the date of the return of the Mission to Japan. The Japanese Government, then, are clearly entitled to so much delay; and they will be pursuing a course utterly in contradiction to all we have ever heard or experienced of the policy of the Easterns if they do not avail themselves of the space for procrastination which may be said to be solemnly guaranteed to them. Our own private advices actually caution us against giving credence to the reports current at Yokohama on the departure of the mail, which are described to be as various as they were unreliable. We believe we are justified in saying that it was more than conjectured the Tycoon's Government were not inclined to ratify the convention made by the Ambassadors, which, it was alleged, went beyond their powers. If such be the decision come to, it must at least be formally signified before any counter policy can be determined on by the representatives of the European Powers. We can hardly therefore place faith in the statement of our informant that the "the departure of "the allied squadron would be again immediately prepared "for, and might take place within ten days." The question, indeed, is now altogether in a different position. The opening of the Straits has by the Treaty concluded at Paris been made a European question—and more especially a French question; and we suspect the Emperor Napoleon will not be disposed to leave to England the task of its vindication and the honours of the contest in the preponderating degree that must result from the largely superior force Britain now has on the spot. We shall expect to find that much has yet to be done diplomatically before the last argument of Monarchs and States is resorted to. It must be borne in mind that the mail, which had just reached Japan, was the one that brought intelligence from England to the 27th June. At that juncture certain resolutions of Earl Grey were on the order-book of the House of Lords for debate on the 1st of July. The discussion did come off on the date fixed, and we can gather nothing from the speech of Earl Russell on that occasion which would induce us to suppose that any hasty measures of violence on the part of the British authorities in Japan would meet with encouragement and support from the Foreign-office. On the contrary, while firmly protesting against "needless and unworthy concessions;" his Lordship seemed bent on maintaining friendly relations with Japan. Admiral Kuper, for his part, will, we are convinced, be in no hurry to embroil himself in another Kagosima affair. Diplomacy must be stimulated to its utmost to preserve peace on terms satisfactory to the Japanese, and becoming to the dignity of England and France. It should be understood from the first that hostilities on the question of the Straits must be levelled against the Tycoon and not against his vassal of Nangato. And such a contest the English force now at Japan is utterly unequal to elevate from mere butchery and destruction into "the pomp and circumstance of glorious war."

FRENCH PROGRESS IN CHINA.

The *Moniteur de l'Armee* of Paris, in its last issue, published a letter purporting to come from "our own correspondent" at Shanghai, and dated August 25th, containing some remarkable statements relating to certain acts of the Chinese Government, of which we have no intelligence through the usual channels. While inserting a translation of this communication in our issue of the 17th inst., we introduced it by observing:—"Perhaps the whole thing is in advance of the facts, "as it states that the Court of Peking has appointed the Man-"darin Konan, Governor of Nanking. It is said that he is "well disposed to Europeans, and well versed in all matters "relating to commerce and navigation. The Taipings expe-"rienced a serious loss by the capture of their capital, but "they are not entirely destroyed. They are endeavouring to "collect their forces in the provinces of Nyang-wei (Ngan-whei) "and of Kiang-si. One of their armies, commanded by the "lieutenant of Chan-Omang (Chung Wang), defeated a numer-"ous division of the Imperial army in a pitched battle on the "3rd of August. The Peking Government has consequently "seen that it cannot disband its army, and it has requested "that the Franco-Chinese corps shall continue to serve. An "arrangement has nearly been concluded for that purpose, "and Lieutenant Aiguebelle, of the French Navy, who com-"mands that corps, had arrived at Shanghai to engage a "number of European officers and non-commissioned officers, "and to procure supplies, &c."

Such is the purport of this extraordinary communication, which is four days in advance of our latest dates from Shanghai, brought by the mail to the 21st August only. Our advices from thence make no mention of a Governor having been appointed by the Court of Peking, to rule over Nanking, simply because there was not sufficient time to receive an answer to the report of Lee Futai on the capture of that city, and requesting orders as to the disposal of the Chung Wang held as a prisoner. Without doubting the authenticity of this special correspondence, it is just possible that the French Government may have received a telegraphic despatch *via* Russia, containing the news given in the official organ from the legation at Peking, and, by way of hiding the source of intelligence, it has been fathered rather clumsily, in point of date, upon an imaginary correspondent at Shanghai. Be this as it may, the paragraph appearing in an official journal, and showing the necessity of retaining the Franco-Chinese contingent, after the disbandment of the Anglo force, is significant of the progress of French influence at the Court of Peking. Apparently the French minister is improving the occasion for his imperial master, during the absence of his formidable rival Sir Frederick Bruce. It is the old policy of the French revived, where they reap unexpected advantages from the carelessness of their allies. Here have the British for the last four years borne the brunt and odium of this Taiping campaign and finally abandon it at the point of victory, when the French step in and secure the substantial rewards dispensed by the Chinese Government.

Our advices from Ningpo recently informed us that the French had established extensive ship-building yards at that port, where three gunboats had been launched, and several other vessels of war were on the stocks, all on account of the Chinese Government, and to be manned by French officers. We now learn through this communication that not only is the Franco-Chinese force under Aiguebelle to be retained and

Digitized by Google

increased, but under French auspices, "flying corps are to be "formed in the Imperial army, which will scour the provinces "traversed by the Yang-tsze-Kiang, to prevent any rebel bands "being organised there." Thus, it would appear, that the French are to have the direction of war affairs in the Chinese Empire both by sea and land, where the disciplined forces are to be engaged. They have readily accepted all the conditions imposed upon these commands by the native authorities, which the English rejected. On these points our gallant allies are not very scrupulous, as they well know how to ride rough-shod over the most stringent Chinese law when they have the upper hand. Ostensibly they will agree to be guided in their actions by the local mandarins, but they will pay no heed to the orders of a Viceroy, if they think a different disposition of the troops will accrue to their advantage. As to undertaking the conduct of these affairs for *La Gloire* alone, we would as soon expect a pure feeling of that nature to influence a corrupt mandarin who engages in war for the sake of *loot*.

As far as it concerns the Chinese this new arrangement of securing the aid of a western nation in the conduct of their army and navy after European models is of very little concern, as their French friends are a pretty good match for Asiatic cunning; and have few delicate scruples in cutting the Gordian knot of wily diplomacy. But it is just possible that ere long British relations in China may be seriously affected thereby. Our mercantile interests extend through every open port into the ramifications of trade in the interior, and in extent amount to the aggregate of all other foreign nations engaged in it, while France stands at the bottom of the list. Acting as a military and marine police in the provinces and on the great river where our commerce lies, it is not improbable that ere long the French cruisers and flying corps may come into collision with the agents and ships of British merchants, that may lead to serious complications. Looking at the progress of the French in China from this point of view, it is desirable that every precaution should be taken by our representatives at the Court of Peking, and the Consuls at all the open ports, to see that the officers of the Franco-Chinese forces by sea and land keep within the proper sphere of their duties in suppressing any rebellious movements, and checking piracy along the coasts and up the rivers and harbours open to foreign trade.

JAPAN AND COCHIN-CHINA.

(FROM OUR OWN CORRESPONDENT.)

PARIS, OCTOBER 22.

It will not surprise anyone that the last news from Japan informs us that France does not intend to stand with folded arms, as supposed here, while England made herself mistress of Japan—to quote the language of certain official or semi-official writers. In speaking of the mad act of the Prince of Nagato in firing on two English vessels in the Straits of Simonosaki, a ministerial journalist says:—"Last year, a similar act of aggression was committed against the French flag, and Admiral Jaures, commanding the naval forces of France, gave the Japanese a severe lesson in destroying the forts which had done the mischief. Since then, the inland seas have been opened by treaty to the ships of the Western Powers, and the Japanese Government has evinced a determination to carry out its engagements. But the Prince of Nagato, a rebellious subject who resists his own Government, refuses to adhere to the treaties, and fires upon European flags. Under these circumstances the French Admiral, who is looked upon as the determined representative of peace and conciliation, but who cannot withdraw himself from the bond which unites the Western interests, has come to an understanding with the British Admiral to take up arms with the view to enforce respect for treaties infringed, and to inflict exemplary chastisement on a Prince who has the insolence to act in opposition to the engagements entered into by his own Government. The two Admirals therefore departed in company for Simonosaki, and it is pretty certain that by this time the forts whence the insult came have been destroyed, and that the inland sea is open to the commerce of the West; and, moreover, that a severe lesson has been read to the people of the extreme East, who will have learned that France, in spite her pacific disposition, will not put up with breaches of faith or allow injuries to her sons to pass unpunished."

This is the kind of language that one might look for under the circumstances, and while it is well that the Japanese should see England and France, and it is hoped, Holland, acting in concert, it is excellent policy for the Imperial Government to participate in an expected triumph of arms with so small a stake in the game as the force under the command of Admiral Jaures. The course adopted is not only just but politic, and its not being costly is a further recommendation. It is not a very noble undertaking for England and France, but vermin must be crushed as well as wild beasts.*

The official *Bulletin des Lois* has published a decree containing the organisation for the judiciary service in the French possessions in Cochin-China. There are to be at Saigon three tribunal courts, a superior and inferior for ordinary matters, and a Tribunal of Commerce. The first will try criminal cases, and will be the court of appeal for all the decisions of the other two. The native tribunals are not to be interfered with, the Annamite law remaining in force as between not only the natives of the country but also all other Asiatics. A second decree regulates the salaries of the judges and officers; the Procureur Imperial is to receive 20,000 francs per annum (£400); the judge of the first court 15,000 francs (£600); the judge of the lower court, 12,000 francs (£480); a judge substitute or assistant, 10,000 francs, and the greffiers 5,000 francs, and 3,000 francs (£120).

THE SECRETARYSHIP FOR THE COLONIES.

THE decease of a statesman who held the reins of the colonial dependencies of England for so long a period as they remained in the hands of the Duke of NEWCASTLE cannot fail to suggest some considerations on the system by which the Crown exercises its prerogative over them. The Secretary for the Colonies must be regarded rather as an institution than a person. The signature and superscription of the holder of the office may be changed without the persons whose affairs he has to administer being sensible of any greater alteration. He forms a wonderful example of that curiously built up and strongly consolidated mass of customs and usages which, under our English practice, in so many instances wield the power of the most positive laws or ordinances. Any of the other Secretaries of State can hardly help importing into his régime some infusion of his own likings and idiosyncrasies. The affairs, too, of the Home and Foreign Departments are brought continually under the notice of Parliament; and reforms and amendments are so everlastingly required in the one, and events themselves are so sure to demand constant action in the other, that it is impossible for the responsible chief in either not to leave behind him some marks of a distinctive policy on the Statute Book, or in the columns of contemporary newspapers, if not on the pages of history. But the very vastness of the extent of his sway—the uncountable variety of nations and tribes, of laws and religions, of customs and manners that he would have to call to mind before he ventured on originating a profound change—inevitably reduce the Secretary for the Colonies to the position of a chief clerk, whose main business it is to record and acknowledge despatches. To exhibit "a masterly inactivity" is his highest praise. For the most part he is the only man of the Cabinet who has never had any personal acquaintance with the matters [or territories with which he is concerned. Every member of Parliament must needs be tolerably versed with the way in which the internal and provincial business of the country is carried on. Every English gentleman may be supposed to have obtained some insight, in the course of his travels, into the principles that direct the policy of Continental States. But the present Lord STANLEY, we believe, was the first hereditary statesman—and be it remembered that the eldest son of an old ,estated, though untitled, Parliamentary family may as properly be so designated as the heir to an earldom—was the first of his class who thought it incumbent on him to see with his own eyes those distant regions in the West and East for which he would afterwards have to enact laws. His good example has not been without followers—with no better effect, perhaps, than by their speeches to make the general ignorance of the House of Commons on all colonial matters the more conspicuous and deplorable. One great result of the innovation has been that each visitor has come back with the conviction that, whether for the benefit of the colonies or the quiet of the mother-

* The *Moniteur de l'Armee* says of the works that they consist of three forts and three batteries situated on the two sides of the straits, in the narrowest part, and so placed as to cross their fires. The guns are on pivots, and were purchased some time since of the Americans. Behind the forts is an intrenched camp in which is the body-guard of the Prince, amounting to 5,000 or 6,000 men, to act as a reserve. The writer adds that the allied forces are more than sufficient for the reduction of the place.

Digitized by Google

country, the only recommendable plan is to allow their inhabitants to be the principal agents in their own affairs. Do what we may, we are at the last inclined to give full credit to the story that the North American Plantations, as they were called, never prospered so well, nor were so much at their ease, as in those days of George II. when the then Colonial Minister never opened his despatches during the whole of his continuance in office.

The utmost indeed that a Secretary for the Colonies now does to mark his tenure of the seals is probably to give his name to some newly founded town or harbour newly discovered, that may be destined hereafter to become the capital of a province, or the resort of every flag that floats. And even in this kind of fame he will be often cast into the shade or utterly extinguished by a busy Governor, ambitious of perpetuating the honours of his race. Thus Lord Charles Somerset has so abundantly engraved the various appellations of his family on the map of the Cape of Good Hope, that one might suppose the whole country to have been first settled under the auspices of some magnate of the ducal House of Badminton. We almost regret to express our fear that the late Duke of Newcastle did not signalise his five years' rule by any such harmless entries for the pages of future Gazetteers. Intelligent, industrious, and possessing to the full that higher honesty which is deservedly dignified with the epithet of "honour," he, too, has gone to his rest without having left any traces of individuality on the system of colonial rule. He deserves praise for having followed up the practice introduced before his time, of reappointing the Governors to new centres of authority; so that England has now a body of such functionaries at her command who have been trained by experience to bear the honours of the situation without haughtiness, and to encounter its difficulties with temper. But a short time since and there were those who loved to dwell on the notion that the day would come when the whole immense viceroyalty of the colonies might be directed by the experienced hands of a nobleman like the Earl of Elgin, whose authority on all points of doubt or dissention would have stilled a captious Parliament and awed a discontented colony. The long apprenticeship now gone through by the Governors will tend to invest their Excellencies with a dignity and credit that will be wanting to their chief at Whitehall; and thence the juncture may possibly come when it will be necessary that the Secretary for the Colonies shall be chosen out of the band of well-tried administrators, who have learnt the capabilities of each colony, and know the predilections and prejudices of their several populations.

Literature.

The October number of the *Quarterly Review* (Murray, Albemarle-street) opens with an article of a class that English periodical literature is lamentably deficient in. If one were to judge by the titles of the essays in our Quarterlies and Monthlies, as compared with those that grace the Table of Contents of their French and German contemporaries, we should be of opinion that England had, of all European nations, the least concern with matters and things beyond sea, whenever "beyond sea" means elsewhere than just across the Channel. The *Quarterly* has always formed a praiseworthy exception to this peculiarity, and the article on "Cochin China" in the present number nobly maintains the distinguishing feature. It is evidently written by one who has not only studied all the facts on record in reference to his subject, but who, in addition, to judge by internal evidence, has actually seen with his own eyes the country he treats of. Hence, the general reader will get from past history and present realities such a notion of the existing state of things in Cochin China as he has hitherto had no chance of obtaining. The style is clear and easy; and the writer has judged well in leaving to others to speculate on the future success of the French embryo colony, of which Saigon is the capital. He has simply, as he himself says, done sufficient for the reader "to know why and how the French invaded and conquered Lower Cochin China, and what are their designs on Cambodia." The article will be read with special interest throughout the East, and well deserves the place of honour it has received as standing first in the new number of this long-renowned Review. We need only add that, among the other contents of the number, there is a deeply interesting notice of Lockhart—Sir Walter Scott's son-in-law, and a former editor of the *Quarterly*—abounding in literary and political anecdote; and a disquisition on Newman's "Apologia," which will be perused with delight by all who view with curiosity the relative position of the Churches of England and Rome in regard to the theories and feelings of the day.

The prognostication put forward in our last number as to the promise of an active autumn in the publishing world is fully borne out by the announcements that have appeared. It becomes the more necessary, therefore, to notice new works as fast as they appear so as to keep our readers *au courant* of the literature of the day. Two books on the subject of Italy are likely to form a leading topic of conversation for some time to come, as the Franco-Italian Convention has again made everything connected with that country and its people a subject of foremost interest. *The Autobiography of Henrietta Carraciolo* is a revelation of the "Mysteries of Neapolitan Cloister Life,' which bears the seal of truth, because there is no secrecy as to the individuality and position of the authoress. Her family, that of the Princes of Forino, is one of the noblest and most ancient in Southern Italy, her antecedents and those of her parents are well known to a great part of her readers, for the book was first published at Florence; and no shadow of doubt exists as to the reality of the main facts of her sorrowful history. Her convent life lasted for nine miserable years—a period surely long enough to enable her to present a picture in detail of all the evil influences of conventual reclusion upon the hearts and minds of those submitted to it. Confession she considers to be at the root of nine-tenths of its evils, which are none other than malice, personal profligacy, jealously, cruelty, and even dishonesty and petty theft, for a good lock and key are absolutely necessary to convent chests and wardrobes. The second of the books we refer to is Miss Cobbe's *Italics: Brief Notices on Politics, People, and Places in Italy in* 1864. It is curious to notice the complete corroboration afforded by the Englishwoman to the statements of her foreign contemporary. Miss Cobbe asserts that "nine-tenths of the women of Italy are the tools of the priests. The Italian gentleman (she says) is to be pitied who devotes his life to the redemption of his country, and who returns from his home to the camp or the senate to know that every word he says will probably be carried by his wife to her confessor, and that his mother's counsels have probably been dictated to her by the bitterest enemy of his cause."

The religious world have been pleasantly catered for in the issue from the press of the *Memoirs of the Rev. Dr. Raffles*, of Liverpool, written by his son. The deceased filled a position so prominent during a long life that the bare record of the title of the book is enough to secure for it the attention of our readers. The anxious aspect of political affairs has given a renewed zest to the lucubrations of those persons who are irreverently called "prophecy-mongers." Those who take an interest in such speculations will welcome *Two Years After and Onwards*, which professes to unfold the "approaching war amongst the Powers of Europe, and other future events as foretold in Scripture Prophecy." The author achieved a reputation in this line by his former work, "The Coming Struggle." *Tabor's Teachings, or The Veil Lifted*, is the designation of a new work by the writer of "Heaven our Home," of which last the extraordinary number of 73,000 is said to have been sold. A new edition is just issued of the Bishop of Oxford's *Agathos and other Sunday Stories*, with illustrations by Pasquier, Skill, Skelton, and others.

In fiction we have to note another novel by Miss Brandon, *The Doctor's Wife*, which, seeing that it makes the sixth from her pen within two years, has caused some admiration at the lady's rapidity of writing, if not of invention, for the book undoubtedly bears a resemblance in its tone and plot to her previous novels. The chief actors are vicious, and at the close of the story the moral teacher assigns impunity to one sinner and wealth to another, just to encourage the others.—*Abbots Cleve; or Can it be Proved?* is, to judge from the title-page, the performance of an as yet untried writer, who certainly gives very high promise; and if he does not fall into the mistake of issuing a new novel every three or four months, a brilliant career is probably before him. The plot is exceedingly well managed; the mind is kept in constant surprise and expectation, but the links in the chain are so neatly fitted together, that it would be difficult to find a flaw or hitch. The minor characters, too, are well suited to their subordinate places, and some of them show a good deal of dry humour.—Miss Thomas sends forth two volumes, containing *A Dangerous Secret; the House in Piccadilly;* and *Philip Morton*—the first and longest of the tales, hardly supporting the reputation won by "Dennes

Digitized by Google

Donne" and "Sir Victor's Choice." When will our novelists get back so far within the confines of real life as to present us with characters not chosen with reference to the broad line of demarcation now in vague—people who ought to be in the dock at the Old Bailey, and people who ought not. Surely human weakness and frailty is productive of sufficient variety and piquancy without this everlasting appeal to incidents that savour of the *Newgate Calendar*.

Continental Intelligence

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Oct. 24.

The pressure which has so long prevailed in the London money market has at last re-acted on ours. The Netherlands Bank was obliged to raise the discount to 7 per cent., while at the same time large advances on foreign bills were refused. These however are willingly discounted in the open market, where money at the rate of 7 to 8 per cent. is easily obtained. It is a matter for congratulation that the very few commercial failures that have been announced comprise only small firms. Nothing hitherto has transpired to show an unsoundness in trade.

The Government has ordered an iron-clad ship to be built in England.

The N.T.C. has chartered the following ships:—From Batavia to Amsterdam: Cornelia Geertruida, and Henrietta Elizabeth Suzanna.

COMMERCIAL.

COFFEE.—The market is very active. The 121,592 bags offered on the 19th by the N.T.C. at auction were willingly bought at higher rates for the good tasting sorts. After the sale there was much demand, but there are no sellers without an advance.

TEA.—Dull, business being confined to the execution of a few small orders for consumption.

SUGAR (Raw).—The market remains very inactive; prices nominal.

RICE.—A large parcel of 4,500 b. Bassein, ex Henrietta Elizabeth Suzanna was all disposed of at 5¼f. to ¼. Since the market has been inactive. The stock of Java sorts is very small.

INDIGO.—Steady, but without transactions.

SPICES.—The market is largely influenced by the unsatisfactory state of the money market. Sellers, however, decline to operate at lower prices. Nothing can be bought under the last auction rates. Cinnamon was offered at 83 c.; pepper in much demand.

TOBACCO (Java).—The market remains unaltered. 521 b. C. H. d. B. were sold at 8 to 25 b.; the 505 b. Nicot, offered by inscription, were retired. Stock 8,400 b. Java.

COTTON.—The market has closed heavily, and prices compared with those ruling last week show a considerable decline; but even at this reduction there are no buyers.

BANCO TIN.—There was no speculative inquiry since our last report, and scarcely any demand for export at 60f., and 59¼f is offered.

DRUGS.—At auction were sold 1,500 kilo. Oleum Ricini at 28 cents; 3,000 kilo. Gum Damar at 23 cents; 560 kilo. Gum Benzoe (Sumatra) at 20 to 60 cents; 270 kilo. Cortex China at 80 to 90 cents; 180 China Rhubarb at f.3 to f.3.03; 600 kilo. Cassia Fistula (E.I.) per matt. f.6 to f.7.

OIL.—Cochin Cocos, ordinary and white f.23¾; pa. white f.25.

RATTANS.—The 47,170 bundl. offered at public sale by the N.T.C. were disposed of at rather lower rates. Banjermassing was paid with f.13.10 to f.17.30.

CURCUMA.—f.12. No stock.

TORTOISE.—The 12 chests imported from Macassar, per *Maassluis*, were sold at prices that did not transpire. The yearly auction of Japan and China mercery will be held by the N.T.C. on the 3rd of November.

AMBOYNA WOOD.—The N.T.C. offered by auction 1,403 bales, of which 1,350 bales were retired at 32¾f.

MONEY.—Unaltered. Bank discount, 7 per cent.; open market, 7 to 8 per cent.; N.W.S. 2½ per cent., 59 15-16ths; 3 per cent., 71½; 4 per cent., 95⅛; Handelmaatschappy, 135⅜; Maatsch. Handel en Nyverheid, 86 per cent.; change on London, 3 mo., f.11.57; 2 mo., f.11.65; short, f.11.84; Paris, 3 mo., f.45.80; 2 mo., f.46.10; short, f.46.75; Hambro, 3 mo., f.34.50; 2 mo., f.34.70; short, f.35.10.

SHIPPING.

ARRIVALS.—October 16, at Texel, from Batavia: Jhr. Mr. van de Wall van Puttershoek; 18, Clio, Anna Sophia; 20, at Brouwershaven, from Batavia, Pantalon; 22, from Tjilatjap, Maria Magdalena.

DEPARTURES.—October 15, from Flushing, for Batavia: H.M.'s frigate Adolp Hertog van Nassau.

READY TO SAIL.—At Brouwershaven: Nieuwe Waterweg, Batavia, Henrietta Elizabeth Suzanna, Sourabaya.

FREIGHTS.—Quotations of Messrs. Fauchey and de Vletter, shipbrokers Rotterdam. For Batavia: J. C. Schotel (632 tons) 15f. to 20f.; for Batavia and Sourabaya, Patriarch, Samhiri (730 tons); Fop Smit (549 tons); Dordrecht, (754 tons); Koophandel, (531 tons); Graaf Dirk III. (598 tons); 18f. to 20f. for Batavia; 25f. to 30f. for Sourabaya. For Samarang, Dorothea Henriette (419 tons) 25f. to 30f. For Macassar: Koning Willem III (422 tons), 45f. All per last of 2,000 kilos., or 120 cub. Amsterdam feet and 15 per cent. For Decima and Kanagawa: Japan Packet (266 tons), 60f. at 15 per cent. per last of 80 cub. English feet. For Melbourne: Maria Diederika (720 tons), 30s. to 50s. and 15 per cent. per ton of 40 English cub. feet.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

OCTOBER 23.

In my last letter I sent you some statistics of the general trade of this port during the year 1863, and now proceed to lay before your readers some particulars of our special commerce with the Far East:—

The goods imported direct from China were of the declared value of 2,363,710 marks banco, of which more than one-half was tea (16,264 chests), for 1,466,780 M.B. The most important of the other items were 16,648 chests and 400 bundles of cassia lignea, for 602,540 M.B.; 211 chests of oil of star anniseed, for 50,470 M.B.; 141 chests of rhubarb, 28,980 M.B.; camphor, for 27,660 M.B.; oil of cassia, 19,820 M.B.; star anniseed, 17,030 M.B.; porcelain, 15,010 M.B.; and silk 8,070 M.B.

From the Philippine Islands were imported 62,655 bags of sugar, of the value of 513,750 M.B.; 410 bales of hemp for 17,810 M.B.; coffee for 3,290 M.B.; redwood and other articles for 3,320 M.B.; altogether 538,170 M.B.

From British India: 96,290 bags of rice for 989,320 M.B.; 1,826 casks of cocoa-nut oil for 470,570 M.B.; 65,761 hides for 206,370 M.B.; 773 bags of coffee for 67,940 M.B.; indigo for 50,700 M.B.; 700 chests of castor oil for 33,170 M.B.; together with lesser quantities of cocoa-nut yarn, indiarubber, buffola horns, jute, silk, rattans, coculus indicus and other drugs; total value 1,908,040 marks banco.

From Singapore: 6,106 bags of pepper, for 147,030 M.B.; 7,903 centners of terra japonica, 111,930 M.B.; 2,000 chests of cassia lignea, 68,590 M.B.; 3,232 chests of sago, 59,040 M.B.; 12,738 bundles of rattans, 10,460 M.B.; 50 chests of raw camphor, 5,110 M.B.; making altogether, with minor quantities of other goods, 414,110 M.B.

From Netherlands India: 856 bags of rice, for 161,530 M.B.; 2,333 kranjangs of sugar, 139,740 M.B.; 239 pipes of arrac, 40,590 M.B.; 4,151 buffalo hides, 19,370 M.B.; 5,954 bundles of rattans, 14,450 M.B.; 159 tubs of raw camphor, 11,380 M.B.; 1,135 centners of redwood, 6,740 M.B.; 200 chests of gum damar, 5,500 M.B.; other articles, 4,070 M.B.; total, 403,370 Marks Banco.

But the above figures give but a faint view of the total quantity of East Indian and China produce imported here last year, as the indirect importations *via* England and Holland are of considerable extent. The following table gives a general view of the quantity and value of China and East India produce imported both directly and indirectly:—

Article.	Quantity.	Value in Marks Banco.
Coffee	784,428 centners	36,888,360
Tea	36,007 „	4,203,900
Raw Sugar	498,699 „	7,322,660
Rice	331,162 „	2,532,500
Sago	14,164 „	203,530
Arrowroot	425 „	14,110
Pepper	17,787 „	426,170
Cassia Lignea	13,443 „	809,870
„ Flores	202 „	39,730
Cinnamon	902 „	81,280
Cardamums	368 „	151,380
Cloves	2,980 „	71,460
Mace	623 „	43,510
Nutmegs	510 „	29,070
Vanille	65 „	110,370
Ginger	6,101 „	272,460
Vermilion	578 „	94,080
Musk	109 lbs.	28,310
Rhubarb	321 centners	69,940
Galanga Root	424 „	7,560
Cassia Vera	927 „	25,740
Star Annis.	442 „	32,970
Cubebs	407 „	29,150
Camphor, Raw	3,152 „	275,490
„ Refined	71 „	9,380
Gutta Percha	316 „	38,270
India Rubber	9,614 „	1,080,130
Castor Oil	2,057 „	72,740
Oil of Annis.	11 „	8,950
„ Cassia	71 „	42,390
„ Cloves	108 „	16,820
„ Star Annis.	334 „	145,950
Mother-o'-Pearl Shells	4,762 „	65,760

Monetary and Commercial.

There are evidences of the return of mercantile confidence. The sudden fall in all the new bank shares has done more than anything to bring about the present state of things, as their customers naturally take alarm and withdraw their deposits. It is rumoured that the old banks initiated the movement in order to crush some of them. Be this as it may, there are, of course, a number of moneyed people interested in crying "wolf." Consols have held their ground at a small advance, 88½ to 89¼.

Subjoined is a list of the rates of discount now current on the Continent, viz.:—Paris, 7½ per cent.; Vienna, Brussels, and St. Petersburg, 6; Hamburg, 5½; Turin, 8½; Frankfort, 5; Amsterdam, 8; and Berlin, 6½ per cent. The English money market is the dearest of all.

The Comptoir d'Escompte Paris, are, it is said, heavy losers by the failures in Brazil.

The return from the Bank of England for the week ending Oct. 19 gives the following results when compared with the previous week:—

Rest	£3,249,485	Increase		£54,846
Public deposits	3,273,589	Decrease		3,749,645
Other deposits	14,098,454	Increase		892,141

On the other side of the account:—

Government securities	£9,570,212	Decrease	£602,131
Other securities	19,780,748	Decrease	2,142,136
Notes unemployed	5,647,090	Decrease	51,835

The amount of notes in circulation is £21,232,935, being an increase of £15,615, and the stock of bullion in both departments is £13,002,488, showing a decrease of £3,805 when compared with the preceding return.

The following comments are from the *Daily News*:—

"The comparative ease with which the advances lately made by the Bank of England are being repaid to it is a favourable feature, as it indicates that, while the Bank is being placed in a position to pay the dividends without sustaining any further serious draught upon its reserve, the general supply of money in commercial channels is still equal to all requirements. The hope is now becoming stronger that, should no unforeseen catastrophe occur in the mercantile world, the Bank will be able to tide over the crisis without raising the rate of discount beyond the present point. The steady contraction of trade, the heavy fall in the prices of cotton and other commodities, the favourable appearance of the exchanges, and the influx of gold to the Bank—entailing, as it does, the creation of a corresponding amount of fresh currency—all tend to encourage a belief that we shall soon emerge from our present state of suspense and financial difficulty. The least reassuring feature at the moment is perhaps the quasi hoarding which is going on. This is promoted by the doubt which is felt with regard to the possible upshot of the present endeavours of the Bank of England executive to carry out the act of 1844 stringently, and thus, as they hope, to obviate all chance of having it suspended for the third time. It is universally recognised that the weeding out of really insolvent houses constitutes a positive advantage to commerce, which will hereafter pursue its course with all the more confidence on account of the purification which it is now undergoing. But a fear lingers among commercial men lest the vague distrust which has become disseminated should affect the position, not of rotten firms, but of such as are unquestionably solvent, though they may possibly at the moment have pushed their transactions beyond the limits warranted by their immediately available means. It has not escaped notice that several of the firms which have lately stopped payment—as, for example, Messrs. Brown, Buckley, and Co., the East India brokers, whose suspension was announced in our impression of this morning—are, or believe themselves to be, not merely solvent, but possessed of a 'considerable surplus;' and when the pressure of the times produces such results as these, it can hardly be wondered at if the mercantile community carry their measures of precaution beyond what is actually necessary. It is satisfactory to believe that the directors of the Bank of England think that a pressure of this sort ought to be treated with indulgence instead of being met by the severe measures which would be necessary if the strain came from abroad, or in consequence of imprudent foreign commitments."

The following are the principal failures during the past week:—

Messrs. Hall and Geere, Russia brokers, with liabilities to the amount of about £30,000, of which, however, it is thought that only a small portion will rank against the estate.

Messrs. Paul, Joske, and Co., in the Australian trade, with liabilities for about £45,000, of which it is thought, perhaps, only £30,000 will rank on the estate. The difficulty is reported to be owing to speculations in shares which will compromise the London house alone, and not the Melbourne firm.

Messrs. B. de Cuadra and Co., Spanish merchants, of St. Swithin's-lane, with liabilities to the amount of about £50,000.

Messrs. Monninger and Denninghoff, commission merchants, of Mark-lane. Their transactions were chiefly in the oil trade.

Messrs. Galbraith, Bigland, and Co., East India and China merchants, owing to the failure of their correspondents at Shanghai, together with other heavy losses. The liabilities are computed at about £150,000, the greater part of which is stated to be secured, so that the amount expected to rank against the estate is comparatively small. The assets will to a great extent depend upon the realisation of consignments to the East.

Messrs. Manning and Collyer, hemp and jute brokers. Their liabilities reach about £100,000, but they are mostly covered by securities.

John Piddington, of Gracechurch-street, tea and foreign patent agent, with liabilities for about £30,000, and assets at present unascertained.

Messrs. Duckworth and Co., wine merchants, who did a large business with India and China.

The accounts from Liverpool describe a better feeling on 'Change. Several failures occurred last week, but although one of them was for £200,000 they were apparently not of a character to create surprise or alarm, and the predictions which, for speculative purposes, had been circulated of more important disasters, were all falsified.

The Stock-Exchange Committee have adopted a measure that will place an effectual check against any repetition of the course lately adopted by one of the finance companies, in making advances on Spanish account to mitigate difficulties consequent solely on the ban under which the credit of Spain is placed from her treatment of her foreign creditors. Already in relation to defaulting States there was a rule of the Stock-Exchange to the following effect:—

"The Committee will not sanction nor take cognizance of bargains made in new bonds, stock, or other securities issued by any foreign Government that has not duly paid the dividend on former loans raised in this country, unless such Government shall have effected and carried out a satisfactory arrangement with the holders of such stock, bonds, or other securities on which the dividends have been left in arrear."

To this is now added:—

"And any public company which shall directly or indirectly contravene the spirit of this law shall be liable to have its name struck off the official list of the Stock-Exchange."

Notwithstanding the present pressure and general distrust, promoters of companies are nothing daunted. Certainly it speaks well of the strength of any such undertaking. To obtain subscriptions from the general public for any scheme now is totally out of the question. The shares therefore must be subscribed by those who are well acquainted with the proposed operations.

The following new companies have been announced:—

The Northern Assam Tea Company, with a capital of £200,000, in 20,000 shares of £10 each. The first issue is to be 15,000 shares. It will, of course, be surmised that the undertaking is started to develope tea cultivation, but it is not brought forward at a very auspicious period. The arrangements with regard to the transfer of the estates appear to be in every sense satisfactory.

Hancock's Foundry and Engineering Company, with a capital of £100,000 in shares of £10 to take over the works of William Hancock and Son, at Fenton, in North Staffordshire. A prospectus has also been issued of the Ouvah Coffee Company, with a capital of £100,000, in shares of £10, to purchase certain coffee estates in Ceylon.

The Colonial Trading Company (Limited), which proposes to "afford to manufacturers and traders in Great Britain and the colonies direct facilities not presented by any existing banking or other institution." The company's programme is explained as follows:—"The company will undertake agencies for colonial governments, merchants, manufacturers, insurance, colonial railways, mail, and other companies. Traders, either in Great Britain or the colonies, can supply their wants through the company, paying for same either on arrival or at such time afterwards as may be arranged. The company will provide at moderate rates convenient depots for storage, including bonded stores, sampling, show, and sale rooms. In England and abroad the company will make temporary and other loans on merchandise, produce, and ships, and will leave the borrower the option of sale, of repayment of advances by approved bills, or of exchange of merchandise." Branches and agencies are to be opened with various colonies and foreign countries, and an agreement is stated to have been made with an "old established and eminently successful firm" for the transfer of its business and connections. The vendors are to receive one-third of the purchase money in shares, but neither the amount of the purchase money nor the name of the firm in question is stated in the prospectus. The capital is fixed at £500,000, in 20,000 shares of £25 each, one half of which are to be issued in the first instance.

In the present state of commercial affairs several suicides have been perpetrated, the most notable being that of the manager of the Mercantile and Exchange Bank, R. H. Williams. The following notice has been issued:—

Sir,—Referring to the sudden death of our manager, Mr. Williams, I am instructed by the directors to state that after an investigation of the accounts and the securities of the bank, they have every reason to believe that the affairs of the bank are not thereby in any way compromised.—I am, &c., Nathaniel Cork, Int. Manager.

The Mercantile and Exchange Bank (Limited),
4, Lombard-street, London, Oct. 18.

The Prospectus of the Eastern Assam Company (Limited) is issued. The object is to purchase twelve extensive tea estates, described as already in profitable cultivation, and situated in the province of Assam. Of the 12,000 acres, 1,836 are planted in tea gardens, varying in growth from one to five years. The purchase-money for the estates and the plant and stock is fixed at £150,000, payable by annual instalments, with interest at 5 per cent., extending over a period of three years. The capital is fixed at £250,000, in 25,000 shares of £10 each, with a first issue of 18,000 shares. 6,000 of the shares are to be allotted to the vendors, and 9,000 of the remaining shares have been already subscribed for; leaving 3,000 shares for the public.

The National Bank of India (Limited), established last year in Calcutta, with an influential and wealthy proprietary, has opened branches in Bombay and London. The latter will be under the management of Mr. A. F. Hewett, late manager of

Digitized by Google

the Calcutta branch of the Chartered Bank of India, Australia, and China.

The present mail takes out 200,000 ten cent pieces to Hong Kong. No definite arrangement has been arrived at as to the dollar shipments.

The biddings for £300,000 in bills on India took place at the Bank of England. The proportions allotted were to Calcutta, £162,800; to Bombay, £30,000; and to Madras, £5,000. The *minimum* price was fixed at 1s. 11¼d. per rupee on Calcutta and Madras, and 1s. 11⅛d. on Bombay. These terms are 1 per cent. below those obtained on the last and previous occasions. The total tenders did not reach up to the amount offered by about £100,000, while in former instances the tenders have been three times the amount to be allotted.

The bar silver and Mexican dollars by the last packet from the West Indies could not command purchasers for the East. The bar silver was bought for Holland at 60⅝d.

The amount of bullion by the P. and O. Company's steamer *Ceylon*, from Southampton on the 20th inst., was—in gold: To Galle, £4,350; to Madras, £1,725. In silver: To Galle, £900; to Madras, £20,226; to Hong Kong. £47,783; to Shanghai, £2,000; to Singapore, £2,950. Total: In gold, £6,075; in silver, 73,859.

ARTICLES OF IMPORT.

TEA.—The increasing stringency of the money market has continued to influence all tea not wanted for immediate use, and in that offered at the public sales without reserve during the past fortnight, a further decline has taken place of 1d. to 1½d. per lb.; new teas, however, have been taken to a considerable extent, and on the whole at good, though in many instances very irregular rates. The arrivals from China make the exports for the first three months of the season, say to 31st August, the enormous quantity of 50,000,000 lbs. Most of the business in red leaf kinds up to 1s. 4d. has been ex public sale, coarse burnt and good flavoury fetching 11d. to 1s., and Kaisow kinds, strong and brisk burnt, and Souchong flavoured, 1s. to 1s. 5d. per lb. The new of this latter grade has sold from 1s. 5d. to 1s. 9d. per lb.; but as last arrivals have brought full supplies prices are giving way. Medium to fine Kaisow has been taken in quantity at 1s. 11d. to 2s. 3d., finest and extra fine at 2s. 4d. to 2s. 9d. per lb., and for which there is still a good demand, the general impression being that the supply will not be equal to requirements. In black leaf, common has fetched 10d. to 11d., but there has not been much done in old kinds, the new seasons are meeting with little attention, a few chops with strong Pekoe flavour have sold at 1s. 10d. to 2s. 1d. per lb., quite 3d. per lb. decline on sales ex *Sea King*, and even at this reduction it has not led to an extended business. One or two parcels of new Souchong have been sold at 2s. and 2s. 6d. per lb. Oolong has fetched from 1s. 7d. to 1s. 9d. for medium, fine 1s. 10d. to 1s. 11d, finest 2s. to 2s. 2d. per lb. Scented Orange Pekoe of Canton does not sell readily, but capers have been fetching full prices. In Foochow make we hear of no further sales. Green: There is a great scarcity of medium and fine country descriptions of Young Hyson and Gunpowder, but common and finest qualities are in full supply and not inquired for. For export, a few Twankays and Young Hysons have been taken for Canada. At the public sales 19,600 packages were offered, of which 18,600 were without reserve.

SILK.—See "Latest."

COTTON.—The general result of trade at the of close of last week was unabated heaviness; the business being extremely limited at a further material reduction in prices of 1d. to 2d. per lb. below those of the week preceding. In the London market we note sales of 350 bales China, 12d. for fair to good fair for cash, and 9d. to 10d. for all faults; with 10 bales Japan at 14d. for good fair. The Liverpool report is, that in China and Japan the better qualities may be quoted fully 1d. lower, while the common kinds have given way about ½d. per lb. In transactions "to arrive," China, October delivery, is cited at 12½d.

SUGAR.—The market generally had a quieter tone at the close of the week, and the improvement that existed earlier was hardly maintained, so that quotations, on the average, are about the same as per last. 8,479 bags Mauritius, at public sale, were nearly all taken off, about half, grocery sorts, selling pretty freely at steady prices, but the remainder, common brown, sold at cheap rates, viz., low to good brown, 25s. 6d. to 28s. 6d.; low to good middling yellow, 32s. to 35s.; good and fine yellow crystallised, 36s. 6d. to 38s. 6d.; white (duty 11s. 8d.), 41s. 6d. to 43s. Privately, 2,200 bags Mauritius have been sold, chiefly at 35s. 6d., a few 38s. 6d. Privately, also, we note a contract for 22,000 bags clayed Manila at 29s. 6d. to 30s.

COFFEE.—60 casks 39 bags Plantation Ceylon, offered by auction, sold without change from previous rates; also 168 packages Mocha, common clean garbled, 84s. 6d. to 86s. 6d.; 218 cases 236 bags Neilgherry and Tellicherry, small to rather bold well made, 73s. to 82s. 6d.; and the chief part of 1,428 bags Malabar and Mysore, good and fine ordinary, 63s. 6d. to 66s.

RICE.—The market has continued without activity, and barely 15,000 bags have changed hands at about previous rates,—ordinary cargo Bengal, 8s. 4½d., low middling to good middling white, 9s. 9d. to 11s., siftings, 9s. 3d., middling Rangoon, 8s. 1½d., and Nakrenzie, 8s. 3d.

CAMPHOR.—Firm, with some inquiry. Of 59 cases China at auction, 10 cases sold at 82s. 6d. per cwt. for good, 83s. 9d. obtained privately in small sales.

CASSIA LIGNEA.—Very quiet, and nothing of any importance doing. 130 cases at auction all retired. Buds: Flat. 27 cases at auction all retired: private business limited.

DRUGS.—Cubebs: Very flat; of 70 bags at auction, one-third sold at 90s. per cwt. for fair but stalky. Dragon's blood and Galangal Root: Both remain inactive, and without business. Rhubarb: Good quality scarce, and in consequence firm; low increasing in supply, and cheaper. 90 cases brought to auction, and one-third sold at 4s. 5d. to 5s. 9d. per lb. for middling to very good flat, and 1s. to 1s. 8d. low and mouldy flat and round.

GUMS.—Benjamin: Steady, and of 33 cases Sumatra at auction, half sold at £11. 7s. 6d. to £11. 10s. per cwt. for second quality, false packed; and £6. 5s. to £6. 7s. 6d., middling 3rd. Damer: Nothing of any consequence doing. Some inquiry for good. Gamboge: Very scarce, and considerably dearer: 4 cases sold at auction at £13 to £14 per cwt. for fair to good pipe.

GUTTA PERCHA.—No business of any consequence doing. 48 tons at auction, all retired; fine quality wanted. India Rubber: No auctions held. The private sales have been mainly in Penang, at 1s. 2d. to 1s. 2½d. per lb.; and there is still inquiry for good qualities.

HIDES.—At sale on the 20th, 785 Singapore cow hides offered and sold, heavy 5½d. to 6d. per lb.; extra heavy, 5½d. per lb.; 355 Java buffalo hides offered, none sold.

JAPAN WAX.—Continues very flat; of 60 boxes at auction, only one-third sold at 6Cs. per cwt. for fair block.

OILS.—Anniseed: Limited business has been done at 6s. 2d. to 6s. 3d. per lb. Cassia: Has given way 3d. per lb. Sales to some extent made privately at 8s. per lb., and 8 cases sold at auction at 8s. to 8s. 1d. Mace and Nutmegs: Firm. 3 cases at auction retired at 3d. per oz.

HEMP.—Manila: Market very flat, at a decline of 10s. to 20s. per ton; limited private sales being effected at £27 10s. to £28. 670 bales at auction retired.

SAGO.—Very quiet; and of 291 boxes at auction, a few lots only were placed, at 23s. per cwt. for very good large. Flour: Nothing of any consequence doing. Tapioca: In Penang nothing of consequence has been done. 116 cases Pearl at public sale were withdrawn at 25s.

SPICES.—Cloves: Nothing doing in Penang or Amboyna. Zanzibar again rather easier: 300 bags sold at auction at 3¾d. to 3¾d. per lb. for fair but rather dark. Mace: Steady; only 4 cases Penang at auction sold at 1s. 9d. to 1s. 10d. per lb. for fair palish. Nutmegs: Very quiet, and without any noticeable alteration. Pepper (Black): Steady; and 2,411 bags Singapore, and 1,019 bags Penang at auction were mostly sold at and after the sale, the former at 3¼d. per lb., and the latter 3⅛d. to 3¼d. White: Not any business of interest doing.

TERRA JAPONICA.—Cutch: Is again rather cheaper; and of 539 bags Pegue at auction, half sold at 21s. to 21s. 6d. per cwt. for good in cases. Gambier: Quiet: 378 bales at auction retired: private business very limited, at 24s. to 25s. per cwt. for middling to good block.

TORTOISESHELL.—Little doing: of 9 cases Manila at auction one-third sold at 13s. to 15s. per lb. for middling to fair in sorts; 3 cases Sydney sold at 19s. 6d. to 20s. good bold shell; 13s. 6d. small and thin; and 9s. pickings: being steady rates. 1 case Singapore retired.

MISCELLANEOUS.—Blacklead: Rather dearer, and of 705 barrels at auction three-fourths sold at 12s. to 17s. 6d. per cwt. for fair to fine lump, and 7s. 6d. to 8s. 3d. dust. Galls: China has somewhat improved upon the recent great reduction, and 185 cases sold at auction at 55s. to 59s. 6d. per cwt. for good. Arrivals of Japan. Musk: Very flat, with scarcely any demand, and no business in Tonquin. Only 3 tins Cabardine at auction, which, however, realised good prices—12s. 9d. to 13s. per oz. Of 16 tins Grain, half sold at 34s. to 34s. 6d. for ordinary. Rattans: Rather dearer; sales at auction of Singapore and Borneo at 3s. 6d. to 6s. per 1,000 canes. Sapan Wood remains flat; and 6 tons Siam at auction sold at £10 15s. per ton. Star Anniseeds: Some little inquiry. Sticklac, Siam: Very flat; 344 cases at auction all retired. Turmeric: Generally much lower; no China offering, and no business doing in Japan.

ARTICLES OF EXPORT.

Iron.—The quotations in London are for Welsh bars, £7. 15s. to £8; nail rod, £9. 10s.; hoops, £10. 10s.; sheets, single £11. 10s.; Staffordshire bars, £9. 10s.; rails, £7 to £7. 5s.

Steel.—Swedish keg, £16.

Copper.—Sheet and Sheathing, £100 to £101 per ton; yellow metal, 8½d. per lb.

Tin.—101s. for block; 102s. for bar. Tin plates, best charcoal, I.C. 29s. per box.

Lead, &c.—English pig, £20. 5s. to £20. 10s.; W.B., £22. 10s.; shot, patent, £23. 15s.; sheet, £21. 10s.; spelter, £22; zinc, English sheet, £28; quicksilver, £8.

The following is from the Circular of Messrs. French and Smith:—This market suffers from the continued depression in monetary affairs, and nearly all metals are very dull. Sales can only be effected at prices below quotations. Pig Iron has fallen from 3s. to 4s. per ton since our last price current. Copper is very dull. Tin also is very flat. Spelter has fallen about £2 per ton.

EXPORT OF BULLION TO CHINA, &c.

H. Soule, Victory, Agra, Beloochee, and Ferris. At Falmouth: Sarah Jane and Queen Bee. At Bordeaux: Salares. At Nantes: Suez. At New York: Ocean Home, Gertrude, Caroline, Rudolf, and Panic. At Boston: Ceylon, Aristides, and Magnet.

From Penang.—At London: Empress, Marengo, Sunium, and Spitfire. At Falmouth: Schlossr. At Cork: Ceylon. At Bordeaux: Sophis.

From Bangkok.—At New York: Eastward Ho!

FREIGHTS AND CHARTERS.

Although there have been some arrivals from the Eastward lately, the amount of tonnage on the different berths has somewhat decreased. No improvement has, however, taken place either in berth freights or for coals, the export trade continuing very inactive. Homeward charters are scarce, but some few vessels have been placed from the rice ports and Maulmain, the ships for the former going out in ballast.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £38 and £1. 17s. 6d. For Shanghai: £48 to £50, and £2. 5s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £1. 5s. For Penang: £27. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have invited tenders for the conveyance of 18 tons (light) naval stores from Woolwich to Hong Kong.

CASUALTIES.

The Independant, of Bordeaux, Labory, from Singapore, which arrived at Mauritius on the 1st of September, had been ashore in the Straits of Malacca, and part of her cargo had been thrown overboard. She did not appear to have sustained any damage, but had gone into dock to examine her keel, and careen.

Rio Janeiro, September 24. The Arab, from Liverpool to Singapore, which put in here leaky, July 22, has transferred her cargo to the Mary Spencer, which will proceed with the same.

The Adolph Herzog von Nassau, Uhlenvick, for Batavia, put back to the Downs Oct. 17, and will proceed to Sheerness for repairs.

The Zeemeeuw, Kayser, sailed from Pasaroaeng Feb. 5, for Holland, and has not since been heard of.

The Dora, Millbank, of and from London, for Kanagawa, lost an anchor and part of chain Oct. 20 during a sudden squall in the Princes Channel, but having been supplied from Ramsgate, proceeded on the 21st inst.

St. Helena, Sept. 27, the Eliza Jane (schr.) is now loading cargo from the Kiandra, van Kuffeler, from Batavia to Amsterdam, condemned here.

At St. Helena.—Sept. 4, from Penang, Ferozepore, Rankin, and sailed 6th for London; 6, from Hong Kong, Chandernagore, Lynas; 9, from Batavia, Rotterdam, Adriaans, and sailed 10 for Amsterdam; 10, from Canton, Rifleman, Jean, and sailed 13 for London; from Batavia, Petronella, Strootman, and sailed for Rotterdam; 11, from Batavia, Robert Dickson, Hjarne, and sailed 12 for Rotterdam; 13, from Pedang, Ceylon, Sampson, and sailed for Queenstown; from Shanghai, Robert and Alexander Moore, and sailed 14 for New York; from Batavia, Cornelia, Croese, and sailed 15 for Amsterdam; 14, from Kanagawa, Red Deer, Whyte; 15, from Singapore, Esperanza, Lopez, and sailed 17 for Havana; from Shanghai, Reigate, Deas; 16, from Batavia, Bosphorus, Kruisinga, and sailed for Amsterdam; from Shanghai, Bessie Stanton, Scobey, and sailed for New York; from Sarawak, Chanaral, Smith, and sailed for London; 20, from Kanagawa, Merse, Moore; 27, from

Digitized by Google

Shanghai, Warwick Castle, and sailed for Liverpool; 28, Silver Eagle, Longman.

OFF ST. HELENA.—Sept. 25, Banian, from Hong Kong.

AT TABLE BAY.—Aug. 26, from New York, Fire Queen, steamer, Johnson, and left 29, for China, Sept. 8, from New York, &c., Foong Suey (steamer), Gray, and left, 13, for Hong Kong, Aug 27, Dunelm, Robertson, sailed for Singapore, Sept. 13, Marion, Thomas, sailed for Singapore.

AT SIMON'S BAY.—Sept. 5, Palmerston, Maillard, after repairing, sailed for Shanghai, Aug. 28, Glengyle (steamer), Sullivan, sailed for Hong Kong, Sept. 2, Sophie, Colburg, and Senior, Bakker, both sailed for Batavia. Falcon, Sullivan, sailed for Hong Kong; 14, Gazelle, from Anjer.

NEW VESSELS FOR THE STRAITS AND CHINA TRADE.—Messrs. Chas. Connel and Co. have launched from their east shipbuilding yard at Overnewton one of their composite sailing ships of 700 tons. Dimensions:—Length of keel and forerake, 175 feet; breadth of beam extreme, 30 feet; depth of hold, 18 feet 9 inches. She was named the Douglas Castle by Miss Arrol of Glasgow, and was built for Thomas Skinner, Esq., for the Glasgow and Asiatic Shipping Company, and is intended for the Straits trade. This is the third vessel built by Messrs. Connel and Co. for this line.

From the yard of Messrs. Holderness and Chilton, Liverpool, the Keu Kee, the length of keel of which is 135 feet, the breadth of beam 28 feet, and depth of hold 12 feet 3 inches, and of 500 tons burthen builder's measurement. She is built for Messrs. Grant, Murdoch, and Co., of Liverpool, and is intended for the China coasting trade.

THE STEAMER "SEA KING."—It is rumoured that the China clipper steamer, *Sea King*, has been purchased for the Confederate Government, and that she will be commanded by Captain Semmes. Whatever the ultimate destination of this steamer may be, we can state positively that Captain Semmes was not on board when she sailed from London. The *Sea King* is one of the finest steamers of her class afloat; she is 1,018 tons burden, 200 horse-power, was built in Glasgow in 1863, and cleared from London on the 7th inst. for Bombay in ballast. The fact of a high price being paid for her, and of her clearing without cargo, has given rise to the report.

Hong Kong—Messrs. Johnson and Co.
Shanghai—Messrs. Johnson and Co.

JOHN SCOTT, Secretary.

DINNEFORD'S PURE FLUID MAGNESIA has been, during Twenty Five years, emphatically sanctioned by the Medical Profession and universally accepted by the public, as the best remedy for acidity of the stomach, heartburn, headache, gout, and indigestion, and as a mild aperient for delicate constitutions, more especially for ladies and children. When combined with the acidulated lemon syrup, it forms an agreeable effervescing draught, in which its aperient qualities are much increased. During hot seasons, and, above all in hot climates, the "regular" use of this simple and elegant remedy has been found highly beneficial. It is prepared (in a state of perfect purity and of uniform strength) by DINNEFORD and Co., 172, New Bond-street, London, and sold by all respectable Chemists throughout the Worl

DOCKS.

PORT OF AMOY, CHINA.

HOLLOWAY'S PILLS.—Bilious complaints and irregularities of the system, produced by depraved or over-abundant bile, can always be corrected by a few doses of these inestimable Pills, which are everywhere admired for their rare combination of mildness and power, for though they conquer with ease and rapidity the most obstinate disease, they never weaken the stomach or necessitate any interruption of ordinary duties or amusements. On the contrary, they increase the appetite, strengthen the organs of digestion, give increased energy and life to all the animal functions, and fit both hand and brain for fresh exertions. The sick and enfeebled can easily discover what a happy revolution these Pills have the power to effect in the human system.

TRUSTEES.

Hon. F. Chomley, Esq. (Messrs. Dent and Co.).
A. F. Heard, Esq. (Messrs. Augustine Heard and Co.).

BANKERS.

The Commercial Bank of India.

This Company has been formed for the purpose of purchasing a site in the colony of Hong Kong for Docks, and constructing docks and erecting suitable premises thereon for carrying on the business of building or docking and repairing steamers and sailing vessels, and for the purchase of the Docks now owned and carried on at Whampoa by Messrs. T. Hunt and Co., with the appurtenances, plant, and goodwill of the docking business of that firm.

It is proposed to register the Company as one of Limited Liability, either under the Imperial Act or under any Ordinance which the local legislature may pass enabling local companies to do so, the property of the Company in the meantime being vested in the trustees; and the deed of settlement of the Company, now in course of preparation, is being framed in accordance with this intention.

The very considerable increase in the number of vessels employed in what may be termed local trade, or in voyages that either originate or terminate, at Hong Kong, in addition to the great quantity of tonnage visiting the port from all quarters of the world, afford ample scope for the remunerative operations of dock companies in addition to those which are already in existence.

Application has been made to Her Majesty's Government with reference to obtaining a site for the proposed docks in the colony, and the project has been favourably entertained, steps being in progress to facilitate this object, the necessary preliminary investigations as to the suitable character of the proposed site having been conducted and satisfactorily reported upon by Mr. S. B. Rawling.

Liberal support has been promised to the undertaking, which, it is contemplated, must necessarily prove a very remunerative one.

Further applications for shares can, till further notice, be addressed to the undersigned, from whom forms of application and all particulars can be obtained.

EDWARD H. POLLARD, Counsel for the Company.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,

24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Has less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

DE JONGH'S

(KNIGHT OF THE ORDER OF LEOPOLD OF BELGIUM)

LIGHT-BROWN COD LIVER OIL

Universally recognised to be Incomparably Superior to every other kind.

Prescribed by the most eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, GENERAL DEBILITY, RHEUMATISM, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, and ALL SCROFULOUS AFFECTIONS.

In cases of **EXHAUSTION** and **PROSTRATION** produced by the debilitating diseases of unhealthy climates or resulting from Tropical Disorders, DR. DE JONGH'S COD LIVER OIL is much more safe and useful than the ordinary stimulating tonics, and it has been resorted to with the most beneficial effects after the whole range of these had been tried in vain. By its administration the natural appetite is revived, and the functions of digestion and humilation are improved, reanimated, and regulated; the muscular power and activity are sensibly and rapidly increased; and when its use is steadily persevered in, its peculiar nutritive and reparative properties entirely restore health and strength to the most feeble and deteriorated constitutions.

SELECT MEDICAL OPINIONS.

SIR HENRY MARSH, BART., M.D.,
Physician in Ordinary to the Queen in Ireland.

"I consider Dr. DE JONGH'S Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

SIR JOSEPH OLLIFFE, M.D.,
Physician to the British Embassy at Paris.

"I have frequently prescribed Dr. DE JONGH'S Light-Brown Cod Liver Oil, and I have every reason to be satisfied with its beneficial and salutary effects."

DR. LAWRANCE,
Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.

"I invariably prescribe Dr. DE JONGH'S Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, *and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed.*"

DR. LETHEBY,
Medical Officer of Health and Chief Analyst to the City of London.

"It is, I believe, universally acknowledged that Dr. DE JONGH'S Light-Brown Cod Liver Oil has great therapeutic power; and, from my investigations, I have no doubt of its being a pure and unadulterated article."

DR. LANKESTER, F.R.S.,
Coroner for Central Middlesex.

"I consider the Cod Liver Oil sold under Dr. DE JONGH'S guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

DR. GRANVILLE, F.R.S.,
Author of the "Spas of Germany."

"Dr. Granville has found that Dr. DE JONGH'S Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, *and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil.*"

*** DR DE JONGH'S LIGHT-BROWN COD LIVER OIL *is sold* **ONLY** *in bottles, each bottle being sealed with a stamped metallic capsule, and bearing beneath the pink outside wrapper a label with* DR. DE JONGH'S *stamp and signature; to these capsules and marks purchasers are earnestly requested to pay particular attention.*

WITHOUT THESE NONE CAN POSSIBLY BE GENUINE.

FULL DIRECTIONS FOR USE ACCOMPANY EACH BOTTLE.

Sole Consignees, ANSAR, HARFORD, & Co., 77, STRAND, LONDON, W.C.

Sold by most respectable Chemists and Druggists throughout the World.

IMPERIAL Half-pints, 2s. 6d.; Pints, 4s. 9d.; Quarts, 9s.

CAUTION.—BEWARE OF PROPOSED SUBSTITUTIONS.

LAMPLOUGH'S PYRETIC SALINE.

EFFERVESCING AND TASTELESS, ITS CONSTANT USE IS ESPECIALLY CALCULATED TO MAINTAIN HEALTH.

HER Majesty's representative, the Governor of Sierra Leone, in a letter of request for an additional supply, states, "it is of great value; it should be in the hands of all Europeans visiting the tropics.' Is an agreeable effervescing remedy, of great efficacy in all kinds of Fever and Blood diseases, especially those occurring during hot weather. Dr. Gibbon, Staff-Surgeon in the Crimean war, states that European residents in hot countries find that the use of this refreshing beverage prevents exhausting perspiration and its alternative deadly fever. It acts by purifying and lowering the temperature of the blood, hence its great importance to all persons seeking to reside with safety and comfort in tropical countries subject to unusual heat.

The elegance, purity, and usefulness of the preparation has been certified by some of the most eminent physicians in the Army, Naval, and Hospital service of Great Britain.

Lieutenant-Colonel Murray, 1st West India Regiment, Sierra Leone. "I have enjoyed uninterrupted health since I have taken your Pyretic Saline."

Dr. Sparks, the Government Medical Inspector, port of London, bears cordial testimony to its efficacy in chronic forms of Gastric complaints and Febrile dyspepsia.

William Stevens, Esq., M.D., D.C.L., states in his work on West India fevers, that wherever the saline treatment is adopted the fatal yellow fevers are deprived of their terrors.

Testimonials and directions for its use in disease accompany each bottle. To be obtained from H. LAMPLOUGH, 113, Holborn, London, and any of the Agents of this Paper, in bottles at 4s. 6d., 11s. and 21s.

ORNAMENTAL STOVES AND FENDERS.

JEREMIAH EVANS, SON, and Co. respectfully call the attention of those Gentlemen who are building or refurnishing their mansions to the most extensive assortment in the United Kingdom of Drawing Room, Dining Room, and Library STOVES, FENDERS, and FIRE FURNITURE, en suite, which, for Elegance of Design and Construction, are unequalled, and are adapted for wood or coal fires. NEAR LONDON-BRIDGE, LONDON, ENGLAND.

ESTABLISHED IN 1815.

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,

METALLIC PEN MAKER TO THE QUEEN

BEGS to inform the Commercial World, Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street, New York, and at 37, Gracechurch-street London

"EXCELSIOR" FAMILY SEWING AND EMBROIDERING MACHINE.

THESE MACHINES are far Superior to any others manufactured They are lighter and easier to operate, simpler to learn, quieter in action, and less liable to derangement. The range of work performed is greater than any. They run, tuck, hem, fell, gather, cord, quilt, braid, and embroider; sews from two ordinary spools, requires no re-winding, finishes its work where it stops, and the seam, if cut at every inch, will not rip. Price, Complete, from £6. 6s.

The New STAR PATENT IMPROVED DOUBLE-ACTION ARM MACHINE, for Bootmakers and Manufacturers generally. Complete, £12. 12s.

SOLE MANUFACTURERS OF STEAM FIRE-ENGINES TO THE BRITISH GOVERNMENT.

LONG ACRE AND LAMBET H LONDON.

BARCLAY AND SON'S IMPROVED Enamelled Punkah Lamps for China,

AS SUPPLIED TO THE INDIA OFFICE.

(TRADE BB MARK.)

SHOW ROOMS,
170, REGENT-STREET, LONDON.

THESE Lamps are wrought into many beautiful designs, having on the surface a coating of the Patent Enamel. By this process the most beautiful marbles and stones—as Malachite, Lapis Lazuli, Brocatella, Pale Sienna, Jasper, and Pink Granite—are imitated to a nicety.

Advantages of these Lamps over ordinar India Lamps:—

1st.—They are unaffected by damp, heat, alkali, or oil.

2nd.—The more they are rubbed the better the polish: in this respect they are the reverse of bronzed or lacquered lamps.

3rd.—They offer no temptation to the natives to remove the outer surface; and were they to endeavour to do so they would signally fail.

4th.—They are free from liability to fracture.

5th.—The enamel never wears off, nor changes in colour or appearance.

PRICES, from £4 10s. to £5.

Ornamental Glasses, 7s. 6d. extra.

Ordinary Lamps, in bronze, bronze and relieved, and lacquered, from 38s.

May be obtained of the makers, BARCLAY & SON, or through the Cape, India, and China Agency, of whom Illustrated Prospectuses may be obtained. Orders sent direct must be accompanied by a remittance.

GELLÉ FRERES' PERFUMERY.

CHIEF ESTABLISHMENT, 35, RUE DES VIEUX AUGUSTINS, 35, à PARIS.

THE house of GELLE AINE and CO., celebrated for the superiority of its Perfumery, addresses itself to the fashionable world as much for its essentially hygeianic, refreshing, and tonic preparations as for its delicate and distingué perfumes.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, of all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot is 12, RUE RICHER, PARIS.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Our dates are to the 12th September. The London mail of the 11th July arrived out on the 31st August.

As soon as it became certain that the Tycoon would refuse to ratify the convention agreed on by his Ambassadors at Paris, rumour grew apace as to the immediate departure of the allied squadrons to effect the purpose originally entertained, that of opening the Inland Sea. On the mornings of Sunday the 28th and Monday 29th of August all further doubts on this point were set at rest. Early on the first-mentioned day the English war-steamer Coquette, the French war-steamers Dupleix and Tancrede, and the Dutch war-steamers Medusa, Djambi, Metalin Kruis, and Amsterdam, steamed away for the seat of operations. At an early hour on the following morning the Barossa took the Tartar in tow, and walked away with her in splendid style. Then followed the flag-ship of Admiral Kuper, the Euryalus; the Leopard took the Conqueror; and the Argus the "Bouncer," in charge; and then the French steamer Semiramis, the flag-ship of Admiral Jaurez, joined. The American merchant steamer Ta-King, flying the U.S. national flag, under command of Lieut. Pearson, with a detachment of the U.S. Marines, trusting to her more nimble heels, more leisurely following them. "Since the departure of the allied squadrons, to the hour at which we write (12th inst., noon, says the *Japan Herald*), no information, native or otherwise, has been received here from them, and as may well be supposed great anxiety—or rather curiosity—at present exists on the question of the reception they have met at Nangato. All the members of the returned Embassy have, we are informed, placed themselves under voluntary arrest; *i.e.*, having felt that they took upon themselves responsibilities beyond the powers delegated to them, they await, in respectful obedience, the pleasure of their Sovereign thereon."

The result, however, was known at Shanghai on the 15th September, by the arrival of the French war-steamer *Tancrede*, which vessel, on her way down from the seat of action, had called in at Nagasaki, where she dressed colours and fired a Royal salute in token of the success of the expedition. The incidents of the engagement that took place with the batteries of Choshiu, Prince of Nangato, are thus detailed in a Shanghai contemporary:—"It appears, however, that attempts were first made by Japanese ambassadors from the shore to divert the English commander from his purpose. They said that the Japanese authorities intended to punish Choshiu (the Prince of Nangato) themselves, and that there was no need for Admiral Kuper's proposed operations. After the experience of Kagosima the Admiral would not entertain any suggestions of that kind, so he told the ambassadors that the fleet would do its own work. The fleet commenced the attack at Simonoseki on the afternoon of the 5th September, and in two hours two batteries on the eastern side were taken, and the camps in the rear destroyed. The Japanese did not fire more than about fifty or sixty shot and shell, and failed to injure the foreign vessels. This success was gained by about seven vessels of the lightest draught of water, for the heavier vessels did not leave the anchorage. On the 6th three vessels went through the Narrows (engaging and destroying the batteries on the Northern shore) as close up to the town of Simonoseki as probably the water would allow them to approach. In doing this several villages, which were immediately behind the batteries, caught fire, probably from shells which missed the forts. After this the vessels returned through the Narrows, and either the same or others went up to a place on the north-eastern shore called Cholu, which, we are told, was also left in flames. The forts on the south side

The mails delivered to-day, per French mail steamer, include those by the P. and O. steamer due here on the 14th, which arrived at Galle in time to transfer to the French steamer at that port.

List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer Delta, Nov. 4, from Southampton.—To Hong Kong: Mr. W. B. Andrews, Surgeon Woolfreys, Miss Thompson, Mrs. Swinhoe, Asst. Commy. Gen. Long, Lieut. Stokes, R.N., Commander G. H. Forster, R.N. From Marseilles, Nov. 12—To Shanghai: Messrs. W. Watson and W. E. King. To Hong Kong: Mr. Wheely, Mr. Arnould. From Alexandria.—To Singapore: Miss Cook and Eur. servant. From Gibraltar.—To Hong Kong: Actg. Depy. Asst. Commy. Gen. Hughes.

Per P. and O. steamer, Nov. 12, from Southampton.—To Singapore, via Bombay: Mr. C. H. Harrison, Mr. R. Smith. To Shanghai, via Bombay: Mr. Holdsworth. From Marseilles, Nov. 20.—To Hong Kong, via Bombay, Mr. M'Clure, Mr. T. Jackson. To Shanghai, via Bombay: Mr. McCalman.

Per P. and O. steamer, Nov. 20, from Southampton.—To Hong Kong: Miss B. E. Collett, Miss Lee, Lieut. B. Lilliehook, Mr. Howard. To Shanghai: Messrs. E. Crace, and M. Hawtrey. To Singapore: Mrs. W. W. Willans and infant. From Marseilles, Nov. 28.—To Hong Kong: Mr. T. F. Ballance, Mr. B. Mackintosh, Mr. P. G. Lawrie, Mr. and Mrs. J. A. Wheelock. To Shanghai: Mr. Hyslop. From Suez.—To Hong Kong: Mr. Caw.

Per P. and O. steamer, Nov. 27, from Southampton.—To Shanghai via Bombay: Mr. Bayne.

Per P. and O. steamer, Dec. 4, from Southampton.—To Penang: Capt. and Mrs. White. To Shanghai: Mr. Herbert Elias, Mr. G. Stanford. To Hong Kong: Mrs. Smith and two infants, Mr. Dent. From Marseilles, Dec. 12.—To Singapore: Mr. and Mrs. H. W. Wood and lady friend, Mr. Geo. Crichton, Mr. J. Crum, Mr. A. J. Gunn. To Shanghai: Mr. J. W. Broadbent. To Hong Kong: Mr. T. Caw, Mr. H. H. Nelson, Mr. J. Sloane.

Per P. and O. steamer, from Marseilles, Jan. 12, 1865.—To Hong Hong: Mr. M'Donald.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Our dates are to the 12th September. The London mail of the 11th July arrived out on the 31st August.

As soon as it became certain that the Tycoon would refuse to ratify the convention agreed on by his Ambassadors at Paris, rumour grew apace as to the immediate departure of the allied squadrons to effect the purpose originally entertained, that of opening the Inland Sea. On the mornings of Sunday the 28th and Monday 29th of August all further doubts on this point were set at rest. Early on the first-mentioned day the English war-steamer Coquette, the French war-steamers Dupleix and Tancrede, and the Dutch war-steamers Medusa, Djambi, Metalin Kruis, and Amsterdam, steamed away for the seat of operations. At an early hour on the following morning the Barossa took the Tartar in tow, and walked away with her in splendid style. Then followed the flag-ship of Admiral Kuper, the Euryalus; the Leopard took the Conqueror; and the Argus the "Bouncer," in charge; and then the French steamer Semiramis, the flag-ship of Admiral Jaurez, joined. The American merchant steamer Ta-King, flying the U.S. national flag, under command of Lieut. Pearson, with a detachment of the U.S. Marines, trusting to her more nimble heels, more leisurely following them. "Since the departure of the allied squadrons, to the hour at which we write (12th inst., noon, says the *Japan Herald*), no information, native or otherwise, has been received here from them, and as may well be supposed great anxiety—or rather curiosity—at present exists on the question of the reception they have met at Nangato. All the members of the returned Embassy have, we are informed, placed themselves under voluntary arrest; *i.e.*, having felt that they took upon themselves responsibilities beyond the powers delegated to them, they await, in respectful obedience, the pleasure of their Sovereign thereon."

The result, however, was known at Shanghai on the 15th September, by the arrival of the French war-steamer *Tancrede*, which vessel, on her way down from the seat of action, had called in at Nagasaki, where she dressed colours and fired a Royal salute in token of the success of the expedition. The incidents of the engagement that took place with the batteries of Choshiu, Prince of Nangato, are thus detailed in a Shanghai contemporary:—"It appears, however, that attempts were first made by Japanese ambassadors from the shore to divert the English commander from his purpose. They said that the Japanese authorities intended to punish Choshiu (the Prince of Nangato) themselves, and that there was no need for Admiral Kuper's proposed operations. After the experience of Kagosima the Admiral would not entertain any suggestions of that kind, so he told the ambassadors that the fleet would do its own work. The fleet commenced the attack at Simonoseki on the afternoon of the 5th September, and in two hours two batteries on the eastern side were taken, and the camps in the rear destroyed. The Japanese did not fire more than about fifty or sixty shot and shell, and failed to injure the foreign vessels. This success was gained by about seven vessels of the lightest draught of water, for the heavier vessels did not leave the anchorage. On the 6th three vessels went through the Narrows (engaging and destroying the batteries on the Northern shore) as close up to the town of Simonoseki as probably the water would allow them to approach. In doing this several villages, which were immediately behind the batteries, caught fire, probably from shells which missed the forts. After this the vessels returned through the Narrows, and either the same or others went up to a place on the north-eastern shore called Cholu, which, we are told, was also left in flames. The forts on the south side

Digitized by Google

of the Straits, in possession of the Prince of Kokura, did not fire, so that the fleet had only one side (the Northern) to engage. A deputation from Kokura and other Princes from the Southern or friendly side waited upon the Admiral before the fighting began, asking him not to commence operations, as the Japanese were themselves going to punish Choshiu. The Admiral, however, replied that the fleet had waited long enough, and preferred doing its own work. Next morning at daylight, the bombardment was re-commenced, and in the course of two hours the forts were silenced. The troops then landed to spike the guns, and fought until dark. On the morning of the 7th the troops were again engaged on shore, spiking the guns and blowing up the forts, but in the afternoon Choshiu sent officials on board the fleet to arrange for peace, and to beg the allies to cease firing, promising that he would submit to any conditions the Admirals might impose on him. Orders were immediately given to cease firing, but the English demanded that the Prince of Choshiu should write a guarantee, binding himself to pay any indemnity, and submit to any conditions that foreigners might impose. This was done on the morning of the 10th inst."

The English loss is said to be about twelve killed, and twenty wounded; amongst the latter we are sorry to say is Captain Alexander, of the *Euryalus*, who was wounded in the foot, and it is feared that amputation will prove necessary. The French lost about five killed and wounded and the Dutch about ten, almost all the casualties occurring on shore, where also Captain Alexander was wounded. While Choshiu was sending on board the fleet to obtain peace, he dispatched fowls and provisions to every ship. Sixty-two guns of large calibre and a great number of light guns were destroyed. Seven (large) forts and several small batteries were destroyed, as well as all the barracks and powder magazines. There is now therefore not a fort standing or a gun mounted at Simonoseki. All the guns that seemed useful were taken on board the allied fleet. It is impossible to ascertain the loss of the Japanese, as they carried away their dead, but it must have been heavy. It is reported that Choshiu confesses that he is sorry for having fired on the ships which passed the Straits, but that he was acting at the request of the Tycoon and Mikado, and that all the guns he had were supplied by the Tycoon. If this be proved, the Tycoon will of course be held responsible for the outrage on foreign flags. The fleet has sustained no injury; the *Perseus* was aground for about twenty hours, but nevertheless made good use of her guns, and had not a single man killed or wounded on board.

The following is a translation of the French Admiral's official report, dated "Simonoseki, Sept. 11":—

"The combined squadrons, presenting an imposing force of sixteen vessels of war, have, after three days' fighting, forced the Straits of Simonoseki, destroyed munitions of war that have been accumulating for more than a year, and struck such terror into the enemy that he has implored for peace. Sixty bronze cannon of large calibre have been embarked on board the vessels of the fleet. The town of Simonoseki has been spared. The resistance of the Japanese batteries was warm and obstinate on the first day, and, it may be said, would have done honour to a European enemy. The vessels that took part in the attack were:—The Semiramis, Dupleix, and Tancrède, French; the Euryalus, Conqueror, Tartar, Barrossa, Perseus, Argus, Coquette, and Bouncer, English; Metalin Kruis, Djambi, Medusa, and Amsterdam, Dutch; Ta-Kiang, American. The Perseus, Medusa, Tancrède, Coquette, and Bouncer fought under steam on the 5th; the other vessels were at anchor. This complete success of the combined forces was, moreover, effected at the relatively insignificant cost of seventeen killed and some sixty wounded. The good understanding of the Admirals was perfect, and reflects special honour on each of them."

We learn from Yokohama that meanwhile no anxiety was felt there for the security of the settlement. A few days after the departure of the fleet a notification was circulated, by order of the British Minister (and it is believed that similar notifications were issued by the other heads of nationalities), containing satisfactory assurance upon the subject of there being ample security for the protection of the settlement in the event of any disturbance (the likelihood of which, however, it did not suggest), but making the very reasonable recommendation that, in the existing state of affairs, discretion should be exercised as to the extent and neighbourhood of excursions made by Europeans. By the steamer *Chusan*, which arrived from Shanghai on the 25th August, the garrison was further reinforced by 163 rank and file of the Beloochees, 86 more men of the 67th, and 22 men of the Royal Artillery. With respect to the Beloochees, the *Japan Herald* points to probable danger from their presence. We take the following from that journal of the 10th September:—

Last evening a *fracas* of a serious character occurred in the Settlement, close to the Old Hatoba. The Beloochees were yesterday transferred from their tents upon the hill to the old Custom-house Godown facing the Hatoba, which it is intended, we believe, shall continue to be occupied as their barracks for some time. It seems that one of the Sepoys was struck by a stone thrown by a Japanese, when a general melée ensued, ending in three Japanese being made prisoners and dragged into the barracks by the soldiers, though not before two of the Japanese were wounded or severely beaten. An officer with a picket arrived shortly afterwards, but returned without being required to render any service, as before their arrival matters had been so far settled as that the Japanese were handed over to the Custom-house authorities. We know nothing further of the particulars of this affair; and so far it appears that the Beloochees probably thought it necessary to act with vigour in self-defence; but though generally desirous to avoid remarks upon matters of military arrangements, we cannot but observe upon what seems to be a step fraught with great danger to the peace of the Settlement—the stationing the Beloochees close to the native town with no European officer in charge on the spot; we trust that it is intended to make this provision forthwith.

In the meantime intelligence arriving from various parts of the interior of the country, at Yokohama, indicates a most disturbed state of political affairs. Towards the end of August there was received news of the destruction of a great part of the city of Kioto by fire, at the hands of a large body of Choshiu's men. This city—better known as Miako—is perhaps one of the finest cities of the world, and the regret at its even partial destruction will be shared by all who have ever read the interesting accounts of its grandeur and elegance in Thunberg or Kaempfer. Choshiu's three palaces in Yedo have been invested by the Tycoon's forces. Mito, the great city of the Prince of that name, has been the scene of a series of violent conflicts between the Ronins of the district and the Prince's retainers. The Ronins were dispersed and many taken prisoners.

The following are native accounts of the fighting within Kioto:—

FIRST INTELLIGENCE OF THE BATTLE AT KIOTO BY AN OVERLAND COURIER.

"Kioto, 20th August.

"This morning at day-break a battle has taken place between Aisoo and Choshiu with artillery; all the streets from Jebisugawa, Tosai, Karasoomaroo, to Tyamatsi have been destroyed by fire; the inhabitants have left the town."

FROM OSAKA.

"Kikawa Keumots a Karo (minister), of Choshiu has arrived here with 5,000 men to advance upon Kioto; reinforcements are following; they are advancing towards Tusimi; great panic prevailing in Kioto.—In haste."

EXTRACT FROM A PRIVATE LETTER FROM A MERCHANT IN KIOTO.

"This morning at daybreak from the other side of Katsulagawa (a river) bands of people of a suspicious appearance were seen advancing, collecting together in a large mob; they attacked the west end of Kioto and committed violence, and advanced towards the palace of the Mikado, with the supposed intention of seizing or capturing the person of the Mikado. The guards got ready, and made preparations for the defence of the gates. Now a band of soldiers, supposed to belong to Choshiu, opened fire with small and large guns, advancing at the same time to the number of five hundred or more. A large fire was raging at the same time and destroyed the houses from the west end of the town, advancing rapidly towards the Mikado's palace. The troops guarding Kioto belonging to Matzdaira Higo no Kami (Aisoo), (Aisoo is also called the Shigoshok, Commander-in-Chief of Kioto), and Yodo (Inaba Tango no Kami, the present representative of the Tycoon in Kioto), as also the troops sent from Yedo, guarded one side of the palace, which position was attacked by the soldiers of Choshiu, and a serious engagement took place on that spot, as the great number wounded and killed on both sides shows. I have not arrived at the particulars of the fight, but shall send them afterwards. The Mikado is well protected. But as the fire is still raging the panic is great amongst the merchants and citizens."

REPORT OF A MESSENGER OF A VILLAGE NEAR KIOTO, ON THE TOKAIDO.

"Before daybreak of the 20th instant the troops of Choshiu assembled on the hill Tenno-san (near Kioto), on the temple of Tin-lin-sin, and advanced suddenly towards the town of Kioto. A fight began with the guards of the Mikado's palace; on both sides big guns were continually firing. At three o'clock in the morning a column of smoke and fire was seen rising from the Choshiu Tastikas (residences of Choshiu), in the Kawalamatso, and in Tusima, apparently set fire to inside. The fight near the Mikado's palace was, in the meantime, increasing; at midday the wounded and killed were lying about in heaps. The houses of the Mikado's officers, named Takatsukasa and Kusio, were burned. The streets were set on fire on the west side. Teramatsi, on the east side Karasoomaroo, all burning at the same time. In the night of the 20th nearly the whole town was laid in ashes. On the 21st the temples of Kiomisa and Kodaisi and Awada-Sisigatani were fired upon with large guns and set on fire, which burned up to the castle called Nijio. The Mikado has been obliged to fly to the temple of Hijesan (5 ri from Kioto). The battle is still raging, whilst the empty plains of Kioto are filled with soldiers dressed in armour. The citizens have all left the ruins.

"This letter left on the 21st August at 8 o'clock in the morning. Received in Yedo at 8 o'clock on the 25th August.

"P.S.—From Yedo.

Digitized by Google

"Troops are going up daily to Kioto, and passing the Tokaido. Several hundreds of Choshiu's men were turned back on the Tokaido by Satsuma's men, sent from their Yedo Yasiki."

A curious document is in our possession purporting to be an exculpatory statement of Choshiu's policy, which is too long for insertion in our present issue, but shall appear in our next number. It is fragmentary, and its authenticity is, of course, more or less open to question. The internal evidence that it is really a statement prepared by the Prince of Nangato himself or by his order is, however, very strong; and in this view it is likely to throw great light, not only upon his own motives of action and his designs, but of those of many others engaged in political affairs, who have been actively plotting for the expulsion of foreigners ever since the signature of the first treaty.

The case of De Forest and Co. *v.* J. Rumebe was before the United States Consular Court on the 24th August, being an action to recover on an overdue bill of exchange of $1,000 (one of four). It appeared that Rumebe, who has been carrying on business at Yokohama as an import merchant and storekeeper, under the name of Rumebe and Co., was in partnership with De Forest and Co. of Shanghai, the latter buying at that port and sharing with Rumebe the profits on goods sold at Yokohama. On a dissolution of partnership Rumebe received information which led him to believe that his invoices were not genuine—that large additions had been made to the prices. He then gave public notice against the negotiation of the bills. The plaintiffs pleaded that the bills had been negotiated to third parties before the notice. The defendant replied that the bills had not been really negotiated at the time of the notice—if since—and asked for a commission to take testimony at Shanghai. This was acceded to, on condition of security being lodged in the event of judgment passing against him. The case, therefore, stands over for the present.

A notice has been issued by Deputy Assistant Commissary-General Murray, calling for tenders for the supply of meat and other necessaries for six months from the 1st October.

A report having reached this of the loss of a foreign vessel, H.M.'s gunboat *Havoc* was despatched to her relief, and on her return reported the wreck of the *Fleda*, from Yokohama to London, in a gale off Volcano Island. She struck in a bay named Kosiama. At the last advices Captain Hughes had not abandoned the vessel. The chief mate and five of the crew arrived at Yokohama in the *Havoc*. This vessel belonged to Messrs. George Duncan and Co., of London. She was despatched by Messrs. Macpherson and Marshall, with a general cargo, consisting of 38 bales silk, 2,819 lbs. tea, 180 bales cotton, and other sundries.

NAGASAKI.

The ruling powers at Nagasaki profess great friendship for the English, and express themselves highly delighted at the fleet having gone to Simonoseki. It is best to believe them sincere, although the measures and precautions taken nominally against Choshiu—such as collecting a large force, overhauling and strengthening forts, &c.—might easily be turned against us. Trade continues extremely dull. The Chinese nevertheless still export largely to Chefoo.

HAKODADI.

Our correspondent sends us the following, under date of the 28th August:—

Departures.—Am. bq. J. W. Seaver, leaving this day for Shanghai. British brigantine Alert, left on 25th August for Tien-tsin.

Vessels in Harbour.—French bq. Marie, British str. Iron Prince, British schr. Petrel, British schr. Khankai.

Nothing to interest the outer world has occurred for some time. In a local way, however, there is a novelty, as the West Pacific Co.'s Saw Mills are now a working reality. The mills, which are of European make, are driven by steam, and have been working for more than three weeks. The Japanese take great delight in visiting the works, which are infested with visitors of all classes daily.

CHINA.

TIEN-TSIN.

A correspondent of the *North China Herald* sends the subjoined notice of the opening of the foreign chapel lately erected at this port. Many handsome residences have already sprung up at Tsze Chu-lin, and this Gothic church will add considerably to the architectural beauties of the Northern River.

In the spring of this year, the Revds. Messrs. Innocent and Hall submitted a project to the community for erecting a church on a portion of the land belonging to their mission. Their plan was generally approved and the appeal for help in its execution was most generously responded to. As the result, a neat and graceful edifice has been raised, affording comfortable accommodation for religious exercises, and constituting an ornament to the locality in which it stands. It occupies a very commanding position, being the most conspicuous object for some distance in the approach to this settlement from Taku, whether by road or river. On Sunday, August 14th, this sanctuary was solemnly opened for divine service, and it was gratifying to observe the interest excited by the occasion. For some time past we have rarely averaged more than fifteen or twenty persons at our service; but nearly one hundred Europeans gathered together in the setting apart of this church. We trust this interesting fact augurs well for the future. Of course a great proportion of the parties thus assembling were officers and men from ships lying at this port; but after allowing for these, we had a good number of the foreign residents present. The service of the Church of England was performed, and an excellent sermon was preached by the Rev. J. Williamson, of the London Mission. It was a source of much satisfaction and thankfulness to those chiefly concerned in the erection of this building, to find that it commands the approval of all who have subscribed to it. The church is in the Gothic style of architecture, with square tower. It will probably cost £800, and towards this amount nearly £500 has already been contributed. We have been interested in learning that, without any previous knowledge of the arrangement, the new chapel at Shanghai was opened on the same day as we were engaged in our dedicatory services.

SHANGHAI.

The English mail of the 26th July arrived out on the 9th Sept. The dates are down to the 21st. The cholera had disappeared, and the northerly airs of September had done good service in restoring vigour to the residents.

Amusements promise to be varied and good this autumn. The races had been fixed for the 9th, 10th, and 11th November. The Christy Minstrels and a theatrical company from the colonies were expected. The Shanghai Burlesque Company also promised attractions of a superior kind.

The Cricket Club has recommenced. The match now on hand between the military and civilians will be very close. It was to be resumed on the departure of the mail. On the departure of the mail the score was—Civilians, first innings, 70; Military, first innings, 55; Civilians, second innings (with six wickets down), 30. The ground is in capital order.

A paper was read at the Asiatic Society on "*The Seaboard* of Manchuria," by Mr. Canny, a gentleman who had served in the Russian fleet.

Little doubt is now entertained as to the elevation of Li Futai to the viceroyalty of the two Hu provinces. The present governor will return to Peking, having doubtless accumulated a very respectable fortune. Liu, the present Fantai of Kiang-su, and Shên, Futai of Kiang-si, have each been mentioned as likely to obtain the post rendered vacant by Li Futai's accession of dignity. Should Liu be appointed, Ting Taotai is, we understand, likely to take the Acting Fantai-ship—an appointment certain to produce no inconsiderable jealousy, as Ting, however gifted with business capabilities, has risen with such rapidity as to excite the envy of many local officials.

The *Friend of China* thus speaks of the late evacuation of Hoo-chow:—

"On the capture of the stockades near the east gate, Hoo-chow-foo was evacuated by the rebels, though leisurely, each man well laden with his share of the plunder. The marauders, as they have now become, have taken to the mountains not far from Hoo-chow-foo, and intend carrying on a guerilla warfare. They are no match, they say, for foreign cannon; so they will get out of their reach—cowed, but not conquered!

"Another of the parties despatched by us, a short time ago, to learn the real state of affairs about Hoo-chow-foo, has just returned, and reports as follows:—

"The Chung Wang was in command up to the last—the force in arms, in and about Hoo-chow-foo numbering 300,000—with plenty of ammunition and ordnance, and provisions in quantity—rice and salt-fish enough for seven years. If the Chekiang provincials, and their French assistants, had been all they had to contend against, they would have still held out; but, quite unexpectedly, they found Le Futai, of Kiangnan, crossing the borders of a province in which he has no legitimate control, bringing with him some of the artillery, under European officers, which had helped to recover to Imperial arms the cities of Suchow and Changchowfoo; the steamer *Hyson*, and another, under foreign management being there too. This produced a determination in the Chung-Wang to evacuate Hoo-chow-foo; and evacuated Hoo-chow-foo was accordingly.

"Three days after—we repeat, three days afterwards, Le Futai gallantly marched into the city with a thundering noise, and then, what did he?—Why, shut the gates even upon the Fantai of Chekiang! Well, the gates were closed, and then

Digitized by Google

commenced a general sack, and the usual massacre of innocent individuals—women only being spared.

"Two companies of D'Aguibelle's forces entered the city from the north-east, as the Futai went in from the opposite direction, and when our reporter, whose narrative, in Chinese, we have some difficulty in comprehending, left the city, matters were proceeding peaceably, although the Fantai's people, at no great distance off, were exceedingly disgusted at being kept out of the pay which they have not had for the last seven months, and which they had fully expected on gaining their prize.

"A laughable story is told of the second capture of the Chung Wang here, at Hoo-chow-foo,—his head—the veritable caput—with loud clamour of gongs, being sent round to all the villages, that people might behold the head of the arch traitor! Our reporter, wicked sceptic, loudly declares that the head said to be the Chung Wang's truly sat on the shoulders, a week or two ago, of a man whose highest grade in life was that of a coolie."

HANKOW.

The steamer *Far East* had not completed her loading. The *Camilla* and *Dovercourt* were expected to clear shortly.

CHIN KIANG.

An important move in the way of facilitating business operations was made on the 5th of September. Consul Adkins, with his assistant, and Mr. Lord, the Commissioner of Customs, left Silver Island, in spite of what our informant emphatically styles "wretched weather," and took possession of their quarters in Chin Kiang. H.M.'s gunboat *Slaney* followed the next day, and is now anchored a little above the Concession. This arrangement was much and long wished for on the part of the residents, and has been gladly hailed by them as decidedly a move in the right direction. They will now be able to get through their business with something like system; and it is likewise confidently expected that, when building and settling is once commenced in earnest by the European residents, the influential native merchants will soon gather round the concession. A few have made flying visits already, and have satisfied themselves that the foreigner means to do business. It is also hoped that the resuscitation of the city of Nanking may have a beneficial influence on the growing trade of Chin Kiang. As people are flocking into the former city, carrying with them the necessity for a partial revival of its former commercial importance, it is believed that the benefits must react, if only indirectly, on the latter port. At all events, present appearances are decidedly in favour of the ultimate establishment of a very respectable business, and and that too at no very distant date.

NINGPO.

The news from Ningpo states that the pirates who abound there are becoming very audacious, and do not hesitate to attack lorchas belonging to Europeans. H.M.'s gunboats *Hardy* and *Flamer* are hard to work with them; their efforts have been very successful, without loss to themselves. Before the gunboats went down to the scene of their atrocities they had attacked a European lorcha, and murdered a man named Johnston. The punishment inflicted on these pests has been as follows: the gunboats captured two piratical junks, one wood-laden junk, and sank two others. The pirates ran the vessels ashore, and then took to the hills. A good many were killed during the engagement.

HONG KONG.

The English mail of 10th August arrived out on the 17th Sept. The dates are now down to the 27th. The following items are from the *Evening Mail*:—

We hear that the handsome sum of $450 has been raised in Hong Kong for the "China Cup" to be sent home for competition by the London Scottish Volunteers. A subscription list will be sent to Shanghai, in order to give the different corps there an opportunity of joining in the movement, and thereby justifying the general name proposed to be given to the prize.

A pension of £300 a-year has been voted to the Bishop of Victoria, subject to a deduction of any sum he may derive from an appointment in England. The vote was considered special, and a note was appended to it suggesting that, as the Bishop's services had been rendered as much to the Imperial as to the local Government, the former be requested to pay one half of the sum voted.—The Governor intimated that a Limited Liability Ordinance was being prepared by the Attorney-General.

The annual public meeting of the Sailors' Home was very numerously attended, evincing the deep interest felt in the institution. Dr. Irwin was called to the chair. Mr. Thomas Sutherland, in laying before the meeting a statement of the financial position of the undertaking, stated that even after deviating in some minor details from the original plan of the building, they would still be in debt to the amount of something like $13,000 before the Home could be opened. He then read a letter from Mr. Whittall, in which the liberal proposal of Mr. Robert Jardine was made to the committee of management. This proposition consists in the institution being placed on trial, by a grant in aid, for a period of probably three years, that gentleman binding himself to pay any excess of expenditure over revenue during that period. The only condition put forward was that one of the partners of Messrs. Jardine, Matheson, and Co., should be appointed a member of the committee of management, in order to have a voice in the direction of its affairs.

The Hon. Mr. Whittall explained that, as Mr. Jardine was of opinion that an institution such as the Sailors' Home ought to be supported by the whole community, he had collected part of the sum from old residents at home, and he hoped subscriptions would be forthcoming from residents in the colony. Mr. Owen remarked that he had received offers of subscriptions, which he believed would amount to nearly $10,000. It was moved by Mr. Thos. Sutherland that the proposal made by Mr. Whittall be accepted; which was unanimously agreed to.

It was then moved by Mr. Owen that the present committee of management be re-elected for another year, and that the Hon. Mr. Whittall be added to their number, which was likewise agreed to unanimously.

The Hon. Mr. Chomley proposed a vote of thanks to the promoters of the scheme, which motion was received with applause; and a vote of thanks to the chairman terminated the proceedings.

The british brigantine *Jeanie* reports that she was in company, off Anjer, with the ship *Sir W. F. Williams*, from London for Shanghai, 100 days out, having two steam-yachts on board. On the 7th, off the Ladrones, the *Jeanie* encountered a severe gale, which drifted her in a strong west current as far as Fau She Ack; it took her seven days to regain her former position, the gale being very severe with a very bad sea. The *Jeanie* brings as cargo three yachts, with coal, lumber, and provisions. Two of the yachts are standing on deck, with engines, &c., complete and in readiness for immediate use. The passage was performed without the least harm to the steamers, which, it is said, has never before been accomplished in so small a vessel.

The following is from the *China Mail*:—

Having learnt that reports have got abroad reflecting upon the character of the Hong Kong Club, we feel it necessary to vindicate the reputation of that institution. So far as we know, the facts are these. On Wednesday evening last both companies of the Volunteers turned out, in compliance with an order from his Excellency Sir Hercules Robinson. The unfortunate ill-feeling which has lately arisen between the military and the police in this colony had led, it seems, to Her Majesty's 99th Regiment being ordered over to Kowlong. In these circumstances, and probably as a trial measure, the Volunteers were ordered to patrol the disturbed localities, in order to impart a sense of security to the Chinese, who had—and not without cause—begun to get alarmed at the riotous proceedings of the two previous evenings. About eighty-five men turned out, in obedience to the Governor's order. None of those men could tell which of them might get hurt while on this duty. There was not much to fear, it is true; for the irritated parties had no animosity towards the Volunteers. But the prompt muster of the corps, both officers and privates, at the command of H.E. the Governor, was creditable to a degree, and augurs well for future cases of emergency. At 9 P.M., after having, for four hours, patrolled the disturbed district, and reassured the Chinese residents thereby, the corps were marched up to the Court-house, and allowed to "fall out."

The next step taken was a bad one, and we do not know who was to blame for it. But it seems that some injudicious individual went into the Hong Kong Club, and began to procure sandwiches with which to refresh the men who had turned out to assist in securing the safety of life and property in a quarter where there was actual danger to be feared. The case as regards the Club, though a peculiarly exceptional one, could not, of course, be entertained. Two officers of the gallant corps—we need scarcely say they were not members of the Club—were disallowed a glass of beer, in compliance with rule 3,788, and, as those gentlemen withdrew unrefreshed, they were very properly hooted by a number of members who happened to be standing on the Club steps.

We are authorised to state that the rule referred to cannot be infringed under any circumstances. Its inviolability has been repeatedly asserted, and we understand that a very intelligent member of the Colonial Government has undertaken the duty of seeing to its strict enforcement.

The Club, we would again insist, must not be made a pot-house of. Had the Volunteers felt "peckish," which doubtless they did after a four hours' spell of work, we have no doubt that Messrs. Dent and Co. or Messrs. Lindsay and Co. would have let them have the scraps that were left from their tables after dinner; but to ask a sandwich and a glass of beer from the Hong Kong Club was too much. Who would not hoo

Digitized by Google

Volunteer officer who had been four hours on duty by command of the Governor and his colonel, and for the safety of the settlement, who dared to assume that the Hong Kong Club would let him have a biscuit and a glass of porter? A piece of grosser impertinence was never perpetrated than for two men, in Volunteer uniform, to violate the sanctity of the Hong Kong Club bar by attempting to take refreshment thereat. The man who introduced the excluded, famished, and hooted victims of such daring presumption upon club hospitality ought to be seriously spoken to. We must really keep the Club from being made a pot-house of, except—of course—by its own members.

SIAM.

BANGKOK.

The *Siam Times* has the following notice of a marriage, which will be found in our list of marriages:—

"The newly married couple are the grand-children of His Majesty the Supreme King of Siam. The father of the bride-groom, and the father of the bride, were the two sons born to His Majesty while he was a young prince, and before he entered the priesthood. It must be borne in mind that His Majesty was a priest twenty-seven years previous to his coronation. On the death of his late Majesty Somdetch Phra Nang Klau, the two late Somdetchs, Ong Yai and Ong Noi, prevailed upon the prince priest to relinquish the priesthood and ascend the vacant throne. The Phra Klang, and Phaya Sripipat, the then prominent men of the kingdom, so controlled the affairs of state, that their present Majesties, the first and second king, became the recognised heads of the nation. After having effected the coronation of the two kings, these two powerful ministers of state, who had judiciously conducted the succession to the throne without an interregnum, and its consequent bloodshed, received from their present Majesties the dignified and honorary titles of Somdetch Ong Yai, and Somdetch Ong Noi. Each of these distinguished noblemen have left a large family of sons. The alliances of these families and their influence extends through every ramification of the Government. They are respected in the palace, in the provinces, in the territories, and everywhere throughout the kingdom. The political talent of the prominent members of these families would do honour to any country, and their extensive power reminds one much of the past history of the English nobility. His Majesty the King appreciates the talents and the powers of the members of these families, and keeps them in the most responsible positions of trust."

MALACCA STRAITS.

SINGAPORE.

Dates are to the 6th October. The London mail of the 26th August arrived out by the P. and O. steamer *Benares* on the morning of the 27th September.

The Overland Summary of the *Straits Times* has the following:—

"We have had a very dull fortnight—nothing of local importance having transpired. It has eked out from political circles, that the transfer of the settlement to the Crown was only assented to by the Chancellor of the Exchequer, on the understanding that the revenue was to be supplemented by an Income-tax to be levied as soon as the change took place. We think it is very doubtful if the report be true; but in any case, it is not of a nature to alarm the residents here. The community of Singapore have long ago been reconciled to the demand that they should pay the entire expenses of their Government, and they are confident that it is not the intention of the Imperial Government to do more than this—or, in other words, to make a profit out of them."

Mr. Peter Benson Maxwell has been appointed to officiate as Registrar of the Penang division of the Supreme Court, during the absence of Mr. Alexander Rodyk, on leave, on Medical Certificate. Mr. Maxwell assumed charge of the duties of the Registrar's Office on the 2nd May, 1864. Her Majesty's Exequatur having been received, Don M. M. Caballero de Rodas is recognised as Consul for Spain. Mr. R. Bain has been appointed by the Consul for the United States, to be Vice-Consul for that Government at Penang.

The *Straits Times* of the 24th September says:—

"It is reported that a fine large iron ship from Liverpool to China, called the *Sea Horse*, is wrecked in Gaspar Straits, but we have no particulars."

Mr. Willans, the Police Magistrate, and Mr. Kirby, the officiating Master-Attendant, having inquired into the abandonment of the barque *Isle o' May*, of London, have suspended the certificate of James Gray, the master, for twelve months.

The prospectus has been issued of the "Johore Sugar Company," the object being to bring under sugar cultivation an extensive tract of the richest soil in the territories of Johore, measuring about 5,000 acres, which has been granted to the company in perpetuity by the Rajah of Johore free of cost; and to erect thereon milling machinery of the first order, so as to reduce the produce of the plantation to the highest class of sugar yet exported from any part of the Straits Settlement. The district in which the land granted to the company by the Rajah lies, is one of the richest, but the particular site will not be definitely fixed upon until a survey of a very large area of ground has been completed, so as to ensure the utmost advantages which it is possible to obtain in combination.

The *Singapore Free Press* takes exception to our article on the Governorship of Singapore, which we will notice in our next issue.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

DATO—On the 8th Sept., at Shanghai, the wife of Benjamin Dato, of a son, stillborn.
GIBBON—On the 3rd Nov., at 10, Edith Villas, Fulham, the wife of Capt. R. Gibbon, of a daughter.
LANE—On the 7th Nov., at Grove-end House, St. John's-wood, the wife of T. A. Lane, Esq., of a son.
KUP—On the 16th Sept., at Hong Kong, the wife of A. W. P. Kup, of a son.
LOUIS—On the 20th Sept., at Hong Kong, the wife of the Rev. W. Louis, of a son.
M'MURDO—On the 16th Sept., at Hong Kong, the wife of R. M'Murdo, of a son.
PADDAY—On the 5th Nov., at Angmering Rectory, the residence of her father, the wife of Reginald Padday, Esq., of Singapore, of a daughter.
TORREY—On the 16th Sept., at Victoria, Hong Kong, the wife of J. W. Torrey, of a son

MARRIAGES.

GLYN—COLLIER.—On the 20th Oct., at the parish church, Wickham, Hants, by the Rev. Carr John Glyn, rector of Witchampton and Stanbridge, Dorset, and father of the bridegroom, Carr Stuart Glyn, Esq., Captain of the Royal Dragoons, to Selina Catherine, youngest daughter of the late Rear-Admiral Sir Francis Augustus Collier, C.B., K.G.H., &c., of Wickham, Hants.
HANCOCK—BUDD.—On the 3rd Nov., at Barnstaple, North Devon, by the Rev. J. Wallas, Alfred Hancock, Esq., of Amoy, China, to Harriot Elizabeth Ryder, second daughter of Dr. Richard Budd, F.R.C.P., of Barnstaple. No cards.
LEIGHTON—LYSTER.—On the 2nd Nov., at St. George's Church, Hanover-square, by the Rev. G. B. Macilwain, Henry Leighton, Esq., of the firm of Leighton and Co., Mark-lane, to Gertrude, daughter of Robert Lyster, Esq., of Milton House, Brighton.
PANKOJ—CHANDRA.—At the Palace, on the 22d August, Prince Pankoj, son of his Royal Highness Prince Nothawongse Krom Mu'n Mahesuer Sivavilas, was married to Princess Chandra, the daughter of his late Royal Highness Prince Supratith Krom Mu'n Visnunarth.
STAVELEY—MINET.—On the 31st Oct., at St. Mary's Church, Dover, by the Rev. John Puckle, vicar and rural dean, assisted by the Rev. John Dyke, cousin of the bride, Colonel Charles W. D. Staveley, C.B., 44th Regt., eldest son of the late Lieut.-General W. Staveley, C.B., Commander-in-Chief at Madras, to Susan Millicent, second daughter of Charles Minet, Esq., of Pier House, Dover, and granddaughter of Mrs. Minet, of Baldwyns, Kent.

DEATHS.

BURKEY—On the 16th Sept., at Kowloong, Thomas Burkey, Private H.M.'s 99th Regiment.
CROFT—On the 1st Sept., at Shanghai, on board the S.S. Mercury, Francis Croft, master, aged 28.
DOOLITTLE—On the 6th May, on board the American ship Helios, bound from Hong Kong to San Francisco, in lat. 30.18 N., lon. 132.31 E., Calvin Mills, son of the Rev. Justus and Mrs. Lucy Doolittle, late of Fuhchau, China, aged 9 months and 25 days, of dysentery, after 10 days' illness.
DATO—On the 10th Sept., at Shanghai, Anna, the beloved wife of Benjamin Dato, aged 29.
DEW—On the 13th Oct., at Madeira, on his return from China, Ensign Charles Dew, of the 99th Regt., in his 21st year.
ENDICOTT—On the 19th Aug., on board the ship Mandarin, off Anjer (three hours before the loss of said vessel, Henry C. Endicott, aged 43, of the firm of Messrs. Thos. Hunt and Co., Hong Kong.
HONGILL—On the 12th Sept., at Hong Kong, George Hongill, Private H.M.'s 99th Regt., from wounds received in Taipingshan.
IRWIN—On the 4th Sept., at the Civil Hospital, Hong Kong, George Irwin, destitut seaman.
KRAWSE—On the 10th Sept., at Pootung, Shanghai, Herman Krawse, formerly of Antwerpen, aged 45.
KETTLE—On the 16th Sept., at Shanghai, of congestion of the brain, Edwin R. Kettle, of the Ningpo Consulate.
LAMB—On the 30th August, at Bangkok, of dysentery, at Dr. Campbell's Hospital, James Lamb, of Bristol, ship carpenter, aged 29 years.
MARTIN—MARTIN.—On the 6th Sept., at Fuhchau, Lucius Allen, younger son of the Rev. C. R. Martin, aged 1 year and 9 months. At the same place, and at 2.30 P.M. of the same day, the Rev. Carlos R. Martin, of the American Methodist Episcopal Mission, aged 30.
M'SWAIN—On the 13th Sept., at Hong Kong, John M'Swain, seaman, from wound received in Taipingshan.
NORONHA—On the 23rd Sept., at Victoria, Hong Kong, Jose Noronha, assistant at the Oriental Bank. Much regretted by all his countrymen.
ROBB—On the 2nd Sept., at Yokohama, Mr. George Robb, formerly chief engineer P. and O. S. N. Co., aged 31.
RAMSDEN—On the 12th Sept., at Hong Kong, Charles Ramsden, seaman, from wound received in Taipingsham.
STARCK—On the 10th Sept., at Hong Kong, Capt. P. A. Starck, late capt. of the Swedish barque Theodore Dill.
WALSH—On the 2nd Sept., at Hanyang, — Walsh, second master of H.M.'s gunboat Hardy.
WULF—On the 10th Sept., at Hong Kong, Johanna, wife of Capt. Wulf, Siamese barque Orestes, aged 24.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON.—The holders of Congous are firm, and buyers have conceded to their demands to some extent. Two more chops of Oonahms have come forward during the fortnight. A small business only has been done in Canton Congous. Scented Orange Pekoes have remained in tolerable request, the finest having advanced. Scented Capers are in fair request, and have advanced a little. In Canton Greens the business has been small. The transactions of the fortnight are reported as under:—Congous, 5 chops fair to fine Oonahms and Oopacks at tls. 24¾ to 31¼; 3,000 boxes and 1,000 half-chests Canton Congous at 19 to 25 tls. for common to medium. Scented Orange Pekoes, 4,000 boxes at 19 to 36½ taels for common to very fine. Scented Caper, 7,000

Digitized by Google

boxes at 18 to 27 taels for good common to pretty fine. Canton Greens, 1,000 boxes at 20 taels for fine. The stock on the market is thus given:—Congous, 3 chops country and 200 half-chests. Canton: Soochong, 500 half-chests; Oolong, 2,000 half-chests; Scented Teas, 20,000 boxes; Canton Greens, 15,000 boxes Gunpowder, and 1,500 half-chests Young Hyson.

FOOCHOW.—A large business has been done in Congou during the last fortnight. The price of common has been maintained, owing to a demand for Australia; the better sorts have fallen one tael, owing to unfavourable advices from London. Other descriptions remain as last quoted. The settlements of the fortnight are reported as under. Congous: 22,869 chests 2,662 half-chests, and 410 boxes, at 6¼ to 14¼ tls. for dust and broken leaf.; 13 to 17 for common to good common; 17 to 22¼ for flav'ry to good flav'ry, and 24½ to 25½ for second-class Kaisow. Souchong: 1,960 chests at 20⅛ to 29 tls. for common to good. Pekoe: 485 chests at 21½ to 28½ tls. for common to fair, and 44 for extra fine. Scented Teas: 2,809 boxes at 24½ to 31 tls. for medium kinds.

SHANGHAI.—Black: Immediately after the departure of last mail holders showed more anxiety to realise, and a decline from two to three taels on previous rates had to be submitted to before buyers would come forward, at these prices a large business has been transacted, and 43 chops are reported as settled during the fortnight. The principal portion of these are second and third crop Oopacks at from 25½ taels to 29 taels, which show three taels decline on last mail's quotations; for Oonahams the prices paid have been irregular. Some settlements showing a reduction of two taels, whilst others have been made at previous rates. Our stock is now considerably reduced, and holders, notwithstanding the advance in exchange, are firmer in their demands. Settlements on the market: 43 chops, or 18,194 chests Oopacks, Oonahms, Ningchows, Hohows, and Flowery Pekoe. Reshipped on owners' account: 37 chops, or 18,308 chests, do., do.; together, 80 chops, or 30,502 chests; making total for the season to date, 247,857 chests. Stock waiting shipment and for resale: 46 chops, or 20,010 chests. We quote second and third crop Oopacks, 25½ to 29 tls.; Ningchows, 25 to 32 tls.; Oonahms, 20 to 26 tls.; Hohows, 18 to 22 tls. Green: Little has been doing during the past fortnight, one chop of Fychow at 37 tls., four chops of Pingsuey at from 37¾ to 40 tls., and two chops of Shanghai-packed at 36 to 40 tls. making up the whole settlements reported. No buyers have at present come forward for the American market. Teamen are very anxious to realise, and Shanghai-packed teas could be bought at a considerable reduction. No country teas have at present come forward from Kiukiang.

KIUKIANG.—Green Teas: About 6,000 half-chests had arrived and a large quantity was known to be close at hand, but owing to the excessive demands of teamen no settlements had been made. Two chops of fine Moyune, however, were reported to have been contracted for at 38 tls. (equivalent to 45 tls. here), and two small parcels of local packed tea had been taken at 32 and 33 tls. At these prices there was likely to be only few buyers, and as money is unusually scarce much lower rates would probably be accepted. Black Teas: Six chops of Ningchow had been settled at previous rates. Stock: 9 chops of Ningchow, and 4 of Hohow.

HANKOW.—The accounts received of the home markets and the continual fluctuations of exchange in Shanghai have restricted business here during the past fortnight. The teamen, though firm, show more readiness to meet the exporters' prices, and rates may be called rather lower. Settlements, only 38 chops (including 8 contracts and 11 sent to Shanghai) making the total for the season 500 chops; leaving a stock on the market of about 55 chops mainly 3rd crops.

YOKOHAMA.—Settlements continue to be made to a moderate extent, but on the whole we do not think the business has been quite up to that previously reported, and receipts having been pretty fair the stocks have slightly increased. The demand seems to be still principally for the higher sorts, and some extreme prices have been admitted for this grade, while the Medium coming forward more than usually mixed in leaf, the teamen for these must submit to reduction.

RAW SILK.—SHANGHAI.—Early in the fortnight the dealers continuing firm at last mail's quotations, transactions were materially limited, but with the very considerable rise in the rate of exchange, they have lately become more willing sellers. The bulk of the settlements, estimated at 2,000 bales, have been made during the past few days at prices showing a decline of tls. 20 to 30 per picul, and the market closes very weak. The arrivals from the interior have been on a par with the sales, so that the stock is without alteration. The latest advices from Japan announcing a successful attack on the Forts at the entrance to the Inland Sea, report the non-arrival of supplies of Silk at Yokohama, and estimate the stock at Yedo to be about 1,500 piculs. Next advices are waited for with considerable anxiety, and much interest is felt as to whether the late success to the expedition will ultimately cause the officials to allow the Silk to be forwarded to the Export market. The settlements of the fortnight amount to 2,000 bales against 3,670 corresponding fortnight last year and 2,700 the year before. The total settlements of the season to date amount to 12,500 bales, against 13,460 same period last season and 31,700 the season before. The present unsold stock is 7,000 bales, against 13,500 same time last season and 10,000 the season before. The following are the latest quotations:—Tsatlees, No. 1 chops, taels 465 to 475 per picul.

DRUGS, &c.—Cassia Lignea: Sales 1,300 piculs at $15¼, stock 150 piculs. Cassia Buds: No sales, quotations $54, stock 40 piculs. Cassia Oil: Sales 2 piculs at $206, stock 60 piculs. Star Anniseed: Sales 100 piculs at $18.20, stock 300 piculs. Anise Oil: Sales 17 piculs at $150, stock 30 piculs. Galangal: No sales, quotations, $2.10, stock 500 piculs. Rhubarb: Stock 30 piculs; inferior, no sales. Vermilion: $35 per 50 catty box. Camphor: Stock on hand about 900 piculs, still held for $19 per picul packed, which purchasers are not willing to pay. No further supplies have arrived.

RAW COTTON.

HONG KONG.—The excitement has much abated, owing to the unfavourable report on the Liverpool cotton market received by the London mail of 10th August. Exporters have, in consequence, become cautious buyers, and are somewhat influenced in their calculations by the rising exchange and the anticipation of large and early supplies of the new crop. The sales of the fortnight are reported at 3,000 bales only, at $32 to $33 for old Shanghai; $33½ for old Ningpo; and $37 for old Japan, which rates exhibit a decline of $1 to $1½. The stock is estimated at 10,000 bales.

NINGPO.—Holders are asking $35 for best new Yo-Yau quality No. 2 (per bale of 118 to 120 catties). There are no buyers at such an extreme figure. About 2,000 bales are now ready for shipment.

SHANGHAI.—The demand continues active and prices tend up. The supply of old is finished. The new crop arrives in driblets, and is eagerly picked up. In this manner nearly 4,000 bales have been settled during the fortnight at tls. 20.5.0 to 21 per picul, at which rates contracts have also been made to the extent of 35,000 bales, holders being firm.

YOKOHAMA.—The more favourable advices brought forward by that opportunity induced more purchasers to offer, and prices stiffened on a scant market, which may at this moment be reported as with an upward tendency, but with stocks completely exhausted. The new Season's may be expected shortly to arrive, say in about 5 or 6 weeks. The quotation is 28.25 to 29.50 dols.

CHINA IMPORTS.

COTTON YARN.—There has not been any native demand for this article during the past fortnight, and the only sales effected to the dealers consist of 51 bales of damaged Twist, which have been placed by public auction. A speculative foreign demand which sprung up during the early part of the fortnight has led, however, to considerable settlements of Nos. 16 to 24, the price of which must be quoted somewhat easier than under the date of last report. The sales effected amount to 690 bales. Grey Shirtings: Prices of these goods remain tolerably firm at the quotations given under date of last Circular, and the business of the fortnight is estimated at 10,800 pieces taken by the Chinese, and 7,500 purchased on foreign account. White Shirtings: Have also been in moderate request at previous rates, and settlements are put at 4,500 pieces. T-Cloths: There is not any improvement noticeable in the value of this quality of goods, which meet with but little attention, and the transactions of the fortnight are confined to sales of 2,850 pieces, and 3,100 pieces sea-damaged Cloths sold by public auction. American Drills: There are not any sales of these goods to report. White Spotted Shirtings, Dyed do., Brocades, White and Coloured: A small sale, amounting to 250 pieces of White Spotted Shirtings, is reported, and this, with the settlement of 500 pieces of Coloured Brocades, constitutes the business transacted in these goods during the fortnight. Chintzes: 700 pieces have been purchased by the Chinese dealers, and 1,500 pieces have been taken by foreign buyers during the fortnight. Handkerchiefs: 2,000 dozens have been sold since the date of last report.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: A fair demand has existed in this market for these fabrics since the date of last circular, and the settlements effected of Spanish Stripes have been upon a larger scale than for some months past, amounting to about 2,200 pieces. Prices, however, continue extremely low, and no immediate improvement in this respect is anticipated; of other kinds about 400 pieces have found buyers. Long Ells continue to meet with good inquiry, and have been purchased to a large extent during the fortnight at about the quotations previously current; the sales effected are estimated at 2,400 pieces taken by the dealers, and 1,000 pieces purchased by a foreign firm. Camlets continue in moderate demand, and the settlements effected since the date of last circular amount to 1,500 pieces. Lastings: Some 700 pieces of these goods are reported as sold during the fortnight. Blankets: The sales of blankets amount to 250 pairs, in addition to which 450 pairs of damaged goods have been sold by public auction.

METALS.—Iron, Flat, &c.: The value of nail rod has improved about 5 to 10 cents per picul; other kinds remain without change, and the total sales are estimated at 2,200 piculs. Lead shows no improvement in value; the sales in this market amount to 1,800 piculs, and in Canton 500 piculs have changed hands. Tin: 1,080 slabs sold. Tin Plates have found purchasers to the extent of 500 boxes, in addition to which 250 boxes (damaged) have been moved off by auction.

EXCHANGES ON LONDON.

At FOO-CHOW.—For London: Cœur de Lion, Lord Raglan, Gauntlet, Rajah of Cochin, West Derby, Ellenborough, Harkaway For Liverpool: Verbena. For New York: Endeavour, Ravensworth.

At AMOY.—For New York (expected from Hong Kong): Salacia.

At HONG KONG and CANTON.—For London: Prince Alfred, England. For Liverpool: Melbrek, Samarang, Mount Stuart, Elphinstone. For New York: N. B. Palmer.

At MANILA.—For Liverpool: Olano. For New York: Rattler.

At SINGAPORE.—For London: St. Oswin, Warren Hastings. For Liverpool: Moneta, Simoon. For Falmouth: Deutschland, Juno.

At PENANG.—For London: Isabella, Wellington.

FREIGHTS AND CHARTERS.

JAPAN.—To London: Cotton and tea, £4, and silk, £5 per ton.

SHANGHAI.—The vessels on the berth for London and Liverpool are numerous. The rates at which they are loading vary from £3 to £3. 10s. per ton.

FOOCHOW.—To London: £3 to £3. 10s.

HONG KONG.—The following are the principal charters from Geo. Holmes' circular, which will show the rates business has been done at:—Prince Alfred (503), on berth for London, at £3. 10s.; Melbreck (870), on berth for Liverpool, at £3; Sydney Eggers, Foochow to London, at £3; Corea (581), Foochow to New York, £3—7s. 6d. extra if to Quebec or London; Silvia (1,400), Shanghai to London or Liverpool, £3. N. B. Palmer on for New York at £2. 10s., gold. To Bangkok and back the rates are 40 to 45 cents.

MANILA.—The Olano has been fixed for Liverpool at £4. 10s. for unclayed sugar and £4. 15s. for hemp. The C. S. Lemon loads for above port at £3. 5s. for clayed, £3. 10s. unclayed sugar, and £4. 10s. per ton for hemp.

SINGAPORE.—Coast and homeward freights are declining in consequence of numerous arrivals seeking employment. The Deutschland (1,000 tons) takes the Champion's cargo of rice to United Kingdom or Continent at £3. 10s. per ton, and the St. Oswin (347 tons), for London, £2. 15s. to £3. 15s.

PENANG.—For London: Rates of freight continue at £3 per ton for dead weight, £3. 10s. light freight, £4 measurement, and 3¾d. per gallon rum.

CASUALTIES.

FOOCHOW.

The British barque Cassiterides left Foochow, bound to New York, on the 29th Aug.; but encountering a very severe typhoon off the Macclesfield Bank on the 7th Sept., in which she sustained considerable damage, she has been compelled to put into Hong Kong for repairs.

AMOY.

On 7th Sept. the Danish brig Poul, Capt. Jessen, from Hong Kong to Shanghai, was totally lost on some rocks two or three miles to the south of Amoy. Crew saved, who arrived at Amoy overland in a very destitute condition, having been stripped of every particle of clothing and subjected to ill-usage by the natives, who then suffered them to depart. The merchants, with their usual liberality, have subscribed a good sum on behalf of the sufferers.

HONG KONG.

The following refers to the loss of the British barque Gharra, Capt. Olsen, bound from Bangkok to Hong Kong. On the 6th Sept. the vessel met with a severe typhoon, and the captain was obliged to cut away the masts for the safety of the ship. At the same time, however, she sprung a leak, and after working the pumps for nearly four days and nights she began to sink, having 7½ feet of water in the hold. The captain and crew were obliged to abandon her on the 10th, and were picked up by Captain Jewett, of the British ship Golden West, at a distance of about 200 miles from Hong Kong, and brought on to Hong Kong.

THE EXPEDITION TO BHOOTAN.

(FROM A CORRESPONDENT.)

An expedition is about to start for Bhootan, on the North-Eastern Frontier, near Nepaul, with the view of annexing the portion of it which is between the British Frontier and the Himalayas, in consequence of the continued incursions into British territory that the inhabitants of this portion of Bhootan have been from year to year making, and also with the view of punishing them for their treatment of the Honourable Ashley Eden last year, when he went in the capacity of a British envoy. The expedition will be composed entirely of native troops; owing to the difficulty of moving and feeding Europeans in the country which will be the scene of operations. The following is an authentic detail of the force about to be despatched to annex the Bhootan *dooars*, as the mountain land in question is called. It will consist of two brigades, the one operating on the right under Brigadier-General Mulcaster, the other one on the left under Brigadier-General Dunsford. The brigades will consist of two columns, according to the following distribution:—

Right column, forming at Gowhatty.
- Three mountain guns of the Eurasian (half caste) company of artillery.
- Three squadrons of the 7th Bengal Cavalry.
- The 43rd Bengal Native Infantry.
- One company of Sebundy Sappers and Miners.
- Three companies of the 20th Native Infantry to occupy Gowhatty in support.

Right Centre Column at Goalpara:—
- Three mountain train guns of the Eurasian Company of Artillery.
- One squadron of the 7th Bengal Cavalry.
- Two squadrons of 14th Bengal Cavalry.
- One company of Sebundy Sappers and Miners.
- A wing of the 44th Bengal Native Infantry.
- A wing of the 12th ditto, ditto.
- Two Companies of 12th Native Infantry to remain in support at Goalpara.

The above is General Mulcaster's Brigade.

The following is General Dunsford's:—
- Left Centre Column at Cooch Behar.
- Three Armstrong mountain train guns of the Punjaub Regular Force.
- Two eight-inch mortars.
- One Company of Sappers and Miners, with three pontoon rafts for crossing rivers.
- The 2nd Regiment of Ghoorkas.

Left Column at Julpigoree:—
- Two Armstrong mountain train guns.
- Two eight-inch mortars.
- One wing of Sappers and Miners.
- A wing of the 11th Regiment Native Infantry.
- A wing of the 18th Regiment, ditto.
- The 5th Regiment of Bengal Cavalry.

Darjeeling is the present frontier military station nearest the seat of operations. Three companies of Her Majesty's 48th Regiment are now there, and they are ordered to be reinforcep by three companies of the 80th Foot from Jhansi, which will give six companies of Europeans within a moderate distance of the operations. There is a strong opinion, however, current here that it is a dangerous experiment sending a force composed only of natives to contend with the Hill tribes; as should they meet with any check they are not so likely readily to recover it as if they were supported by Europeans. The expedition was to have started at once, but it has been delayed until the middle of November.

Sir John Lawrence returns to Calcutta on the 30th of the present month (October). There are doubts that he is likely to be so highly appreciated as a Governor-General as was first anticipated, and there seems to be a growing opinion that the "Lord Sahib," as the Viceroy of India is called, should be a real lord—in other words, one of the hereditary aristocracy, on whom vice-regal honours would sit naturally. Sir John, whatever his administrative capacities may be (and they are said to be a good deal exaggerated), is not intended by nature to represent the Empress of India and Queen of England. Amongst other defects for the office, extreme parsimony is one that has brought him under the censorship of the press and the lash of private tongues. He has been unfortunate, also, in his choice of a private secretary—his brother-in-law, Dr. Hathaway, giving anything but satisfaction in that capacity, and apparently, least of all, to the members of his own profession, who are somewhat clamorous in their denunciation of him.

The London & China Telegraph.

LONDON, WEDNESDAY, NOV. 9, 1864.

THE OPENING OF THE INLAND SEA.

THE journals and letters received this morning fully confirm the information communicated by electric telegraph some days ago, that the combined fleets of the European Powers had bombarded the castles and batteries by which CHOSHIU, Prince of Nangato, fancied he could bar the passage of the Straits of Simonoseki, and had landed and removed all his cannon, so that his long-vaunted power is at once and for ever disposed of. But the detailed accounts are of a much more gratifying nature than the telegrams gave us reason to hope for. The task of humbling this obstinate Daimio is thoroughly finished. He has signed a convention binding himself to pay any indemnity, and to submit to any conditions the so lately despised "foreigners" may choose to impose. But that which is the most satisfactory feature of the various accounts is that it is clear CHOSHIU stands alone. The batteries opposite his were silent, and thus the Allied fleets had only those on the Northern side to contend with. The Prince of KOKARA, who rules on the Southern coast, refused to have anything to do with the mad schemes of his neighbour on the other sde of the channel. The French have a proverb of deep meaning, to the effect that nothing is so irresistible as success. We might have been inclined to express doubts as to the prudence of the policy that has been adopted, and to ask whether our intercourse with Japan is to be annually marked by one of those "little wars" which our highest military authority declared to be equally harassing to and unworthy of England. In the present instance, it is clear that what has occurred has been done by the concert of all the European Powers, and also—no slight point, perhaps—with the co-operation of the United States. That fact alone might well disarm censure. But the events we are likewise enabled to lay before the reader in our present number create a suspicion that this combined action of the Powers was based on motives and considerations of which we can but guess the urgency and value. CHOSHIU is revealed to us as actually—almost at the very moment of the affair in the Straits—engaged in a most murderous rebellion against his Sovereigns—for so we must rank both the TYCOON and the MIKADO. We find him sending a large army, reckoned by thousands, accompanied by artillery, to seize on the person of the most venerated of the two, the MIKADO, or Spiritual Sovereign. Under such circumstances the Allies would be entitled to consider the TYCOON absolved from any blame that he could do nothing to carry into execution the convention so recently agreed on in Paris. The quicker way, and the way altogether most palatable to everybody but CHOSHIU himself, was for the Allies to take this arch-rebel and general disturber of the peace into their own hands. This has been done with the success that might have been expected, with a cordial good understanding not only between the Allies, but, as we trust, with the TYCOON. We shall look to find the matter settled amidst general rejoicing; the person not least jubilant being Admiral KUPER, who has, by his services in Japan, well deserved to gain laurels that will pass unchallenged either by the politician r the humanitarian.

RAJAH OF JOHORE.

BY the last mail from Singapore intelligence reached us of the extraordinary proceedings of a Malay potentate, who has but recently appeared among the native princes of the Eastern Archipelago as "the free ruler of a free state,"—as he is styled by our contemporary the *Straits Times*. This is the personage well known to all residents in Singapore as the TUMONGONG of Johore, whose father lived in bankrupt obscurity on that island for many years, an humble dependent of the British authorities. He suddenly leaped into wealth and importance when gutta percha became a valuable article of export, as the trees from whence it is extracted grew abundantly on his territory, and thereby reclaimed it from an unproductive wilderness to a profitable domain. With the acquisition of wealth through this source he has assumed a power and position that does not belong to him, and which threatens seriously to interfere with the legitimate trade of Singapore, if it does not undermine British authority among the Chinese and Malay population of that settlement. The present Tumongong has been brought prominently before the public on more than one occasion since his residence at Johore. He was one of the belligerent parties at Pahang; his gunboats blockaded the ports of that state, without previous notification; it was his exchequer that stood the brunt of the war, and it was his army which was finally expelled from that territory. The late BANDAHERAH of Pahang was a mere puppet in his hands; and as he had, with the connivance of the Straits Settlements' authorities and the Bengal Government, rid himself of his allegiance to the SULTAN of JOHORE, he has now assumed the title of RAJAH of JOHORE, declined the allowance which he was but too glad to accept at the hands of the British in less prosperous times, and styles himself an independent potentate.

Whether the Straits authorities have pursued a wise policy in allowing this ambitious and cunning Malay chief to usurp such a position will be best shown by the following statement of facts derived from the most authentic sources:—In February of the present year a boat manned by Chinese was plundered off Tanjong Surat by some Malays, and the crew, with the exception of one man, were murdered. About a month afterwards four natives of Singapore, British subjects, named MASIM, AHMED, KAHA, and POLOH, were arrested by the police, and charged with having committed this crime of piracy and murder. When they were arraigned before the Police Magistrate at Singapore MASIM turned "Queen's evidence," and acknowledged himself an accomplice, charging his fellow-prisoners with being the principals in the crime. As the deed was committed off the territory of Johore, all four were sent to be tried there before the native authorities, the Commissioner of Police at Singapore attending the trial to see that British justice was satisfied. From the evidence that transpired, it appears that MASIM recanted all he had previously stated, and acknowledged that he had been bribed by two men named SAMAN and LAILANG to prefer the charge against the other three; also, that he and these two men made the accusation through spite and malice. Notwithstanding this recantation, and that no further evidence, or even a shadow of evidence, was brought against these innocent men to implicate them in the murderous deed, they were placed in close confinement, heavily ironed, and were in prison at Johore when the last accounts left Singapore, on the 19th Sept.—an imprisonment of *seven months*. In June last their relatives petitioned the Recorder of Singapore to obtain their release from the merciless clutches of the TUMONGONG and his myrmidons, who doubtless are squeezing all the money they can out of the unfortunate men and their friends. That functionary referred the petitioners to the Governor, Colonel CAVENAGH. In reply to the petition, his Excellency was pleased to declare that he "was satisfied that "due inquiry would be made into the charge, and therefore "declined interfering on their behalf." Thus four British subjects, against whom no evidence of criminality exists, are imprisoned for an indefinite period, in a prison within hail of the authorities of Singapore—as anyone will find on consulting a map of that island, that it is separated from Johore only by a narrow strait—in fact, a kind of river—from *one* to *two* miles in width, and not "three to five," as represented in the *Straits Times*.

Another flagrant wrong perpetrated by this purse-proud petty despot and his corrupt underlings touches our commercial relations with Johore. We have before us the translation of a petition forwarded to us from thence by the Chinese planters there, who conduct the export of gambier, pepper, and other

Digitized by Google

articles subject to duty. In this petition these industrious people complain that the TUMONGONG, *alias* the RAJAH, through his agent, TAN HIOH NIE, is using coercive measures in order to force them to sell their produce to certain monopolisers of native trade in that territory. It is well known that these gambier and pepper plantations are maintained chiefly by advances obtained from the Chinese merchants at Singapore—whose cause, we are glad to learn, has been espoused by the Chamber of Commerce there, which has requested the Governor to interfere. Surely in this case his Excellency will step forward and protect that free trade principle which the eminent and sagacious founder of the Settlement, Sir STAMFORD RAFFLES, introduced at its birth, long before COBDEN and BRIGHT had agitated the question, and but for which Singapore, instead of being the leading and most vigorous settlement of the Straits, would have been dragging on a feeble existence under the nightmare of protection. If, however, we are to judge of Colonel CAVENAGH'S neglect of the case already mentioned, as an indication of his high appreciation of justice in Johore, we should doubt the success of any application on this matter, since surely the "independent potentate," who may imprison British subjects without evidence, may monopolise, or cause to be monolised, the products of his territory.

These are important questions affecting the administration of justice and the *prestige* of British authority over native subjects in the Straits settlements. They demand the attention of the home Government, as it is just possible that some serious complication may arise ere long from the acts and increasing power of this self-styled Rajah. We are informed that an armed steamer named the *Johore* was shortly expected at Singapore, the property of this ambitious chief. This vessel is a screw ram, ostensibly intended for the suppression of piracy. There are strong reasons, however, for concluding that she is to be employed in the furtherance of his designs towards intimidating his neighbours. To have permitted such an increase of power, and to have acknowledged his usurped position shows a laxity of British relations, and a questionable policy on the part of the Straits authorities that we cannot understand, fraught as it is with danger, not only to the trade of Singapore, but to the lives and liberties of the natives who have so long lived in security under the protection of the British flag. We trust that the Chamber of Commerce at that port will not allow this important subject to drop until satisfactory results are obtained, and the late pensioner of English bounty is taught that he is not quite so independent or so puissant a potentate as he imagines himself, or fain would be.

OUR DIFFICULTIES IN JAPAN.

(COMMUNICATED.)

"When doctors differ, who shall decide?" The question is a knotty one, more especially if the patient be intractable, as patients of the class we are about to allude to are wont to be. No sooner does one of our Eastern friends show signs of unwillingness (to fulfil his treaty obligations) than a host of advisers spring up—each convinced that his own mode of treatment can alone work a cure. As a general rule, however, they may be divided into two principal classes; first, those who without troubling themselves to inquire very deeply into the symptoms, unhesitatingly pronounce the patient to be in a plethoric condition, and to require bleeding; and who are ready forthwith to despatch a few thousand men duly provided with that most effective of surgical instruments, the bayonet, to perform the depletive operation. The other class of advisers are equally prompt in their decision. But they take quite a different view of the case, and persistently ignoring symptoms of an unpleasant and even troublesome degree of vigour, frequently evinced by such patients, declare them to be in the last stage of exhaustion, and require us to pet and pamper them, to put up with all their ill-temper and perversity, and will not hear of administering even the most homœopathic dose (of lead)—no, not a single globule! Such are the differences of opinion that arise whenever intelligence reaches us of one of the ever-recurring misunderstandings between our representatives in China and Japan and the Governments to which they are accredited. Of three courses, the middle one—though often the most desirable, is generally the most difficult to steer. Few more arduous tasks could be imposed upon a diplomatic agent than that of preserving friendly—or at all events pacific—relations with an Oriental Government, without either assuming an attitude which would imply a standing threat of coercion, on the one hand, or exhibiting too great a degree of forbearance, which would certainly be construed into submission, and expose him to insult and humiliation, on the other.

Our policy in Japan has so long fluctuated between these two extremes that we have no clue to indicate what course of events may be expected to follow the late successful operations at Simonoseki. As far as the trucculent Prince of Nagato is concerned, we may reasonably suppose that the justly-merited retribution wrought upon him by the allied forces will place it out of his power to be troublesome again—at all events for the present. But how do we stand with the Tycoon's Government? Shall we remain on our old insecure footing in Japan, and pursue the very *uneven* tenor of our way, as heretofore? Or will our representative make the present crisis an opportunity for demanding a thorough fulfilment of the provisions of the treaty or a complete revision of it? We have yet to learn how the intelligence of our victory at Simonoseki will be received at Yedo. The Gorogio deny that they have any control or influence over the Prince. *He* affirms that in blockading the Straits he acted under orders from the Tycoon. Yet we know that a few months ago he fired on and sunk the *Sir Charles Forbes*, a steamer well known to be the property of the Government.

On looking over the treaty in its present form, it is quite startling even to the initiated—to those who have had practical experience of its working—to find how many of the most important provisions are virtually nullified by ingenious evasions, and by the passive resistance of the Japansse Government and its myrmidons. We will instance a few:—Article V. stipulates that natives guilty of offences against British subjects shall be punished by their own authorities, and *vice versa*. Art. VI. settles, in a most satisfactory manner (on paper), the mode of adjusting disputes between British subjects and natives. And Art. VII. provides for recovery of debts due either by British subjects to Japanese, or *vice versa*. Now, when a British subject commits an offence against a native, and is charged with it before his Consul, he has no escape; the legal punishment is duly inflicted, in some cases with even unjustifiable rigour—as witness the oft-quoted case of Moss, at Yokohama. Again, when a Japanese brings a complaint against a British subject, the Consul fairly investigates it, and gives an equitable decision, to the best of his ability and judgment; and should a Japanese sue a British subject for debt, the debtor is compelled to pay; if without means, his property may be taken to satisfy it, and even his person imprisoned. But not so on the other side. The native criminal so often escapes unpunished that for small offences, though of constant occurrence, foreigners seldom take the trouble to prosecute; any complaint made by a foreigner against a Japanese is invariably decided by the native authorities in favour of their own subject; and a debtor, when his creditor is a foreigner, is allowed to go scot free; neither his goods nor his person being liable, he may defy his victim without even going through a form of white-washing.

Art. VIII. says "The Japanese Government will place no restriction on the lawful employment of Japanese by British subjects." And yet, at Nagasaki, every servant in the employ of a foreigner has to be registered at a Government-office, and pay a tax on the amount of wages earned by him.

Art. X. provides that foreign coin shall be current in Japan, the value being determined by weight. On this point it is useless to enlarge in the present article; volumes would hardly suffice to record the losses and vexations entailed on foreign merchants by "currency" difficulties—which have at times amounted almost to a temporary suspension of trade. We have only space at present to advert to one more instance of habitual disregard on the part of the Japanese to one of the most important provisions of the treaty—viz., Art. XIV., which stipulates that "at each of the open ports British merchants may import and export, directly or indirectly, any lawful merchandise, paying the duties prescribed by treaty. And, with the exception of munitions of war, which shall be sold to the Japanese Government alone, *they may freely buy from, and sell to Japanese, any article they may have for sale; and Japanese may buy and use the same.*" Nothing can be more satisfactory than this, or more clearly and explicitly framed; and yet, in the present state of affairs, it is virtually null and void. For whenever it suits the caprice or interest of the native authorities at either port to put a stop to the importation of any particular article of merchandise, they do not for a moment scruple to impose a heavy duty on it, over and above the duty already paid, according to treaty, by the importer; and this extra tax

Digitized by Google

is extorted from the native purchaser of the goods by the well-known process of "squeezing," in a manner over which the foreign Consuls can, of course, have no control. And, in like manner, when the whim seizes them to put a stop to the exportation of any article of native produce, they issue a notification prohibiting Japanese from selling the same to foreigners; punishing any who offend against this arbitrary law with the utmost rigour. When foreign merchants complain of the injustice of these restrictions, they say: "We are not interfering with *you*. You are quite at liberty to buy this article of produce, or sell that description of manufacture—do so, *if you can*." Thus opposing to all remonstrances a system of passive resistance which the utmost energy of our Consular officers, of whom we have some very able ones in Japan, fails to overcome.

These instances will convey some idea of the difficulties that present themselves when such an important question as the revision of the treaty comes to be considered, and these, it will be observed, concern only our commercial status in the country, and are quite apart from the intricacies and dilemmas that may be expected to arise out of the disorganised state of the internal politics of the empire.

(*To be continued.*)

THE NEWS FROM CHINA AND JAPAN.

(THE TIMES.)

BEFORE ARRIVAL OF THE TELEGRAMS PER FRENCH MAIL.

The disappearance of the Taiping power seems to have been so sudden and unexpected as to have startled even the Chinese themselves. The last intelligence which reached us was that the Taiping force was nominally besieged in Hoochow, but that they had succeeded in defeating the Franco-Chinese besiegers, who found themselves in a position of no little peril. The rebel force was large, Hoochow was strongly fortified, and M. D'Aiguebelle, who commanded the auxiliaries, was fully occupied in keeping his own. Later events appeared to strengthen rather than impair the force of the insurgents. Fugitives from Nanking joined them, and they became powerful enough to detatch and capture an Imperialist fleet of gunboats; when suddenly they evacuated the city they had proved themselves well able to defend. The besiegers were astonished as the people of Samaria when they found the Syrians had fled; but the good news proved true. The rebel army had gone all abroad, and only a small remnant were believed to be making their way south to the province of Kiang-si to join the lawless marauders who infest that region. Meanwhile the Brother of the Moon had with rare prescience published an edict in which he declared that after the taking of Nanking the rebels were like "broken tiles," and scattering them would be as easy as "splitting canes." He went on to order that two of the chiefs taken at Nanking, Chung-Wang and Kan-Wang, the latter a brother of the rebel Prince of Peace, should be sent to Peking, where it is understood they will meet with a fate which ought to disabuse us of some of our notions of the Chinese. We were wrong in thinking that this ingenious people had discovered everything and perfected nothing; they have at least carried the art of torture to a pitch undreamt of by the ruder Western intellects. Chung-Wang and Kan-Wang will be brushed with wire brushes till their flesh is gradually torn from their bodies and they die under the operation. We may hope that this is the last we shall hear of a war which has been chiefly remarkable for the barbarities practised by both armies. In wanton destruction of life and property the Imperialists have attempted to outvie the rebels, and if on the latter rests the responsibility of having commenced the insurrection, the corruption and misgovernment of the former were enough to justify any outbreak.

(JAPAN.)

But the news from Japan is even more important to Englishmen than the news from China. The extinction of the Taiping movement may be the first step to a restoration of order in the silk districts; but we shall have to wait for the mulberry-trees to grow again to realize the full benefit of the fact, while the hostilities which are about to commence or by this time have commenced in Japan may produce an effect on Mr. Gladstone's next Budget. It seems that the Prince of Nagato objects to the passage of foreign ships through the Straits of Simonoseki into the inland sea, and even fired a shot across the bows of the *Cormorant* when she proposed to enter. To punish the too daring Prince was a matter of course, and as far back as last July a fleet was about to sail for the Straits, when the Japanese Ambassadors who were here two years ago arrived home and reported the treaty they had made with the Emperor of the French, guaranteeing the opening of the sea within three months. On the news of this peaceful solution of the difficulty the expedition was stopped, but it was soon seen that the Japanese treatment of their Ambassadors was very different from the European. European Governments make it a rule to back up their representatives. Spain is going to war with Peru because an officious commander has seized the Chincha Islands, and we have been involved in a score of little affairs through the caprice of some conceited Governor or pedantic Ambassador. But the Japanese order things differently. The Gorogio and the Tycoon at once repudiated their Ambassadors; they had no authority to execute such a treaty, and the Government could not guarantee its fulfilment. To crown all, and by way of encouraging the others, the pleasant old gentleman whose urbane manners we all remember, as they went in and out among us two years ago, received permission to perform the *Hari-Kari*, and no doubt accepted the permission to despatch themselves with that wonderful resignation which is not the least of the Japanese marvels. Such a summary nullification of the last French treaty made it necessary to resume the expedition against Simonoseki, and the Christian Ambassadors, who, to do them justice, always hang together in Japan, soon provided a composite force which ought to be sufficient to reduce all opposition to silence. English, French, and Dutch ships of war are banded together, and, as the American ships are unluckily all engaged in the Atlantic waters, the American Minister, zealous for his country, chartered the merchant steamer *Takiang* to carry the United States' flag into action. Seventeen ships, manned with European and American seamen—the British contingent of eight ships consisting of the *Conqueror*, a line-of-battle ship of 78 guns, the *Euryalus*, 35, three frigates, and three corvettes armed with Armstrong guns—must, one would think, speedily blow the batteries of the Prince of Nagato to pieces, and the next mail from Japan will probably bring the news of a glorious victory won in the Straits of Simonoseki.

The issue of the expedition against the Prince of Nagato cannot be doubtful; but we may ask whether there is to be no limit to these disagreeable surprises. Are we to be always liable to the contingency of discovering that we have been at war two months without being aware of it? It is possible that this particular difficulty has been foreseen, by official people, but it is undeniable that the nation at large has not suspected during the holiday months of the vacation that an English fleet was busy in destroying the batteries of a Japanese Prince. There is very little glory to be obtained by such an expedition. It is understood that, according to the plan of attack, the Armstrong guns will first silence the batteries of the Prince of Nagato, and the Marines will afterwards land and finish the easy victory. And if there is little glory to be gained, it is quite certain that the commercial advantages we can possibly acquire are infinitely less than the mere cost of the expedition. We have got a footing at Kanagawa, and if we bide our time we shall soon show the Conservative feudatories of the Empire—what the democracy are already aware of—the benefits of foreign commerce. But whatever opinions may be held as to the glory of profit of fighting one after another the turbulent Princes of Japan, it cannot be denied that our manner of setting about the enterprise is unsatisfactory. Our policy is not directly determined by the responsible Ministers of the Crown, but by an obscure agent whose acts are always adopted even if they are very faintly approved. What has been done in Japan may deserve unbounded praise, but it cannot be doubted that our policy there ought to be the result of deliberate judgment, and that we should not suffer the possibility of our being betrayed by zealous diplomatists into positions from which we can neither advance nor recede with honour.

OPENING THE STRAITS OF SIMONOSEKI.

(ECONOMIST.)

The new expedition announced from the Far East is very provoking, but its character and objects seem a little misunderstood. Sir Rutherford Alcock, the very able and exceedingly prolix officer who represents Great Britain in Japan, has laid it down as a principle that unless the great vassals of the Empire are tamed, Europeans must quit Japan. The central authority has not sufficient power either to protect their lives or to maintain the freedom of trade stipulated in the European treaties. The only mode of taming them is to destroy the batteries erected by one or two of the most powerful, and he has accordingly recommended the punishment of those most contemptuous of treaty rights. This view has obviously been accepted by Her Majesty's Government and all the European Powers with interest in the East except the Russians, but including the Dutch, who alone thoroughly understand Japanese tactics. Among the offending Daimios no one is more obnoxious than the Prince of Nagato, and no one can make his dislike to foreigners felt in a more annoying way. Japan possesses among other geographical advantages what it suits foreigners to call the "Inland Sea," and geographers the Sea of Swoinrada. It is not really a lake, but simply the ocean channel which separates the vast island of Niphon from Sikoke and Kiusiu, and which is the nearest route between China and Eastern Japan. Owing, however, to the narrowing of the western entrance, the only entrance from China without a circuit of many hundreds of miles, the channel may be considered landlocked, and forms a vast natural lake, at least 350 miles long by about 40 broad, well sheltered, very deep, and in fact constituting a dock without parallel in in the world, Free entrance to this lake is entrance into the heart of the islands; and, moreover, a few miles beyond the head of the sea stands Miaco, capital of the religious Emperor, which, were ingress once free, would be almost as completely within our reach as Yedo now is. It is believed that were the inland sea once opened many of the difficulties which now harass Japanese policy would be removed, while the European trade would be indefinitely increased. The opening was therefore provided for by treaty, but the Prince of Nagato objects, and he has heavy batteries at Simonoseki commanding the narrow channel. These batteries recently fired on the *Cormorant*, and punishment would have been immediate but that the last batch of Japanese Ambassadors sent to Europe made concessions which seemed to remove the difficulty. On their return, however, they were directed to commit suicide, and Sir Rutherford Alcock resolved to wait no longer. Accordingly, a great combined fleet of seventeen war vessels, English, French, Dutch, and American, has been despatched to Simonoseki with orders to destroy the batteries, to land the 1,500 soldiers on board, and, we suspect, but do not know, to occupy the point for a time. If they succeed the inland sea will be open, as there is no other point narrow enough to make batteries efficient.

The expedition appears, therefore, to be a wiser one than is usual in these regions, the work being definite, the means very ample, and the object worthy of considerable expense. It is difficult to believe that the Prince of Nagato can defeat such a force, and not easy to see how, with free access to the inland sea, Japan can longer resist European influence. If it be ever just to establish that influence by arms, it is just when the Central Government has conceded our demands of its own will, and is secretly instigating its own vassals to resist its own decrees. The one objection to be raised is the old one, by whose consent are these very expensive, possibly beneficial, but certainly costly and bloody, expeditions being carried out? They are certainly not ordered by the nation, for the nation knew nothing about them until letters from China announced that fleet and troops were in motion. They were certainly not ordered by Parliament, for not a word was said on the subject during the session, though orders must have gone out in May at the very latest; or if Sir Rutherford Alcock is acting on his own responsibility, news of his intention mus

have been received before September. The whole design has been as secret as a conspiracy from everybody, except the offending Prince, who has been menaced for months, and the precedent seems to us a most dangerous one. Considerable latitude must, we are aware, be allowed to an officer in Sir R. Alcock's position, but if he is to arrange conjoint expeditions, implicating half the maritime Powers, to summon troops from China and India, to declare war on powerful nobles, and to carry out with the Imperial strength a policy of his own, unchecked save by unknown despatches from the Foreign-office, often sent too late to be of use, self-governme nt becomes a mere phrase. Suppose he thinks it advisable to conquer Kusiu. English Governors have resolved upon greater schemes than that before now, and we believe it was owing to the firmness of Lord Canning that a much greater scheme was not carried out in Southern China. Even as it is, no one knows the precise effect of the terrible blows we are delivering in Japan, the danger of exciting national retaliation, or the precise designs of the other European Powers who, divided at home, are in Asia acting with cordial unanimity. Earl Russell may justify the expedition completely to the country, but English money and lives ought not to be expended until the nation has signified its approval, at least, of the object of such expenditure.

THE REBELLION IN CHINA.

(MORNING POST.)

The Chinese rebellion is thought, in China at least, to be extinguished. This is perhaps the most satisfactory part of the chequered intelligence that the mail has brought us from Eastern Asia. The Emperor of China has distributed his rewards and punishments to friends and foes on a principle which reminds us of the saying that the gratitude of Royalty is repaid by a smile and its enmity by the gallows. His Imperial Majesty has rewarded his successful General Sangkolinsin with a present of several packages of tea and some cooling medicine. He has at the same time ordered the two principal leaders of the rebellion to be brought to Peking, where they are expected to undergo the penalty of being "brushed to death." It requires some periphrasis to properly describe the refinement of this torture; but it may be briefly stated as consisting in the application of wire brushes to the persons of the victims until the flesh is torn away, and nothing but the bones remain. The revolution, under this ordeal, is supposed to be punished, and the cause of Celestial legitimacy vindicated. Let it be hoped that this is really the end of the slaughter and massacre that have filled the pages of Chinese correspondence for many years past.

The apparently final discomfiture of the Taipings has come upon the Imperialists themselves, and upon our own mercantile colonies on the Chinese coast, with considerable surprise. It is not very long since there was some apprehension entertained whether the Taipings would not overthrow the Tartar dynasty and drive the Imperialists out of successive cities, until they at length reached Peking. The great city of Nanking was in their hands; and Shanghai was trembling at their approach. However, the Imperialists, with the aid they derived from European military skill, and especially at the hands of the French, captured Nanking; and there they revenged themselves with a fabulous massacre said to have involved one hundred thousand Taiping victims. The present mail brings us the further intelligence of the rebels having been driven out of Hoochow, which is looked upon in China as their last military standing-point. Nor does this place appear to have been surrendered until after they had endured hardships with a heroism commensurate only with their barbarity. They had pulled down houses for firewood; they had even raked up the coffins of the dead, and burned them for the same purpose; rice had come to an end; supplies were failing them; and their communications were at length completely cut off. Part, at any rate, of the garrison contrived to effect a retreat without beat of drum; and this consideration serves to import some doubt into the complete extinction of the rebellion. But, having encountered so many disasters; having been cowed by the nearly equal barbarity of the Imperialists themselves; and, having lost their principal leaders, it is hardly likely that what remains of this once formidable body will be able to regain its former organisation. In that case the rebels may probably be by degrees dispersed. That is certainly the most favourable anticipation; but it is one that appears to be so generally entertained by the European public and press in the Chinese cities open to our trade, that it is probably based upon clearer premises than we have at present adequate means of arriving at in this country.

The peculiarity of this extraordinary movement in the Chinese empire consisted in its combination of a religious with a political character. The Taipings set themselves up for religious reformers. Their object was entirely to upset the established religion of China, as well as the reigning dynasty. The religion they professed was an extraordinary compound. It was based apparently on certain doctrines of Christianity, which they contrived to mingle with the most debasing superstitions and grovelling obscenities, which they deduced either from other systems of theism they had met with in the east of Asia, or from their own imagination. Part, probably, came from the one source and part from the other. The fragments of the Christian religion which they contrived to pick up and distort are best explained, as a part of their creed, on the supposition that they represented the traces of former Christian missions sent by the different Churches into the interior of China at different periods. However, instead of loving their enemies, or even their neighbours, they learnt only the principle of exterminating both the one and the other. Why they ever derived support from any part of the Chinese population may perhaps be understood, even though their tyranny was incomparably worse than that of the Imperial Government. The Chinese administration was so corrupt and oppressive that there were many who instinctively caught up any alternative that offered to it, before they had had any opportunity of comparing the one tyranny with the other. In the meantime the corruption of all parties—both Taipings and Imperialists—was such that at last the original cause of the war grew forgotten. The Imperialist Generals and the Taiping Generals appeared to have arrived at an understanding with one another. Each was to be permitted to ravage certain provinces and districts; and, so long as neither interfered with the other, each army acted as a swarm of locusts upon the country. Both desolated the civil population, while neither did any injury to the other.

This state of things continued for a long time, and possibly it would have been so even to this day had it not been for the Anglo-French military expedition to Peking, which Lord Ellenborough somewhat hastily criticised as likely to subvert the throne of the Emperor of China, and to render the Taipings everywhere supreme. The Celestial Government, it is quite clear, learnt from that expedition a respect for European arms, and, to a certain extent, for European principles. They listened to European advice, and even accepted military and political assistance from us. From that date the military opposition of the Imperialists to the Taipings appears, for the first time, to have taken place in earnest. Had such a change occurred at an earlier period it is probable that the Chinese civil war would not have continued for so long a time. The last European campaign in China clearly produced a great effect upon the Government at Peking, and one which is already being felt in the farther provinces of the empire. We have since supported the Chinese dynasty, and we have endeavoured, not without considerable result, to reform its system. With that policy the suppression of the rebellion, if it has really happened, is to a great extent connected; and we hope that the confidence this event cannot fail to create will give a fresh impetus to European commerce.

THE ATTACK ON SIMONOSEKI.

(MANCHESTER EXAMINER.)

The object of our present war with Japan requires a few words of explanation. Our treaty with Japan gave us the right to navigate its inland waters, or the straits which are so described between the larger islands. Geographically, Japan may be regarded as the Great Britain of the Eastern Seas. It lies just off the great continent of the East, as the British Islands lie just off the great continent of the West. To the east of Japan stretches the unbroken expanse of the Pacific Ocean, corresponding to the Atlantic which washes our shores. Japan consists of four larger islands and an almost countless number of smaller ones. Of the former, by far the largest is the island of Niphon, some seven hundred miles in length, which lies long and straggling, right over the northern coast of China. Yesso, another of these larger islands, known to us chiefly from its seaport Hakodadi, lies to the north of Niphon, from which it is separated by the narrow straits of Sangar. The scene of the recent action lies at the other end of the island of Niphon, nearly seven hundred miles southward, where the other two islands—of the four just named—are so placed as almost to inclose between them and Niphon a strait varying in breadth from two to forty miles. These straits are the "inland sea" referred to in the despatches. They are no more an inland sea than St. George's Channel, save that they are narrower, and almost blocked up at both ends. The western entrance is only two miles wide, and as it lies nearest to Shanghai the free passage of this narrow strait is essential to our navigation of the interior waters. The Japanese Government conceded the right, but the Prince of Nagato, whose province forms one side of the strait, saw fit to refuse his permission. His batteries commanded the passage, and as he refused to give way we took the liberty of knocking them down.

Measured by European rules, this must be admitted to be an extraordinary proceeding. Treaties are made with the supreme authority of a State, with whom alone rests the duty of giving them effect. In Japan, however, the central authority is so weak, that it is of little use to enter into negotiations with it. The political structure of the islands bears a close resemblance to the feudal system. The territory is divided into great military holdings, each under the rule of an hereditary chief, who, while nominally subject to the Siogun, who resides at Yedo, does pretty much as he likes. In England when the great barons of the north were in the plentitude of their power, it would have been of little use for the king to have bestowed upon a foreign nation treaty rights beyond the Humber. The feudal barons would have been likely enough to clap the interlopers into a dungeon or stretch them upon a gallows, and appeal to their swords when the King appealed to the treaty. This is very much the case with Japan. The feudal chieftains resolve to have a voice in the matter, and the Prince of Nagato may, no doubt, be taken as a sample of the rest. It is alleged that the Japanese Government is secretly backing up the malcontent nobles. This is likely enough—for whatever engagements such a Government may have been forced to contract with a foreign Power, it must, in the long run, fall in with the views of its own people. It is said that the Ambassadors who recently visited this country were disavowed on their return, and received permission to commit suicide—a delightful privilege, of which they at once availed themselves. It would seem from these facts that the resistance with which we are threatened is national in its character, and that the Prince of Nagato is only one of a host of antagonists with whom we may have to deal successively. When it is said that, as the result of the recent victory, the Japanese sued for peace, we are clearly to understand merely the people of the province of Nagato; but there are fifty other provinces, and if they should all require a defeat to render them accessible, our advantages will be dearly earned. Who is responsible for the policy we are pursuing in Japan? Apparently, Sir Rutherford Alcock; certainly not the British Parliament. Why are we engaged in fighting the Japanese? The answer is re-echoed from every corner of the Eastern seas—the interests of trade. How tenderly our trade and traders are fostered at the Foreign-office! If a gentleman gets up in the House of Commons, and on the strength of his commercial knowledge ventures to offer an opinion on our foreign policy, Lord Palmerston snubs him for his presumption. Yet the politicians of the Foreign-office know precisely what is for the advantage of our trade, and tend its interests like wet nurses. The truth is that the Foreign-office and its agents abroad know the use of a first-rate pretext. To say that they fought for the good of the united service—this is, for mere pay and promise—would rouse a storm of indignation. No—say it is for trade. That will go down. Of course we must submit. Trade must bear the odium and find the cash. The spoil and the laurels go elsewhere.

Naval and Military.

Col. Knox, C.B., who has for some time commanded the 9th Depôt Battalion at the camp at Colchester, is above to leave England for an important command in Japan. The testimonial to the gallant colonel from the officers of the 9th Depôt Battalion, has been presented.

The ordinary period allotted to admirals for service abroad will, in the case of Sir Augustus L. Kuper, K.C.B., Commander-in-Chief in China, expire early in February next, and among others Rear-Admiral the Hon. George Fowler Hastings, C.B., has been named as likely to be despatched by the First Lord of the Admiralty to replace Sir Augustus.

The Dutch 50-gun screw frigate *Adolph Hertogvan Nossau*, Capt. O. A. Ulmberg, which met with the casualty after leaving the Texel, for Batavia, has been taken into the great basin at Sheerness, where she is to undergo a thorough repair at the hands of the dockyard workmen. The whole of her powder and shells have been unshipped and received into store at the Upnor powder magazines, Chatham. Since the frigate has been in the basin she has undergone a careful survey at the hands of the dockyard officials, the result of which is the discovery of several other injuries in addition to those previously seen. Her cutwater is very much damaged, and her machinery has been put considerably out of order. Her repairs will occupy some time. The captain and the whole of the officers of the frigate were entertained at dinner and a ball on the 29th Oct., at the Admiralty house, by Vice-Admiral Sir C. Talbot, K.C.B., commander-in-Chief at the Nore, the ward-room officers at the Naval-barracks having previously entertained them.

land, Coulnakyle, Taiping, Red Riding Hood, Banian, Canute, Philomela, Adriatic, P. J. F. Burchart, Keepsake, Chandanagore, Volunteer, Aunt Lizzie, Holmesdale, Rifleman, Isabella Robinson, Zelia, Vimeira, Zarah, L. Wharncliffe, Gloucester, Lorton Vale, Iceni, S. Ralston, Wm. Thompson, Marlborough, Dora, Whinfell, Ocean Queen, Theodore and Julie, Amelia, Magnus, Josephine, Glaramara, Sappho, Charles Davenport, and Osborne House. At LIVERPOOL: Geologist, Fanny, Joshua Bates, Wm. Dawson, Affghan, Jessie Beazley, De Jex, Warwick Castle, Peerless, Sea Snake, Thomas Bell, Reigate, Esk, Surry, Pegasus, Hugomont, Lord Dalhousie, Cornelia, Inamhore, Mayflower, Regina, Edward Percy, Henriette Cornelis, Victoria, Montgomery, Helvellyn, Australia, Ann Forster, Brockham, and General Windham. At FALMOUTH: Divina, and Linda. At BORDEAUX: Leon. At HAMBURG: Mecklenburg, and Gravina. At NEW YORK: Dorchester, Regnago, St. Paul, Luson, Gleam, Cornelia, Mary, Roslin Castle, Cassiterides, Queensland, and Maggie Leslie.

From MANILA.—At LONDON: Cambodia, Seaforth, Labrador, Jupiter, Constance, and Staffordshire. At LIVERPOOL: Indiaman, Patriot King, Alicia Anne, Barinaga, Kathay, Gondola, Frederick, and Royal Mint. At FALMOUTH: Der West, St. Paul, Voladora, and Ocean Empress. At COWES: John Banfield. At NEW YORK: Tropic, George Peabody, Bengal, Continent, Franklin, and Julia Ambridge.

From SINGAPORE.—At LONDON: Oscar, Confidence, Pet, Polly, Bonanza, Miss Nightingale, Volunteer, Tweed, Eddystone, Najade, Rangoon, Prince Alfred, Dewa Gungadhur, Dunkeld, and Tartar. At LIVERPOOL: C. H. Soule, Victory, Agra, Beloochee, and Tigris. At FALMOUTH: Sarah Jane and Queen Bee. At BORDEAUX: Salares. At NANTES: Suez. At NEW YORK: Ocean Home, Gertrude, Caroline, Rudolf, and Panic. At BOSTON: Ceylon, Aristides, and Magnet.

From PENANG.—At LONDON: Empress, Marengo, Sunium, and Spitfire. At FALMOUTH: Schlossr. At CORK: Ceylon. At BORDEAUX: Sophis.

From BANGKOK.—At NEW YORK: Eastward Ho!

FREIGHTS AND CHARTERS.

The arrivals from the Eastward lately having been more numerous, the different loading berths are fully supplied. Ships are also offering freely for coals, and outward rates are altogether very low. In homeward charters there has been nothing doing.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £38 and £1. 17s. 6d. For Shanghai: £46 and £2. 6s. 6d. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £25 and 21s. to 22s. For Penang: £27. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have invited tenders for the conveyance of 39 tons naval boilers from the River Thames to Hong Kong; also for 32 tons combustibles, &c., to Shanghai.

The clipper Falcon, Captain Keay, which passed the Downs 3rd inst., conveys stores for the Spanish Government to the Chinchas Islands, from whence she will proceed to China; and the Glenaros, Captain Buckham, has been taken up for the same purpose.

CASUALTIES.

TEXEL.—October 26, the Willem en Carel, Steenveld, from Newcastle to Cheribon, which put in here to-day, is leaky

The Cambodia, Paige, from Manila for London, which put into Plymouth Nov. 2, had a portion of her bulwarks and stanchions carried away, and was making a little water, having been struck by a sea on the 22nd October.

PERNAMBUCO.—14th October, the A. O. Anderson (Swed. brig), from Newcastle to Singapore, was totally lost at Cabo Branco, near the mouth of the Paraiba River, 11th Oct. Crew saved.

OFF ST. HELENA.—Sept., from Shanghai, Glaramara, Watson.

The Eucharis and Paul, Dugast, from Sumatra for Nantes, put into Mauritius Sept 19, with foremast sprung.

The Norman, Orfeur, which arrived at Mauritius, Oct. 4, from Melbourne and Timor, brought intelligence that the Keepsake, of Shields, Swan, from Shanghai to Europe, with tea, silk, &c., was totally wrecked on the N.E. Point of Island Sara, Timor Sea, in the early part of July. The crew left Coupang Aug. 28, in the Dutch steamer for Java. The wreck was seen on Aug. 30, hopelessly bilged, and the cargo was distributed all over the island. Some silk and tea, which were shown to the master of the Norman, were in good condition, but there was not much of it.

ANOTHER "SEA KING."—We have already noticed the sale of the *Sea King* to the Confederates, and no doubt we shall soon hear of Captain Semmes' exploits in her. That vessel having proved so successful in her voyage to China (*via* New Zealand) and back, we understand that Messrs. Robertson and Co., the ship brokers, and others interested, have ordered a similar vessel to be built by Messrs. Stephens on Clyde.

DISCOVERY OF A NEW ISLAND.—Captain Moore, of the ship *Merse*, reports that while on his passage from Yokohama to London he discovered two islands in the North Pacific not laid down in the charts. One island was in lat. 31·23 N. and 140 E.; and the other, about four miles distant, is given at 30·19 and 139·51. From the first of these islands a reef extends about two miles in a N.W. direction; and Captain Moore had a narrow escape from touching on this reef.

LAUNCH OF THE "DEVANA."—On the 1st inst. there was launched from the building-yard of Messrs. Hall and Sons, Aberdeen, a fine ship, of 795 tons register, named the *Devana*, classed thirteen years at Lloyd's. The vessel is the property of John Jamieson, Esq., and is intended for the China trade.

"EXCELSIOR" FAMILY SEWING AND EMBROIDERING MACHINE.

THESE MACHINES are far Superior to any others manufactured They are lighter and easier to operate, simpler to learn, quieter in action, and less liable to derangement. The range of work performed is greater than any. They run, tuck, hem, fell, gather, cord, quilt, braid, and embroider; sews from two ordinary spools, requires no re-winding, finishes its work where it stops, and the seam, if cut at every inch, will not rip. Price, Complete, from £6. 6s.

The New STAR PATENT IMPROVED DOUBLE-ACTION ARM MACHINE, for Bootmakers and Manufacturers generally. Complete, £12. 12s.

WHIGHT AND MANN, 143, *HOLBORN BARS, LONDON.*
MANUFACTORY: GIPPING WORKS, IPSWICH.

NOTHING IS MORE REFRESHING THAN RIMMEL'S

EXTRACT OF LIME JUICE AND GLYCERINE,

Which cleanses and cools the head, and gives the hair a beautiful gloss, without greasing it.

RIMMEL'S TOILET VINEGAR,

Will also be found a perfect luxury in warm climates as an adjunct to the Toilet and Bath, and a reviving Perfume.

96, STRAND, AND 24, CORNHILL, LONDON.

SOLD BY ALL PERFUMERY DEALERS IN INDIA.

BARCLAY AND SON'S

IMPROVED

Enamelled Punkah Lamps for China,

AS SUPPLIED TO THE INDIA OFFICE.

(TRADE BB MARK.)

SHOW ROOMS,

170, REGENT-STREET, LONDON.

THESE Lamps are wrought into many beautiful designs, having on the surface a coating of the Patent Enamel. By this process the most beautiful marbles and stones—as Malachite, Lapis Lazuli, Brocatella, Pale Sienna, Jasper, and Pink Granite—are imitated to a nicety.

Advantages of these Lamps over ordinar India Lamps:—

1st.—They are unaffected by damp, heat, alkali, or oil.

2nd.—The more they are rubbed the better the polish: in this respect they are the reverse of bronzed or lacquered lamps.

3rd.—They offer no temptation to the natives to remove the outer surface; and were they to endeavour to do so they would signally fail.

4th.—They are free from liability to fracture.

5th.—The enamel never wears off, nor changes in colour or appearance.

PRICES, from £4 10s. to £5.

Ornamental Glasses, 7s. 6d. extra.

Ordinary Lamps, in bronze, bronze and relieved, and lacquered, from 38s.

May be obtained of the makers, BARCLAY & SON, or through the Cape, India, and China Agency, of whom Illustrated Prospectuses may be obtained. Orders sent direct must be accompanied by a remittance.

GELLÉ FRERES' PERFUMERY.

CHIEF ESTABLISHMENT, 35, RUE DES VIEUX AUGUSTINS, 35, à PARIS.

THE house of GELLE AINE and CO., celebrated for the superiority of its Perfumery, addresses itself to the fashionable world as much for its essentially hygeianic, refreshing, and tonic preparations as for its delicate and distingué perfumes.

COLD CREAM, AU LOTUS DE LYBIE, to soften and refresh the skin.
NIGRITINE VEGETALE, an incomparable dye for the hair and beard, not staining the skin.

SPECIAL PERFUMERY WITH A BASIS OF GLYCERINE

SOAP, TOOTH-PASTE, POMMADE, CREAM FOR THE COMPLEXION, EAU DE TOILETTE.

To be obtained of all the principal Perfumers and Hairdressers in Europe and other parts of the world.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, of all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot is 12, RUE RICHER, PARIS.

Sold Retail.—London: Jozeau, Hannay. New York: Fougera, Gaudelet, Milhau. Gibraltar: Patron and Danilo, wich. Malta: Dr. Pirotti, Bugeja, Magri, and Rolando, Esperanza. Alexandria: Bellamore, Galette, Perinic, Bombay; Franjee Nesserwanjee and Co. Singapore: Martin and Little Batavia: L. Platon and Co. Macao: J. D. Freita.

CHARTERED MERCANTILE BANK

of INDIA, LONDON, and CHINA. Incorporated by Royal Charter. Paid-up capital £700,000. Reserve Fund, £250,000.

The Bank negotiates and collects bills and grants drafts payable at Bombay, Calcutta, Madras, Colombo, Kandy, Singapore, Galle, Penang, Hong Kong, Shanghai, Yokohama, and Mauritius, issues letters of credit and circular notes for the use of travellers by the overland route, erms for which can be ascertained at the Head Office, in London.

The Bank will effect the purchase or sale of Indian securities, undertakes the safe custody of same, and the receipt of interest, dividends, pay, pensions, and other moneys, for remittance through the Bank or otherwise.

The Bank receives money on deposit, on which interest will be allowed according to the length of time deposited. Particulars as to rates can be ascertained at the Head Office, 52, Threadneedle-street, London.

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY HER MAJESTY AND THE ROYAL FAMILY.

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon II., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s CHERRY TOOTH PASTE gives the Teeth a pearl-like whiteness, protects the enamel from decay and imparts a pleasing fragrance to the breath.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON is adapted for universal use, and the most serviceable and convenient Hair Brush ever invented. Letters Patent Granted Nov. 6, 1852.

Merchants and Shippers supplied on liberal terms.

12, THREE KINGS COURT, LOMBARD-STREET, LONDON.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day. AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., Three King-court, Lombard-street, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored, one application per month will keep it in perfect colour. Price One Guinea per Bottle; half bottles 10s. 6d. Testimonials from artists of the highest order, and from individuals of undoubted respectability may be inspected. Messrs. JNO. GOSNELL and Co. have been appointed Perfumers to H.R.H. the Princess of Wales.

London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S OINTMENT AND PILLS.
—THE BEST WAY.—To gain any end there are often many ways, but there is always a best way. This statement applies with wonderful force to Holloway's remedies, which overcome ill-health by driving noxious matters from the frame, by repairing broken or injured structures, and by establishing regularity of action. This is the only safe and feasible method of combating diseases and securing sound health. With pure blood, good digestion, strong nerves, and perfect functional order, most maladies may be vanquished and strength surely re-established. The balsamic and healing qualities of Holloway's Ointment render it invaluable in the nursery for healing cuts, scratches, or sores, for allaying inflammations, reducing swellings, or cleansing unhealthy skins.

List of Passengers.

PASSENGERS INWARD.

To Marseilles, per P. and O. steamer Ceylon, arrived Nov. 14.—From Singapore, Mr. Launspack. From Ceylon: Mr. H. Williams.

To Southampton, per P. and O. steamer Baroda, expected to arrive Nov. 20.—From Singapore: Mr. and Mrs. Cruikshank, Mr. Fawcett. From Hong Kong: Mr. Gibson, Mrs. Linstead, infant, and European servant, Mr. Lock. From Shanghai: The Rev. Mr. Ritchings. From Galle: Mr. Skinner, Miss Embank, Mr. Gillson, Mr. H. Cooper, Mr. and Mrs. Veevers and two children, Capt. Brooke, C.R.R., Mr. Chas. Wait.

PASSENGERS OUTWARD.

Per French steamer Peluse, from Marseilles Nov. 19.—To Hong Kong: Messrs. A. Meyer, H. Locock, and J. E. Stewart, and two steerage passengers. To Shanghai: Mr. and Mrs. Wignall, Dr G. Thin, Mr. R. Scheibler. To Galle: Messrs. Geo. Lawson, F. T. Rolls, E. Hoare, John Harding, and J. Theobald, Miss Woodriff, and three steerage passengers. From Suez to Galle: Mr. D. Forrest.

Per P. and O. steamer, Nov. 20, from Southampton.—To Hong Kong: Miss B. E. Collett, Miss Lee, Lieut. B. Lilliebook, Mr. Howard. To Shanghai: Messrs. E. Crace, and M. Hawtrey. To Singapore: Mrs. W. W. Willans and infant. To Ceylon: Mr. G. Crosbie. From Marseilles, Nov. 28.—To Hong Kong: Mr. T. F. Ballance, Mr. B. Mackintosh, Mr. P. G. Lawrie, Mr. and Mrs. J. A. Wheelock. To Shanghai: Mr. Hyslop. From Suez.—To Hong Kong: Mr. Caw.

Per P. and O. steamer, Nov. 27, from Southampton.—To Shanghai via Bombay: Mr. Bayne. To Ceylon, via Bombay: Mr. Cummins.

Per P. and O. steamer, Dec. 4, from Southampton.—To Penang: Capt. and Mrs. White. To Shanghai: Mr. Herbert Elias, Mr. G. Stanford. To Hong Kong: Mrs. Smith and two infants, Mr. Dent. To Ceylon: Mr. and Mrs. J. Walker, three children, and servant, the Rev. J. Allcock, Mr. H. Bois, Capt. Rutherford, Mr. H. C. Park. From Marseilles, Dec. 12.—To Singapore: Mr. and Mrs. H. W. Wood and lady friend, Mr. Geo. Crichton, Mr. J. Crum, Mr. A. J. Gunn. To Shanghai: Mr. J. W. Broadbent. To Hong Kong: Mr. T. Caw, Mr. H. H. Nelson, Mr. J. Sloane. To Ceylon, Messrs. T. G. Davis, R. E. Hope, J. T. Green, and John Fraser, Mr. and Mrs. Schweitzer.

Per P. and O. steamer, Dec. 20, from Southampton.—To Hong Kong: Messrs. Jas. Henderson, A. Leigh and J. Maitland, Mrs. Wilkinson and infant. To Ceylon: Mr. J. Bannatine, Mr W. Mayon. To Shanghai: Mr. Carritt. From Marseilles, Dec. 26.—To Hong Kong: Mr. and Mrs. Ryrie, Mr. Pastorius. To China: Mr. W. A. Foster. To Shanghai: Mr. and Mrs. Tyers. To Ceylon: Messrs. F. Pater and Fraser.

Per P. and O. steamer, from Marseilles, Jan. 12, 1865.—To Hong Hong: Mr. M'Donald.

CHINA.

ABSTRACT OF PEKING GAZETTES.

Chen Ting-ching, a censor, draws the Emperor's attention to the fact that some of the Imperial family live outside the walls of the palace, and amuse themselves by every description of debauchery, assuming false names. The Emperor, in reference to the charge, says, "It is recorded."

Aug. 13. Expressing the Emperor's regret that the grave of Tai-tsu, the first Emperor of the Ming Dynasty (1368 to 1398), has been desecrated by the rebels, and ordering Tsêng Kuo-fan to see to its being restored, and to salute the deceased prince.

Yen Ching-ming, Futai of Shan-tung, reports that a ruffian named Tsao Wen-ping, having murdered his father with an axe, has been cut to pieces, and his head hung up.

Tang Tiutang, Futai of Hupeh, reports that his predecessor, Yen Shu-seng (who was some months ago degraded to the rank of Taotai at the instance of Kuan Wen, Governor-General of the two Hu) requests leave of absence for three months to visit the graves of his father and mother. "It is granted."

Aug. 14, 15, and 16. The report by Kuan Wen and Tseng-kuo-fan as to the capture of Nanking is given at length, and the Emperor makes the following note: "It is recorded."

Aug. 16. Deciding that Chung-wang and Hung Jen-ta be not conducted to Peking, but their sentence of being cut to pieces be carried out at Nanking, and their heads be sent round the districts formerly in possession of the rebels.

Aug. 18. Kuan Wen, Governor-General of the two Hu, indulges in a general diatribe against military officers, and recommends the disgrace and dismissal of several whom he mentions by name.

Aug. 19. Wu Ting-tung, a censor, recommends the Emperor not to be too ready to pat himself on the back on account of the capture of Nanking, as he will be sure to come to grief.

SHANGHAI.

A gentleman who has just returned from Nanking has favoured us *(North China Herald)* with the following sketch of the appearance of the city:—

"We entered the Yi-feng-men or Northgate, and rode for a distance of about eight miles, for the most part amongst cultivated fields. The city from the North side has simply the appearance of a large tract of land walled in. The first thing of any interest that struck us on the way was a square pagoda about fifty feet high with three large arches. On the top of this is the celebrated turtle mentioned in Forrester's account of Nanking, constructed of one block of marble. The next thing was the Tien-wang's palace, which must have been most gorgeous. The entrance or reception hall is panelled in carved wood, and the pillars and ceiling are splendidly carved, painted red, and gilded gold seems to have been spread on that place like mortar on an ordinary building; and, although to a European taste too gaudy, to the Chinese eye it must have seemed truly magnificent. Having passed through the reception hall, we entered a long and wide stone path, on one side of which are little houses, or offices, lying in ruins, and on the other is a garden full of trees. Thence we passed into what must have been the *bona fide* residence of the Tien-wang, and this, although now a mere heap of ruins, must have been of enormous extent and full of valuable stone work. In the garden are two granite basins, each of which is a rough model of a boat, but these I am sorry to say have been nearly demolished by the Imperialists. Almost every nook and corner has been

Digitized by Google

dug up, and all the flooring torn to pieces. I was told that ten millions of taels in sycee had been found in the Tien-wang's palace, but half that amount is probably nearer the truth. The reception hall is still preserved, as the fire did not reach it, and it is indeed well worth looking at. I fear, however, that this also will soon be ruined, as every soldier who passes through it tests the sharpness of his sword on the carving, and crowds of beggars are industriously occupied in scraping the gold off the pillars. I should mention that the palace is surrounded by a wall of about thirty feet in height. From the Tien-wang's palace we went to the "breach" near the Taiping gate, and I am really astonished that the rebels gave the Imperialists a chance of making that breach. The Imperial trenches run right under the wall at a distance of about one hundred feet from it, and any good shooting ought to have sent the Imperialists flying out of their positions. My idea is that the rebels felt perfectly secure in the belief of the strength and height of their wall, and, having had the Imperialist camps all round them for the last ten years, got gradually accustomed to them and were consequently taken by surprise. The rebel artillery was in general very poor, with the exception of a few guns mounted on foreign carriages. On the whole, I think but little credit is due to the Imperialists for taking Nanking. They might have done the same eight or nine years ago. All the dead bodies have been removed. I saw only three still lying unburied near the breach. The business part of the city is in a state of constant bustle and confusion, and building is going on right and left. The new houses are not, however, very substantial. At the Shui-si-men (West water-gate) and Nanmen the number of people entering and leaving the city was most remarkable. A good deal of local trade seems to be going on at Nanking, but as a port for foreigners I think it will prove a miserable place, and from the swampy ground which surrounds the city, it must be most unhealthy, As to curiosities, nothing can be bought, as the soldiers that assisted at the looting have for the most part been removed, and a lot of dirty, gaudy dresses is all that remains for sale. Up to now the taking of Nanking has had no effect upon Chinkiang. I am afraid it will take some years before the right bank of the river thoroughly recovers from the ravages of the rebels."

The following notification of the Taotai has been issued. Old residents in China will, indeed, marvel at such signs of compassion in a Chinese Mandarin :—

NOTIFICATION.

Ting, Taotai of Soochow, Sung-kong, and Tai-tsang, issues a notification for general information.

Whereas, on the sea coast (of this province) both native and foreign craft are frequently wrecked during tempests, it is necessary to take precautions to ensure the safety (of life and property), that every man may act conscientiously, that the unprincipled may be punished, and the good rewarded according to the statutes. Every one, indeed, should know the penalties attached to wrong-doing in this matter.

Now, on careful examination, I have discovered that whenever a ship is wrecked in a storm, it does not enter into the heads of the people who live on the coast to defend and assist the sufferers, but, on the contrary, they treacherously endeavour to rob them of all they possess. When the rudder is broken and the sails are torn to ribbons, and while the wrecked crew are looking anxiously and sorrowfully for succour, these robbers rush violently on board, ransack every chest and carry off whatever property they may covet. The hard won earnings of some scores of years are suddenly snatched from the hands of those who had, cash by cash, painfully accumulated a little store. Those who had travelled over many thousands of miles of dismal ocean, and passed through numberless terrors of the deep, are obliged at last to heap reproaches on the injustice of their fate. Even although a ship be wrecked, yet still all hope of (future) success is not necessarily lost, but these pirates, not satisfied with seeing a fellow creature fall into a pit, must needs fling a stone after him. Such poor fellows are much to be pitied, but it is difficult to assist them, for they have not only lost their sheep, but the fold has also disappeared. Thus the trial sent by Heaven is rendered heavier by man. These unprincipled wretches are, moreover, not content with robbery, but they also emulate the fame of murderers. The eye cannot bear to rest on such doings, and the mind is grieved by the very report of such atrocity.

Wherefore, seeing that I, the Taotai, am fully acquainted with the misery inflicted on these people, how can I sit quietly by? For the future the following regulations will be enforced in the districts over which I exercise supervision. Wherever there are villages on the coast, every ten li shall constitute a parish, which must provide a police officer and assistant, who, no matter whether a ship which may be stranded on our shores be native or foreign, shall instantly set measures on foot to render her whatever assistance she may require, and shall request the local officials to come in person, examine into the matter, take the cargo under their charge, and hand it over to the proper owner. They must also decide on the reward to be given to those who shall have exerted themselves (to save life and property). If the cargo be completely lost, and there only remain a few poor penniless wretches, these are at once to be conducted to my official residence, where they will be supplied with money sufficient to carry them home, that they may not be left wandering about, without a chance of getting away.

The officials are requested to consult one with another, and make any suggestions which may appear advisable to them for the better carrying out of the above design, informing me minutely of their opinions. A communication has been addressed to the Tsung-ping of the island of Tsung-ming, directing him to assist in carrying out the views just enunciated.

This notification is accordingly issued for the information of the public. Henceforward if any ship be wrecked in a tempest, the regulations laid down above must be carefully complied with. If any offenders be found, let them be seized and most severely punished.

The following is the official copy of the judgment delivered by the British Consular Court, in the case of Messrs. Birley, Worthington and Co. *v.* the master of the *Finzel* :—

The Court consider that there has been a want of care in the manner of describing the iron in England, and in the way in which delivery of it has been taken in Shanghai. In the bill of lading and in the shipping order, the entries are "OO. 2,400 bundles nail rod iron," and it appears to the Court that that description was not sufficient to lead the master or mate of the *Finzel*, when receiving the iron on board, to look for two hands or rings of white paint encircling each bundle. Had it been distinctly specified in the shipping order and bill of lading that the iron was marked with white rings, the absence of that mark might have attracted the attention of the master or mate. Again, in Shanghai, neither the plaintiffs nor Messrs. Dow and Co., agents for the defendant, appear to have accurately informed themselves as to the marks on all the bundles of iron ex *Finzel* now stored in their respective godowns, and it seems not impossible that a further examination may prove that the two original shipments (to Messrs. Birley, Worthington and Co. and Hooper and Co.) have become mixed. However that may be, the Court, having strict regard to the wording and marks of the bill of lading on which the action is brought, can only hold that the master of the *Finzel* is bound to deliver to Messrs. Birley, Worthington and Co. 2,400 bundles of nail rod iron marked with two cyphers.

Costs to be divided.

(Signed) HARRY S. PARKES, Consul.

We assent to the above judgment,

(Signed) JAMES WHITLOW, R. R. WESTALL, } Assessors.

HONG KONG.

IMPORTANT FREIGHT CASE.—SUPREME COURT, MONDAY, SEPT. 12.

BUTLER AND OTHERS V. DUTHIE.

Before the Acting Chief Justice and Special Jury. Jurymen.—C. H. M. Bosman, F. Parry, H. B. Gibb, J. M. Vickers, F. D. Williams, R. Rowett, A. W. P. Kup. Counsel for the plaintiffs Mr. Kingsmill and Mr. Pollard. Counsel for the defendant, the Attorney-General and Mr. Pauncefote. This was an action in trover brought by the plaintiffs, Butler and others, trading in London under the name of H. and J. Johnston and Co., against Mr. W. Duthie, also of London, the registered owner of the British ship *Indiaman*.

The *Indiaman* was chartered from the defendant by Mr. W. N. de Mattos, of London, to load a cargo of coals at Birkenhead, and to proceed therewith to Hong Kong. As regarded the payment of freight the charter party stipulated as follows :—

"The freight to be paid in London on unloading, and right delivery of the cargo at and after the rate of thirty-nine shillings sterling per ton of 20 cwt. on the quantity delivered in full of all port charges. Bute-dock wharfage, harbour dues on cargo and Dover and Ramsgate line as customary, and such freight is to be paid say one half by charterer's acceptance at four months from the final sailing of the ship from her last port in Great Britain, the same to be returned if the cargo be not delivered at the port of destination ; the freighter to insure the amount, and deduct the cost for so doing from the first payment of the freight, and the remainder by like bill at three months from date of delivery at charterer's office in London of the certificate of the right delivery of the cargo agreeably to bills of lading, less cost of coal or fuel short delivered, or in cash under discount at five per cent. per annum, at freighter's option."

The *Indiaman* accordingly proceeded to Birkenhead, and

Digitized by Google

there took on board 1,200 tons of Large Welsh Hartley steam coals, for which bills of lading were signed by the Master (J. F. Webb) on the 7th October, 1863, containing the following clause, "The freight for the said goods to be paid by the freighter as per charter party with average accustomed."

Mr. Borradaile, a member of the firm of Walker, Borradaile, and Co., being in London about the time the ship had completed her loading, arranged between Mr. W. N. de Mattos and Messrs. H. and J. Johnston and Co. for an advance of £2,100 (being 35s. per ton on 1,200 tons), to be made by the latter to the former.

This advance having been agreed upon and made, the documents relating to the cargo and advance were forwarded by Messrs. H. and J. Johnston and Co., to Messrs. Walker, Borradaile, and Co., of this port, with orders, when realised, to remit proceeds to Messrs. H. and J. Johnston and Co. direct, their letter containing the following sentence :—"Please note that we have advanced £2,100, due 22nd April, 1864, against this cargo, under your guarantee as before."

It may here be mentioned that on the 8th December, and, therefore, during the *Indiaman's* voyage, Mr. W. N. de Mattos, the charterer, stopped payment.

The *Indiaman* having arrived in Hong Kong on the 14th February, Mr. Walker proceeded on board the following day to present the bill of lading, and to demand delivery of the cargo, but as Captain Webb was not on board, the demand was made of the captain on the following morning at Messrs. Walker, Borradaile, and Co.'s office, which demand the captain refused to comply with unless the freight was paid or security given for the same. Mr. Walker not having consented to enter into any such arrangement, Captain Webb, on the 16th of March, through an auctioneer, advertised the cargo for sale on board by public auction, and on the 22nd March the entire cargo was knocked down at $8.50 per ton.

This action was then brought to recover damages for the wrong sustained by the plaintiffs at the hands of the defendant's servant.

Mr. Pollard having opened the pleadings, Mr. Kingsmill addressed the Court on the part of the plaintiffs, and called Mr. T. S. Borradaile, who proved the fact of the advance having been made by the plaintiffs to Mr. De Mattos and of the defendant being aware of such advance having been granted. The Attorney-General submitted the witness to a severe cross examination, but elicited nothing of consequence.

Mr. R. S. Walker was then called to prove the demand having been made for the coals on the ship's arrival, and Captain Webb's refusal to comply with the demand, except upon conditions mentioned above.

Mr. Schmidt, the resident partner of the firm of Fletcher and Co., was called to prove that part of the proceeds of the coals were paid by Captain Webb to this firm, out of which they disbursed the ship, remitting the balance to the defendant.

Mr. F. T. Smith, broker, was then called to prove the sale on board the ship, he having bought the cargo for account of a firm at $8.50 per ton.

Mr. Adamson, manager of the Borneo Company, Limited, and Mr. A. Booth, of the firm of Bourjan, Aubener and Co., were called to prove the market price of coals at the date of the conversion, viz., the 16th and 17th February, the day on which the demand for the coals was made by the consignee and refused by the master. Market price at that time was proved to be about $10\frac{3}{4}$ per ton from alongside.

This closed the case for the plaintiffs, and, as the defendant's counsel decided not to call any witnesses, Mr. Pollard was proceeding to address the jury in reply, when the foreman stated that the jury would not trouble him. Mr. Pollard, however, begged to be allowed to draw their attention to the question of interest, which the law left entirely in their hands, to be dealt with as they might think fit.

The Attorney-General then addressed the Court for the defence and in mitigation of damages.

The Acting Chief Justice summed up the evidence.

The jury, after a few minutes' deliberation, returned a verdict for the plaintiff.

Damages being	$3,231.63
1,195 tons of coals at $10\frac{3}{4}$ per ton	$12,846.25
Interest at 6 per cent. per annum	386.38
	$13,231.63

One or two legal points were reserved.

The *Evening Mail* says :—"It is scarcely necessary to call attention to the Public Gardens lately opened here on the large slope between the Government House and the Old Albany, The ground was formerly a most unsightly waste, and could not well be built upon, as that would have destroyed the amenities of Government House. To convert it into a public garden seemed an undertaking of doubtful possibility ; but this was at last determined upon, and a landscape gardener was got from Australia to lay off the grounds. With what success this has been done we can all judge for ourselves. Indeed, it is not easy to suggest any, even the slightest, improvement in that respect. Every point of advantage has been availed of for its most suitable use ; and there has been nothing wasted or misemployed. The extent of the walks is very considerable, and the regulations for the admission of visitors is wisely framed."

The following on the New Docks is from the *Daily Press*:—

"We hear that the new Dock Company have come to advantageous terms with the Government relative to the site at Kowloon. The ground will have to be put up at auction, in accordance with the rules and regulations made and provided, but as a prime condition of the sale will be the construction of docks within a limited period, it is hardly likely that any competition will be excited. We rejoice to find that the Government is at last sufficiently awake to the construction of docks in the colony as to induce them to meet the enterprising parties concerned in the undertaking in a proper spirit. We are given to understand that most of the shares of the New Dock Company have been taken up, and that the undertaking is viewed as *une affair accompli*. The steps adopted in the business appear to us to be dictated by sound sense, strict economy, and practical knowledge. We hope the result will be that the repairs of vessels in Hong Kong may be effected at one third less than heretofore, and with twice the despatch. Such a result will undoubtedly multiply the business, affording vast employment to artisans and labourers.

BORNEO.

LABUAN.

The *Hong Kong Daily Press* has the following :—

The steamer *Sterling*, Capt. Henderson, which has been employed for the past few months in carrying coal from Labuan to this, arrived from that colony with rather important intelligence. Owing to a quarrel which occurred between the Malay and the Chinese coolies at the coal mines, a serious riot took place, which led to loss of life and to some bloodshed in addition. The Malays fought with krisses, the Chinese with bamboos ; the former were getting the best of it, when two Englishmen connected with the mines, who are popular with the Malays, separated the combatants, and by persuasions kept them apart.

It seems that there is a garrison on the island of 300 sepoys, commanded by four English officers. At one time matters looked very serious, and indeed after the combatants were separated, there appeared a strong probability of their renewing the combat. The *Sterling*, which was lying off the mines, landed twelve Europeans armed, and fired several alarm guns, which, although they brought no assistance, intimidated the rioters. The Europeans at the mines sent a messenger to the Governor, Mr. Callaghan (who was chief magistrate here) for a sepoy guard. His Excellency naturally could not be so easily induced to comply with such a request without calling a council. After calling a council of war, he decided on sending the sepoys a roundabout way by water.

This disturbance has stopped mining operations for the present at Labuan. The *Sterling* was despatched with only part of a cargo, the manager desiring that she would seek other employment, and not come down again. He had a stock on hand, but he preferred to keep it for passing steamers. The ship *Goshen* was despatched from Labuan for Hong Kong with 1,200 tons coals on the 23rd Aug., and may be hourly looked for.

MALACCA STRAITS.

SINGAPORE.

From private advices from Singapore we learn that 110 gambier and pepper shops have petitioned against the Tumongong of Johore, and forwarded their petition to the Governor through the Chamber of Commerce, but that his Honour ha not favoured them with a reply up to the 6th October.

We also hear that the said chieftain has lately arrested five Dutch subjects on the charge of the same murder for which

Digitized by Google

the British subjects are incarcerated. They, the Dutch subjects, formed the crew of a pilot boat. Two of these men are dead, two are still in confinement, and one has been released on payment of $10.

COMMERCIAL POSTSCRIPT.

TEA AT NEW YORK, OCT. 29TH.—The market has assumed more activity of late, and we notice sales of 5,000 hlf-chest Oolong from first hands, 3,500 ditto from second hands, 500 to 600 Japan in lots, and 1,500 Green, mostly from first hands, at full prices, closing strong, with a tendency to improved figures.

ARRIVALS NOT INCLUDED IN THE TABLES.—Nov. 12, off the Wight from Batavia, Whampoa; 14, at Clyde, from Bassein, Laurel; 13, at Texel from Rangoon, Estafette; from Bassein, Piscataqua; 14, from Batavia, Sperwer, the Allegonda Jacoba; at Brouwershaven, from Bassein, Margaretha Smith; 16, at Deal, from Batavia, Martin; at Falmouth, from Maulmain, Jessie Munn; 14, off Eddystone, from Rangoon, Odessa.

DEPARTURES.—Nov. 16, from Deal, for Chincha Islands and China, Glenaros; 17, from Liverpool, for Mauritius and Galle, Nydia; for Singapore, Wm. Chandler.

SPOKEN.—Borealis, London to Hong Kong, Oct. 11, 8 N., 23 W.

LAID ON.—At London, for Hong Kong and Canton, Banian, White Adder; at Liverpool, for Manila, Sales.

CASUALTIES.—The Orange Nassau, van Hees, from Batavia, put into Mauritius, October 12, with loss of 2 topmasts and 3 topgallant masts, &c., having encountered a whirlwind Sept. 7, in 26 S., 56 E. The Seringapatam (British barque), Wyeth, from London to Yokohama, put into Mauritius, Oct. 15, having experienced a hurricane, Sept. 22, in lat. 40 S., 20 E., which lasted thirty-six hours, during which she sprung a leak, and was obliged to keep the pumps constantly going. She was discharging.

The Joseph Willem (Dutch ship), Bik, from Batavia to Rotterdam, put into Mauritius Oct. 15, having experienced on the 10th and 11th, in lat. 25 S., lon. 27 E., a heavy cross sea, in which she sprang a leak, and was obliged to keep the pumps constantly at work.

At MAURITIUS.—Oct. 12, from Batavia, Oranje Nassau, van Hees (with damage); 15, from London, for Yokohama, Seringapatam (British barque), Wyeth (with damage); from Batavia, for Rotterdam, Joseph Willem (Dutch ship), Bik (with damage); 6, Foong Suey (str.), Gray, sailed for Singapore; 8, Matchless, Nicolin, sailed for Galle.

MR. CANNY ON MANCHURIA.

The following account, to which we alluded in our last, is from the *North China Herald*:—

Mr. Canny, in opening his lecture, sketched the progress of Russian colonisation in Manchuria from the year 1849 to the present day. In the year 1849 the most southerly ports in the possession of the Russians were Aian on the sea of Okhotsk, and Petropaulovsk, in the peninsula of Kamschatka. Soon, however, Petrovsk, on the Northern entrance of the Straits of Saghalien, was seized, and in 1851 Nicholaefesk, now the centre of Government for the entire of maritime Siberia, was founded. In 1853 Castries Bay, Port Imperial and Aniva Bay were quietly annexed. These acquisitions were all on the sea coast, but the outbreak of the Crimean war gave Russia her long wished for opportunity of colonising the valley of the Amoor and Usuri. Accordingly a body of Russian troops was ordered to march from Irkutsk to the head waters of the Amoor. Although the snow was upon the ground, and the Chinese and Manchu officials at the different posts were very far from friendly, the expedition was successful, and some 1,500 miles of water communication between the sea and the interior of Siberia was thrown open. The entire valley of the Amoor was quickly occupied by Russian posts, and the country was virtually made part and parcel of the Russian possessions in the East. In 1858 a treaty was obtained from the Emperor of China, granting the territory on the left bank of the Amoor and the right bank of the Usuri to the Russians. The successive humiliations which had been heaped on the Chinese in the south may be assumed to have caused this concession. In 1860, this treaty was amplified and ratified, and thence forward the Russian occupation has remained undisputed.

Passing on from the history of Russian annexation, Mr. Canny next gave a geographical description of that portion of the seaboard now claimed as Russian territory. The typography—even the scenery—of Victoria Bay, Passiet and Vladivostock, was graphically sketched, and the inner life o. the garrison stationed at the latter place minutely described. It would appear that the officers, at least, lead a somewhat "jolly" life, if we leave out of consideration the fact that they are occasionally four or five months at a time utterly destitute of European news. They hunt, shoot, smoke, drink, read, and play cards, and thus contrive to pass their time away. But on the whole, taking every advantage and disadvantage into consideration, the garrison at Vladivostock is hardly to be envied. An intention on the part of the authorities to fortify Vladivostock was displayed at the time of Mr. Canny's visit, by the arrival of seventy-four smooth bore broadside guns. Since, then, however, these guns have been removed to Nicholaefesk, on the Amoor. As to the native inhabitants of the country round Vladivostock, Mr. Canny stated that the prevailing race is the Manchu, but that a slight intermixture of Chinese and Goldi, from the head waters of Usuri, may be noticed. These interlopers are for the most part escaped criminals, and, in consequence, very few women are to be found amongst them. The Tazas or Oroches (Tartars) occupy the districts to the north, and with these the Manchus occasionally intermarry. The means of subsistence are simply hunting, fishing, and the cultivation of the ginseng. A small quantity of gold has also been discovered in some of the rivers. The repulsive appearance of the Tazas was then described,

Digitized by Google

and their dirty habits and miserable dwellings in turn dilated upon. At the same time, M. Lindau's description of the horrible filth and ugliness of the inhabitants of that part of the country was stated to be overdrawn, and a fair meed of cleanliness and good looks awarded to them. By exercising strict justice, the Russians have gained a very considerable moral influence over the aborigines, and the latter are not slow to acknowledge the advantages they derive from the Russian rule. The Eugenie Archipelago was next described, and the picturesque beauty of the islands graphically portrayed.

As to the commercial prospects of Southern Manchuria, Mr. Canny informs us that nothing can be done in the way of an import trade. The native inhabitants are too few in numbers and too poor to admit of a lucrative trade ever being set on foot. Lead, cottons and Russian whisky are in demand, but these are obtained readily from the Russians. Timber is the only export, and this trade is freely permitted on the most reasonable terms by the Russian Government. Mr. Canny then dwelt on the degraded character of the colonists sent to the settlements on the coast of Manchuria, the hardships they undergo, and the position they hold; and finally wound up by a collection of extracts from a diary kept at Olga during the summer of 1863. These extracts served to give a lively idea of the life a Euroapean may lead in such a place, and the shifts to which he is occasionally put.

THE ATTACK ON SIMONOSEKI.

(SPECTATOR.)

Sir Rutherford Alcock has at least one qualification for an English pro-consul—he is lucky. He has evidently determined to bring Japan for all political purposes under his own rule, and to effect this object if necessary by an unsparing use of force. If he cannot succeed by milder means he will conquer each Prince one by one, batter the Secular Emperor's capital about his ears, and carry the Spiritual Emperor prisoner to Yokohama, where already an English guard invests the English Embassy with something of the character of an Indian residency, an *imperium in imperio*, a little State within which the writ of the great one does not run. Already he has broken the power of the Prince of Satsuma, destroyed his batteries, fired his capital, and reduced him into a humble but efficient ally of the central Government; has compelled the Prince of Nagato, the Duke of Burgundy of the Japanese monarchy, to sue for peace, and was when the last mail left contemplating an expedition to Yedo to bring the Tycoon himself finally to terms.

There is nothing to be said against the expedition, which had a justification, was wisely planned, and most ably carried out; but we should like to know, nevertheless, where it is all to end. Is Sir Rutherford Alcock to conquer Japan or not? That he can do it, and rule the country when he has conquered it, we have not the shadow of doubt, nor are we prepared to affirm that such a proceeding would be opposed to the permament interests either of Japan or Great Britain. Looking to the character of the people, we suspect that efficient "captains of labour" would manage them as easily as, and much more justly than, their own Daimios, and an island possession is, of all others, the easiest for Great Britain to keep. But just at the moment the acquisition of a tropical New Zealand with some thirty millions of Maories might not be popular, and if we do not intend to acquire it Sir Rutherford is doing an amount of mischief which requires further justification. He is breaking up an old civilisation without offering anything in its stead. At the very moment that the Armstrongs were destroying the influence of the Prince of Nagato, the Spiritual Emperor was flying before the arms of that very noble, and the Tycoon was inventing lies by the ream to avoid breaking either with his great feudatory or his great feudatory's foes. The organisation which has kept these chiefs within bounds is visibly breaking up, and the old Empire resolving itself into a knot of principalities, always at war with each other, always hankering to re-cement union at any cost of blood. Have we any right whatever to bring all this misery on Japan unless we intend to replace the ancient *régime* by one more full of possibilities than any which the country has yet enjoyed? We doubt it greatly, and doubting it, feel but half a heart to congratulate Her Majesty's Ministers on their triumph at Simonoseki.

THE FRENCH ACCOUNT OF THE ATTACK ON THE STRAITS OF SIMONOSEKI.

The *Moniteur* contains the following report from Rear-Admiral Jaurèz, commanding the French naval division in the Chinese waters:—

"The Minister of Marine and the Colonies has received despatc es from Rear-Admiral Jaurèz, commandant-in-chief of the naval division in the Chinese waters, containing an account of the expedition sent against the batteries which defend the entry of the Straits of Simonoseki, by the combined naval forces of France, England, Holland, and the United States.

"On the 3rd of September the *Semiramis* frigate, the *Dupleix* corvette, and the advice boat *Tancrede*, went to the anchorage in the front of the island of Himésima, the place of rendezvous of the allied forces. On the 4th, in the evening, the admirals, after making a reconnaissance on board of Her Britannic Majesty's corvette *Coquette*, made the following dispositions for attacking the batteries, which was to be effected on the following day.

"The corvettes formed a line the length of the south coast of the Strait; the weakest vessels drawing the least water remaining under steam, took *en echarpe* all the batteries by enfilading the length of the north coast from Cape Kunsaki. In fine, the two admirals' frigates, the *Euryalus* and the *Semiramis*, advancing between the two lines, directed their fire against the batteries which appeared the most likely to offer the strongest resistance. On the 5th, at four o'clock in the afternoon, each of the vessels was at its post, and the small light squadron under steam, when the admirals made the signal to commence firing. For twenty minutes the fire of the Japanese was very brisk; but when the light squadron came to take part in the attack, presenting their broadsides, and opened fire with their largest artillery, the enemy was compelled to evacuate the batteries. At half-past five all resistance had ceased. On the 6th, at daybreak, the battery situated facing Cape Mose Saki again opened fire on the corvettes *Dupleix* and *Tartare*. The first shot, well directed, taking the *Dupleix en enfilade*, the commandant, De Franclieu, hastened to take a more advantageous fighting position; this manœuvre having been rapidly executed, while the *Tartare* maintained a well-sustained fire, the battery was promptly reduced to silence by the two corvettes. At eight o'clock a corps was landed, composed of 1,200 English, 350 French, and 250 Dutchmen, which took possession of the beach at the same place where, during the previous year, the landing company of the *Semiramis* and three companies of African light infantry, executed a brilliant and daring *coup de main*. The Japanese then retired precipitately before the allied troops, who carried off 22 pieces of bronze cannon of large calibre and two mortars, and advanced to the faubourgs of Simonoseki. At four o'clock in the afternoon the order to embark having been given, our landing companies went to their boats, when the English came upon an entrenched camp, defended by numerous troops and five pieces of cannon. Received with a very brisk fire of musketry, our allies threw themselves into the camp and forced the enemy to evacuate it; but this engagement cost them 10 men killed and about 30 wounded, among whom were the flag captain of Vice-Admiral Kuper and two officers. The 7th, 8th, and 9th were employed in destroying the store-houses and powder magazines, and completing the embarkation of the cannon. In the meantime, four corvettes, doubling Cape Mose Saki, compelled the evacuation of the batteries and the Isle of Hikesima. The admirals, doubling Point Kibune and entering the China Sea on board the *Coquette*, found that the Strait of Simonoseki had been forced at all points. The total loss of the allies amounted to 13 men killed and 60 wounded; the French division lost 2 men killed and 9 wounded. There were 60 bronze cannon and 3 mortars altogether embarked on board the various vessels. Rear-Admiral Jaurèz, in giving an account to the Minister of Marine of this brilliant feat of arms, pays the highest compliment to the officers placed under his orders, as well as to the seamen. Every one rivalled another in ardour and courage, and the gunners gave proofs of the greatest ability.

"On the 10th the allied divisions cast anchor before the town of Simonoseki, and a minister from Nagato, furnished with full powers, went to the admirals to ask for the cessation of hostilities, and to agree with them on the basis of a convention, of which the following are the principal dispositions:—The opening of the Straits of Simonoseki to the ships of all nations; the batteries are neither to be armed nor repaired; the allied powers are to receive an indemnity, of which the amount shall be eventually fixed by their representatives at Yedo. On the 16th of September, at the moment of the departure of the courier, the admirals expected the ratifications, and prepared for their return to Yokohama."

VIEWS OF SIMONOSEKI.

The correspondent and artist of the *Illustrated London News* has forwarded a series of sketches from the inland sea which appear in the journal of the 12th inst., accompanied by the following remarks:—

"A small map or plan of the Strait of Simonoseki, from a drawing furnished by Captain F. Brine, appeared in this journal about a twelvemonth ago. It must first be understood that the so-called 'Inland Sea,' which is about 240 miles long and from 20 to 60 miles broad, is enclosed between the three islands of Niphon, Kiu-Siu, and Sikok, which constitute the main provinces of the Japanese empire. The position of this sea may therefore be compared to that of St. George's Channel and the neighbouring waters, having England, Ireland, and Scotland upon its shores. There are three entrances to the Sea of Suwonada—one by the Bungo Channel, from the south-east; one by the Kino Channel from the north-east; and one from the south-west, by the Strait of Simonoseki, which divides Kiu-Siu from the larger island of Niphon. Many great cities, including Osaca, the centre of aristocratic fashion, and Miako, the residence of the Japanese Pontiff or ecclesiastical Emperor (the political Emperor, or Tycoon, being a distinct person) are situated either upon the shores of the Inland Sea or in such a position that it affords the readiest approach to them. It is, consequently, the main channel of internal traffic, and is navigated by thousands of small vessels which do not encounter the risks of the outer ocean.

"The western entrance, by the Channel of Simonoseki, is at the narrowest part only a quarter of a mile broad. The scenery of its shores is varied and picturesque—the luxuriant vegetation reaching the water's edge around the base of the hills. To the right is observed a very dangerous rock, situated in mid-channel; it is, however, well marked by a stone pillar. There is a tradition about this rock that in the early days of Japanese history, one of the Emperors having been murdered and his throne seized by the usurper, the infant heir of the rightful Sovereign was saved by a nurse; and she, in making her escape across the strait, was wrecked, but fortunately succeed in reaching this rock, whence they were eventually rescued by some fishermen, and in due course the son recovered his father's throne. How far this tradition is really correct is, we believe, very doubtful. It may be remarked that the current runs very swiftly through this channel, and is of great assistance to the numberless junks which pass that way.

"Our second illustration is a veiw of the town and harbour of Simonoseki. A large number of junks of all sizes stop at this town to obtain water and other necessaries, on their way through the Inland Sea. It is situated in a very commanding position for the purposes of trade, and might become a flourishing seaport if opened to foreign commerce. Junks of the largest size and of the most grotesque build are here to be met with. They are all more or less ornamented with copper devices on their stems; but they have, in general, a very clumsy appearance, and their sailing qualities, as may be imagined, are not very good. Our third view is taken from the narrowest part of the pass, and is the first glimpse obtained of the Inland Sea itself, the deep blue water of which, contrasted with the dazzling white sails of the numberless vessels continually passing over it, affords a lively and pleasing scene.

"As an accompaniment to these views of Simonoseki, we give a view of the Night Guard of the Tycoon's Palace at Yedo, in their quaint military costume, with a lantern in every man's hand. Below this is a view of the famous volcanic mountain Fusiyama, as seen from the summit of a bluff near the British quarters at Yokohama. This mountain, 11,000 ft. or

Digitized by Google

12,000 ft. high, and always crowned with snow, resembles the Peak of Teneriffe in its shape and position. It is the subject of many wonderful legends believed among the Japanese people, who regard it with superstitious veneretion. Both these engravings are made after the photographs taken by Signor Beato, of Yokohama."

Naval and Military.

In addition to the name of Rear-Admiral the Hon. George Hastings, C.B., as likely to succeeded Admiral Kuper on the China Station, it is rumoured that Rear-Admiral Nicholas, who commanded the Pique in the Pacific during the time of the Russian war, is more likely to succeed him.

The Ringdove, 4, crew gunvessel, 674 tons and 200-horse power of engines, Commander Ralph A. O. Brown, was paid out of commission, at Portsmouth, after a foreign service of nearly five years, having been commissioned in October, 1859. During this period she has been employed off the coasts of China and Japan, and has gone over upwards of 250,000 miles under steam and canvas. George Bettesworth, leading stoker on board, received the medal and gratuity awarded by the Admiralty for long service. Commander Brown's service in the Ringdove completed a ten years' continuous service in Chinese and Japanese waters. He joined the navy in 1849, and, after having served in the Penelope and her tender, the Teazer, on the West Coast of Africa, went out as midshipman in the Hornet, screw sloop, and served for the first nine months under the command of Commodore Elliott against the Russians in the North of China. He was present and in charge of the Hornet's pinnace at the capture of the seventeen junks at St. John's Deep Bay and in the operation against pirates in Escape Creek, Fatshan. He commanded the Hornet's small-arm company at the assault of Canton and the Bogue forts, and was promoted to lieut. in May, 1859, paid off the Hornet as her first lieut., under the command of Capt. Viscount Gilford. In September of the same year he fitted out the Sphinx, six, paddle, as first lieut., under Capt. Day, and again went out to China, where he commanded a rocket boat at Taku and Tien-tsin. He was several times afterwards engaged with Chinese rebels and pirates, and was afterwards sent in acting command of the Sphinx to the North Pacific in search of the shipwrecked crew of the English ship Norna, whom, after a four months' search, he succeeded in finding and rescuing. He was made commander in September, 1862, by Admiral Sir James Hope, and appointed afterwards by that officer to the Ringdove. Since the arrival of the Ringdove at Portsmouth, Commander Brown, his officers and crew, have been formally tried by court-martial for having grounded that vessel on the Bombay shoal while on her passage from Hong Kong to Labuan. Commander Brown was reprimanded, the master admonished, and the remainder of the officers and crew were acquitted.

The *Army and Navy Gazette* has the following notices:—

"We mentioned last week that Major-General J. Rowland Smyth, C.B., was to have one of the vacant divisional commands in India, either in Bengal or Madras. We believe the gallant general is likely to be posted to that in the Madras Presidency, which Major-General M'Cleverty now holds. No arrangement has yet been made for filling the divisional command in Bengal, about to be vacated by Lord George Paget, on his appointment as Inspector-General of Cavalry.

"The command of the troops in Ceylon may be considered vacant, as, we regret to learn, Major-General O'Brien's state of health makes him anxious to return home before the expiration of his five years' term of service in November, 1865.

"Colonel M'Murdo will be succeeded as Inspector-General of Volunteers by Colonel Erskine, who has for some time very efficiently discharged the duties of deputy inspector.

"Colonel W. O'Grady Haly, C.B., of the 38th Regiment, will succeed to the divisional command in the Madras Presidency, which will be vacated by Major-General the Hon. A. Spencer, in March next."

The 2nd battalion of the 9th Regiment embarked on board Her Majesty's troop ship Tamar, for China, on the 3rd of November.

The report of the officials connected with the Steam Reserve who were directed some time since to make an inspection of the various vessels comprising the Chatham Steam Reserve, prior to a number of the steamers which are no longer fit for actual service being either broken up or sold out of the service, having been under the consideration of the Admiralty, their lordships have decided on the immediate breaking up of a number of the paddlewheel and screw steamers now encumbering the channel of the Medway between Chatham harbour and Sheerness. The steamers, the orders for the breaking up of which have already been received, are the paddlewheel steamer Dragon, 6, 1,270 tons, 560 horse power; the Hermes, 6, 830 tons, 220-horse power, paddlewheel steamer; the Alacrity, 4, 675 tons, 200-horse power, screw sloop; the Renard, 4, 680 tons, 200-horse power, screw gunvessel; and the Wrangler, 4, 477 tons, 80-horse power, screw gunvessel. The whole of the vessels to be broken up will be removed round to the Thames, at Charlton, where extensive docks and premises have been taken by the Admiralty to be used as a breaking-up yard for ships of war. The contract to supply the labour for breaking up the vessels has been taken by the firms of Messrs. Castle and Sons and Mr. Beech. The boilers, engines, and machinery of each of the ships to be taken to pieces will be retained by the Admiralty, together with the whole of the copper bolts and metal, which latter will be returned by the contractors. The Dragon will be towed round from Chatham to Charlton in the course of a few days, and the other vessels named will afterwards follow.

ADMIRAL SIR MONTAGU STOPFORD, K.C.B.—The Hon. Sir Montagu Stopford, K.C.B., died on the 10th inst. at South-East Circus-place, Edinburgh. Admiral Stopford was the fourth son of the Earl of Courtown, by a daughter of the third Duke of Buccleuch, and was born in 1798. He entered the navy in 1810, and assisted at the conquest of Java in 1811; accompanied Lord Amherst's embassy to China, and was wrecked in 1817 on his passage home; commanded Her Majesty's ship *Pique* from 1842 to 1846, on the North American and West India stations; was appointed a rear-admiral in 1853; served in the Black Sea in 1854 and 1855, and was made a K.C.B. for his services before Sebastopol in the latter year. In 1857 he received from the Emperor of the French the order of Commander of the Legion of Honour, and was made a Knight, second class, of the Medjidie by the Sultan in 1858, in which year also he was appointed superintendent of the dockyard at Malta. In 1861 he was made a vice-admiral, and in 1863 became admiral.

THE ANGLO-INDIAN TELEGRAPH.—A convention has been concluded at Constantinople between the British Government and the Porte for the working of the Anglo-Indian telegraph. A Turkish office will be established in Fars, where the land and submarine lines meet. One wire from Constantinople will be exclusively used for Indian messages. The Brussels convention is to apply to the general service. The tariff for a single message from Constantinople to Fars will be 22f. 50c.

THE sum of £4,000 has been presented to the Devon and Exeter Hospital, by Mr. J. C. Bowring, of Larkbear, Exeter, eldest son of Sir John Bowring, in furtherance of the wishes of the late Lady Bowring.

Continental Intelligence

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Nov. 15.

Nearly all the Ministers have replied to the observations and remarks that have emanated in the sections, and have met all objections to the extent possible. The most important reply was that of the Minister of Marine. He endeavoured to prove that his system was not more undecided and expectant than was rendered necessary by the general situation. Of course he will defend himself by the same reasoning against the Opposition in the Chamber, but I doubt whether he will convince the majority, which is inimical to his system. I the more believe that this prognostication will prove correct, as Mr. Thorbecke seems ready to accept his resignation.

Mr. Betz, the Minister of Finance, has positively announced that the Bill for abolishing the stamps on newspapers cannot come into operation before the 1st of July 1866, even if it should be voted by the First and Second Chamber; he has, therefore, another six months before him, which is a further reason for believing that the tax upon knowledge will not be abolished at all. The Minister has also shown that it was desirable to continue selling the Government coffee at monthly auctions, and that the amount produced by the sale of colonial produce would not be much inferior to that of former years, because prices would rise in proportion to the diminution in the quantity produced. Moreover, he holds that the expenses in Java will not be so considerable as in former years.

The sittings of the States-General were resumed on Saturday last, with the debate on the Agatha Bill. The Government proposal referred to the private sale of the extensive property of the monastery of St. Agatha to four priests, on very favourable terms. There was so much opposition against this sale, as well in the Chamber as in the Press, that the Bill was rejected yesterday by 34 against 30 votes. This is a very serious check for the Cabinet.

The reports of Captain J. E. de Man, commander of the squadron in the waters of Japan, caused but little enthusiasm here. His narrative of the affair has called forth some sharp criticism from the independent portion of the Press.

The measures of the Governor-General of the East Indies in reference to offences of the Press have been since the last mail the topic of the day. The *Nieuwe Rotterdamsche Courant* was their principal defender. The general feeling is in favour of a law placing the press in India on a footing with that at home; and there are reasons for believing that Mr. Fransen van de Putte will lay such a Bill before the Chamber.

His Majesty is at his seat "het Loo." The Prince of Orange is again on a visit to Paris and Compiègne.

Mr. D. Baddingh, ex-Professor of the University of Delft, has addressed himself to the States-General, begging that his salary may be paid to him for the future, or that otherwise he will not be able to pay his taxes. This is an excellent occasion for his friends in India to do him a good turn.

The position of our money market is tending somewhat to improvement, and there are some indications that the Bank rate, still 7 per cent., will be reduced. For the present, however, it can only be said that matters are rather easier in commercial circles; for failures, though not heavy ones, continue to be announced. The statement in the *Shipping and Mercantile Gazette* that Messrs. Koch and Vlierboom were amongst the latter is entirely untrue, and those gentlemen intend to prosecute that paper for the false report.

COMMERCIAL.

COFFEE.—With much demand, but the sellers ask such considerable advances, that only a few transactions took place. Good ord. Java can

Digitized by Google

scarcely be bought at 43½ cents. On the 23rd the N.T.C. will sell at auction 85,000b.

TEA.—The demand is very languid. On the 18th will be offered at private auction 172½ and 218½chs. ord. Congou, and 200½ very ord. Pouchon.

SUGAR (Raw).—The market is somewhat firmer, but very few parcels are offered. 301 kr. Sourabaya, No. 14, ex S. van Heel, and 147 kr. Samarang, No. 16½, ex Australie, were sold at f.1 under the September prices.

RICE.—Without transactions.

SPICES.—According to the unfavourable information from London there was scarcely any demand for export. Nutmegs: No. 1, 86c., No. 2, 76c. Cloves: No. 2, 33c. Cinnamon: No. 3, 1864, with much demand at the rate of 86 to 87c. Pepper: The importers seeing the quantity afloat now reduced to some hundreds of bales, show great firmness.

TOBACCO.—Java: Without transactions. Considerable auctions are waited for in the first days of December. Stock, 11,033b.

COTTON.—The market was very active at higher prices.

BANCA TIN.—Dull, f.59½.

COCOA OIL (COCHIN).—f.24.

HEMP.—Riga, f.70; Bombay, f.50; Manila, f.59 to f.60.

INDIGO.—In more request at former rates. 350 chests have arrived per Adriana Petronella, but are not yet in the market.

RATTANS.—603 bdls. ex Jhr. Mr. van de Wall van Puttershoek, and 1,408 bdls. ex Stad Leyden, were sold at firmer prices.

MONEY MARKET.—Bank discount, 7 per cent., open market; Prolong. 7½ per cent; discount, 7 per cent.; N.W.S., 2½ per cent., 61½; 3 per cent., 72½; 4 per cent., 95 9-16. Handel Maatschappy, 134½; Maatsch. van Handel and Nyverheid, 70 per cent.; Change, London, 3 m., f.11.50; 2 m., f.11.58; short, f.11.75; Paris, 3 m., f.45.75; 2 m., f.46; short, f.46.55; Hambro', 3 m., f.34.50; 2 m., f.34.70; short, f.35.

PASSENGERS INWARD.

From Yokohama, per Twee Cornelissen, Captain Kreije: Mr. A. van den Brock.

PASSENGERS OUTWARD.

To Samarang, per Peking, Captain Deinum: Mr. J. Stoové.

SHIPPING INTELLIGENCE.

ARRIVALS.—Nov. 10, at Brouwershaven, Adriana, Petronella, from Batavia; 11, at Texel, Twee Cornelissen, from Yohohama; 13, at Brouwershaven, Hendrik-Ido-Ambracht, from Tjilatjap; 14, Whampoa, from Batavia; 12, at Texel, Koning Willem II., from Batavia; 14, Petronella, from Bantam; Allegonda Jacoba, Sperwer, from Batavia; at Zierikzee, Nederland, from Batavia.

DEPARTURES.—Nov. 6, from Brouwershaven, Emilie, for Batavia; 10, from Hellevoet, Waalstroom, for Decima; from Flushing, Miranda, for Hong Kong.

FREIGHTS.—Quotations of Messrs. Fauchez and de Vletter, shipbrokers, Rotterdam:—For Batavia: J. C. Schotel (632 tons); Fop Smit (549 tons), 18f. to 20f. For Batavia and Sourabaya: Koophandel (531 tons), Graaf Dirk III. (598 tons), 18f. to 20f. for Batavia, 25f. to 30f. for Sourabaya. For Batavia and Samarang: Baron van Heemstra (752 tons), 18f. to 20f. for Batavia, 25f. to 30f. for Sourabaya. For Samarang: Maria Magdalena (403 tons), 25f. For Macassar: Koning Willem III. (422 tons), 45f. For Padang: Whampoa (462 tons), 30f. for heavy, 45f. for light goods. All per last of 2,000 kilos., or 120 cubic feet Amsterdam, and 15 per cent. For Melbourne (HB): Susanna (959 tons), 30f. to 50f., and 15 per cent. per 1,000 kilos., or 40 cubic feet English. For Decima and Kanagawa: Japan Packet (256 tons), 60f., and 15 per cent. per last of 80 cubic feet English. For Singapore and Hong Kong: Gouveneur van Swieten (352 tons), 30f. to 35f. for Sourabaya, 40f. to 45f. for Hong Kong, both per ton of 40 cubic feet English, or 1,000 kilos., and 15 per cent.

LOADING.—At AMSTERDAM.—For Kanagawa and Decima: Libra, Joan Melchior, Kemper, Ferdinand and Louis. For Padang: Maria Agnes. For Macassar: Quatre Bras. For Batavia: Friesland, Pollux, Doesborgh, Anna and Sophia. For Batavia and Sourabaya: Willem Hendrik. For Samarang: Machtilda and Simonetta, Madura, Johanna, Christina, Nicot. For Sourabaya: Sourabaya Packet, Willem Daniel, Capella, Baltimore.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

NOVEMBER 14.

From St. Petersburg we learn that Mr. Collins has arrived in that city from America, for the purpose of negotiating with the Russian Government on the subject of the extension of the telegraph destined to connect the two hemispheres. According to the despatch addressed by Mr. Secretary Seward to Mr. Perry McDonough Collins, and the project laid before the Congress of the United States, a line of telegraphs is to be constructed from some point in the North-Western States of the Union, or their territory on the Pacific, through British Columbia, the Russian-American possessions, thence by a short submarine cable of only thirty miles under Behring's Straits, from Cape Prince of Wales to Cape East, the extreme point of the Asiatic continent. From this spot it is to be continued by a submarine line under the Gulf of Anadir, thence by land across the neck of the Peninsula of Kamtschatka, and round the shores of the Sea of Ochotsk to the mouth of the Amoor, to join the great Russian line of communication with St. Petersburg, and thence with the whole of Europe. Partly to correct some mistakes in Mr. Seward's despatch, and partly to rectify some false impressions that have got abroad and been incorrectly stated in the newspapers, the Russian Telegraph Department has just published an official account of the present state of the works. From this it appears that the line from St. Petersburg is completed and open for public traffic as far as Irkutzk, the seat of Government in Siberia, from whence wires have just been put up, and are opened to Kiachta, the last Russian town, and situated close to the frontiers of China. From this point the telegraph will be eventually carried on to the town of Ourga, and thence through Mongolia and the Great Desert of Gobi to Peking, terminating at Tien-tsin, on the Gulf of Petchili. "But," says the report, "when this extension of the line will be carried into execution is not yet officially decided." On the other hand, a line of telegraph hitherto intended for the exclusive use of the Naval Department is being constructed along the right bank of the Amoor, from Charabofka to Nicolayefsk, to be continued by-and-bye up the Ussouri, and thence to the Gulf of Possiet, in the Sea of Japan. In the concession applied for by Mr. Collins, but not yet granted, the Russian Government is required to construct the line from Wershne-Udinsk to a point on the Amoor, to meet the American line. This comprises a distance of 3,000 versts, or 2,000 English miles, and its execution on the part of Russia is made dependent on the funds being subscribed in America, so as to ensure the performance of their part of the contract within a given period of time, to be fixed by mutual consent. Mr. Seward's statement that this line has been commenced, and is going on with activity, appears, therefore, to be a fiction, whilst the other telegraphic lines mentioned by the American Minister as being about to be executed by Russia, viz:—1, from the mouth of the Amoor to Jedo, the capital of Japan; 2, from the Onisk in Siberia through Mongolia, China, Turkestan, Bokhara, to Cabool, and thence to form a junction with the Indian lines; and 3, from Kasan along the west coast of the Caspian Sea, through Caucasus and Grusia to Teheran, and thence to Bagdad, and down the Euphrates to the Persian Gulf, to join the lines in British India—all these are purely emanations of a strong imagination, but have never as yet been taken into serious consideration by the Russian Government, though it is far from being improbable that they may be eventually executed, at some distant period. On the other hand, it may here be remarked that there is now in existence telegraphic communication from St. Petersburg and the rest of Europe, by way of Kasan, Saratoff, Stavropol, and Vladi-Caucasus to Tiflis; and thence by Erivan to the Persian frontier, where it joins the line constructed by that Government of Persia through Tauris to Teheran, from which city it is being continued in two directions. One of these goes through Ispahan and Shiraz, to Bender—Bushire, on the Persian Gulf—to join the line to Kurrachee and the other parts of British India; whilst the other is to be laid by way of Hamadan and Kirmanshah to Chanegin on the frontiers of Turkey in Asia, in connection with the English telegraph from Constantinople. Thus it appears that a long time will probably intervene before the projected telegraphic communication between the Old World and America be completed by way of Behring's Straits; and if the new Atlantic telegraph cable be successfully laid in the spring, Mr. Collins's plan will be superfluous, and probably fall to the ground.

The navigation at St. Petersburg closed on the 22nd of October, and on the 24th the Neva was passed by sledges on the ice.

From the year 1706 down to 1864 the Neva was closed by ice twenty-five times in October, one hundred and twenty-one times in November, and only thirteen times in December.

COMMERCIAL.

COFFEE.—A lively demand has again sprung up, prices are in consequence remarkably firm, and the market is in a satisfactory condition. Sales of the week, 12,000 bags.

SUGAR.—For the raw article there has been but small inquiry, and prices remain without alteration. Refined, calm, and values fully supported.

RICE.—Though the dealings have not been unusually large, all descriptions are creeping up. A cargo of 9,000 bags of East India has arrived per *Bengalen* from Calcutta, and been warehoused, as the importers anticipate shortly a further advance.

SPICES.—Business confined to the execution of orders for the requirements of the trade, and in quotations no alteration to report. Cassia Lignea continues to realise 9½ to 9¼ sch. bco. Sumatra Pepper fetches 3⅜.

SPELTER.—A further improvement has taken place in the value of this metal, and a greater degree of animation is visible in the market. About 10,000 centners have changed hands since last mail at successively rising prices, the latest sale being made at 14¼ marks banco, and in the present firm state of the market no sellers are to be found willing to take less than 14½.

LONDON, FRIDAY, NOV. 18, 1864.

THE COMMERCIAL PROGRESS OF CEYLON.

A PAPER which was read on Tuesday evening at the opening of the session of the Statistical Society of London led to an interesting discussion. The subject was "The Commercial Progress of the Colonies in the five years between 1858 and 1863," by Mr. E. T. BLAKELEY, of the Board of Trade. The field of discussion is too wide to be taken up *in extenso* in our columns. The consideration of one of the most important—Ceylon—will, however, suffice to illustrate the great advance which has been made. Without entirely following Mr. BLAKELEY's figures, which were confined entirely to the colonial estimate of the aggregate external trade and revenue, we prefer to look at the colony from the British aspect, taking in the first instance the trade with the mother-country, as regards imports and exports, estimated at the British computed value, which, taking into consideration freight, importer's profit, &c., shows a widely different value from that assumed in the colony where the articles are shipped. Coffee, it is true, forms the chief export, but there are a few other articles of growing importance, as cocoanut oil, coir, cinnamon, plumbago, &c. The value of our imports from Ceylon have risen from £1,304,000 in 1856 to £3,701,000 last year, and the exports of British produce and manufactures to the island from £411,000 to between £570,000 and £670,000. Here are the trade figures for five years:—

	Value of Imports.	Of Exports.
1858	£1,679,852	£541,131
1859	1,654,391	667,387
1860	2,274,648	671,219
1861	2,251,019	486,655
1862	2,488,262	573,998

Last year the value of the produce imported from Ceylon was £3,700,806, and it is the coffee production which has thus served to swell the value. Our direct imports from Ceylon having risen from 43¾ million pounds in 1858, to nearly 80 million pounds in 1863; whilst there is also an enhanced value in price. In 1858 there were 556,391 cwt. of coffee shipped from Ceylon, and in 1862 600,546 cwt., from 120,000 acres under culture. Thé increase is chiefly in plantation, which shows an advance of about 100,000 cwt., for the native-grown has declined some 70,000 cwt. With increased labour, improved roads, more machinery, high cultivation, and a judicious system of pruning and handling the trees, we see no reason why the coffee export, which has increased tenfold since 1840, should not before another ten years reach 1,000,000 cwt. Passing from the commercial progress to the fiscal position of the colony, it is satisfactory to find that while the revenue raised is being gradually reduced, the amount, about £711,000, must fall very lightly in taxation upon a population of 2,000,000, and even most of this sum is expended on improvements and public works, roads, streets, and bridges, lighthouses, electric telegraphs, &c. There are already 307 miles of telegraph wires maintained, a railway from Kandy to Colombo in course of formation, about 1,900 miles of road maintained, and 130 miles of canals. Technically speaking, the colony has no debts except a very small sum incurred on account of the late Ceylon Railway Company.

There is one matter which is just now occupying a large share of public attention in the island, and which certainly is at variance with the sentiments advanced by some of the speakers at the meeting of the Statistical Society. When Mr. NEWMARCH spoke so energetically and enthusiastically of the freedom accorded to all our colonies of legislative action and the appropriation of their colonial resources, he certainly must have been unaware of the sum which is attached by the Colonial-office for military expenditure, the payment of which many of them neither ask for nor require. There appears to be 3,000 military in Ceylon, and we are not quite sure whether even this number does not include the Ceylon Rifle Corps. A great outcry is made as to the military and naval expenditure for the colonies, and this complaint found exponents among the Statists; and yet the colonies are not allowed to relieve themselves from this stigma. In 1862 we perceive £24,000 on the Ceylon estimates for contribution towards military expenditure; and again, in 1863, they are saddled with an increased charge for what they do not require, and the sum of £30,000, besides several items of house rent and travelling allowances, was claimed by the Home Government from the colony for the military. Although the Legislative Council refused to vote the supply, the Secretary for the Colonies has insisted on its payment, thus setting the Legislature at defiance. We cannot wonder at the indignation of the Legislature and the commercial community generally at this infringement on its rights and privileges. Sir HERCULES ROBINSON, the new Governor, will find, on his arrival, he has a delicate matter of question of privilege to arrange, but one with which he will be thoroughly conversant, seeing that the Legislative Council of Hong Kong have taken the same view as their brethren in Ceylon, and thrown out the Bill requiring a vote for military expenditure not sanctioned by the colony.

THE FRENCH IN COCHIN-CHINA.

(FROM OUR PARIS CORRESPONDENT.)

M. Aubaret's treaty with the Annamite Government has given rise, we understand, to much discussion and wide differences of opinion amongst members of the Imperial Cabinet. The matter was expected to be settled and instructions sent by the present out-going mail. Possibly there is an object in this, and the public will not be told what has been done until after the departure of the mail. In the meantime, some few facts have been brought to light respecting M. Aubaret's change of opinion which may be worthy of notice. This gentleman, it will be remembered, was captain of a frigate in the Imperial navy, and became aide-de-camp to Vice-Admiral Bonard, Governor and Commandant in Cochin-China; when he came to France last time he found a party in the Government very favourable to the restitution to the Emperor of Annam of the provinces of lower Cochin-China which had been ceded to France. The project of this party was that France should retain the town of Saigon, and there form a vast commercial settlement which, in the words of its reporters, "should rival those which the English possessed at Shanghai, Hong Kong, and other places in China." M. Aubaret combated this idea with all his power, and wrote an official note which was lithographed and sent to each member of the Government. This was in the month of August, 1863, and the main points of the document were as follow:—The restitution of the territory in question in consideration of an indemnity which the Annamite Government so much desire (and which it was the special duty of the ambassadors sent to Europe to obtain) would be equivalent to a total abdication on the part of France of her power in that part of the world where European influences are extending daily, and the French would thereby immediately fall in the eyes of the Annamites "far below a power of the third class." As to the establishment of a great commercial centre at Saigon, M. Aubaret then thought that it was a chimera; the Kingdom of Cochin-China, he said, "without question, was the best administered and the most hierarchical in the East; authority was acknowledged without constrain and obeyed in the most minute particulars" (a kind of Eastern Utopia realised). As to the chances of commerce at Saigon, M. Aubaret was then of opinion that the Annamites would easily find means of cutting off the supplies. He declared that it was idle to quote the case of Shanghai, as the condition of China was totally different from that of Cochin-China; that in the former authority was so weakened that the governors could not arrest the mercantile spirit which was especially a characteristic of the Chinese, whereas in the latter the people where purely agricultual, and the power centralised

Digitized by Google

at the capital would be obeyed to the very frontiers, and the French would find themselves in the same condition as in Japan. His conclusions were explicit enough, and we quote them *literatim*:—"There remains now nothing to be done but to consummate our conquest, and to draw from it the best possible results in fairly considering the laws of humanity, our political interests, and pecuniary sacrifices." . . . "In short, we cannot without loss of prestige abandon our provinces in Cochin-China. To exchange them for a commercial settlement only would be a useless sacrifice and equivalent to evacuation. There remains nothing then but the substitution of our authority for that of the Annamites; and this substitution is perfectly possible."

Since the issue of that note M. Aubaret has quitted the naval for the diplomatic service, and, as is well known, has been appointed Consul and Charge d'Affaires at Bangkok, and was entrusted with the negotiation of the questions between the Courts of Paris and Hué. It is quite natural that a party, from patriotic feelings, should strongly object to the cession of the provinces in question, as placing France in the position of retracting the steps she has taken; and, of course, this party does not take into account the fact that the expedition was undertaken on the clearly expressed condition—nay, promise, to the Legislature and the French nation—that not an inch of territory should be acquired. It may be said that such professions are constantly made and as constantly violated; but, in this instance, France was dead against the enterprise except for the punishment of those who had murdered the missionaries, and, therefore, the promise was a sacred one; but, nevertheless, like some others, was grossly violated.

Nor is it at all surprising that those who thought with M. Aubaret in 1863 should be angry with him for his apparent inconsistency, but they forget that while they have stayed at home nursing their old opinions, he has seen much more of the Annamites and the Siamese, and is, perhaps, a wiser man than when he penned the note quoted from above. Those who know anything of what has been the course of commerce at Saigon since the French occupation will fully corroborate M. Aubaret's opinions respecting the power of the Annamite authorities over the trade of the country, and it is not likely that those opinions have undergone any change since his return to the East; but he may, from his more extended experience, have arrived at this conclusion, that the Annamites will never rest under the loss of the provinces in question, and that France, to secure her authority, would have to embark in a long, tiresome, and unpopular war, in a climate terribly fatal to Europeans; and that during its continuance, if not even after its termination, the stream of trade to Saigon would be damed at the source, and that, therefore, it would be far wiser to please the Annamites by giving them back their provinces, and thus open up the only possible chance of Saigon becoming the "first entrepot in the East," as it has already been called a hundred times by the patriotic French party, or even of its trade recovering the terrible diminution which has been the result of the French occupation. The French have something more yet to do besides diplomatic and administrative work before Saigon rivals Hong Kong, Shanghai, or Singapore.

THE LEGEND OF TIE-OUANG.

UNDER this title the evening *Moniteur* of Paris has a very queer story, which it declares to be derived from a Chinese source, and of which the following is an epitome:—Three or four hundred years ago, we are told, entire equality reigned in China between men and women; both could reign, both dressed in the same manner, and *golden lilies* were then unknown. Women could make war, and did it, and a list of Amazons is given, of whom MOU-KOUI-IN, "Empress of Chen-Tou," was one of the most remarkable. JEN-IE-TSIEN, Governor of Tan-Tcho, met the famous EMPRESS in battle, and did not get the best of it, for he found himself lying on mother earth with the lady's foot upon his body, and her lance just about to transfix him; but he managed to slip away, and got back home very crestfallen, but very angry. He told his misadventure to King TON-TAI-TSUN, who recommended him to send his son, JEN-TSON-PO, to revenge his defeat, which the young man very properly undertook to do. A day was appointed for the affair to come off, but young JEN-TSON-PO had a suspicion of himself, and asked his conscience quietly whether it was really the battle he longed for so much, or whether it was a secret yearning to see the beautiful Amazon, who likewise, on her part, we are told, had anything but fire-eating towards the handsome young soldier. The day came, and so did the two opponents; but they neither fought nor conquered. Dan Cupid was victor. The lady fair and the brave young knight no sooner set eyes on each other than they both turned very pale, and their emotion was visible to all; their eyes met, but instead of flashing with rage and fury, sparkled with love and tenderness. For a long time they looked at one another without uttering a word, when suddenly the EMPRESS, using her lance as a leaping pole, vaulted lightly from her horse and advanced towards JEN-TSON-PO, who, not to be behind-hand in gallantry, followed the lady's example, and in an instant was at her feet, as his father had been before him, but in a different manner, and at the very moment that the soldiers expected the signal for the combat to commence, the lady and gentleman were in each other's arms!

Not long after this the young gentleman's papa heard that his scapegrace was married to the EMPRESS and swore that he would cut him off, not with a shilling, but with the sword of the executioner. A year later the son begged his father to forgive and receive him, the GOVERNOR traitorously consented, and when the young man was in his power, had him arrested and condemned him to death. JEN-TSON-PO's uncle interceded for him, but got snubbed for his pains, and went and told Mrs. J.—that is to say, the EMPRESS—of the plight her young husband was in. The lady arrived in the twinkling of a bedpost, and when she appeared the GOVERNOR was seized with such terror that it took two men to hold his nerves quiet. Her Majesty MON-KOU-IN knelt at her father-in-law's feet, turning her head over her shoulder, as is the custom in such cases. "What do you want?" shouted the GOVERNOR, rudely. "I want three things," said the lady; "I offer you peace." "Done," said the GOVERNOR. "What next?" "I lay my sceptre at your feet," and, accordingly, she placed it in his hand. "And I "want you to detach my husband from your door where you "have tied him." At this the GOVERNOR turned the colour of a red cabbage or of bullock's liver, and swore that his son's head should fall within an hour! At this the EMPRESS lost all patience, drew both her swords, and gave the GOVERNOR such a terrible fright that he consented to all she asked. The traditions of this famous EMPRESS are known all over China.

But there was another lady also an EMPRESS, be it observed, who governed Nanking a few years ago, only her name was LIEON-TCHAN-TCHIN. She was reported to be a sorceress, cut out men in paper, and transmogrified them with a few words into armed warriors—an admirable method of recruiting an army! This EMPRESS had a number of agents whose duty it was to go about the country collecting men of intellect and muscle for her service. One day three of these gentlemen met a youth at Canton who went into a temple in company with his uncle, the agents following at their heels. The young man looked wistfully at the necklace of the god Fo, and said, "I would give a great deal to have one of those superb pearls," whereupon one of them fell at his feet! His uncle, however, prevented his picking it up, saying that what was supernatural was also mischievous. "If that is the case," said the young man, "the pearl may go back as it came," and so it did, immediately! The three agents were struck by this scene, and said that the young man was evidently an extraordinary being, and destined to greatness; and, finally, having got him to take a walk with them, pounced upon him, carried him on board ship, and soon had him in the presence of the EMPRESS. "An Emperor has fallen from Heaven, your Majesty," they said, "and we have picked him up and brought him here." The uncle went home, and related what had happened to the young man's parents, and they went and complained to the Mandarin of the city, who said, "You want to bring me into "communication with the Taipings," said the Mandarin, "but "that is not my business; however, I will write to Nanking "for you." He wrote to the Prime Minister, who answered in the young EMPEROR'S name—"I have neither father, nor mother, nor uncle; I am the son of Heaven." The EMPRESS abdicated in favour of her young kidnapped husband, who reigned as TIE-OUANG, and died the other day at Nanking.

"The account," says the narrator, "does not agree with "that given of TIE-OUANG by travellers and missionaries—"which will be at once admitted; but, at any rate, it has the "merit of having been gathered directly from the mouth of a "native of the Celestial Empire," which is certainly something to say. Moreover, its very novelty ought to be a recommendation.

NEW JAPANESE EMBASSY.

BERNE, Nov. 17.

The Japanese Government has announced to the Federal Council the proximate arrival of a fresh embassy from that country, who will visit Switzerland in the course of their travels.

Literature.

The coming winter is evidently to be a season of extraordinary activity in the publishing world. Every class of literature is amply represented in the lists of forthcoming works. With reference to those more particularly connected with China and the East, we are promised a personal narrative of a visit to parts of Asia of some of which we have had no account from a European wanderer since the days of Marco Polo. Mr. Murray, of Albemarle-street, will issue almost immediately *Travels in Central Asia;* being the adventures of Arminius Vambéry, member of the Hungarian Academy of Pesth, by whom he was despatched on a scientific mission, in the course of which, disguised as a dervish, he succeeded last year in penetrating across the Turkoman desert on the eastern shore of the Caspian, to Khiva, Bokhara, and Samarcand. Two other works of deep interest, to issue from the same publisher, are *The Siberian Overland Route from Peking to St. Petersburg*, and *The British Army in North China and Japan*. The first-named is the journal of Mr. Alexander Michie, during his traverse of the new route from the Far East, across the deserts and steppes of Mongolia, Tartary, Siberia, &c. The other is from the pen of Dr. D. F. Rennie, than whom it would be difficult to find a man more competent to inform us on the subject named in his title-page. Dr. Rennie, from being on the medical staff of the British army in China, was selected to be attached in his professional capacity to the Embassy at Peking. He had so gained the confidence of the late Earl of Elgin that his lordship applied for his favourite medical adviser to be allowed to follow him to Calcutta. The application, however, was not early enough, for Dr. Rennie found when he arrived in India that his distinguished friend had already succumbed under the double exhaustion of the climate and the exactions of office.

Of Serials we are glad to record the issue of Part I. of the first volume of the new series of the *Journal of the Royal Asiatic Society*. The set recommences with two translations from the Chinese by the Rev. S. Beal, Chaplain R.N., of works belonging to the Buddhist ritual. There is a valuable paper by Mr. E. R. Power on "the Commercial, Financial, and Agricultural Statistics of Ceylon."—The October number of the *Chinese and Japanese Repository*, is in interest far in excess of the average of this periodical. We are first presented with most amusing "Reminiscences of the Opening of Shanghai to Foreign Trade," by W. H. M.,—initials that will scarcely serve to include the writer among anonymous authors. The "Story of Han-wan and the White Serpent" is concluded, and we are delighted to find that the finale is so far in unison with European notions that all ends happily. Japan is well cared for by papers on "Japanese Weights and Measures;" "Notes on Japan—No. I., the Royal Families," by Mr. Wal. Dickson; and the "Manufacture of Porcelain in Japan," translated from Japanese writings by Dr. J. Hoffman. We extract a note to Mr. Dickson's paper, bearing the initials of the Editor, the Rev. James Summers:—

The word "Tycoon" is from the Chinese "Ta-tsiang-kiun," literally "great leader of the army." The Japanese pronounce this word "Daisyó-goon," and they call this general by that name, or by two of the syllables of which it is composed. Thus "Daigoon" (*i.e.* Tycoon) or "Syó-goon," often printed "Siogun" and Siogoun."

SOCIAL SCIENCE MEETING.

PAPER ON THE CELEBES, BY MR. A. R. WALLACE.

The northern peninsular of Celebes is the only part of that island which is of volcanic structure. A considerable portion of it is elevated 2,500 feet above the sea, forming the beautiful plateau of Tondano, in the centre of which is a lake about twenty miles in circumference. Scattered about this plateau are volcanic peaks and ridges 6,000 or 7,000 feet high. A fertile soil clothes even the mountain slopes of all this region, and, assisted by the abundant equatorial rains and a mild and uniform temperature, supports a vegetation of great luxuriance and beauty. The Dutch have now had possession of this country for nearly two hundred years, having taken it from the Portuguese in 1677. The inhabitants, more particularly in the central plateau, differ from those of the rest of Celebes. They often approach to the fair complexion of the European, while they retain the straight black hair and general physiognomy of the Malay races. In character they are gentle and submissive, industrious, and easily educated. Up to a very recent period they were complete savages, and were almost always at war with each other. They built their huts upon lofty posts to guard against attacks, and decorated them with the heads of their slain enemies. Their clothing was strips of bark, and their religion was a degrading demon-worship. From this state of barbarism they have been raised to comparative civilisation in a short time by the Dutch Government. The country is now becoming a garden worthy of its sweet native name, "Minahassa." The villages are almost all like model villages, and the cottages like those one sees upon the stage. The streets are bordered with trimmed turf, and fenced with hedges of roses in perpetual bloom. Near every village are the most beautifully-cultivated and productive coffee plantations, while rice fields and fruit and vegetable grounds supply abundance of food to the inhabitants. In every village there is a schoolhouse, and in the larger ones a church also. The people are neatly dressed, and the native chiefs and schoolmasters would pass muster among respectable people in England. On arriving at one of these chiefs' houses, in a principal village, the writer was received by a gentleman in a suit of black; boys nicely dressed and with smooth-combed hair brought water and napkins for him to wash, and he was furnished with a dinner comprising every European comfort, finger-glasses, clean napkins, claret and beer, along with a variety of well-cooked native dishes. The house was handsome and lofty, the chairs and tables were of fine native woods, and though made by self-taught natives were of superior workmanship to any but the very best we get at home; and as he sat in the verandah taking coffee his eye was gratified by the sight of beautiful flowers, which, in this delightful climate, are perpetually renewed. This great change is the result of the introduction of the coffee-plant under Government superintendence, and of the labours of Dutch Protestant missionaries. The native chiefs were induced to further the views of the Government by the promise of a per-centage on the coffee produce of their district, and the whole system is carried out by them, under the advice and support of the inspectors and Dutch residents. Each family in a village works in the plantations; an account is kept of the number of days' labour each gives, and when the produce is sent to the Government warehouses, and paid for at the fixed price agreed upon on the formation of the plantations, the amount is divided proportionately among the inhabitants. The system of the Dutch, as carried out here and in Java, he considers as most excellent, and especially valuable as a step in the education of an uncivilized race; and he cannot but contrast it with the deplorable results of the free competition of antagonistic races in New Zealand, which can only end in the extermination of a people which it seems probable would, under more favourable conditions, have been capable of improvement and civilisation.

THE STEAM SERVICE FOR JAVA.

The Netherlands India Steam Navigation Company (Limited) are actively engaged with the construction of their fleet of new steamers for the service of the Archipelago, and its connection with the European mail lines on one side, and with Australia on the other, the first of which will be launched next month from the ship-yard of Messrs. Randolph, Elder, and Co., on the Clyde. The company have, we think, very wisely resolved that these steamers shall be built mostly upon the "Composite" principle; that is, with an iron skeleton and teak exterior coppered, by which the evils and drawbacks of rapid fouling, which invariably attend iron bottoms in those inter-tropical waters, will be entirely escaped. The steamer *Sea King*, for the China trade, was built on this principle.

GLEDSTANES AND OTHERS V. THE CORPORATION OF THE ROYAL EXCHANGE.—This was a special case, which lasted the greater part of the day, and raised a question of some importance to marine insurance companies. The plaintiffs were the London agents of the Hong Kong Insurance Company, who were in the habit of insuring cargoes which were to be shipped from India to England, before the amount of the cargo was really known, or even the name of the ship; but they never effected policies of that kind above the amount of £5,000. Between them and the defendants there was an agreement that the latter would undertake the risk of any excess should the former effect any policies for larger amounts. In the present instance the plaintiffs had effected a policy upon certain goods, which were to be shipped from Calcutta to England, and the defendants undertook the risk of the excess, the policy being for the sum of £7,000, and dated the 13th of March, 1859. Previous to that date, viz. —the 15th of March, 1859—the only message that ever passed through the Red Sea Cable arrived in London to the effect that the Red Gauntlet had been burnt and scuttled; and that part of her cargo would perish. It was admitted on all sides that both parties knew of the loss of the vessel previous to the making of the policy; but neither of them knew that the insured cargo was in her. The defendants, however, refused to pay the risk above the sum of £5,000, viz., £2,000, on the ground that the plaintiffs knew of the loss of the vessel previous to the policy being effected on the cargo. Mr. Lush, on the part of the plaintiffs, contended that the defendants were liable to be charged with the excess. It was true that the plaintiffs knew of the loss of the vessel upon the 16th of March, 1859, which was previous to the date of the policy; but their practice was to insure goods before it was known what vessel they were to be consigned in, and that the defendants knew perfectly well. At the time of the making of the policy the plaintiffs had not the slightest knowledge of the contents of the *Red Gauntlet*, and, therefore, the insurance was a perfectly good one, and one by which the defendants ought to be bound. Mr. Bovill, on the part of the defendants, contended that inasmuch as the policy was made after the knowledge of the loss of the vessel it was a bad one, and one upon which the assured could not recover. The Court were of opinion that the policy was a good one, and gave judgment for the plaintiffs, which we consider quite warranted.

NANKING BLUE CHINA.—Among the most interesting collections of works of art on loan at the South Kensington Museum is one of great interest and importance to designers of ceramic decorations. This is the fine selection of specimens of old Nanking blue china, the property of Louis Huth, Esq., now placed in the Oriental Court of the Museum. We commend these specimens to students as exemplifying, in a characteristic Oriental manner, the true principles of decoration for such works, whether as regards colour or form. Most of the articles are large and splendid.

Monetary and Commercial.

A call of £5 is to be paid on the shares in the Commercial Bank Corporation of India and the East by the 8th December. The directors, having complied with the provisions of the charter, have obtained the official sanction of the Treasury to proceed with business under the new title.

The Singapore Gas Company are advertising for loans on debentures at 6 per cent. interest.

The Bank of Hindustan has arranged with the National Bank that the drafts of their various branches in India and China should be drawn on that bank, in addition to their present arrangement with the Alliance. The National is an old-established and first-class institution, with unlimited liability, with a large capital and a reserve fund of £700,000. The current quotation for the £30 share is £75 to £80.

The failure has also been announced of Messrs. Elliot and Co., Austin Friars, engaged in the China trade, chiefly in running vessels on the coast. They have been established about four years. The amount of the liabilities and assets has not been stated.

We have before alluded to the difficulties of the firm of Halliday, Fox and Co., in the Rangoon and general East India trade. The formal announcement was made on the 12th. The liabilities are stated at £1,900,000, and the assets will, it is believed, yield 15s. in the pound. The cause of the failure is over trading and too great eagerness to become in three years equal to the old-standing East India houses. They despatched a private agent to Burmah to negotiate for special privileges in the opening of the trade with Western China, a project which has been pursued, as our readers are aware, by Capt. Sprye. They had some transactions with China through Messrs. Ellissen and Co.

A meeting of the shareholders of the British India Steam Navigation Company (Limited) was held in London on the 2nd inst. The accounts relating to the operations of the steamers for the first-half of this year were produced. After making a liberal allowance for repairs, depreciation, &c., an available balance remained sufficient to pay the usual dividend of 4 per cent. for the half-year, with a bonus of £1 per fully paid share, both free of Income-tax, and to carry forward a balance of nearly £6,000 to next half-year. The *Persia*, which was totally lost, and the other vessels of the company, which suffered in the late cyclone at Calcutta, are fully covered by insurance.

COTTON EXPORTS TO INDIA AND CHINA.

The following is from Sam Mendel's table of exports from London, Liverpool, and Clyde, from Jan. 1 to Oct. 25, 1864 :—

	Cottons. Yds.	Twist. lbs.
Calcutta.		
Month ending Sept. 30, 1864	16,023,539	375,019
Previously this year	119,001,523	6,177,528
	135,024,791	6,552,547
From Oct. 1 to date	12,243,854	407,129
Total to date	147,268,646	6,959,676
Bombay.		
Month ending Sept. 30, 1864	13,277,876	714,086
Previously this year	84,484,951	3,432,917
	97,762,827	4,147,003
From Oct. 1 to date	8,400,204	342,886
Total to date	106,163,031	4,489,889
Madras.		
Month ending Sept. 30, 1864	858,455	248,859
Previously this year	5,618,463	1,502,149
	6,476,918	1,751,008
From Oct. 1 to date	12,400	14,500
Total to date	6,489,318	1,765,508
Ceylon.		
Month ending Sept. 30, 1864	412,477	11,721
Previously this year	5,899,129	151,800
	6,311,606	163,521
From Oct. 1 to date	298,343	10,518
Total to date	6,609,949	174,039
Hong Kong.		
Month ending Sept. 30, 1864	1,436,216	89,880
Previously this year	17,122,738	1,333,530
	18,558,954	1,422,610
From Oct. 1 to date	170,931	40,000
Total to date	18,729,885	1,462,610
Shanghai.		
Month ending Sept. 30, 1864	1,376,025	20,000
Previously this year	24,496,539	85,249
	25,872,564	105,249
From Oct. 1 to date	31,200	—
Total to date	25,903,764	105,249
Singapore.		
Month ending Sept. 30, 1864	552,576	75,000
Previously this year	15,466,594	761,092
	16,019,170	836,092
From Oct. 1 to date	106,072	20,000
Total to date	16,125,242	856,092
Batavia.		
Month ending Sept. 30, 1864	191,679	—
Previously this year	6,219,201	237,305
	6,410,880	237,305
From Oct. 1 to date	366,288	11,600
Total to date	6,777,168	248,905
Manila.		
Month ending Sept. 30, 1864	—	—
Previously this year	6,970,550	41,150
	6,970,550	41,150
From Oct. 1 to date	189,738	20,400
Total to date	7,160,288	61,550

The Board of Trade Returns for the month and nine months ended the 30th September have been isssued, but, although they may on the whole be looked upon as favourable, they do not show that ratio of increase which has characterised the returns for some months past, and the chief decline has been in the export of cotton yarn and cotton manufactures. The total declared value of the exports for the month of September is £14,687,942, against £14,542,862 in 1863, and £11,396,327 in 1862, which is an increase over the former period of £145,080, and over the latter of £3,291,615. For the nine months of the present year the total is £123,404,161, against £104,294,713 in 1863, and £93,672,434 in 1862, which is an increase of £19,109,448 as compared with 1863, and of £29,731,727 as contrasted with 1862.

The returns for the month and nine months present the following results in reference to the exchange of commodities between the United Kingdom and the ports and countries of the Far East :—

EXPORTS TO CHINA AND HONG KONG.

	1862.	1863.	1864.
	For the Month ended 30th September.		
Cotton yarn	160,336	511,320	295,400 lbs.
Cotton manufactures	1,522,713	6,328,453	4,926,052 yds.
Worsted stuffs	485,122	842,546	1,308,835 ,,
Woollen and worsted cloths	10,649	25,211	33,712 ,,
Lead	566	663	1,174 tons
	Value for the Nine Months ended 30th September.		
Cotton yarn	£183,645	£144,815	£213,753
Cotton manufactures	1,158,187	830,589	1,557,435
Worsted stuffs	281,113	461,925	739,126
Woollen and worsted cloths	200,428	251,782	233,034
Lead	144,896	243,128	136,933

The Cotton Manufactures exported to the other great centres of traffic eastward of British India exhibit the following quantities and values :—

	1862.	1863.	1864.
	For the Month ended 30th September.		
Singapore	1,262,986	4,038,325	819,497 yds.
Java	118,800	1,318,502	747,158 ,,
Philippine Islands	1,438,033	957,829	— ,,
	Value for the Nine Months ended 31st August.		
Singapore	£512,121	£476,092	£546,284
Java	431,766	251,774	457,086
Philippine Islands	252,329	273,010	457,517

Of Cotton Yarn, 75,000 lbs. were exported to Singapore in the month of Sept., against 390,390 lbs. in the same month of 1863, and 100,600 lbs. in 1862; the value for the first nine months of the present year being £90,742, against £158,193, and £89,649 in the same period of the years 1863 and 1862.

IMPORTS.

Raw Cotton still presents a wonderful increase, and to show to what extent the trade in this important staple has been developed in the Eastern Hemisphere, we shall give the return from British India as well as from China :—

	1862.	1863.	1864.
	Quantity for the Month ended 30th September.		
British India	292,867	359,634	466,876 cwts.
China	89	21,490	33,367 ,,
	Value for the Eight Months ended 30th September		
British India	£6,673,502	£14,058,913	£21,161,406
China	20,429	1,350,182	4,688,283

Digitized by Google

Of Sugar, the quantity imported from Java and the Philippine Islands in the month of September was all of the 3rd and 4th quality—20,062 cwt. of the former, and 22,428 cwt. of the latter. The quantities and values given in the present returns will serve to show the effect of the altered duties enacted last session :—

	1862.	1863.	1864.
	Quantity for the Nine Months ended 30th September		
2nd quality (equal to Brown clayed)	35,999	1,232	436 cwts.
3rd (not equal to Brown clayed)	294,973	669,545	29,328 ,,
3rd (equal to Brown Muscovado)	—	—	79,588 ,,
4th (not equal to Br. Muscovado)	—	—	76,915 ,,
	Value for the Eight Months ended 31st August.		
2nd quality	£49,357	£1,581	£632
3rd (previous to April 16, 1864)	277,743	577,800	41,205
3rd (entered subsequent to do.)	—	—	75,535
4th quality	—	—	74,839

Of Hemp the import from the Philippine Islands during September in the present year was 9,616 cwt.; against 22,091 cwt. in the same period of 1863, and 6,823 cwt. in 1862. The quantity for the nine months of the present year was 119,812 cwt., against 239,613 cwt. in the preceding year, and 114,897 cwt. in 1862. The value for the eight months ended the 30th August was £202.460, against 280,478 in the similar period of 1863, and £138,314 in 1862.

The Declared Value of British and Irish Produce and Manufactures exported from the United Kingdom to the undermentioned ports and countries of the Far East, for the eight months ended the 31st August, is represented by the figures following :—

To	1862.	1863.	1864.
Singapore and Eastern Straits	£828,398	£860,834	£903,568
Hong Kong	842,425	788,918	1,167,736
Netherlands India	642,733	359,814	594,043
Philippine Islands	329,353	384,373	607,759
Siam	16,831	11,956	11,513
China (exclusive of Hong Kong)	1,537,185	1,608,550	2,068,531
Japan	—	73,526	340,403

The amount of bullion by the P. and O. Company's steamer *Delta*, from Southampton on the 4th inst. was—in gold, to Alexandria, £1,000; to Madras, £1,546. In silver, to Hong Kong, £39,783 (including £24,896 on Government account); to Shanghai, £51,290. Total—in gold, £2,546; in silver, £91,073.

ARTICLES OF IMPORT.

TEA.—Since our last we have had a moderate business doing out of the new arrivals, with a few more speculative purchases of Congous of old import from 11d. to 1s. 1d. per lb. The public sales, however, now in progress tend to restrict business privately. In broken leaf and dusty Congous little has been done; good common to inferior flavoury have been taken to a moderate extent on speculation. The medium to second-class Kaisows, of new import, have gone off slowly, at prices, if anything, in favour of buyers; fine and finest are well maintained. Common to fair blackish leaf Congous have been taken on speculation at rather stiffer prices; but the better kinds, of old import, remain as last advised. There has been a little more doing in the new Monings, from 1s. 10d. to 2s. 2s. per lb.; but above this price we do not hear of any transactions. In Scented teas there is nothing new. Canton Gunpowders, of medium grades, have sold cheaper. In true Greens we have no change to notice. The public auctions of China teas commenced on the 15th; out of 29,934 packages, 17,376 are printed "Without Reserve." Prices have been irregular, in some instances a slight advance was realised on common black leaf Congou, whilst brown leaf sold at rather lower rates. Common Greens have also sold easier, whilst fine maintain late prices. The United Kingdom Stock was on the 31st ultimo, 88,500,000 lbs., against 80,000,000 lbs. on the 31st October, 1863.

SILK.—Market flat, but quotations nominally the same as last. According to a circular of Messrs. Arlès-Dufour and Co., of Lyons, a considerable decrease in the silk transactions of that city took place during the past month, and manufacturers are generally much disheartened by the long-continued absence of any rally such as would be necessary to cover the cost of goods calculated on the present rates of the staple. Meanwhile, however, quotations have been maintained with a firmness which can only be accounted for by the bad results of the European crop, causing the stock of raw material to remain exceptionally low for this time of the year, and by the uncertainty prevalent with regard to the question as to what will be the extent of the export from China and Japan.

COTTON.—A large business has been done in the London market a advancing prices, and there was more competition at the public sales on the 10th, 220 bales of China going, with all faults, at 12d. to 12¼d. per lb. During the week we note sales as follows—1,845 bales China, 12d. to 13d. for fair, and 13d. to 13½d. for fully fair; 390 bales Japan 15d. for fully fair, and 15½d. for good. At Liverpool, also, China and Japan partook of the general improvement, and are quoted at about 1d. per lb. dearer. The following statistics of the Liverpool trade are of interest :—

Increase of imports, compared with last year ...	541,360
Increase of quantity taken for consumption ...	199,420
Increase of stock, compared with last year ...	175,200
Increase of quantity taken for export	64,315
Cotton at sea—for the United Kingdom ...	470,000

SUGAR.—A large amount of Raw Sugar was offered at public sale during last week, and the greater part disposed of at an advance of 6d. per cwt. on refining kinds. This present week prices have been barely sustained. By private treaty up to the 12th we note sales of new and old clayed Manila, at 31s.; and 700 bags good and fine white Siam, at 39s. to 40s. On Tuesday, the 15th, 2,900 bags of Mauritius were offered by auction and chiefly sold—yellow, 33s. to 34s. 6d.; grainy, 34s. to 35s. 6d.; crystalised, 36s. to 38s. 6d.; 1,700 bags of Bengal were also mostly sold, low Banares, 35s. to 36s.; Gurpattah date, 32s. 6d. to 34s. 6d.; 600 bags of Penang brown, 30s. 6d. to 32s.; good middling to good yellow, 35s. to 35s. 6d.; the chief portion of 600 bags of Madras date, brown, 26s., native, 27s.

COFFEE.—There was a good deal of inquiry last week, and prices recovered 1s. per cwt. At auction Singapore went at 52s. to 65s. per cwt. The parcels offered on the 15th met a good demand, and were all disposed of at firm prices—420 casks 70 barrels and 170 bags of plantation Ceylon, triage, 51s. to 69s.; fine fine ordinary to good middling, 75s. 6d. to 85s. 6d.; peaberry, 81s. to 84s. 6d. 100 packages of Mocha, long berry, 92s. to 94s.

RICE.—The demand continues active. On the 15th 17,000 bags sold, white Bengal at 11s. 6d.; Rangoon, 9s.; Bassein and Necranzie Arracan, 8s. 7½d. to 8s. 9d. 8,000 bags of Bassein were offered in public sale, and bought in at 9s. 1,600 bags of Rangoon sold, first-class, damaged, 8s. 6d.

SPICES.—More inquiry prevailed last week for Black Pepper. Nutmegs have nearly supported their former value in the face of increased supplies. 770 bags Singapore Black Pepper, imported from New York, sold at 3¼d. 2,911 bags Penang realised 3⅛d., a few lots 3¼d. Of 121

Digitized by Google

cases brown Nutmegs, a considerable portion sold at 11d. to 1s. 9d. for low to middling, with good to fine bold at 2s. to 3s. 9d. 16 cases Mace, 11d. to 1s. 6d. for low to middling bright. 18 cases Penang Cloves sold at 1s. 2d. to 1s. 4d. for middling to fine. 780 cases Cassia Lignea partly sold: pile 1, 90s. to 93s.; the remainder withdrawn at 85s. to 90s.

INDIA RUBBER.—200 packages of West India sold on the 15th at 1s. 2d. to 1s. 2½d., and 80 cases Assam, 9d. to 9½d.; 100 baskets Singapore bought in at 1s. 4d.

ISINGLASS.—30 cases Penang sold at 3s. 10d. to 3s. 11d.

SAGO.—296 boxes 381 bags partly sold on the 11th, small grain 19s. 6d.; bold, 22s. to 22s. 6d. per cwt.

SHELLAC.—100 chests sold on the 15th at £5 to £5. 2s. 6d. for native liver, and at £6. 10s. to £6. 12s. 6d. for reddish orange.

TURMERIC.—A small parcel of Bengal, old import, sold at 20s. 6d.

TERRA JAPONICA.—Cutch: During last week 420 cases 250 bags sold at 22s. to 22s. 6d. per cwt. Gambier: In moderate demand, and 500 bags at public sale, on the 15th, were only in part disposed of at 24s. per cwt.

MANCHESTER MARKETS.

Messrs. John Slagg and Co.'s report of the 15th inst. says:—"Since last Tuesday we have had an active demand, and large orders have been placed at gradually improved rates. The advanced prices of cotton and yarns have to-day compelled manufacturers to raise their quotations to a point not followed by buyers, and our market closes with a rather limited business."

Sam' Mendel's Circular quotes:—"In the week just ended sales were more active at advancing prices: the quotations to-day show a marked improvement, but there is little doing, as buyers hesitate to continue with the upward movement to any extent."

HOLLOWAY'S PILLS.—Bilious complaints and irregularities of the system produced by depraved or over-abundant bile can always be corrected by few doses of these inestimable Pills, which are everywhere admired for their rare combination of mildness and power, for though they conquer with ease and rapidity the most obstinate disease, they never weaken the stomach, or necessitate any interruption of ordinary duties or amusements. On the contrary, they increase the appetite, strengthen the organs of digestion, give increased energy and life to all the animal functions, and fit both hand and brain for fresh exertions. The sick and enfeebled can easily discover what a happy revolution these Pills have the power to effect in the human system.

The French mail, with dates from Hong Kong to Oct. 26, arrived at Suez on the 24th inst.—Mails expected on Dec. 3.

List of Passengers.

PASSENGERS INWARD.

By this mail, to Marseilles, per Delta, arrived Nov. 26.—From Shanghai: Mr. J. Dow, Dr. Jones. From Hong Kong: Messrs. W. Lemann, T. A. Macnair, and J. Sweeney. From Singapore: Mr. F. and Mrs. Vilgars, child, and European servant.

To Southampton, per Ellora, expected to arrive Dec. 3.—From Hong Kong: Mrs. J. Bernard, Capt. and Mrs. J. B. Caldbeck, Commander Aling, R.N., Messrs. R. Wing, R. Johnson, Gibson, J. Donatine, O. Williams, J. Sweeney. From Singapore: Messrs. Thos. Maclean, A. Murphy, Captain Carter, and Mr. J. A. Boyden. To Alexandria, for Trieste.—From Hong Kong: Mr. H. J. Tarrant. To Suez.—From Hong Kong: Messrs. H. P. Malsen, J. J. Lavorei, F. Knuppel, and J. M. Schmidt. To Alexandria.—From Singapore: Mr. and Mrs. Lloyd.

PASSENGERS OUTWARD.

Per P. and O. steamer Delhi, Nov. 20, from Southampton.—To Hong Kong: Miss R. E. Collett, Miss Lee, Lieut. B. Lillichook, Mrs. Howard, Mr. T. Olive, Mrs. Brown, Mr. Nicholson's European servant, Messrs. J. W. P. Stuttaford and Jos. Wellington. To Shanghai: Messrs. E. Grace, M. Hawkey, E. Hall, and G. Edwards, Mr. Johnson's native servant. To Singapore: Mrs. W. W. Williams and infant, Messrs. Jas. Mutton and Wm. Byers. To Ceylon: Mr. G. Crosbie and three 2nd class passengers. To Calcutta: Mr. and Mrs. Pittar, infant, and native servant, Messrs. John Hill, R. Hill, W. Cornell, E. Taylor, J. J. Atkinson, T. Sheridan, D. O'Connor, Tucket, W. Copinger, C. Wagentrieber, J. Hunter, E. Wiff, Williamson, A. Price, Warren, Fletcher, B. Turner, Scale and Tait, Mr. and Mrs. W. Johnson, Mr. and Mrs. Heard and two infants, Mr. and Mrs. Reid and two infants, Miss Nelson and European servant, Mrs. H. Johnson, Mrs. R. Ranken, Paymaster Moore, Mrs. Phillips, Mrs. Hamilton and European servant, Hon. C. Parker, Miss Adam, Mr. and Mrs. W. D. Latimer, Mrs. Trotter, two infants, child, and native servant, Rev. Mr. and Mrs. Higgs, Lieut. F. G. Boughey, Mrs H. B. Henderson, Miss Voyle, Miss L. Harward, Revs. J. Stevenson and W. Wallett Major B. Mauleverer, Rev. J. W. Young, Ensigns J. F. Bailey and Boileau, Miss Janes, Mrs. Palboys, Mr. and Mrs. Langlois, Assist. Surgeons Atkinson, Bolster, Cogan, Flemming, Turner, and J. V. Malcolm, Mr. Egerton's European servant, Capt. and Mrs. L. Hall, Miss F. East, Capt. Trevor, and six 2nd class passengers. From Marseilles, November 28.—To Hong Kong. Mr. and Mrs. J. Wheelock, infant, and female servant, Mr. P. G. Lawrie. To Calcutta: Mr. and Mrs. P. Egerton, Mr. and Mrs. J. Allan, Capt. and Mrs. Basseir and European servant, Col. McDonnell, Miss Tucker, Mr. and Mrs. Adams, Mr. Donegan, Mr. E. McBride, Lieut.-Col. Hutchinson, Dr. Veitch, Mrs. Eddis, Capt. Carew, Mr. Benwell, Mr. E. C. Dealtry, Capt. Smith, Mr. A. B. Rose, Mr. Hurst, Mr. E. A. Campbell. To Madras: Mr. and Mrs. H. J. Brockman, Mr. I. Young, Lieut.-Col. Rich, Surgeon A. O. Renton, Mr. W. Gillilan, Mr. Cockerell. To Ceylon: Mr. J. Findlay. To Alexandria: Messrs. J. Laing, Wilson, and W. Wilson, Earl of March, Mr. Ralph Vivian, Rev. E. Hill, Mr. J. W. Patterson, and one second-class passenger. From Malta.—To Calcutta: Capt. Ogilvie. From Suez.—To Hong Kong: Mr. Caw. To Calcutta: Capt. and Mrs. Squirb and European servant.

Per P. and O. steamer Ripon, Nov. 27, from Southampton.—To Shanghai via Bombay: Mr. Bayne. To Ceylon, via Bombay: Mr. Cummins.

Per P. and O. steamer Baroda, Dec. 4, from Southampton.—To Penang: Capt. and Mrs. White. To Shanghai: Mr. Herbert Elias, Mr. G. Stanford, Mr. Carritt. To Hong Kong: Mrs. Smith and two infants, Mr. Dent. To Ceylon: Mr. and Mrs. J. Walker, three children, and servant, the Rev. J. Allcock, Mr. H. Bois, Capt. Rutherford, Mr. H. C. Park. From Marseilles, Dec. 12.—To Singapore: Mr. and Mrs. H. W. Wood and lady friend, Mr. Geo. Crichton, Mr. J. Crum, Mr. A. J. Gunn. To Shanghai: Mr. J. W. Broadbent. To Hong Kong: Mr. T. Caw, Mr. H. H. Nelson, Mr. J. Sloane, Mr. R. Calderson. To Ceylon, Messrs. T. G. Davis, R. E. Hope, J. T. Green, and John Fraser, Mr. and Mrs. Schweitzer.

Per P. and O. steamer, Dec. 20, from Marseilles.—To Singapore via Bombay: Mr. and Mrs. Ottman. From Suez.—To Ceylon: Mr. Coomarac Swamy and servant.

Per P. and O. steamer, Dec. 20, from Southampton.—To Hong Kong: Messrs. Jas. Henderson, A. Leigh, and J. Maitland, Mrs. Wilkinson and infant, Miss M. Wedgewood, To Ceylon: Mr. J. Bannatine, Mr W. Mayon, Mr. E. H. Jones. To Shanghai: Mr. Carritt. From Marseilles, Dec. 26.—To Hong Kong: Mr. and Mrs. Ryrie, Mr. Pastorius. To China: Mr. W. A. Foster. To Shanghai: Mr. and Mrs. Ryrie, to Ceylon. Messrs. F. Pater and Fraser.

Per P. and O. steamer, from Marseilles, Jan. 12, 1865.—To Hong Hong: Mr. M'Donald.

From Gibraltar to Bombay.—For Goa: Governor Jose Ferreira Pentana and wife, Capt. V. F. Scarnicher, wife, and infant, Capt. D. J. A. de Mells, wife, and two children, Major J. M. de Mello Mendonca, wife, and two children.

Per Min.—To Shanghai: Mr. J. Hockings, Mr. Flowerjoy, Mrs. Parker and child, Dr. Frieland.

Per Garawalt.—To Shanghai: Mr. J. Flym, Rev. Mr. Hill, Mr. Scarborough.

Per Fiery Cross.—To Hong Kong: Mr. Smith.

Per Young Lockinvar.—To Hong Hong: Mr. and Mrs. John White, Mr. Charles Fielding, Mr. and Mrs. Fairbanks and four children.

Per Guinevere.—To Shanghai: Mr. G. F. Smart.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The dates from this port are to the 30th September. The London mails of the 26th July arrived out on the 17th September.

The Yokohama journals are, as might be expected, filled with details of the gallant affair in the Straits of Simonoseki. As regards the actual fighting, they add nothing to the intelligence contained in Admiral Sir A. Kuper's despatches, and in the other accounts that have already been published. It would appear that the difference between the feeling entertained by the people and the Daimios towards foreigners was never so strikingly evinced as on this occasion. "We read various accounts (says the *Japan Herald*) of the assistance rendered by the Japanese in this work of dismantling the forts, from some of which we gather that their offer of aid was quite freely and spontaneously given, by others, that it was on the gentle hint that they had better 'lend a hand.' We incline from the whole to the opinion that the former statement is correct, for we have undoubted authority for the fact, that whilst the crews of the *Amsterdam* and *Medusa* were preparing to embark the guns of the Chofu and Ravine batteries, nearly a thousand of the soldiers of Nangato, unarmed, came to their assistance, saying, 'you must feel very tired after your work of to-day, allow us to embark these guns;' which they accordingly did, and the boats left shore with their heavy freight, the soldiery wishing them good-bye—*Sayrnara Matta mionittzie;* seeming, indeed, to be still more glad to get rid of their old companions than their late enemy." The *Commercial News* more than corroborates the above by the following:—"An episode is related that, when all the Daimios and *yakonins*, with their valiant *samri*, had retired, the natives—merchants, farmers, and country people—came down in numbers and assisted the foreigners in carrying the captured guns to their respective boats. Some of the guns were very heavy, about seven to eight tons. From all we can see and learn of the lower classes of Japanese, they on all occasions seem well inclined towards foreigners, and in no instance that we are aware of has any animosity been displayed by them.

Digitized by Google

The only enemies the foreigners have in Japan are those Daimios' retainers, *yakonins*, who dislike foreigners because they do not acknowledge their respective rank."

The loss sustained by the landing party, while engaged in removing the guns, is explained by the circumstance that the Japanese, who commenced an annoying fire, were protected by a forest, and, in the middle, by a paddy field. "The enemy was *hardly ever seen*; men fell wounded, and no enemy to fire at. Foreigners have not caught one Japanese. A Dutch boat got loose and drifted down a seven-knot current with a Dutchman on board: Japanese set out and caught him, killing him instantly."

With reference to the firing, a civilian, writing from on board the *Ta-Kiang*—possibly, therefore, an American, and writing impartially—says: "The rifled guns of the *Semiramis* and *Dupleix* were doing excellent execution, and the little] 30lb. Parrot-gun on board the *Ta-Kiang* threw several shells right into the fort. The Armstrong guns did certainly refute all that had been said against them after the battle of Kagosima." Another little note, by a different hand, is that the *Medusa* (Dutch ?ship) had chain, armour all round her boilers, and fought well. When Choshiu showed a flag of truce one of his emissaries was sent on board Sir. A. Kuper's flagship, and he was at once recognised as one of the two of the Prince's retainers lately returned from Europe, who were taken down in the preliminary trip of the *Barossa*. He had been but a short time with the Admiral when the result of his visit appeared in a general signal to "hoist flag of truce;" obeyed, as one gentleman writes, under the circumstance—"a white-flag not appearing to form an item in the category of paraphernalia of H.B.M's navy—with a variety of substitutes, which conspicuously displayed the diversity of ways in which invention is inspired by her maternal relative, for one ship flies a table-cloth —another a shirt—a third a towel—a fourth a handkerchief—a fifth a pillow case, and two others are two sheets in the wind."

On the opposite coast of Buzen there were enormous crowds of spectators of the fight, who were laughing and shouting, appearing to enjoy the proceedings enormously, and who were in perfect raptures when they saw the foreign Jacks planting their flags upon the batteries. The Prince of Buzen, we are told, is awfully opposed to Choshiu because he did not warn him that he was going to fight, so as to give him a chance to remove his people to a place of safety."

The letter sent by Choshiu, asserting that he was acting by orders of the Tycoon, was, it seems, addressed to the "United States' Admiral." As the Americans were the first to establish diplomatic relations with Japan, the native authorities often affect to give the United States a sort of seniority, and, there is reason to believe, have been brought to consider that country as being specially well disposed towards them. It will be observed that in this letter, Choshiu admits his rebellion against the Tycoon:—

"A humble presentation to the United States' Admiral:—

"The instruction of the Emperor of Japan and those of the Tycoon are different. Because, in obedience to the Emperor's command, I, at Simonoseki, fired upon foreign vessels, I have received the name of Rebel. When I appeared to be acting in opposition to the Imperial orders, a messenger came from the foreign nations to make it known to me and demand its discontinuance. This being the case, Nangato no-Kami, [supposed to mean the young Prince] went on horseback to Kioto to learn the Emperor's will. Before arriving there, an insurrection having arisen in Kioto, there was no alternative but to return without having accomplished the mission. Three days [ago, or following] I heard your illustrious country's ships had come to Hime-shima. I sent a messenger to you by boat, saying that I did not care whether you passed through the Straits or not. Whilst on his way you left the Island and the boat returned, thinking to reach you from Simonoseki. Much time having elapsed in the interval, war broke out. For this inability to prevent its breaking out, I am exceedingly sorry. I have not from the first hated foreigners. I consider this was a great affliction to thousands of people; I desire nothing but amity. Please consider this subject well. Further particulars Moori-Izumo, my Minister, and his associates will make known to you.

"1st year of Genji, 8th month, 9th day (September 9th).

"MATSDAIRA DAIZEN NO-DABU."

The envoys who brought this note stated that according to Japanese law a Prince was not allowed to communicate personally with the Admiral until he had received the permission of the Mikado to do so. When an opportunity was afforded him of a personal intercours, he would then lay before the Admiral his letter of instruction, given him by the Tycoon, to fire upon all vessels attempting to pass through the Straits.

That the Tycoon is in earnest against him is plain enough from the following, understood to have been issued by the former's authority:—

"Because the servants of Mats'daira Daizen no Dabu have threatened the Emperor with arms, thus committing high treason, they are speedily to be punished by the Tycoon. Wherefore now, all Daimios with revenue above 10,000 kokus are commanded to utterly destroy them. Owari Zen Dai-na-ngon is to command in chief, Mats'daira Echizen no-Kami is to be second in command. Be ready against the time when the Tycoon goes forth to inflict punishment. To all the Hatta Mottos it is commanded according to their several abilities to be prepared to sacrifice their lives for their Master. Take this Royal Command cordially to heart. Though the foregoing command is to the military class, yet those who are not of the military class who wish to join the army are requested speedily to make it known."

To the above is appended a list of 21 Daimios who are to take the field against Choshiu. They will be seen to be those of Kiushiu, Shikoku, and Chiu-ngoku (the Provinces immediately around Nangato).

An eye-witness gives an account of the utter destruction of Choshiu's palace at Yedo:—The palace called 'Com-mi-yoshki,' the principal palace of the Prince of Nangato, was totally destroyed on the 12th day of September. The fire-bells were rung and a large number of firemen collected. The men were led to the work of destruction by the yakonins, and urged on by them. At last the palace was razed to the ground. It took several days to complete the work of destruction, and so effectually was that accomplished that not a single vestige was left standing. On each successive day the fire-bells were rung to collect as large a number of people as possible; and the palace was also completely gutted of its contents, of which some were thrown into the pond and some into the streets. The Prince has some six other palaces, which it is said are to share the same fate."

The first fruit of the punishment inflicted on Choshiu was the following circular despatch from Sir Rutherford Alcock to Mr. Consul Winchester:—

"H.B.M.'s LEGATION, YOKOHAMA,
24th September, 1864.

"I have to request you will notify to British subjects under your jurisdiction that merchant vessels are at liberty to pass through the Straits of the Inland Sea, the free passage of which the Prince of Choshiu has formally engaged to secure.—I have, &c.—RUTHERFORD ALCOCK."

A public meeting was convened on the 26th Sept., at the office of the Central Bank of Western India, relative to the establishment of a Chamber of Commerce at Yokohama, when a committee was appointed to ascertain the views of the mercantile community on the subject; also to correspond with the chambers of Hong Kong and Shanghai relative to their rules and regulations, and any other information of importance that might be obtained. The proceedings of the committee were to be communicated at another meeting to be held on the 25th Nov. With regard to the restrictions on trade, it was stated that an able letter had been drawn up on the subject, which, having met with general approval, was circulated to the various mercantile firms for signature. The meeting then separated with a vote of thanks to the chairman, Mr. Kingdon. We append the letter, which was forwarded to Sir Rutherford Alcock through Mr. Consul Winchester, by whose hands also was received the reply:—

"YOKOHAMA, 26th September, 1864.

"Sir,—We, the undersigned British merchants resident at Yokohama, beg respectfully to address you on the present position of trade at this port, more particularly with regard to the restrictions known to exist in respect of the staple article of produce—silk—apparently emanating from the Japanese Government. In making this communication, we are fully possessed with the conviction that our authorities are and have been doing their utmost to meet and improve the present unsatisfactory position we occupy in our commercial relations with this country.

"Hitherto we have felt that political complications might render an address on this subject inopportune; but recent events have impressed us with the idea that the present time is one in which the subject may be brought forward judiciously and advantageously, with a view of placing before you officially facts which our daily intercourse with the natives enables us, as far as is possible in such cases, to verify.

"Our available sources of information are not of such a nature as to permit of bringing forward positive proof of the direct interference of the native Government, but are still sufficient to satisfy us that the present restricted supply of raw silk is wholly and entirely owing to the action of the Japanese authorities. Native dealers assert that the supply of the article in Yedo and the vicinity is large; and were it not for the impossibility of passing it through the Customs at Yedo and Kanagawa, would immediately be brought in large quantity to this market. The prices current in the country, when compared with those ruling here, show such a margin of profit to the native dealers as to leave no doubt whatever on our minds that it must be their interest as well as their wish to immediately bring their available stock for sale to this market; and, indeed, such a desire is openly and universally expressed.

"We have little doubt, from what we have been able to ascertain, that the yield of the present is at least fully equal to that of the preceding season, and that the native demand is not in excess of that of the same period; whilst the export clearly points out the existence of restrictions in some quarter, which we think it is evident, from what we have already stated, cannot arise from the ordinary course of trade.

"In the season 1861-62 the export to corresponding date was 2,592 bales;

Digitized by Google

1862-63, 5,283 bales; 1863-64, 5,436 bales; 1864-65 to the present date is but 706 bales. And we have every reason to believe that the above small quantity of 706 bales, representing this season so far as it has gone, has been brought to market with the greatest difficulty and in direct opposition to the wishes or desires of the Japanese authorities.

"The restriction of which we so justly complain not only deprives us of our most valuable article of export, but militates to a very great extent indirectly, through the absorption of such a large amount of native capital, against the sale of imports—a branch of trade which it is absolutely necessary to encourage and, as much as possible, extend. Facts, as above stated, will, we have no doubt, continue to enlist your most earnest endeavours to remedy evils that must ultimately reduce the trade of this port to a mere nonenity. And begging further to recommend the subject to your consideration, with the request that you will be pleased to bring the matter under the notice of H.M.'s Minister,—We are, Sir, your obedient, humble servants." (Signed by nineteen British firms.)

"YOKOHAMA, 28th September, 1864.

"Sir,—In reply to your despatch of the 17th instant, giving cover to a letter addressed to you by the principal British traders at this port, in reference to the existing stoppage of the commerce in silk, I have to instruct you to inform the memorialists that, perfectly cognisant of the fact to which they would draw my attention, I entirely sympathise with them. You may also state that I agree with them in the conclusion that the stoppage of which they justly complain is due to the intervention of the Tycoon's Government, in direct violation of treaties. In this conviction many and urgent remonstrances were made from Her Majesty's Consulate, and when these failed representations of the unjustifiable nature of the obstructions experienced followed from this Legation, equally without effect.

"Under these circumstances it was evident to my colleagues, the representatives of France, the United States of America, and the Netherlands, as to myself, that the Government of Yedo—under pressure from the hostile party at Kioto (apparently sanctioned by the Mikado)—had virtually stopped the trade of the port, as a concession to their imperious demands, backed by the Mikado's decree for the permanent closing of Yokohama, if not the rupture of all relations of amity and commerce.

"The blow recently struck at one of the chiefs of this 'Sako' party, combining for the expulsion of the foreigner, offered the only chance of redress. Its entire success, and the signal defeat of the Prince of Choshiu's forces, there is reason to believe will do more to remove the obstructions to trade here, as at Nagasaki, than any amount or kind of remonstrance and diplomacy, which, as that event proved, were both ineffective.

"I am informed, indeed, since the news of Choshiu's defeat arrived, that these restrictions have already been removed by authority. And as my information comes from the same authority that imposed them, probably the assurance that silk in large quantity is now on its way to the port, and may be expected daily, is entitled to credit. I am glad to be able to give this the only satisfactory reply to the merchants, and beg you will communicate it without loss of time.—I have, &c.

"RUTHERFORD ALCOCK."

On the 8th September the settlement was visited with a cyclone, the centre of which seems to have passed over Yokohama. The gale commenced about midnight of the 8th from South-east with squalls and rain. As the morning advanced the wind increased in violence, and continued to blow in severe gusts accompanied with heavy rain until 11 a.m. of the 9th, when it suddenly abated to calm, and rain ceased for the space of one hour, when it again as suddenly freshened up in the opposite direction, North-west, blowing fresh; which continued for some hours without any rain, when it gradually died away towards the evening. No accident occurred to the shipping that we have heard of (says the *Commercial News*). Between the hours of 9 to 10 a.m., when the gale was at its height, vibrations of an Earthquake were perceptibly felt by several persons, but of short duration.

It was in this gale that the *Fleda* was lost, the wreck of which vessel, as she lay in Algiro Bay, was sold at auction by Mr. Hansard for 620 dollars. The steamer *City of Nantes*, Capt. Gibson, left the harbour on the 7th September bound for Hakodadi. On the 9th she encountered the gale while off Simoda head. The engines broke, when steaming under reduced sail; at 3 P.M., gale at its height, the sea driving up as far as the mast head, and carried away the quarter boats, breaking the davits, and ship receiving much damage. The boiler shifted during the gale; barometer stood 28.4; was forced to put back for repairs. A bark was seen after the gale, supposed to be the *Glendoveer*.

A Mr. Marquis Chisholm has won the hearts of the Japanese by playing a fantasia on their own melodies as a pianoforte solo. A native artist has portrayed the performer enthusiastically playing to excited Japanese audiences, whilst a few drowsy foreigners are depicted as falling asleep. The inscriptions on each division of the picture declare the air played to be some favourite of their own, and it would seem to be the Japanese method of expressing their idea that the Europeans do not appreciate their minstrelsy. The following is a free translation of the writing on the margin of the picture:—

"We Japanese are very fond of Sing-song; we like it more than we can express; we cannot have enough of it; all the year round our daughters play and sing. All the people in the world we are told are fond of it, and speak largely of its charms; how then can we speak too much? The piano is an instrument most wonderful: all our good people in this part talk of it, yet their talk is too small. The best ladies in our land go to see it, and to hear this Marquis Chisholm play upon it. He plays our own music. His fingers are like as many butterflies, fluttering from flower to flower, the flowers our own native melodies. He is indeed very great, and we are very small. I had heard much talk of this great man before I went to see him: the talk I did not understand, until I heard him play. His playing is as the singing of many birds. All men must like him; he is from the Western country—English. I make this picture of him in the month of August, year eighteen hundred and sixty-four. Otto-matchi, one mile from the house of Marquis Chisholm, Yokohama, Japan."

NAGASAKI.

We learn that the Japanese are very quiet regarding the action at Simonoseki; but business shows much greater animation, both among natives and foreigners. Cotton had commenced to arrive in the market, and was being bought by Chinese. A very large business had been done in tea; the ships Castleton and Alice loading with that article for London. Freights too were looking better, and the supply of vessels appeared likely soon to run short. The Pembroke brought over a full cargo from Shanghai, and a hope is expressed that this success may encourage the agents to continue to run her to Nagasaki, as the residents highly appreciate the regularity with which they receive their mails by her. The barque Kate Cleather was on the berth for Shanghai; the Diana loading for Tien-tsin; the Alice and Mary and the Dutch barque Alita Augusta for Hong Kong; the Castleton and Alice for London. Besides these vessels there were in port, H.M S Scylla, the Avalanche, Dom Pedro II., Cosmopolite, Berlin, and the French brig Paralyta.

HAKODADI.

The British schooner *Khantai* arrived at Yokohama on the 17th September, having left the above port on the 11th. She experienced thick hazy weather and northerly winds. The typhoon at Yokohama did not extend so far north as Hakodadi.

CHINA.

PEKING AND TIEN-TSIN.

Dates from the latter place are up to the 22nd Sept. The only items published being a notice of the intended races, and extracts from the *Peking Gazettes*.

SHANGHAI.

The English Mail of 10th August arrived out on the 24th Sept., and the French Mail of 17th on the 4th Oct. The dates are now down to the morning of the 9th. The health of the community is *once* more satisfactory.

General Brown had left for Hong Kong, calling at Ningpo *en route*, and on the arrival of General Guy will leave for England. Previous to leaving Shanghai the 2nd Beloochees were paraded and inspected. A number of evolutions were gone through, the men marching past, and making a most imposing show, which was by no means lost on the crowds of Chinese collected to assist in the inspection. The General expressed himself highly pleased at the efficiency displayed by the men, and complimented the colonel and officers on the excellent appearance of the entire regiment.

The Consular Court has been occupied in the investigation of a charge of murder and robbery brought against a man named O'Brien, for some time known as a member of that rowdy class which infests the creeks and rivers in and around the Keang-su and Chi-keang provinces. He now lies in the English gaol, charged with the murder of a Chinaman, under circumstances of almost incredible atrocity, and there is but too much reason to fear that this is only the last of a long continued course of murderous outrages committed on the unoffending native population.

The *Aerolite* case, to which we alluded in our last, has been decided. The ship was held to be in fault, but the junk owners were not altogether guiltless of a want of care and attention. The damages to the junk were therefore awarded as follows: towage taels 125; repairs, taels 1,052; owners of cargo, taels 212—total taels 1,389; costs to be borne by defendants.

In amusements we find the following programme:—The Rowing Club have arranged that a regatta be held during the last week of this month. A gymnasium will shortly be opened in connection with the Volunteer corps, to which, however, non-volunteers will be admitted on the payment of a small entrance fee. A debating society has also been started, and the theatrical season has been most successfully opened by an Amateur Burlesque Company. A professional company has also announced performances for every night during the ensuing eight weeks. The approaching races are also engaging attention.

The settlement has latterly suffered severely from fires. On the morning of the 25th Sept. six shops in the Pên-tang-

Digitized by Google

lung were burned, and but for the exertions of the police a much more serious loss of property must have occurred. The entire block of buildings was insured in the "Royal," the agents for which—Messrs. Bower, Hanbury and Co.—have presented the police with the sum of one hundred dollars, as a mark of their appreciation of the exertions of the latter. A few days later an alarming conflagration broke out on the Hongque side; and again on the 6th Oct. the Maloo was the scene of a second fire, more disastrous in its results than was that above mentioned. That a very large amount of property was not sacrificed is due entirely to the fearless and indefatigable exertions of four or five policemen, and of a sailor of the *Coquette* named Boynand, who were on the spot fit an early period. The latter especially deserves the highest credit for the pluck, activity, and intelligence he showed; and we hope that a suitable acknowledgment of his services will be made by the owners of the property and by the Council.

The Chamber of Commerce held a meeting on the 23rd Sept. The only points decided were as to a scale of commissions to be allowed upon mercantile transactions. This scale has called forth much comment. A commission of ½ per cent. is to be allowed on bills and bullion, but the brokerage on produce has been reduced from 1 to ½ per cent.

From Soochow the *North China Herald* gives an account that the country in the vicinity of this city is perfectly quiet, and the villagers are returning in great numbers. An outrage was committed on three Germans and one Englishman who lately made a trip into the country round Soochow. It seems that these men were on their way to join one of the disciplined forces, and had nearly arrived at their destination. At a village where they stopped they were very kindly treated, and even fed and lodged without charge. Having left the hospitable shelter of this village, the travellers were encouraged to pass on to the next halting place on their route. Here the people refused either to give or to sell provisions of any kind. Being unable to obtain supplies by fair means the men proceeded to take what they wanted, and no doubt conducted themselves as rowdies usually do when away from all the restraints of civilised life. The villagers rose and gave the culprits a beating, which the latter certainly very richly deserved. They were then allowed to escape, and they continued their way to the next village on the creek, where they were met by a mob determined to prevent aggression. To this end the villagers seized the boat, arrested the three foreigners, and brought them before the local magistrate, for the violence of whose conduct no excuse can be offered. Instead of taking charge of them and forwarding them to Shanghai, they were given up to be dealt with according to the will of the mob. They were beaten, tied up by the wrists, put up to their necks in water, and otherwise badly treated. One German and the Englishman have since died in consequence of the injuries which they sustained. They eventually escaped, got to Soochow, and there obtained money sufficient to bring them back to Shanghai. The punishment inflicted was outrageously severe, but we can only regret that their own misconduct seems to have, in the first instance, brought it on them. Such is a summary of what occurred. Baron Radowitz, Mr. Probst, and Mr. Interpreter Alabaster proceeded to Soochow to investigate the case, but the result of their inquiries has not yet been published. The depositions of the two Germans who survived have been taken, and coincide in all points with the sketch given above.

The same journal publishes the following from Paoshun :— This usually tranquil spot, which has hardly been heard of since the rebel campaign in the north-east of this province, was, on Sunday evening last, the scene of a brutal outrage. The steamer *Sycee*, owned by the well-known native merchant Yang Fang or Takee, was on her way to the island of Tsung-ming, and had dropped anchor, when she was boarded by a few Cantonese, who were immediately joined by the Cantonese portion of the crew and the firemen. Having seized the captain, they, after a sharp struggle, forced the remainder of the crew and the passengers into the hold, which was battened down. They then took the captain, a poor fellow named Wilson, and leading him down the companion way, chopped his head off with an ordinary meat knife and threw the body overboard. Having accomplished this, they transferred miscellaneous property and sycee to the amount of about thirty thousand taels, to the boats and finally scuttled the steamer, leaving the poor wretches in the hold to their fate. These latter, finding the water rapidly rising, and rendered desperate by their situation, succeeded in forcing the hold open, and at length emerged from their prison before the steamer sunk. Some of their number as soon as possible reported the matter to the superintendent of police, who made every effort to secure the criminals. One Cantonman was caught in a sampan on the river, and was pointed out, and, of course, arrested. He was brought up at the Mixed Court and sent into the city to be examined. Two women, the wife and sister-in-law respectively of the engineer of the boat, who was principally concerned in the murder, have since been arrested on suspicion of knowing something as to the whereabouts of the culprits. They denied being able to give any information on the subject, and were, accordingly, remanded to await the Hien's examination.

The Times' correspondent sends the following under date October 8 :—

Her Majesty's gunboats *Hardy* and *Staunch* have just returned from a successful cruise after pirates among the islands of the Chusan group. On leaving Ningpo the two vessels proceeded in different directions towards the spot where it was anticipated that a piratical nest would be found, in order to intercept any junks that might attempt to escape. The latter, however, appeared to have gained scent of the expedition, and had all disappeared when the two gunboats arrived off Ketsu Island, one of their favourite resorts. As, however, the whole Chusan archipelago abounds in cover to which it is well known that pirates habitually resort, it was determined to prosecute the search. On the 9th information was obtained that two piratical lorchas had just put to sea from Sheipoo harbour, but they were lost sight of, and during the three following days no suspicious craft could be discovered. On the morning of the 12th the gunboats again arrived off Sheipoo on their way back to Ningpo, and this time were more fortunate in their visit. The pirates had evidently flattered themselves that the search was over in this direction, and had doubled back to Sheipoo as soon as the gunboats had left it. The latter were still further favoured by the darkness, which had already fallen when they arrived. Armed boats were sent off from each, which surprised and captured two junks and 25 of the crews after little resistance, the whole affair being over within two hours. On the following morning the *Staunch* steamed to the bottom of the harbour and brought out another pirate junk, which had been deserted by her crew. Having landed the prisoners to be dealt with by the native authorities, the two gunboats steamed out of the bay at daylight on the 14th, but had not gone far when they perceived the mast of a junk peering over a point of land at a considerable distance. Casting off the junks and anchoring them outside, they steamed as close to the spot as the shallowness of the water would allow, and then sent away their boats fully manned and armed in pursuit. The latter, after a pull of about four miles among the islands, came in sight of two vessels beached on the mud in a beautifully secret cove, where they no doubt conceived themselves quite safe from discovery. The moment the boats appeared at the entrance, the junks opened a sharp fire with grape and gingall balls from the four guns which each carried in her broadside. The shots, however, were badly directed, and the attacking party were able to land without loss, and take up a position on some high land from which they poured so hot a fire of musketry that the pirates soon abandoned their vessels and scudded along the mud flats at their best speed, several being knocked over in their flight. On descending to the beach the victors found eight men lying with their throats cut, and on boarding the junks three others in the same condition. Another man, who was lying bound, but alive, was released, and informed the captors that he and the murdered men belonging to the crew of a large Foochow junk had been taken by the pirates a few days previously, and that twenty others of his comrades were lying bound below. The latter were at once released, and were taken by the *Hardy* to the spot where they said their junk had been left at anchor. It is needless to say that she was restored to them. Later in the afternoon the two junks were blown up, and the gunboats set out on their return to Ningpo, the *Hardy* having in tow the *Foochow* trader, and the *Staunch* the two junks that had been captured at Sheipoo. Very bad weather was experienced during the voyage, and some danger incurred through the heavy loads they had astern; but at length, on the evening of the 16th, all five vessels were safely anchored in the Yung. This must be considered a highly successful cruise, five piratical junks having been destroyed, and a large trading vessel and her crew released.

Digitized by Google

The steamer *Far East* arrived from Hankow and Kiu-Kiang on the 8th Oct., and would sail for London about the 15th. Her cargo from Hankow is reported as 718,445 lb. tea, and 336 piculs gall nuts.

SWATOW.

The *Daily Press* has the following:—The foreign community of Swatow were put into a state of alarm a few nights ago by the sound of heavy firing at midnight, close to the settlement. This proved to be two piratical junks covering a landing party detached from their crews, who had been discovered by the Kakchio men looting Messrs. Bradley and Co.'s godowns, and were making off with their plunder.

Directly the rascals got on board their junks they stood up the river, having secured about one thousand bags of beancake. Messrs. Richardson and Goodrich (of Messrs. Bradley and Co.'s firm), Mr. Preston (of the Customs), and Mr. Sage (the Consular Constable), snatching up what arms they could, gave chase in three boats.

The pursuit continued for twelve miles, a running fight being kept up the entire distance. The pirates fired from large guns, but the gigs, by keeping well on the junk's quarters, escaped injury, and by sustaining a well-directed and an incessant fire from the gigs at about thirty yards' distance, the pirates were so cut up, that finally they were compelled to run their boats ashore and desert them. This they did close to two large villages, and it was not thought safe to follow the fugitives, particularly as such could only have been done by wading in the mud.

The boats towed the junks off and brought them down to Kakchio in triumph, arriving about eight A.M. The junks' decks were covered with blood, and bullet holes prevailed to an alarming extent. Mr. Preston gave one pirate the contents of two barrels with No. 4 shot at only twenty yards' distance. Sage confined his practice to the helmsmen, and committed sad havoc with a Sharp's rifle. It is hoped that the mandarins will hunt down the perpetrators of this robbery, and make a severe example of them.

HONG KONG.

The English Mail, with dates to 26th August, arrived out on the 4th Oct., in 39 days. The dates are now down to the 15th. The steamer *Glengyle*, Capt. O'Sullivan, arrived out on the 11th Oct., having left the Clyde on 8th July.

The following marine reports are from the *Evening Mail*:—

The Hamburg brig *Bruno* reports having encountered severe weather on the 7th Sept., in which she lost her foremast-head and several sails. On the 17th, she rescued a man from part of the wreck of a vessel supposed to be the Hamburg ship *Goshen*. Some doubt, however, exists as to this, for the man, being a native of Cape Palwa, is not very easily understood. From his statement it would appear she was bound from Borneo to China, when her cargo shifting in a heavy gale, she foundered with all on board. The mate and himself managed to keep afloat on a part of the ship's house, but the former died before assistance came. He also says a large full-rigged ship passed by three days before the *Bruno*, and inquired the name of the vessel, but would not take him off because he was a black fellow.

The British ship *Pak Wan* arrived on 1st Oct. after a passage of 90 days from London, which is the fastest this year. She reports having encountered strong easterly gales from Tristan d'Acunha to lat. 40 S., and strong gales off the Cape of Good Hope; and after entering the China Seas, she had a southerly wind up to lat. 10 N., and north-east and northerly the remainder of the passage. Passing through the Gaspar Straits, she saw three vessels ashore, one of which, a large iron ship, appeared to have been only recently abandoned.

A narrative of the rescue of the passengers and crew of the Hamburg schooner *Athlet*, which was wrecked on the Pratas on the morning of the 29th Sept., has been published. The account was kindly given us by the Rev. Mr. Gulick, who, with his wife, was on his way to the scene of his mission work, in the north of China. The present position of the Chinese junkmen, who behaved so honourably in saving from the wreck and safely landing the party, who saw nothing but death before them, is not a very safe one for the honour and probity of foreigners, or for the encouragement of humane acts on the part of native junkmen. The journal of the rev. gentleman gives a very fair and impartial statement of events which have occurred up to the present moment; and for the present we only express the hope that the Chinamen will get their well-merited due.

The steamer *Union* reports that a very severe gale was felt at Formosa on the 24th Sept., and much damage done to ships in the harbour of Keelung. The Hanoverian brig *Mathilde* was driven on to Tamsui bar, and was almost a total wreck when the *Union* left. On her passage to Hong Kong the *Union* called at the Pescadores, and was there informed by the Chinese that a two masted iron steamer had been lost on the north rocks on the 27th of Sept. Her cargo, they stated, consisted of cotton and beancake.

H.B.M.'s gunboat *Opossum* went out for a cruise, returning with three junks and twenty prisoners. They were taken without resistance in Sow-ke-wan Bay, having full cargoes, with English marks upon them.

The Hamburg brig *Carl Johanna*, which left Hong Kong bound to Chefoo on 13th September, has been obliged to put back, having encountered the typhoon on the 27th, in which she stove in the water-casks she had on deck.

The Hamburg barque *Venezuela* reports having had moderate weather during the latter part of her passage. Off Anjer, on the 8th September, she saw the British ship *Maribelle*, 127 days from New York towards Hong Kong; some of the crew ashore sick. On the 12th September, in the Macclesfield Straits, she saw a large British clipper ship take the ground, and in about an hour after part amidships and sink entirely, the crew reaching the shore in boats.

The British ship *Maiden Queen*, from London, reports having encountered a heavy gale on the 25th August, in lat. 46 S., long. 39 E. Up the China Sea she had light south-west and southerly winds as high as 13 N., and since then a strong north-east monsoon. On 19th August, in lat. 46.30 S., long. 10 E., about noon, the second mate, Mr. Isaac Nicholson, was unfortunately washed overboard. A boat was instantly lowered, though a high sea was running, but all efforts to rescue him were futile. On 19th September, off Java Head, the cook, a Chinaman, named Aching, either jumped or fell overboard.

The *Daily Press* pours out a heap of abuse on Sir Hercules Robinson for the appointment of Captain Kinder as Mint Master, and the latter gentleman also comes in for a share.

The steamer *Fusi-yama*, on her passage from Hong Kong to Yokohama, when off the north end of Formosa, with the wind blowing strongly from the northward, broke her crank shaft. This was followed by the bursting of one of the cylinders. After laying to for twelve hours the broken engine was successfully disconnected, and the steamer made Nagasaki for repairs on the 23rd of September. They were accomplished, and she was obliged to leave for Yokohama on the 5th of October.

The following notification has appeared:—A godown of from three to five hundred tons capacity is required by the Colonial Government for the storage of materials expected from England for the Mint. The godown will be taken for six months certain, and a power of renewal by Government for a further period of six months will be retained. Tenders for the above, stating situation, price per month, and capacity, will be received at the Surveyor-General's office.

The *China Mail* on the late riots between the military and police says:—The details of this affair have been very spare in the Hong Kong papers. The result of the inquests on the bodies of several persons killed in a riot in Hollywood-road has been inconclusive, no verdict having been brought against persons known to the jury. The inquest on the body of an Indian constable has been somewhat more decisive, being a verdict of wilful murder against eleven soldiers of the 99th Regt., who will, of course, be tried at the Supreme Court; but it is difficult to say whether, among so many, the real murderers will be pointed out to the satisfaction of the jury. In the meantime, that hitherto well-behaved and respectable class of men have been rusticating at Kowloong, and we hear that they are under orders for the Cape for two years previous to returning home.

CANTON.

The circular of Messrs. Nye and Co., Canton, has the following on the proposed railways in China:—Reverting to the subject of the proposed railway from Canton to Hankow, as the measure of all others available most fraught with blessings, both moral and material, to the Chinese people, as reaching in this double sense, and most directly, the heart of the empire, we cannot but allude again to the compensation due to them as passive sufferers in the destructive collisions of the two civilisations, out of which the obvious gain has been chiefly to our own, to point out that in taking the initiative of

Digitized by Google

forcible inculcation we committed ourselves to the correlative obligation to contribute the beneficent results of Western civilisation as embodied in railway and other "means of intercommunication and hence of moral and social culture prelusive" of those of a spiritual nature. But we have no need to appeal to a sense of duty for incentive to this undertaking, since the volume of trade alone and irrespective of the passenger traffic of this populous country will suffice for its ample productiveness to the shareholders. And since its utility to the Government as a means of preserving order is susceptible of clear demonstration to the Court of Peking, we may hope that the present cordial accord of the four great Powers in presence there by their able representatives,—England, France, Russia and America,—may be effective in obtaining not only the permissive sanction of the Imperial Government but its assurance of pecuniary support of this undertaking.

MALACCA STRAITS.

SINGAPORE.

Dates hence are to the 23rd October. The London Mail of the 10th September arrived out on the 18th October, and the French Mail of the 17th September on the night of the 21st. Since we last wrote (says the *Strait Times*), instructions have come down from India to the Government here, to proceed with the construction of works for the supply of the town with water. These will entail an expenditure of at least £10,000 in the first year, leaving about double that amount to be afterwards spent by the municipal authorities for the purposes of distributing the water. Of course, this work will in course of time pay itself, and afterwards be a source of considerable municipal revenue; but it is an outlay in the first place which we scarcely expected the Government of India, under the present circumstances of probable transfer, to sanction; for it is understood that India makes no claim to reimbursement for what she has expended on public works, and it is just possible that the sum to be expended on these works—which may reach nearer £20,000 than £10,000—may not be covered by the year's revenue, and may have to be set down among the previous sums spent upon public works, and lost to the India Government. Another way of looking upon it is, that the Indian Government have really had intelligence that we are not to be transferred to the Colonial office.

The following "losses" are recorded:—

Captain Nordenholz, of the Bremen brig *Johanna*, from Buenos Ayres, reports having seen, on the 7th October, the wreck of a large ship, apparently American built, off Rattan Island, between Rhio and Singapore Straits. Her masts were gone, and the ship water-logged; figure head gilded, no name to be seen, passed within 25 fathoms; wreck drifting.

By the *Oenarang*, Dutch mail steamer, we hear of the total loss of the British ship *Knight Templar*, Captain Sparke, of Liverpool, bound from Shanghai to London, in Allass Straits, on the 17th Sept. The captain, passengers, and some of his crew arrived at Singapore on the 19th Oct. Captain Swan, of the British barque *Keepsake*, also from Shanghai for London, had arrived, reporting the loss of his vessel on the Island of Savu in June last.

The British steamer *Foong-Suey*, from New York on the 28th July, arrived at Singapore on the 19th October.

The British steamer *Glengyle*, Captain Sulivan, from Glasgow the 8th July last, arrived on the evening of the 30th September, and sailed for Hong Kong on the 2nd October.

The British steamer *Fire Queen*, Captain Thompson, from New York the 7th July last, arrived on the morning of the 2nd October.

Captain Cartz, the officers and crew of the iron ship *Sea Horse* (the wreck of which vessel in Gaspar Straits was noticed in the *London and China Telegraph* of the 9th November), arrived on the 22nd October from Billiton in a native craft. They describe the vessel as a total wreck—nothing but some of the stores and rigging being saved. During the time the shipwrecked crew were on Billiton, they received every kindness and attention from the Dutch authorities.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

HARPER—On the 5th Oct., at Shanghai, the wife of Capt. W. Harper, of a daughter.
HUFFUM—On the 27th Sept., at Hong Kong, the wife of F. S. Huffum, of a son.
HENDERSON—On the 9th Sept, at Shanghai, the wife of James Henderson, Esq., M.D., F.R.C.S.E., of a daughter.
NORIE—On the 30th July, at Valetta, Double Bay, Sydney, the wife of Capt. W. F. Norie, of a daughter.
VACHER—On the 9th Nov., at 33, Avenue-road, N.W., the wife of Major Vacher, 22nd Regt., of a daughter.

MARRIAGES.

ALT—EARL.—On the 15th Sept., at Adelaide, South Australia, William John Alt, Esq., of Nagasaki, Japan, to Elizabeth Christiana Fernhill, daughter of George Windsor Earl, Esq., of Province Wellesley, Straits of Malacca.
STIBOLT—MORRIS.—On the 24th Sept., at Shanghai, at the Trinity Church, by the Rev. W. Mitchell, N. Stibolt, of Shanghai, native of Denmark, to Mrs. J. Morris, of Shanghai, native of Norwich.

DEATHS.

ADAMS—On the 20th Nov., at 55, Torrington-square, Harriet Anne, wife of Borlase Hill Adams, Esq., barrister-at-law, and daughter of the late John Cobbold, Esq., of Hol, Wells, Ipswich.
ANTROBUS—On the 24th Aug., at Auckland, New Zealand, aged 29, Major Antrobus, 2nd Waikato Militia, second son of the late G. C. Antrobus, Esq., Eaton Hall, Congleton.
ALLAN—On the 12th Oct., at Penang, John, the infant son of John Allen, Esq., aged 5 months and 5 days.
BAITH—On the 9th Oct., at the Seaman's Hospital, Hong Kong, Geo. Baith, seaman of the ship Energie.
FREEMAN—On the 19th Sept., at the Washington Restaurant, Hong-que, Shanghai, Wm. Freeman, aged 30 years.
FRASER—On the 12th Oct., at the Seaman's Hospital, Hong Kong, A. Fraser, seaman of the ship Fahkee.
HAKANSSAN—On the 14th Oct, at the Seaman's Hospital, Hong Kong, J. F. Hakanssan, seaman of the ship Falco.
HINDS—On the 4th Oct., at Hong Kong, Charles Hinds, master of the British barque Xulla, aged 52 years.
HALL—On the 20th Sept., suddenly, at the Methodist New Connexion Mission, Tientsin, North China, Emma Eliza, the beloved wife of the Rev. William Nelthorpe Hall, in her 35th year.
KETTLE—On the 28th Sept., at Shanghai, of dysentery, Mary Anne, relict of the late Edwin K. Kettle, of the British Consulate, Ningpo, aged 20 years.
MOLLER—On the 29th Sept., at Shanghai, of dysentery, at the age of 6 months and 18 days, Eric Arthur, the beloved and infant son of Nils Moller.
M'DONALD—On the 13th Oct., at Hong Kong, Mary Ann, youngest child of A. M'Donald, shipwright, aged 11 months.
NEILSON—On the 14th Oct., at Hong Kong, Capt. Neilson, of the ship Hope.
OFFY—On the 5th Oct., at the Civil Hospital, Hong Kong, John Offy, destitute seaman.
PHILLIPS—On the 9th Oct., at the Seaman's Hospital, Hong Kong, George Phillips, seaman of the ship Montrose.
ROWE—On the 29th Sept., at Ningpo, George Henry Rowe, late master of the steamship Tun-sin.
SIMPSON—On the 30th Sept., at Hong Kong, West Point, Henry Simpson, superintendent of Buildings for the Hong Kong and China Gas Company, in the 59th year of his age.
WITTY—On the 30th Sept., at Hong Kong, West Point, Ellen, the beloved wife of R. C. Witty, manager of the Gas Works.
WAYETT—On board the Berwick Walls, floating hospital ship, Shanghai, aged 40, of dysentery, James Wayett, late proprietor of the Pacific Restaurant, Hong-que.

EXCHANGES ON LONDON.

[The telegram per French mail, with ten days later news, reports Exchange at Shanghai 6s. 8½d.; at Hong Kong, 4s. 9½d.]

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON.—In Country Congous little has been done; in Canton Congous an average amount of business has been transacted; Scented Teas are in fair request, fine being wanted, and common being neglected. Canton Greens are neglected and tend down. The following are the settlements of the fortnight:—Congou: 1 chop fair Oonahm at 24 taels, 1,250 half-chests and 750 boxes Canton at 18 taels to 37 for common to finest. Scented Orange Pekoe: 5,000 boxes at 19 taels to 37 for common to very fine. Scented Caper: 7,000 boxes at 19 taels to 31 for common to finest. Canton Greens: 1,600 boxes Imperial at 14 taels to 22 for common to fair. The stock on the market consists of 4 chops Country Congous, 3,500 half-chests Canton do., 600 half-chests Souchong, 3,000 half-chests Oolong and Powchong, 22,000 boxes Scented Teas, 15,000 boxes Canton Gunpowder, and 2,000 half-chests Canton Young Hyson.

AMOY.—Oolongs: Settlements have been confined to 710 half-chests at $23 to $26 for fair to superior cargo, but the teamen are now willing to accept much lower rates. In the absence of late transactions, no true quotation can be given. In Ankois no settlements have been made. The total supplies of these two kinds for the present season to date amount to 91,350 half-chests and 1,750 boxes, against 63,600 half-chests and 1,750 boxes same period last season. The settlements this season to date amount to 54,800 half-chests and 1,100 boxes, the stock on the market being reported at 36,500 half-chests and 650 boxes. Congous: A decline of $3 was at one time established, but latterly an improved demand having set in, prices have become a little firmer. The settlements of the month are reported at 1,400 half-chests at $15½ a $22½, for common to flavory. The total supplies of the season to date amount to 38,000 half-chests and 2,400 boxes, against 48,000 half-chests and 550 boxes same period last season. The settlements this season to date amount to 31,000 half-chests and 250 boxes, leaving an unsold stock of 7,000 half chests and 2,000 boxes. Plain Orange Pekoes: No transactions; supplies this season 1,000 half-chests and 500 boxes against 4,000 half-chests and 1,750 boxes same period last season. The whole of the present season's supply has been placed. Plain Capers: No supplies this season.

FOOCHOW.—A large business has been transacted during the fortnight, notwithstanding the unfavourable news from London per 10th August mail. Dust and shipping kinds have been largely dealt in for the Colonies at previous rates; extensive settlements have also been made in flavory to good flavory kinds at very irregular prices; these descriptions are fully 1½ tael higher. The market for all grades closes firm, good common Congou being 16 taels.

Digitized by Google

SHANGHAI.—Black: A fair business has been transacted during the fortnight at rates which show no material change; the prices, however, have been very irregular, some settlements being fully one tael over last mail's quotations. In spite of the continued bad advices received by the French mail, holders remain firm. The stock is now almost entirely composed of third crop teas. Settlements on the market 25 chops, or 11,119 chests Oopacks, Oonahms, Ninchows, Hohows, and Flowery Pekoe. Re-shipped on owners' account, 25 chops, or 12,719 chests, together 50 chops, or 23,838 chests, making total for season to date 271,695 chests. Stock, waiting shipment and for re-sale, 53 chops or 23,289 chests. Second and third crop Oopacks are quoted 25½ tls. to 29 tls.; Ningchows, 25 tls. to 32 tls.; Oonahms, 20 tls. to 26 tls.; Hohows, 18 tls. to 22 tls. Green: Very little has been doing during the fortnight, and only two settlements of Shanghai-packed are reported, which show no change on previous rates. Buyers are generally holding off, and settlements could be made at a considerable decline, as the stock is now daily increasing. Several chops of Teen-Kai and Fychow have arrived from Ningpo, but at present holders are not pressing sales. The stock is, it is generally thought, considerably over what is reported by the natives. Re-shipments and settlements, 10,548 half-chests Pingsuey, and 1,925 half-chests Japan and Shanghai packed—together, 11,873 half-chests, making total to date, 69,713 half-chests. Stock of Green Tea is estimated at 15,396 half-chests Fychows, &c.; 2,762 half-chests Shanghai-packed Japan; 5,758 half-chests Pingsuey: total, 29,916 half-chests.

HANKOW.—The market continued quiet until about a week after the departure of last mail, when a very active business took place for a few days, which was suddenly checked on receipt of the news of advance in exchange, and the market has now relapsed into its former quiet state. The teamen still remain very firm, and transactions are likely to be limited until they submit to a reduction. Settlements since the 14th ult. amount to 60 chops (including two contracts and four sent to Shanghai) making the total settlements for the season 600 chops, and leaving a stock on the market of about 50 chops. Quotations are:—Oopacks mediums, taels 20 to 22; Oonahms, common, taels 16 to 17.

KEWKIANG.—Green: On the 21st ulto. a chop of medium Fychow was settled at 36 taels, which was deemed the opening of the market. The next day a chop of fine Tea was settled on private terms. Nothing further was done until the 26th, when another chop of medium Fychow was taken at 36¼ taels—these, with the purchase of 400 half-chests. Kewkiang packed at 32 taels, comprise the settlements of the fortnight. Shippers appear to be unwilling to go on at these rates, and arrivals having been full the market looks quiet and dull. The stock amounts to 15,000 half-chests Country and 2,000 Kewkiang packed, and more is known to be close at hand. Black Teas: The settlements of the fortnight comprise 6,000 chests. Congou at taels 20 to 24 for fair medium Ningchow, and taels 14¾ to 16 for common to fair Hohow. Stock 13 chops.

YOKOHAMA.—Although a decline of about $2 per picul has taken place, still rates are too high for investment. Stocks are increasing, and must continue to accumulate until the dealers moderate their demands. The settlements for the month of September are estimated at 3,500 pl., the unsold stock being 8,000 pls. The quotations are—fine, $27 to $28 per picul; medium, $24 to $27; common, $15 to $23. The export from 1st July to date amounts to 1,311,903 lb. against 1,404,223 lb. same period last season, 5,811,901 lb. for season 1862-63, and 5,847,133 lb. for season 1861-62.

RAW SILK.—SHANGHAI.—For a short time after the departure of last mail the dealers continued firm, notwithstanding the high rate of exchange. Latterly, however, they became more anxious to realise, and submitted to a decline of 10 to 15 taels per picul, which enabled them to sell about 1,500 bales. The receipts from the country are estimated at 800 bales, and the Chinamen report they find difficulty in obtaining supplies, and that prices are, consequently, very high. From Japan only 83 bales have come forward, and although at Yokohama they are sanguine that the stock at Yedo will shortly be brought down, there is still much uncertainty about it, so little dependence can be placed in the promises made by the Japanese officials. The transactions of the fortnight are stated at 1,500 bales, against 1,700 do. the corresponding fortnight of last season, and 1,200 of the season before. The present stock is stated at 6,000 bales. The following are the latest quotations:—Tsatlees, No. 1 chops, 460 to 470 tls. per picul; 2, 440 to 450; 3, 420 to 430. Taysaams, No. 1, 380 to 390; 2, 360 to 370; 3, 345 to 355; 4 and 5 inferior, 300 to 335. Sewings, 300 to 350.

YOKOHAMA.—The state into which the market has for so long a period been thrown still prevails, owing to a continuance of the restrictions for some time past imposed on this article by the Japanese authorities. Several parcels have been smuggled down, but as they passed direct into the hands of the respective firms who were interested in them, they were not placed on the market, and prices therefore cannot be quoted. The native silk dealers give strong assurances that the silk now detained at Yedo will shortly be set free, but beyond this there is no ground to base a hope when this desideratum will take place. The exports this season have been 698 bales, against 5,810 bales same period last season.

DRUGS, &C.—Cassia Lignea: Settlements are reported to the extent of 500 piculs at $5.60, and notwithstanding the augmentation of the stock to 800 piculs the article is firmly held at $15.70, being fully 20 cents advance on last quotations. Cassia Buds: Nominal at $53, no stock. China Galls: The old stock of 100 piculs is now offered at $12.50 showing a decline of 50 cents. Vermilion: Has further receded in value, being now quoted $40.50 per box of 50 catties. Rhubarb: On reinspection the old stock of 130 piculs shows a serious depreciation in quality, occasioned by careless drying of the roots, and as the holders do not moderate their demands, no doubt this stock will soon become unfit for shipment to Europe or New York, as has often been the case before. Musk: Nothing doing, no fresh supplies. Galangal: No buyers for export; nominal price $2 to 3 per picul. Essential Oils: None on the market.

CAMPHOR.—HONG KONG.—Of the 900 piculs stock on hand but 150 piculs have found buyers, at 19 dols. per picul packed, and the balance is still held at the same price without finding buyers. No supplies have arrived during the fortnight.

COTTON.

SHANGHAI (From John R. Fraser and Co.'s Circular).—The animation which existed in this market at the departure of the last mail continued during the greater portion of the past fortnight, but the high rates at which the market opened are declining. The news brought by the English mail of the 10th August and the French mail of the 16th August, with telegrams, and the state of our money market here, have all had the effect of causing buyers to wait for lower rates or advices of improvement at home. The cotton is now coming on the market pretty freely, but it is to be regretted that the Chinese still persist in wetting or otherwise falsely packing the cotton, and though the resistance made to receiving wet cotton is well understood by them, the desire to purchase when rates were so high has encouraged the Chinese to wet the cotton to make up in weight for the decline in price. It is quite certain that as the price has declined the supply has become of an inferior description, the cotton in the hands of the weavers being much superior to that brought on the Shanghai market. The rates given at present are so much in favour of the planters or farmers that the greater portion of the dealers or cotton shopkeepers have been obliged to stop buying, even with the market price at Tls. 20. Parcels on the spot have been sold this week in lots of 200 to 1,000 bales each, at Tls. 19.50 to Tls. 20 for Shanghai denomination. Tls. 19 for Kongpo. Tientsin, Tls. 19.50. Contracts for delivery this month, Tls. 19.25 and Tls. 19.50; for November, Tls. 19 Shanghai cotton.

NINGPO.—Supplies have been pretty free; rates have fallen about $3 per bale, and seem disposed to decline still further. The quotations are—You You, $33 (per bale of 118 to 120 catties) for the best. Eu chong, $31,50. The steamer *Tynemouth* took 4,000 bales to Hong Kong, and the stock on the market is 5,000 bales.

YOKOHAMA.—The season is drawing to a close, and the new crop is expected by the end of October. Prices are firm at $30 to $31 per picul, the settlements for September being reported at 6,000 piculs, the quality of which has proved very inferior. The unsold stock is reduced to 500 piculs.

CHINA IMPORTS.

COTTON YARN.—The value of cotton yarn in this market remains much the same as previously quoted, although small parcels of the lower numbers have been quitted at slightly easier prices. The transactions of the fortnight are estimated at 425 bales, and about 70 bales of damaged twist have likewise been moved off at auction. Grey Shirtings: The demand has been entirely confined to the Chinese dealers, who have purchased more freely since the departure of last mail than for some time past. Prices are, however, slightly weaker, although there is scarcely any change to be made in current quotations. Settlements are estimated at 13,500 pieces, exclusive of 5,500 pieces damaged cloths sold by public auction. In Canton 1,000 pieces have been taken at about previous rates, and sales of about 8,000 pieces are reported from Foochow, at $4.90 to $5.70 for 7¼ lbs. to 8½ lbs. goods. White Shirtings: Without change to notice in value, have also met with a fair amount of inquiry, and the settlements reported during the past fortnight are put at 10,000 pieces. 1,000 pieces have found buyers in Foochow, at $4.50 to $5.40 for 56 to 62 reed. T-Cloths: During the last week there has been more inquiry for these goods, and the value of the lighter grades had advanced fully 10 cents per picul. To-day however, there is less demand, and the market closes rather dull. Settlements amount to 22,400 pieces, and 12,800 pieces sold by public auction. Sales of 1,800 pieces are reported from Foochow, at $3.40 to 3.65 for 6lbs. to 7¼lbs. White Spotted Shirtings, Dyed do., Brocades, White and Coloured: Have been in moderate request, and the sales effected during the past three weeks amount to 1,950 pieces Dyed Shirtings, and about a similar quantity of Coloured Brocades, exclusive of 500 pieces of the latter sold by auction. 600 pieces of Brocades have also been disposed of in the Foochow market. Damasks: 220 pieces disposed of at about previous rates. Chintzes: No sales. Handkerchiefs: The sales effected of these goods are estimated at 4,500 dozens, in addition to which about 1,020 dozens of damaged handkerchiefs have found buyers at public auction.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: These goods have met with good demand during the last three weeks, and prices of the first-mentioned are slightly firmer. Sales are estimated at about 1,800 pieces of all descriptions. Long Ells: There is some little improvement noticeable in the value of Long Ells, and the amount of business which has been transacted since the date of last Circular has reached a fair amount. Settlements are put at 2,200 pieces. The sales reported from Foochow are put at 300 pieces, H H Scarlet at $8.80, and 500 pieces Assorted Colours at $9.75 per piece. Camlets have also advanced about 50 cents in value since the beginning of the month, and the settlements effected amount to 1,580 pieces. Lastings: These goods are very scarce, and transactions have been limited to the placing of 20 pieces. Blankets: A moderate inquiry has existed for these goods, and sales of 850 pairs are reported.

METALS.—Iron, Flat, &c.: There is not any change noticeable in the value of the principal descriptions of iron imported, but prices continue firm, and a moderate amount of inquiry exists; the settlements of all kinds in this Colony amount to 4,700 piculs, the bulk being Nail Rod; while from Canton the sales are put at 3,750 piculs of Nail Rod and 115 piculs of iron wire. Lead: Stocks continue to increase, and there is not at present the slightest demand for the article in this Colony. In Canton the sales are put are at 1,200 piculs at lower rates. Tin: The settlements amount to 650 slabs. Tin-plates: Have found buyers to the extent of 550 boxes.

SHIPPING INTELLIGENCE.

ARRIVALS.

AT KANAGAWA.—None.

AT SHANGHAI.—From London: Sept. 23, Laurel; 24, Sir W. F. Williams; and 30, Anglo Saxon. From Liverpool: Oct. 1, Elizabeth Murrow. From Sunderland: Sept. 21, Beatrice and Bosworth. From Glasgow: 21, Glenclune. From Cardiff: Oct. 5, Cesarea. From New York: Sept. 21, Lancaster.

Digitized by Google

At Foochow, Amoy, &c.—None.

At Hong Kong.—From London: Oct. 1, Pak-wan, and Sovereign of India; 2, Havelock; 12, Maiden Queen. From Liverpool: 2, Amazone. From Cardiff: 1, Venezuela, and Wartburg; 3, Antagonist; 5, Orion. From Shields: 2, Sepia; and 3, Daisy. From Sunderland: 4, Cambridge. From Newcastle: 8, Telegraphe. From Clyde (*via* Singapore): Glengyle (steamer). From Newport: 2, Atlantic. From New York; 2, Caroline; 6, Maribelle.

At Manila.—None.

At Singapore.—From Liverpool: Oct. 11, Conheath. From Cardiff: 5, Florentine; 19, Euxine. From Bristol: 6, Equinox. From Newcastle: 8, Warrior. From Swansea: 10, Der Sud. From Hamburgh: 10, Ophelia; 18, Aline. From Bordeaux: Jeane d'Arc. From New York: 20, Foong Suey (str.); 8, Fire Queen (str.)

At Batavia.—From London: H. Lidnina, and from Glasgow: County of Lanark.

DEPARTURES.

From Kanagawa.—None.

From Shanghai.—From London: Sept. 24, Sarah Newman, and Yaratilda; Oct. 2, Leichardt; 6, Queen of Nations. For Liverpool: Sept. 23, Providence; 30, Patna. For New York: Sept. 24, Prince of Wales.

From Foochow.—For London: Sept. 19, Rajah of Cochin; 23, Harkaway, and Lord Raglan. For Liverpool: 28, Veronica.

From Amoy.—For London: Oct. 7, Taeping. For New York: 5, Salacia.

From Hong Kong and Canton and Macao.—For London: Sept. 28, Coulnakyle; 29, Cathaya; 3, (via Macao) Peterborough; and 7, England. For Liverpool: Oct. 1, Samarang. For Queenstown: Sept. 26, Alida. For Hamburg: Sept. 30, Minerva and Guillaume.

From Manila.—For Liverpool: Oct. 1 (via Cebu), North; 5, Olano. For New York: Sept. 20, Rattler.

From Singapore.—For London: Oct. 20, Warren Hastings. For Liverpool: 18, Simoon.

From Kui-Kiang.—For Woosung and London: Oct. 4, Far East (tr.).

From Penang.—For London: Oct. 13, Isabella.

LOADING.

At Kanagawa.—For London: Mountain Ash, Amelia, Little Edith, Comus, Lucknow.

At Shanghai.—For London: Avonhue, Agincourt, Beemah, Rifle, Canadian, Cleveland, Countess Russell, David McIvor, Glenclune, John Staunton, jun., Palawan, Queen of the Ocean. For Liverpool: Gwalior, Isabella, Queen of the East, Southern Empire, Sailor's Home, Savior Faire, Ærolite, Ariadne, Constance, Coringa, Denis Horton, Her Majesty, Norah Creina, Roodee. For New York: Clara, Babuijun.

At Foochow.—For London: West Derby, Cœur de Lion, Lord Raglan, Gauntlet, Ellenborough (expected), Lord Clyde, Prince Alfred, Carisbrook, Langdale, Verbena. For New York: Ravensworth.

At Hong Kong and Canton.—For London: Cambalu, Peterborough (full). For Liverpool: Melbreck, Jas. Vinnicombe, Mary Nicholson. For New York: N. B. Palmer.

At Manila.—For London: President Harbitz. For Falmouth: Malvina Vidal. For Liverpool; C. S. Lemon.

At Singapore.—For London: Maid of the Tyne, Northumberland, St. Oswin. For Liverpool: Moneta. For Falmouth: Susanne. For Cork: Kirkconnell. For Marseilles: Ocean. For New York: Demetris. For Boston: Borneo.

At Batavia.—For Channel (for orders): Ocean, Oscar I., Cecilia, President v Ryckevorsel, Wilhelmina.

At Penang.—For London: Wellington. For Bordeaux: Concorde.

FREIGHTS AND CHARTERS.

Kanagawa.—To London: Silk, £5 tea and cotton; £4 per ton of 50 cubic feet.

Shanghai.—To London and Liverpool: Tea and cotton, £3. 7s. 6d. to £3. 17s. 6d. per ton.

Foochow.—To London: £3. 15s. to £4.

Hong Kong a. d Canton.—Geo Holmes's Circular gives the following settlements for home:—James Vinnicombe (679), on the berth for Liverpool, at £3; Blancathra (466), Foochow to London, at £3. 5s.; Star of the North, do., £3. 5s.; Prince Alfred, do., £3. 15s. to £4; Freya (486), Foochow to Europe, £3. 10s.; Catharina (225), Macao to Hamburg, £3; Montrose (778), Whampoa to Demerara with coolies, at £15 per head. To Rangoon and back the rates vary from 60 to 80 cents per picul; Bangkok and back, 45 cents—20 to 25 cents extra if ordered north.

Manila.—The President Harlitz has been laid on for London, at £3 for clayed sugar, £4. 10s. for hemp, and £4 per 18 cwt. for coffee. The North has been taken up for Liverpool, to load here and at Cebu, her rates being £3. 5s. from this, and £3. 10s. from Cebu, for unclayed sugar, and £4. 5s. for hemp shipped at Cebu.

Singapore.—Notwithstanding a good number of arrivals seeking employment, rates have slightly advanced.

Batavia.—Numerous charters have taken place, and as the arrivals of seeking vessels have been less numerous, an advance in freights has been established, vessels having been lately taken up at 85f. per last for sugar to Holland, equal to £4. 2s. E.I. Company's conditions.

PASSED STRAITS OF SUNDA.

From England and Continent to China, &c.—Sept. 27, Equinox, from Bristol, to order; 24, Florentia, Cardiff to Singapore; 27, Ophelia, Hamburg to Singapore; Frans and Elise, Amsterdam; 30, Lelia Rookle, Hendrika, Amsterdam, Batavia; Oct. 2, Clarendon, Newport to Shanghai; Ontares, Bordeaux to Saigon; 8, Aline, Hamburg to Singapore; 11, Europe, Rotterdam to Batavia.

From China, &c., to England and Continent.—Sept. 25, Wild Deer, Shanghai to London; 26, Joseph Wilson, Batavia to Rotterdam; 27, Queen Bee, Singapore to Falmouth; 30, Edward Percy, Hong Kong to Liverpool; Oct. 3, Yeavering Belle, Hong Kong to London; 6, Queen of India, Singapore to London; Hendrika, Batavia to Rotterdam.

From China, &c., to United States.—Sept. 27, Franklin and Julia Ambridge, and, Oct. 1, Continent, from Manila to New York.

CASUALTIES.

FORMOSA.

The steamer Union reports that a very severe gale was felt at Formosa on the 24th of September, and much damage done to the ships in the harbour of Keelung. The Hanoverian brig Mathilde was driven on to Tamsui bar, and was almost a total wreck when the Union left.

HONG KONG.

The Goshen, from Labuan to Hong Kong, has foundered, all hands lost; excepting one coloured man.

The Hamburg schooner Athlet, from Hong Kong, bound to Tien-Tsin, was totally lost on the Pratas Shoals on the 29th September. The Rev. Mr. Gulick and his wife were passengers. All hands saved.

COMMERCIAL POSTSCRIPT.

Arrivals not Included in the Tables.—Nov. 24, at London, from Manila, Admiraal de Winter; 24, at Falmouth, from Rangoon, Transit and Valentia; 23, at Queenstown, from Rangoon, Kallibokka, from Manila, Achilles; 22, at Texel, from Batavia, Sliedrecht; 22, a; Quiberon, from Rangoon, Alphonsine Irma; 22, at Brouwershaven, from Batavia, Burgermeister Hoffman; 26, at Liverpool, from Shanghai, "Hougoumont," Flamank; at Milford, from Maulmain, Madawaska; 28, at Ramsgate, from Ceylon, Choice; at Falmouth, from Manila, Chance; at Liverpool, from Singapore, Volunteer; at Plymouth, from Maulmain, Tony; at Deal, from Colombo, Balnaguith; at London, from Singapore, The Tweed.

Departures.—Nov. 25, from London, for Colombo, Isabella Atkinson; Nov. 28, from Liverpool, for Cheribon, Java, Moreno, for Hong Kong, Monsoon, for Batavia and Sourabaya, Dionysia Catherina, for Singapore, Agenoria, Hurry Puddemsey, for Shanghai, *via* Cardiff, W. W. Smith.

Spoken.—Asia (Eng. bark), for Singapore, 48 N., 8 W.; Zaanstroom (Dutch schr.), Amsterdam to Batavia, 21 Sept., 2 S., 20 W.; William Stairs (?), Penang to London, 23 Oct., 8 N., 23 W.; Barndre, Bordeaux to Batavia, Oct. 18, on the line, 25 W.; Waalstroom, Amsterdam to Japan, Nov. 17; Geologist, Hong Kong to Liverpool, Sept. 14, out 50 days, 14 S., 88 E.; Velore (Pr. ship), Batavia to Boston, Sept. 29, 24 days out, 31 S., 38 E.

Laid On.—At London, for Colombo, Princess, Empress.

Casualties.—The long boat of the Robin Hood was picked up on the 23rd November off the South Foreland, and on the following day in the stream off the North Sand Head, a few cases, supposed to be from the wreck of that vessel.

The mate of the Helen's Bank, from Colombo to London, which ran ashore at Scilly on the 18th Nov., reports that when she struck there were only three men and a boy on board, most of the crew having been discharged.

The Choice, Crozier, of Shields, from Colombo to London, went on shore in St. Margaret's Bay during the gale on the night of the 25th Nov. Crew saved; she has since been towed into Ramsgate Harbour, making water.

According to latest accounts, the Robin Hood lies in the same position where she sunk. All her sails have been unbent or cut away by boatmen, but in consequence of a heavy swell, nothing else could be done. Seven cases of her cargo have been washed ashore at Dungeness.

THE NAVAL ACTION IN JAPAN.

(From the *London Gazette* of Nov. 18.)

Despatches, of which the following are copies, have been received at the Admiralty from Vice-Admiral Sir Augustus L. Kuper, K.C.B., the Commander-in-Chief of Her Majesty's ships and vessels on the China station:—

"Operations in the Straits of Simonoseki.

"Euryalus, Straits of Simonoseki, Sept. 15.

"Sir,—I acquainted the Lords Commissioners of the Admiralty briefly in my letter of the 10th inst., No. 342, with the successful result of the operations of the allied squadrons in the Straits of Simonoseki, and I have now the honour of reporting in detail, for their lordships' information, the progress of events subsequently to the 29th ult., the day of our departure from Yokohama.

"2. The Perseus having joined my flag in the entrance to the Boungo Channel, with a large collier in tow from Shanghai, and the Coquette arriving at the rendezvous on the 4th from Nagasaki, the force by which the operations were conducted consisted of the undermentioned ships, viz.:—

"British.—The Euryalus, Tartar, Conqueror, Barossa, Leopold, Argus, Perseus, Coquette, Bouncer, and the battalion of Royal Marines.

"French.—The Semiramis, screw, 35 guns, flag of Rear-Admiral Jaurès; Duplex, screw, 10 guns; Tancrède, screw, 4 guns, despatch vessel.

"Dutch.—The Metalen Kruis, screw, 16 guns, senior officer's ship; D'Jambi, screw, 16 guns; Amsterdam, paddle, 8 guns; Medusa, screw, 18 guns.

"And the United States' chartered steam vessel Takiang, with an officer, a party of men, and a gun of the United States' corvette Jamestown.

"3. The whole squadron having assembled at the island of Hime Sima, in the Inland Sea (the appointed rendezvous), left that anchorage at 9 A.M. on the 4th inst., and steered for the entrance to the Straits of Simonoseki, anchoring in the afternoon out of range of the batteries.

"4. The accompanying tracing of the chart of the straits will explain to their lordships the position and strength of the batteries as described thereon by Major Wray, Royal Engineers, the batteries being referred to in this despatch by numbers corresponding with those on the plan.

"5. Having, in company with Rear-Admiral Jaurès, reconnoitred the

Digitized by Google

position of the batteries belonging to the Prince of Choshiu, it was arranged that the attack should be made on the 5th inst., as soon as the tide served, and at 2 P.M. the signal was made for the ships to take up their positions.

"As soon as this was accomplished the action was commenced from the bow gun of the Euryalus, and the fire was smartly returned and kept up with much spirit by the Japanese batteries. At about 4.30 P.M. the fire from Nos. 4 and 5 batteries evidently slackened, and shortly afterwards ceased altogether, and by 5.30 batteries Nos. 6, 7, and 8 were also silenced. The day was now too far advanced to admit of the landing parties being disembarked, but the Perseus and the Dutch corvette Medusa being very close to battery No. 5, and it being too dark to signalise for instructions, Commander A. J. Kingston, with Lieutenant F. J. Pitt and a party of men from the Perseus, followed by Captain de Casembroot and Lieutenant de Hart, of the Medusa, gallantly landed, spiked most of the guns in that battery, and returned to their ships without casualties of any sort, thus rendering very valuable service.

"6. The positions taken up by the allied squadrons in this afternoon's engagement were as follows:—The advanced squadron, under the command of Captain J. M. Hayes, consisting of the Tartar, Dupleix, Metalen Kruis, Barossa, D'Jambi, and Leopard, moved into the bay off the village of Tanoura, as shown on the plan, within easy range of batteries 3 to 9 inclusive, while the Euryalus and Semiramis opened fire upon the same works; the light squadron, under Commander Kingston, consisting of the Perseus, Medusa, Tancrède, Coquette, and Bouncer, were directed to take the batteries in flank; the Argus and Amsterdam, being at first kept in reserve to render assistance to any ship that might be disabled or grounded, were afterwards ordered to close and engage; and the Conqueror, having the battalion of Marines on board, was, in consquence of the difficult navigation, directed to approach only sufficiently near to admit of her Armstrong guns bearing on the nearest batteries. During this operation the Conqueror grounded twice on a knoll of sand, but came off again without assistance and without sustaining any damage. The Takiang also fired several shots from her one Parrot gun, doing good service. The Coquette towards the close of the engagement was withdrawn from her position with the flanking squadron, and sent to assist the foremost of the advanced corvette squadron, a service which Commander A. G. R. Roe performed with great promptness.

"7. At daylight on the 6th inst. No. 8 battery again opened fire upon the advanced squadron, doing some damage to the Tartar and Dupleix, but on the squadron returning the fire the battery was soon silenced, and only an occasional straggling shot was fired from it afterwards. The arrangements for the disembarkation having been completed, the allied forces, composed of the small-arm companies of the Euryalus and Conqueror, under the command of Captain J. H. J. Alexander, of the Euryalus, the battalion of Marines and Marines of the squadron under that of Lieutenant-Colonel W. G. Suther, and detachmen's of 350 French and 200 Dutch seamen and Marines, the former under the command of Captain du Quilis and Lieutenant Layrle, Chef-d'Etat Major, and the latter under that of Lieutenant Binkis, were distributed in the boats of the squadron, and towed to the opposite shore by the Argus, Perseus, Coquette, Tancrède, Amsterdam, Medusa, and Takiang, the Bouncer assisting to cover the landing, which was effected without accident, under the able superintendence of Captain W. G. Luard, of the Conqueror, assisted by Commander E. T. Nott, of that ship, and the force proceeded, under my personal directions, to assault and take possession of the principal batteries, which was accomplished with only trifling opposition. All the guns having been dismounted and spiked, carriages and platforms burnt, and magazines blown up, and deeming it inexpedient, from the very rugged and almost impenetrable nature of the country, to retain possession of any post on shore during the night, I directed the whole force to re-embark at 4 P.M.

"8. The French and Dutch detachments were already in their boats, when the Naval Brigade, stationed at Battery No. 5, was suddenly attacked by a strong body of Japanese assembled in the valley in the rear of the battery. Colonel Suther's battalion of Marines coming up at this moment a joint attack was immediately organised, and the enemy driven back upon a strongly-placed stockaded barrack, from which they were dislodged after making a brief but sharp resistance, leaving seven small guns in our possession. I regret to say that Captain Alexander, while gallantly leading his men to the attack of the stockade, received a severe wound in the foot, and many other casualties also occurred in this attack. The whole force having then been ordered to embark reached their ships without accident, notwithstanding the violence of the currents, which presents serious obstacles to any operations in these straits.

"9. During this day's action I noticed with great pleasure the coolness and gallantry of the Naval Brigade, under Captain Alexander, the excellent discipline and steady bearing under fire of the battalion of Marines under Colonel Suther, ably supported by Lieutenant-Colonels P. C. Penrose and C. W. Adair; and I observed with satisfaction the readiness with which the French and Dutch brigades occupied their positions. It was, however, a source of regret to me that the embarcation of our allies prevented their taking part in the gallant affair at the enemy's stockade.

"10. The Perseus, while covering the landing on the morning of this day was driven on shore by a strong eddy of the current, and, resisting all efforts to get her off, she remained fast until midnight of the following day (7th), when, having been considerably lightened, she was towed off under the judicious management of Commander John Moresby, of the Argus, and apparently without damage.

"11. The batteries from Nos. 1 to 8 inclusive being now entirely in our possession, large working parties were landed early on the morning of the 7th, and commenced embarking the guns captured on the previous days; and during the afternoon the Tartar, Metalen Kruis, D'Jambi, and Dupleix moved round to the westward of Mozi Saki point, preparatory to an attack on Batteries Nos. 9 and 10.

"12. On the 8th inst. I shifted my flag to the Coquette (Admiral Jaurès accompanying me), and proceeded, in company with the four ships named in the last paragraph, then composing the advanced squadron, to open fire upon Batteries Nos. 9 and 10. The fire not being returned, parties were shortly afterwards landed from the squadron to destroy the batteries and embark the guns, the whole of which was effected b the evening of the 10th, and all the guns are now on board the ships of the allied squadrons; the embarkation of the guns, consisting of 62 pieces of ordnance, of various sizes, a work of much labour and difficulty, was very efficiently performed, under the directions of the captains of the allied squadrons. Captain W. M. Dowell, of the Barossa, who had charge of the embarkation at one of the principal batteries, has brought to my notice the zealous assistance rendered by Lieutenants W. H. Cuming of the Barossa, and R. E. Tracey, of the Euryalus, and by Lieutenant Costa, of the Semiramis, which contributed largely to the success of the undertaking.

"13. I forward for their Lordships' favourable notice copies of letters I have received from Captains Hayes and Alexander, Lieutenant-Colonel Suther, Commanders Moresby and Kingston, and the surgeon of my flagship, and would beg leave to draw attention to the testimony borne by them respectively to the conduct of various officers and men whose duty was performed under their immediate directions, and in which I desire to assure their Lordships that I fully concur.

"14. In addition to these reports, it is my pleasing duty to record the high sense I entertain of the skill and gallantly displayed by the entire force under my command during the operattons above described. Of the fire maintained by the Tartar in the conspicuous position I had assigned to Captain Hayes, as the senior captain, and of the gallant manner in which he was supported by Captain Franclieu, of the Dupleix; Captain de Man, of the Metalen Kruis; Captain W. M. Dowell, of the Barossa; Captain Van Rees, of the D'Jambi, and Captain C. T. Leckie, of the Leopard, I cannot speak too highly. I beg leave also to bring under their Lordships' notice the zeal and activity displayed by Captain W. G. Luard, of the Conqueror; Captain J. H. J. Alexander, of the Euryalus; Lieutenant-Colonel W. G. Suther, commanding Royal Marine Battalion; Commander John Moresby, of the Argus; Commander Augustus J. Kingston, of the Perseus; Commander E. T. Nott, of the Conqueror; Commander J. E. Hunter, of the Euryalus; Commander A. G. R. Roe, of the Coquette; Lieutenant H. L. Holder, commanding the Bouncer; and Lieutenant Richard H. Harington, of the Euryalus, who succeeded to the command of the Naval Brigade on Captain Alexander being wounded; as well as Captain du Quilis, of the Semiramis; Captain Muller, of the Amsterdam; Captain de Casembroot, of the Medusa; and Lieutenant Pallu, commanding the Tancrede; and I have to thank Lieutenant Pearson, of the United States' Navy, for the efficient assistance rendered by him in the chartered steam vessel Takiang in towing boats and for subsequently consenting to receive on board the wounded men of the squadrons.

"15. To the hearty co-operation and the cordial goodwill displayed by Rear-Admiral Jaures, during the preparations for and the progress of these operations, I am deeply indebted. I have endeavoured to express to that officer the satisfaction I have felt in having been associated with him in the conduct of this affair, and my appreciation of the good service rendered by the able and efficient force under the Rear-Admiral's command. I have also conveyed to Captain de Man, the senior officer of His Netherlands Majesty's ships, my thanks for the efficient co-operation and assistance of the squadron under his command, as well as to Lieutenant Pearson, of the United States' Navy, for the readiness with which he has sought to carry out my wishes on all occasions. Without the cheerfully rendered and able support of these officers, and the perfectly good understanding which has prevailed throughout the allied squadron, the very rapid and brilliant successes that have attended our operations could scarcely have been secured without greater losses, and considerable delay; and I trust that the satisfactory result will receive the approbation of their lordships.

"16. Much credit is due to the masters of the squadron for the skilful manner in which the various ships were manœuvred among numerous difficulties, and particularly to Mr. George Williams, master of my flagship, and Mr. John C. Solfleet, of the Conqueror, whose zeal and intelligence have deserved my special notice; and the praiseworthy conduct of Mr. James G. Liddel, of the Bouncer, the senior Second-Master on the station, has been brought favourably before me by Lieutenant Holder, commanding that gunboat.

"17. Mr. D. L. Morgan, surgeon of my flagship, has called my attention to efficient service rendered by the Medical Staff employed on shore under his directions, and to their devotion to the wounded.

"18. I should wish also to bring under their lordships' favourable notice my Secretary, Mr. Hemsley H. Shanks, and Flag-Lieutenant Robert P. Dennistoun, who accompanied me on shore and afloat throughout the operations, and rendered me valuable assistance.

"19. To Major Wray, Royal Engineers, whose services have been placed at my disposal by the War-office, I am indebted for much useful information as to the nature and position of the batteries; and I have much pleasure in recording my sense of the energy and zeal displayed by this officer throughout the operations, and in the destruction of the batteries and magazines. Lieutenant Crowdy, Royal Engineers, who accompanied the expedition at my request, with the permission of Lieutenant-Colonel Browne, commanding Her Majesty's troops at Yokohama, also rendered valuable service with his men, both while attached to the Naval Brigade, and subsequently in the embarcation of the heavy guns.

"20. Mr. J. F. Lowder and Mr. Earnest Satow, interpreters, attached to the squadron by Sir Rutherford Alcock, have afforded me every assistance, and have been most zealous in the performance of their duties.

"21. Since the conclusion of these operations I have satisfied myself, by personal examination of the entire Straits, that no batteries remain in existence on the territory of the Prince of Choshiu, and thus the passage of the Straits may be considered cleared of all obstructions.

"22. On the 8th inst., while the demolition of the batteries and the embarcation of the guns were in progress, an Envoy of the Prince of Choshiu came on board my flag-ship, under a flag of truce, charged, as he informed me, with instructions from the Prince to negotiate for a termination of hostilities. He produced documents, said to have been written by command of the Prince of Coshiu, and stated that no opposition would henceforth be offered to the free passage of the Straits. The Envoy also exhibited copies of letters to substantiate the statement that in the various acts of hostility towards foreign flags recently carried into effect the Prince had acted under the direct authority of the Mikado and of the Tycoon.

Digitized by Google

"23. Having conferred with Rear-Admiral Jaurés, who was present at the interview, it was determined that, to convince us of the sincerity of the Prince's desire for peace, it was indispensable that we should receive a written requisition, under his own hand, to that effect; and the Envoy having observed that an interval of two days would be required to obtain the desired communication, a suspension of hostilities for that time was agreed upon, and the squadrons were immediately directed to hoist flags of truce. It was, however, stipulated that the armistice should not interfere with the work of embarking the guns from the batteries then in progress, and it was accordingly proceeded with and completed, as previously described.

"24. True to the time named, at noon on the 10th inst., the Chief Councillor of the Prince of Choshiu (Mori Idzumo) came on board the Euryalus, and placed before me a despatch from the Prince, identical despatches being also brought for the senior officers of the allied squadrons.

"25. The very satisfactory character of the Prince's written communication and its humble tone afford, in the opinion of Rear-Admiral Jaurés and myself, reasonable grounds for the presumption that, apart from the brilliant success achieved in a military point of view, and the great extent of the injury inflicted upon the Prince of Choshiu, his power, and prestige, advantages of an important nature in a political sense may very possibly result from the presence of the allied squadrons in these Straits. I have duly informed Sir Rutherford Alcock of these events, and have placed at his disposal the means of communicating with me here should he desire to do so.

"26. A personal inspection of the Straits of Simonoseki has convinced me of the inexpediency, with the means at present available, of holding any position either on an island or on any portion of the mainland in the vicinity of the Straits. I do not, therefore, purpose carrying into effect that portion of the programme of the diplomatic representatives forwarded with my letter of the 28th ultimo, No. 328. It is, however, my intention to maintain possession of the Straits by leaving here an English, a French, and a Dutch vessel of war, until the relations between the Tycoon's Government and those of the Treaty Powers, with regard to this portion of the territory of the Prince of Choshiu, have been arranged on a satisfactory footing; the presence of the ships will, at the same time, afford a guarantee against the erection of batteries, which the Prince has engaged should not be again undertaken. I have subsequently had a further interview with the envoys of the Prince of Choshiu, who have agreed, on behalf of the Prince, to the terms proposed to them as the conditions of the cessation of hostilities, which will insure the Straits remaining open for the future, the ratification of the Prince being now all that is required to complete the object for which the allied forces came to these Straits.

"27. In conclusion, I have only to express my hope that the operations I have had the honour of describing, and the results obtained, may receive the approbation of their Lordships and of Her Majesty's Government.

"I have, &c.,

"AUGUSTUS L. KUPER.

"Vice-Admiral and Commander-in-Chief.

"The Secretary of the Admiralty, London."

"Her Majesty's ship Tartar, Simonoseki, Sept. 9.

"Sir,—You have been pleased to intrust a division of the squadron as per margin* to my command, during the late hostilities in the Straits of Simonoseki, and the operations have so far terminated with such satisfactory results, I beg to report, for your information, the proceedings of the advanced squadron since noon of the 4th inst.

"2. Having taken up the position directed by your General Order of the 3rd inst., the squadron under my orders was held in readiness for immediate action. On the first gun having been fired from your flagship the batteries immediately opened on us with shot and shell, the first discharge striking the Tartar in several places.

"3. The advanced squadron instantly replied to the fire of the batteries, but it would be needless for me to enter into a detailed account, as the whole engagement occurred under your immediate observation; still I cannot allow this opportunity to pass away without bringing to your notice the valuable support I received from the able management and precision of the rifled guns of his Imperial Majesty's ship Dupleix, which ship invariably replied to the guns which were striking the Tartar, and showed an energy which reflected the highest credit on her commander.

"4. The assistance rendered by his Netherlands Majesty's ships Metalen Kruis and D'Jambi, and the preparations made by them beforehand, showed that they spared no trouble in preparing their ships for any emergency, their rifled guns also telling on the nearest fort.

"5. I need hardly mention what pleasure I felt in finding that the Commander-in-Chief had given to the advanced squadron the services of so valuable and experienced an officer as Captain Dowell of Her Majesty's ship Barossa; the judicious and cool manner with which that ship was handled, and the precision of her fire, while replying to the enemy's guns, more particularly when directed on the Tartar, was fully appreciated by myself and all on board.

"6. At 5.25 A.M., on the morning of the 6th, the long battery again opened fire, and, I am sorry to say, with unfortunate effect, the first discharge killing two and wounding several on board the Dupleix, which vessel during the night had drifted between ourselves and the fort. She immediately slipped her cable and moved to her former position, when the Tartar again was instantly and repeatedly struck by the fire from the fort, dangerously wounding my first-lieutenant, Lieutenant W. A. De V. Brownlow, a valuable and steady officer, whose service I desire to bring under your favourable consideration. My second-lieutenant, Lieutenant C. B. Powell, immediately took his place, showing that cool aptitude for work which is so valuable in an officer.

"7. Having been directed to take up an advanced position on the afternoon of the 7th, I anchored the ship for the night in the position pointed out by yourself, advancing the next morning while shelling the two last forts on Point Kibune to a position within 3,000 yards, when we again anchored, and thence shelled the forts, which had the effect of making the enemy abandon them without firing a gun, probably in consequence of a barrack taking fire in the rear, near a magazine containing a large amount of powder and upwards of seven or eight hundred shell, which soon after exploded, also from feeling the impossibility of coping with guns of such superior power, and the moral effect produced by the fleet on the two previous days.

"8. Throughout the whole of these proceedings Mr. John E. Chapple, the master of the Tartar, showed the greatest coolness and judgment in the pilotage of the ship.

"9. The Prussian officer, M. von Blanc, lately appointed to this ship, proved his skill and worth in several ways, and I consider him an intelligent and valuable officer, certain to do credit to any position in which he may be placed.

"10. The remainder of the officers and ship's company conducted themselves throughout entirely to my satisfaction.

"I have, &c., "JNO. M. HAYES, Captain,

"Her Majesty's ship Tartar, commanding the Advanced Squadron.

"To Vice-Admiral Sir Augustus L. Kuper, K.C.B.,

"Commander-in-Chief."

"Her Majesty's ship Euryalus, off Simonoseki, Sept. 10, 1864.

"Sir,—I have the honour, in compliance with your directions, to report as to the proceedings of the Naval Brigade landed under my command from Her Majesty's ships Euryalus and Conqueror, in the Straits of Simonoseki, on the morning of the 6th inst:—

"That, having formed on the beach in the order prescribed by you with reference to the other landing forces, the Naval Brigade ascended the heights immediately above a succession of small terraces to capture a one-gun battery at their summit, and after reaching the crest of the boulder descended its western side to overlook the heavy battery at its foot, and cover, if necessary, the flank of the combined column then advancing along the beach to the westward.

"The one-gun battery was found to be deserted, the gun removed, the carriage only remaining, which was immediately destroyed.

"In crossing this battery the right flank became exposed to the enemy's riflemen, concealed in the dense bush on the opposite (east) side of the ravine.

"The leading company immediately deployed in skirmishing order and returned their fire, while the column pushed on and gained the cover of the upper bluff, though not before the force had suffered the loss of three wounded.

"On descending, with much labour, through the dense brushwood on the western side a detachment of French sailors was found in occupation of the upper battery on the right-hand side of the valley.

"The remainder of the force, excepting a company of Royal Marine Artillery (Lieutenant W. H. T. M. Dodgin, Royal Marine Artillery, in command), left to join my command, had continued its march westward.

"Not conceiving the assistance of the brigade required by the main force, and as immediately on arriving at the foot of the hill parties of the enemy had shown themselves at intervals between the trees on either side of the valley, and opened fire with field and mountain pieces and musketry, which they withdrew out of sight towards the head of the valley whenever my men advanced, I determined to hold the batteries on either side of the valley, and occupy the men in dismounting the guns, destroying the carriages, and exploding the magazines, &c., after which, if not required to join the remainder of the force, I intended attacking the enemy's stockade at the head of the valley, and capturing his guns.

"The former part of my intention was carried out, and the men had had half an hour for such dinner as they could get, when I received intelligence that the main body was returning, at the same time an order from yourself to embark, in accordance with which the Royal Marine Artillery Company had shoved off, when about half-past three I received your orders to retain possession of the batteries, the Perseus being aground beneath that to the eastward.

"I now considered it more than ever advisable to dislodge the enemy at the end of the valley, and the head of the Marine column appearing at this minute I sent a request to Lieutenant-Colonel Suther to co-operate for that object, to which he agreed, selecting the right side of the valley for his attack.

"The Naval Brigade, in order to take the left, instantly but with some difficulty, crossed by the ridges between the rice fields, and on reaching the narrow roadway on the left of the valley commenced ascending it at the double.

"The enemy had already commenced firing, but on observing from this and the approach of the Marines our intention was to attack, his fire became extremely hot. Our men continued at the double and returned it with steadiness and visible effect, and when distant about 200 yards, with a loud cheer from all, the leading company rushed on, the succeeding company, while still advancing, returning the enemy's fire, which he continued from the parapet of the moat and top of an eight foot wall, backing the front side of the palisade, till the leading men were within 50 yards, when he threw down his arms and ran in all directions.

"I regret to state that at this moment a musket-shot through the ankle-joint of the right foot totally incapacitated me from proceeding, and, on a stretcher arriving, I was carried to the rear, leaving the brigade under the orders of Lieutenant Harington.

"I have also to regret that this operation was not effected without a severe loss—viz., 7 killed and 26 wounded in the Naval Brigade; but I trust its successful termination, and the moral as well as physical effect of the reverse inflicted on the enemy, may justify in your opinion its undertaking.

"It gives me much pleasure to bring to your favourable notice the marked merit displayed in the following instances:—

"1. Mr. D. G. Boyes, midshipman of the Euryalus, who carried a colour with the leading company, kept it with headlong gallantry in advance of all, in face of the thickest fire, his colour-sergeants having fallen, one mortally, the other dangerously wounded, and was only detained from proceeding yet further by the orders of his superior officer. The colour he carried was six times pierced by musket balls.

"2. Lieutenant Frederick Edwards, commanding the third company,

* "Tartar, Dupleix, Metalen Kruis, Barossa, D'Jambi, Leopard."

Digitized by Google

has called my attention to the intelligence and daring exhibited by William Seeley, ordinary seaman, in ascertaining the enemy's position, and afterwards, when wounded in the arm in the advance, continued to retain his position in the front.

"Lieutenant R. E. Tracey rendered me most valuable assistance throughout, and when disabled myself conducted the advance with great gallantry and ability.

"Lieutenant Edward's company, which was in advance, was most gallantly led by him.

"Lieutenant Harington's company efficiently supported him.

"Lieutenant Jephson's company, through my mistake only in] giving him the wrong route, did not arrive as soon as no doubt it otherwise would have done.

"The Conqueror's companies followed in support of Lieutenant Harington's, and officers and men showed zeal and alacrity, and far more steadiness than could be expected from men together for so short a time and under their circumstances.

"The medical officers, Messrs. E. A. Birch, Samuel M'Bean, and J. T. Comerford, assistant-surgeons, were exceedingly prompt and constant in their attention to the wounded.

"Mr. R. N. Haly, clerk, accompanied me throughout the day, and Messrs. Henry H. Dyke and John Arthur Horne, midshipmen, acted as my aides-de-camp.

"Lieutenant Crowdy, Royal Engineers, with four of the Royal Enginee Corps, and having also under his directions the pioneers of the Naval Brigade, afforded active and useful assistance in exploding magazines, destroying guncarriages, &c.; at the same time they were very ready with their rifles.

"Mr. Satow, of Her Majesty's Legation, Yokohama, accompaned me on all occasions and in the thickest fire to act as interpreter, if required.

"In conclusion, the whole force, combatants and non-combatants, during this long hot day, with exceedingly hard work, and under very trying circumstances, behaved in such a manner as to merit the highest praise, officers and men universally exhibiting gallantry, zeal, energy, and steadiness, their only fault being at times a too reckless exposure of themselves, unwarranted by necessity, and all that their conduct leaves for me to hope is that I may ever be fortunate enough to have the honour to command such on similar occasions.—"I have, &c.,

"J. H. J. ALEXANDER, Captain, Her Majesty's Ship Euryalus, commanding Naval Brigade.

"To Vice Admiral Sir Augustus L. Kuper, K.C.B., Commander-in-Chief, &c."

"Her Majesty's ship Conqueror, Straits of Simonoseki, Japan, Sept. 7.

'Sir,—In compliance with your orders I was yesterday disembarked at 8 o'clock A.M., and, placed in command of the brigade, landed for the demolition of the enemy's batteries.

"As soon as the force had been formed the battalion of English sailors, under the command of Captain Alexander, mounted the heights for the purpose of destroying a three-gun battery situated about 100 feet above the beach; and with the rest of the brigade—viz., a battalion of French sailors, two battalions of Royal Marines (the first under the command of Lieut.-Colonel Penrose, and the second of Lieutenant-Colonel Adair), a detachment of Royal Engineers, under the command of Major Wray, and a battalion of Dutch soldiers and sailors—I marched along the line of batteries, and under your personal observation dismounted the guns, burnt the carriages, and blew up the magazines.

"On returning from this duty, and after the French and Dutch portion of the brigade had re-embarked, the enemy opened fire upon us from a three-gun stockaded barrack building, situate in a ravine not easily approachable, and very ill-suited to military manœuvring.

"I directed the two battalions of Royal Marines to storm the building upon its right approach, while the battalion of sailors stormed upon its left. After a sharp resistance the enemy fled from his position.

"Having spiked the guns and set fire to the buildings, I ordered the brigade to return to the place of embarkation.

"In the execution of this duty I very much regret that several casualties occurred.

"Captain Alexander, while gallantly leading his battalion, was severely wounded and carried to the rear, so also were Captain N. W. de Courcy and Lieut. J. W. Inglis, of the Royal Marines.

"Where all performed their duties well it is difficult to individualise, but I feel it incumbent on me to mention the high bearing of the commanding officers of battalions, Lieutenant-Colonel Penrose, Royal Marines; Lieutenant-Colonel C. W. Adair, Royal Marines; and Capt. J. H. J. Alexander, Royal Navy; to those officers I am greatly indebted for their zeal and gallantry.

"The senior captain of Royal Marines, Captain N. W. de Courcy, who was severely wounded when at the head of his company, holding a difficult position near the stockade, Captain and Brevet-Major Ambrose Wolrige, acting Brigade-Major, and First Lieutenant J. C. Hore, my orderly officer, I am bound to bring particularly to notice for their zealand intelligence.

"The medical staff of Royal Marines, under Dr. C. K. Ord, were most active and prompt in their attendance to the wounded.

"I beg also to state that I received much assistance when in the stockaded barrack building from Lieutenant R. E. Tracey, Royal Navy, who carried out some orders it was necessary for me to give in a zealous and efficient manner.—"I have, &c.,

"W. G. SUTHER, Lieut.-Colonel Royal Marines, commanding Allied Forces disembarked on the 6th inst.

"To Vice-Admiral Sir Augustus L. Kuper, K.C.B., Commander-in-Chief, &c."

ADMIRALTY, Nov. 18.

With reference to Vice-Admiral Sir Augustus L. Kuper's foregoing despatch of the 15th of September, reporting the successful result of the operations in the Straits of Simonoseki, the following promotions have been this day made:—

Commanders John Moreshy and Augustus John Kingston to be Captains.

Lieutenants Henry Lowe Holder, William Henry Cuming, William Arthur de Vesci Brownlow, Richard Hastings Harington, and Richard Edward Tracey, to be Commanders.

Mr. James Greenwood Liddell, Second Master, to be Master.

Mr. Richard Lovel Bluet Head, Assistant-Surgeon, to be Surgeon.

LIST OF KILLED AND WOUNDED.

The following has been received at the Admiralty from Vice-Admiral Sir A. L. Kuper:—

List of officers, seamen, and marines killed or wounded during operations of the 5th and 6th inst., at Simonoseki, Japan:—

HER MAJESTY'S SHIP EURYALUS.—J. H. J. Alexander, 32, captain; wound of right ankle-joint by musket-ball—dangerous. C. W. Atkinson, 19, midshipman; wound of finger by musket-ball—slightly. F. E. Edwards, 22, lieutenant; wound of left foot by musket-ball—slightly. B. Connor, 28, A.B.; wound of abdomen by musket-ball—killed. S. Baily, 28, captain of foretop; wound of groin by musket-ball—killed. J. Kidd, 29, ordinary; wound of heart by musket-ball—killed. G. Wells, 24, A.B.; wound of both lungs by musket-ball—mortally, since dead. John Sney, 27, private marine; wound of stomach by musket-ball—mortally, since dead. Thomas Riley, 28, A.B.; wound of throat, ball lodged—dangerously. Thomas Pride, 28, A.B.; wound of left side of chest by musket-ball—dangerously. Charles Lover, 26, A.B.; wound of right leg by musket-ball—severely. George Dumfoy, 20, ordinary; wound of left leg by musket-ball—severely. George Atteridge, 35, A.B.; wound of left side of chest by musket-ball—severely. William Seeley, 26, ordinary; wound of right arm by grape shot—severely. Joseph Marcham, 28, A.B.; wound of right shoulder by musket ball—severely. Thomas Harman, 20, ordinary; wound of left leg by musket ball—severely. John Winsby, 23, ordinary; wound of right hand by arrow—severely—Patrick Butler, 19, ordinary; wound of chest by spent ball—slightly. Thomas Williams, 29, A.B.; wound of right wrist by arrow—slightly. James Shylock, 28, A.B.; wound of right side of chest by arrow—slightly. George Chicks, 23, private R.M.; wound of scalp by a rock splinter caused by shell—slightly. James Robinson, 31, private R.M.; wound of neck by a rock splinter caused by shell—slightly. William Jones, 26, A.B.; wound of fore arm by arrow—slightly.

BATTALION OF ROYAL MARINES.—N. W. de Courcey, captain; gunshot wound of left wrist—severely. J. W. Inglis, 1st lieutenant; gunshot wound of left groin—severely. C. W. Adair, lieutenant-colonel; temporary concussion from fall of a tree produced by a shot—slightly. Daniel Moore, 22, private bullett wound of head—killed. Edwin Shaw, 22, private; bullet wound of left lung—dangerously. Samuel Howard, 23, private; shell wound of right knee—dangerously. Thomas Cooper, 28, private; bullet wound of right thigh—severely. William Lethbridge, 20, corporal; wound of knees—slightly. Thomas Blakemore, 27, private; shell wound of left leg, compound fracture—dangerously. William Gill, 22, private; wound of left wrist by explosion of magazine—slightly. John Burrows, 29, private; contusion of thigh from explosion of magazine—slightly. James Haydon, 16, drummer; contusion of left hip—slightly. William Allen, 22, private; burn of face and hands by explosion of magazine—severely.

HER MAJESTY'S SHIP LEOPARD.—Edward Rowley, 26, private; bullet wound of left elbow—slightly. Thomas Yates, 24, private; bullet wound of left leg—dangerously.

HER MAJESTY'S SHIP CONQUEROR.—George Greene, 22, ordinary; bullet wound of right lung—killed. Frederick Lufar, 22, private, marine; bullet wound of left lung—killed. David Riddles, 19, ordinary; bullet wound of back—ssverely. Henry Kitchener, 21, A.B.; bullet wound of left wrist—severely. Henry Martin, 22, A.B.; bullet wound of right leg—severely. Ralph Barnes, 22, private, marine; bullet wound of abdomen—severely.

HER MAJESTY'S SHIP TARTAR.—A. de V. Brownlow, lieutenant; wound of left hip—dangerously. E. J. Wingfield, midshipman; wound of left leg—severely. Alfred Camplin, private; wound of right shoulder—dangerously. John Ford, A.B.; wound of back—severely. William Smith, ordinary; wound of arm and face—slightly. Henry Sercombe, A.B.; wound of face—slightly. John Murphy, boatswain's mate; wound of face—slightly. Robert Breeze, private Royal Marines; wound of face and head—slightly.

HER MAJESTY'S SHIP PERSEUS.—John M'Carlan, 31, private, marine; bullet-wound of left thigh—severely. Charles Suitors, 27 seaman; contused wound of left foot—severely.

HER MAJESTY'S SHIP BAROSSA.—George Fountain, private, marine; musket-ball wound of arm—slightly.

HER MAJESTY'S GUNBOAT BOUNCER.—Michael M'Donald, corporal; bullet wound of right thigh—severely.

Total killed, 8; total wounded 48.

D. L. MORGAN, F.R.C.S., Surgeon in Charge.

ABSTRACT OF THE ABOVE.—The Euryalus—Five men killed; three officers and fifteen men wounded. Royal Marine Battalion—One man killed; three officers and nine men wounded. The Conqueror—Two men killed and four wounded. The Tartar—Two officers and six men wounded. The Leopard—Two men wounded. The Perseus—Two men wounded. The Bouncer—One man wounded. The Barossa—One man wounded. Total killed and wounded, 56.

GENERAL TOTALS.—English squadron, 8 killed, 48 wounded; French squadron, 2 killed, 9 wounded; Dutch squadron, 2 killed, 3 wounded; total, 12 killed, 60 wounded.

RETURN OF KILLED AND WOUNDED IN THE ALLIED SQUADRONS.—Euryalus, 5 killed, 18 wounded (3 officers); Tartar, 8 wounded (2 officers); Conqueror, 2 killed, 4 wounded; Barossa, 1 wounded; Leopard, 2 wounded; Perseus, 2 wounded; Bouncer, 1 wounded; Battalion of Royal Marines, 1 killed, 12 wounded (3 officers); Semiramis, 1 wounded; Dupleix, 2 killed, 8 wounded; Metalen Kruis, 2 killed, 3 wounded: general total, 12 killed, 60 wounded.

HEMSLEY H. SHANKS,
Secretary to Vice-Admiral Sir A. Kuper.

Her Majesty's ship Euryalus, Simonoseki, Sept. 13.

LONDON, MONDAY, NOV. 28, 1864.

THE SINGAPORE GOVERNORSHIP.

IN our issue of the 17th August we published an article on the above topic, in which we commented freely, as an independent journal should do, upon the capacity of the Singapore Governors generally for the important office they hold as chief at the helm of affairs in the Straits Settlements; and specifically named Sir STAMFORD RAFFLES as a model Governor, whose liberal and vigorous policy it would be well if his successors carried out progressively. Our contemporary the *Singapore Free Press* chooses to designate that article as "written in an "unwarrantably depreciatory spirit of our past rulers, and is "mistaken in its several statements."

Touching the first assertion in this paragraph, we deny that we penned the article in such a spirit, as we have no desire to detract from the merits of those Governors who have exhibited capabilities of a high character in other branches of the public service. We merely wished to point out that they have not been selected from that class of public men whose education and training fitted them for developing the resources of the Settlements in past days, or adapting themselves to the present exigencies of that important colony, Singapore—the key to our possessions in the Far East. To put the case as we meant it: surely it is no detraction from the ability of a gallant military Governor to say that he is not qualified to rule over a commercial dependency, where questions of peace and not of war engage his attention. In this spirit we maintain the argument laid down in the article which seems to have been so unpalatable to the Straits journals, and repeat, without fear of contradiction, what we then stated, which was as follows:—"With the ex- "ception of Sir STAMFORD RAFFLES, scarcely one of the many "Governors who have held office in the Straits Settlements has "either shown the will or the way to raise them in the colonial "scale of self-dependence. We have no desire to cast reflections "upon the character of the several administrators of affairs at Sin- "gapore since the time of RAFFLES, but it is well-known that the "educational and other institutions founded by him for the "improvement of the intelligent natives have become effete "for want of gubernatorial patronage, and a helping hand "has rarely been put forth to develope the commercial re- "sources of the magnificent port." In proof of these remarks we have only to point to the neglected condition of the "Singa- "pore Institution," which should be the basis of British *prestige* among the educated native population; to the present state of the Malay Peninsula, distracted as it is by war and contention; to our disturbed relations with Siam; to the bombardment of Tringanu, and to the ambiguous policy pursued on the coast of Sumatra. It is unnecessary to refer to the past, the present unsatisfactory position of affairs would justify even more stringent remarks than we have indulged in regarding the administration of the Government at the Straits. We refrain from doing so because we are aware that benefits have been conferred by them upon the settlements which, in a measure, make up for their short-comings in other respects. For example, the interior administration of affairs has given satisfaction to the residents generally, an opinion in which we fully concur. This is not the point which has given rise to the remarks in the article referred to by our contemporary. Besides developing the commercial capabilities of the port, we alluded to the growing importance of its external diplomatic relations; hence we pointed out what we now reiterate:—"It is, therefore, "high time that a Governor should be installed there to hold "the reins of government with a firm hand, and to maintain "the *prestige* of England among these settlements, com- "mensurate with our position elsewhere. The day may be not "far distant when affairs of moment may transpire, involving "diplomatic decision of the highest order, in communicating "with the French Governor of Saigon; and it would be only "a matter of political prudence to have a competent Governor "at the helm of affairs in our fine colony of Singapore." To this we would further add: that it is essential the next Governor should be a man of decision in carrying out his external diplomacy with the neighbouring native States, so that there may be no paltry conventions entered into with cunning or ambitious chiefs, who flourish wrongfully under the *ægis* of British power. On the other hand, a conciliatory policy is required to open the Malay Peninsula and its undeveloped products to our commerce, so that Singapore should reap the full benefits of its maritime position with that region; for if the neglect of our interests there be continued, it is not improbable that the native trade may be diverted from its existing channel, to the detriment of the revenue, and the export shipping of the settlement. Moreover, from its proximity to the Kingdom of Siam, it is important that the amicable relations now existing be strengthened with its enlightened KING—who, of all potentates in Eastern Asia, maintains and cultivates our relationship in the highest degree. It is patent to all the world that in this quarter the French have ambitious designs, which may lead to future complications with our representatives at Bangkok and the Straits Settlements; therefore it is essential that the Governorship of Singapore be filled by a competent man, who should, if necessary, have an increased salary to fulfil its duties with credit to the country.

With regard to the article being mistaken in several of its statements, in reference to the antecedents of Singapore Governors, wherein we inadvertently stated that they "have "been almost exclusively military men, bred up in the stereo- "typed school of an Indian durbar;" our contemporary has made the most of this, the slightest accusation of inefficiency advanced. It appears that there have been two military Governors during the last twenty-eight years, the late General BUTTERWORTH, and Colonel CAVENAGH, the present Governor; and two civil Governors, the late Sir GEORGE BONHAM, and Mr. BLUNDELL. It should appear that none of these gentlemen had been bred up in the "stereotyped school of an "Indian durbar," as their predecessor, "Mr. FULLARTON, "who was a Madras civil servant." Now, we meant no disparagement in appending the doubtful political education we gave them credit for; as, however "stereotyped" and "red-tapist" it might have been, still it was a degree of diplomatic training which qualified these Indian durbar officials to carry on outward relations with foreign Powers according to the forms and usage of the diplomatic service. We must therefore conclude that this small modicum of education that initiates political acumen or foresight in the mind of an administrator of British diplomacy abroad was wanting in the case of these Governors; who rung the changes of a weak policy and *laissez faire* administration for upwards of a quarter of a century, which was pretty equally divided between civilian and military Governors. Of these Sir GEORGE BONHAM is mentioned as "by no means one of the ablest of our Governors, and yet so "valuable were his services considered by H.M.'s Government, "that, as an inducement to remain in Hong Kong, they bestowed "a baronetcy upon him." Without casting the slightest reflection upon the hospitable character of that Governor, we know from China experience that if there was any value in the late Sir GEORGE'S service to the Imperial Government it was almost entirely of a negative kind—based upon his remarkable capacity for doing nothing; and from all we can learn, the claims of his memory upon the gratitude of the inhabitants of the Straits Settlements are founded upon the same principle.

In alluding to the inefficient administrations that have appeared in the annals of the Straits, we have no desire to rake up the misgovernment and grievances of the past, except as illustrating the neglected garden, "which has grown to seed, in "things rank and gross," as another Governor under a new *régime* may appear upon the ground to weed it out and direct its future development. A new era is dawning upon this group of settlements in the Far East, especially upon that of Singapore, which is destined at no distant date to hold an important place in our Colonial Empire. It behoves, therefore, everyone who has the interests of these embryo States at

Digitized by Google

heart, as the juncture of their transfer approaches, to aid Her MAJESTY'S Government by their local experience in establishing a vigorous administration, with a capable man at the helm of affairs, to guide the ship of the State through the shoals that at present bar its progress into a channel of vigorous commercial activity.

HONG KONG.

IT is a long time since our attention has been drawn to Hong Kong, its government, and the progress of the town of Victoria, by any circumstance calling for special remark. The departure of Sir HERCULES ROBINSON, as Governor of the colony, to his new appointment at Ceylon, is an occasion wherein the journalist of China is in duty bound to record the event. During his term of office Sir HERCULES has conducted the affairs of the settlement with respectable talent; and it is just possible he might have exhibited greater administrative energy if he had had a wider field to operate on—in metaphorical language, an Augean stable to cleanse, like his classic namesake. No great event has transpired either to call forth his diplomatic talent, in dealing with cunning and astute mandarins, as some of his predecessors have done. Consequently, he leaves Hong Kong in much the same condition of gradual improvement as when he found it. If to have made no gubernatorial blunder be a qualification for advancement, then Sir HERCULES leaves for "fresh fields and pastures new," in the Colonial domain at Ceylon, as a good and faithful shepherd who has entered into the joy of his mistress. Thus far we congratulate him on his change of post, and trust that we may be able to give a good account of his administration in the rapidly improving commercial dependency of Ceylon.

But who is to be his successor at Hong Kong? We learn that the Colonial Secretary, the Hon. W. T. MERCER, has been nominated as Governor. It is reasonable for the Imperial Government to promote an old servant of the Crown, with considerable local experience, from a subordinate office to that of supreme director, as a reward for past services. But is he qualified to guide the reins of Government to the satisfaction of the community? Is he the right man in the right place? These are the questions we would ask without fear or favour. The antecedents of Mr. MERCER in China date back as far as 1842, when he began his career in Hong Kong as private Secretary to Governor Sir JOHN DAVIS, the first Governor of the colony. In that capacity he acquitted himself to the satisfaction of his talented master; and his recommendation led to Mr. MERCER being subsequently appointed Colonial Secretary. Herein we regret to say that he has at times shown "a penny wise and pound foolish" policy towards developing the resources of the colony. Recently, as Acting-Governor during the absence of Sir HERCULES ROBINSON, his views have been cramped and narrowed regarding the improvements of the Port of Victoria, and the establishment of the Mint. Perhaps it is only fair that he should hold the appointment long enough to retire on an increased pension, but we hope, for the sake of the commercial advancement of Hong Kong, to record his retirement from the post at an early date, in order to make room for a more vigorous Governor, armed with extended powers for the better government of the colony.

In thus giving expression to a general feeling regarding the governing capabilities of the Hon. Mr. MERCER, we have no desire to detract from his usefulness in the capacity of Chief Secretary, wherein he has shown that he had the interests of the colony at heart. For example, in the recent discussion on the military vote of 92,000 dollars for the maintenance of troops, he boldly brought forward a resolution in the Legislative Council in opposition to that vote, which was placed on the estimates by the Secretary of State for the Colonies, and which was carried against only one dissentient voice—that of the Attorney-General. In this act he expressed the opinion of the colonists as to the injustice of the measure, that the community should be taxed to maintain a large military contingent, avowedly for imperial purposes, while British subjects at the wealthy settlement of Shanghai, besides the other northern ports and in Japan, were not called upon to contribute their quota. We trust that this resolution has had its full weight with the Home Government, and that they will see fit to rescind the instructions to levy the obnoxious contribution. It must be remembered that the colony has raised an efficient corps of Volunteer infantry and artillery, at a considerable cost of time and trouble to the members, who can ill spare absence from their commercial occupations; and that, as far as the internal affairs of the colony are concerned, this contingent, together with the police, is amply sufficient to maintain law and order. It is clear, therefore, that if the mother-country intends to constitute this rocky isle, with its suburb on the Kowloong shore, into a Gibraltar of the Far East, the cost of maintaining its military strength should be furnished by the CHANCELLOR of the EXCHEQUER. Or if the colony must be saddled with the proposed contribution of £20,000 per annum, then it would be only fair that the present military site should be sold for the benefit of the local treasury, out of which this amount might be paid without robbing the colonists of any portion of their revenue which is required for improvements. It was unfortunate that the eye of Mr. GLADSTONE rested on the surplus of the colonial revenue over expenditure, and Sir HERCULES ROBINSON was off his guard when he allowed such a surplus to appear. He should have had any such sum at once appropriated for the many requirements of the colony.

There is another *questio vexata* on the rocky shore of the "Island of Sweet Waters" that demands our attention. We allude to the Praya question. It appears that this public work on the quays of the harbour, which was heralded as the *ne plus ultra* of engineering skill, turns out to be as great a piece of sham masonry as the famous wall in Chancery-lane, and which afforded the *Daily Press* of Hong Kong an inexhaustible theme for leading articles. It is high time that these Chinese contractors were put aside, and properly qualified men employed to construct this important work in a manner that will make it a permanent structure against all the forces of wind and water. Why not apply through the Agent for the Crown Colonies here to put the work into the hands of competent English contractors? If their estimates were double or treble that of the "pottering" local contractors it would be a saving in the end, where it is evident that the Chinaman's slopwork must be renewed from year to year. It is certainly very hard that any extra cost should fall upon the landowners; and, consequently, they should be permitted to secure the full term of 999 years' leases of the area to be created in front of, and added to, their marine lots, at *thirty years' purchase*, instead of an additional annual Crown-rent added to their present leases. These considerations ought to command the attention of the Executive Government in justice to the colonists, who have suffered by the incompetency of its officers; and if Governor MERCER is desirous of continuing the just popularity he has secured by his prompt resolution against the military vote, he will see that the public works of the colony, especially the Praya, be carried out with efficiency.

OUR FINANCIAL AND COMMERCIAL RELATIONS WITH JAPAN.

Under this heading we gave an article from the *Money Market Review* in our issue of the 26th October, and in reference to the writer's statement "that there is nothing in the treaty to "prevent our holding direct communication with the native "princes at ports in their own territories," we stated this to be an error. In the number of the *Money Market Review* of the 12th inst. is the following:—

"Our able and zealous contemporary the *London and China Telegraph*, in republishing from the *Money Market Review* an article on 'Our Financial and Commercial Relations with Japan,' ventures to express a doubt as to the correctness of our statement that there is nothing in our treaty with the Tycoon's Government to prevent our entering into direct commercial relations with the Daimios, and trading at their ports, our contemporary conceiving that to do so would be in direct violation of Imperial rights. Our statement was made with the treaty before us, and is fortified by the authority of Colonel Neale; its correctness is further confirmed by the present offer of the Prince of Nagato to open certain of his ports to foreign trade, and this without any reference to the Tycoon."

In answer to this we produce the third article of the treaty, which runs thus:—

"The ports and towns of Hakodadi, Kanagawa, and Nagasaki to be opened to British subjects on July 1st, 1859. Nee-e-gata, or if that is unsuitable as a harbour, some other port on the west coast of Niphon, on Jan. 1st, 1860, Hioga, on Jan. 1st, 1863. In all those places British subjects may permanently reside, and may lease ground, and purchase and erect buildings, but shall not erect fortifications. They are not to be confined by any wall or gate, and their free ingress and egress not to be impeded. The limits within which British subjects may travel are defined. The general limit is ten ri (each ri being 4,275 yards,) in any directions After Jan. 1st, 1862, British subjects may reside at Yedo; and from Jan. 1st, 1863, in Osaca, for purposes of trade only. In each of those cities a suitable district for their residence, and the distance to which they may go, shall be arranged by the British diplomatic agent and the Japanese Government."

From this we think it will be perfectly clear that the privileges of trade were intended to be confined to the ports named. It was the same in China, and must necessarily be so

Digitized by Google

n dealing with all Oriental and semi-civilised Powers. The words *open ports* we all know to mean the ports stipulated by treaty, and with those only are we allowed to trade. To assert that there is "nothing in the treaty to prevent, &c.," is a negative assertion, and will not hold water. Equally so is the reference to the offer of Prince NANGATO to trade with us without consulting the TYCOON. It is quite consistent for those princes who are in open rebellion to the TYCOON to propose, but not on our part to deal with them. In another column will be found an article communicated by a merchant lately from Japan which fully confirms our view.

CHINESE EMIGRATION TO THE WEST INDIES.

THE supply of coolies from India being likely to fall short, in consequence of the greatly increased demand for native labour, the attention of the planters has of late been principally directed to China. The Chinese are undoubtedly the best labourers, but they are at the same time the most expensive to obtain. They give great satisfaction by their conduct in the colonies. The advantage in their case is mutual. They not not only benefit the planter by supplying the labour he so urgently requires, but they largely benefit themselves. A number have returned to China—many of them at their own expense—and not a few have expressed an intention to revisit the West Indies. This is a very encouraging state of things, but, as already stated, the great drawback is the expense. Definite arrangements, however, have been made for a supply of 2,000 in each of the seasons 1864-5-6; thus spreading the expense of fixed establishments (which would be almost as great for a small as for a large emigration) over a space of three years. Of the 2,000 ordered in 1864, British Guiana takes 1,250, and Trinidad 750. The greater part, if not all, of the shipping necessary for their conveyance has been engaged in this country, and the first vessel was expected to be despatched on the 15th October with about 300 on board.

OUR DIFFICULTIES IN JAPAN.

(COMMUNICATED.)

From the very commencement of our relations with the Tycoon's Government, it has been their constant endeavour to prevent our representatives holding any intercourse whatever with the Daimios, the reason for this being a determination to monopolise whatever advantages might accrue from foreign trade, perhaps combined with an idea that they would obtain assistance from their new allies to hold in check such of their princely vassals as might prove unruly. The monopoly of almost all the benefits of foreign commerce they have managed with consummate skill. Although more than one of the Daimios were, from the first, quite willing to encourage intercourse with foreigners, the Government, on the plea that all of them were averse to trade, opened only such ports as were within Imperial territory, and have steadily discouraged the transit to those ports of the produce of the inland provinces, by vexatious restrictions of every imaginable description. It is a fact well known to those who have resided any length of time at Nagasaki—which is in close proximity to the province of Satsuma—that the Prince of that province has always been anxious to encourage and develop trade, that he has long been at variance with the Government, in consequence of their restrictive monopoly, and that whatever ill-feeling he may have towards foreigners, it has not proceeded from any disinclination to admit them, but from a sort of jealousy which naturally arose from being so unjustly treated. It is far from improbable that this jealous feeling has been purposely fostered by the Tycoon's Government, in order to bring him into collision with the British forces—an easy means of weakening and humiliating a haughty vassal whose growing power and large resources rendered him too formidable for themselves to deal with. In the late misunderstanding regarding the Straits of Simonoseki they seem to have adopted a similar line of policy. Choshiu having set his own Government—as well as every other—at defiance, the Gorogio waited patiently for a long while, in the hope that foreign Powers would take upon themselves to force the passage. But many months having passed without any such action being taken, they promised that the Straits should be opened within a specified time—well knowing that the engagement would not be fulfilled, but confident in their ability to turn on the unlucky Choshiu the wrath of the Allies, which this stratagem effectually provoked; and so well did it succeed that at the very time when this rebellious Daimio was engaged in a direct attack on the capital, his fortifications were being battered down by the allied fleets. Since it is evident that we can obtain no readers from the Tycoon's Government against such of the Daimios as are hostile towards us, surely we have a right to demand that others, who are disposed to receive us in a friendly manner should be permitted to do so without interference on the part of the Government? When a revision of the Treaty takes place, they should not only be required to open Osaca to foreign trade, at once, but also to acquiesce in the opening of all other ports, not in Imperial territory, at which the respective Daimios might feel disposed to admit us. If this were carried into effect, a spirit of competition would be aroused which would speedily sweep away most of the obstacles at present existing to the development of trade.

Literature.

The Siberian Overland Route from Peking to St. Petersburg, through the Deserts and Steppes of Mongolia, Tartary, &c.; by ALEXANDER MICHIE.—Mr. Murray, of Albemarle-street, so renowned for his Handbooks, the series of which has already stretched eastwards beyond Egypt and Syria to Bombay and Madras, may be said to have now carried it to the limits of the Far East, for the present volume conveys us from Shanghai right away to St. Petersburg. Not that Mr. Michie's book falls to the level of a mere road-directory: it is a most interesting record of a journey across half the globe, through districts long famous by name, but now for the first time described to us by an observant man of the world, who gives us a thorough idea of the people that inhabit the country, without troubling us with any of the "ologies" that pertain to its natural features. The route taken by our traveller was from Shanghai by steamer to Tien-tsin; up the Peiho to Tungchow, and thence to Peking. Here some time is spent in making preparations for the journey, arranging for horses, camels, carts, and guides, procuring passports, &c. And thus we get a picture of the life of an idler in that capital, which puts the inhabitants in an unexpected light; for we are told—"I never met a more robust-looking, or more jovial, hearty set of men than these our boon companions of Peking." Mr. Michie had determined to obtain introductions from the Lamas resident at this city to their influential brethren in Mongolia; and, eventually, the whole distance to Kiachta on the Russian frontier is made under the guardianship of one of these priests. This creed and its professors are, it appears, bountifully patronised by the Chinese Emperors. The great lamasery is outside Peking, but there is also an immense establishment within the city boundary. A notice of the latter induces a glimpse at the

POLICY OF CHINA TOWARDS THE MONGOLS.

Two thousand Mongol lamas are maintained here by the bounty of the Emperor. The other lamaseries are in the same manner literally endowed by the Government. The Chinese Emperors feel that they have but a slight hold on their Mongol subjects, scattered as they are over a vast desert, where no Chinese troops could penetrate, even were the Chinese a match for the Mongols in a military point of view, which they never were. The independence of the Mongols would be rather a gain than a loss to China in its immediate results, but it would establish a warlike race on the borders, which has been the terror of China from the earliest times. No doubt ages of peace have done much to subdue the warlike spirit of the Mongols, but they retain their ancient habits, and lead a life of privation and hardship from the cradle to the grave. They are susceptible of the greatest enthusiasm, and at a word from their chiefs they would be ready to follow them to death or glory. A few years of fighting would render the Mongol hordes as formidable to a non-military nation like the Chinese as they were in the days of the terrible Gengis-Khan. In the present enfeebled condition of China an irruption of the Mongols would be irresistible, and would sweep everything before it like a flood. The Chinese Government are quite alive to such a possible contingency, and hence the care they take to conciliate the Mongols. Their forty-eight kings (of whom San-go-lin-sin is one), nominally tributary to China, are really pensioned by the Emperor, and every inducement is held out to the Mongol lamas to settle in the monasteries in Peking. Here they live in comfort and luxury, unknown in their deserts. Their friends have every facility for visiting them, and carrying back to "the land of grass" their reports of the goodness of the Chinese Emperor. The lamas are taken from all parts of Mongolia—we conversed with several from Dolonor and Kuren (Urga), and many others from the north and south, the names of whose districts were not included in my geographical vocabulary. These large Mongol communities, under the eye and hand of the Emperor, answer the double purpose of conciliators on the one hand and of hostages for the loyalty of distant tribes on the other. The Mongols are as little a match for the Chinese in craft as they are superior to them in martial energy. It is supposed that the Chinese Government have a deep design in supporting and encouraging lamaism, an institution which makes nearly one-third of the Mongol race celibats—for there are female as well as male lamas—the object being to keep down the population of the tribes.

At Urga, some distance within the Chinese frontier, we meet with the first outpost of Russian diplomacy; the Czar's

Digitized by Google

Vice-Consul receiving the travellers very hospitably, and treating them with a civilised breakfast on a clean white table-cloth—altogether a greater luxury than may be imagined, for no egg had been seen for twenty-seven days, there being no fowls in Mongolia. Here is a sketch that will serve as a pendant to the preceding, showing us the

POLICY OF RUSSIA TOWARDS MONGOLIA.

The Russian Government keeps up a considerable establishment at Urga, the Consul having a body-guard of twenty Cossacks, besides the twenty Russian carpenters who are at work on the new house, and other hangers-on. The object of such an expensive establishment at a place like Urga, where Russia has no interests whatever to protect, can only be divined by the light of its traditional policy of progress in Asia. It has long been considered that the Khinghan chain of mountains, running east and west past Urga to the head waters of the River Amoor, forms the "natural boundary" of Siberia, and consequently, advantage has been taken of disputes between the Mongol Khans of former times and some Russian merchants who had penetrated as far as Urga, to gain foothold there, which will certainly never be relinquished until the tract of country inclosed by these mountains and the River Kerulun, the head stream of the Amoor, to Lake Hurun or Dalainor, has been annexed to Siberia. After that the "natural boundary" will be discovered to lie still farther to the south. Russia is in no hurry to enter on the possession of this new territory, but in the meantime the country has been surveyed, and is included in the Russian maps of Eastern Siberia. The transfer will be made quietly and without bloodshed when the favourable moment comes, for none understand better than Russian diplomatists the *suaviter in modo*, when it suits their purpose. No one will be much a loser by the change. The Emperor of China will lose his nominal suzerainty over a country that even now probably costs him more than it is worth. The Mongol tribes, with their chiefs, would merely become subjects of one autocrat instead of another; but everything else would probably go on as at present until time brought gradual changes. The Chinese merchants don't care a straw about who is king as long as they are left to their peaceful occupations; and the Russian Government is too enlightened to throw any obstacles in the way of a trade which has done more than anything else to develop the resources of the Siberian deserts.

Arrived at Kiachta, the further route was by steamer across Lake Baikal, to Irkutsk, and then through Krasnoyarsk, Tomsk, Omsk, and Tumen to Ekaterineburg, at the foot of the Ural Mountains, or rather hills, for at this spot they are not more than a thousand feet in height above the elevated plain. From the last-named place the journey was continued through Kazan to Nijni-Novgorod, whence there is a line of railway to Moscow and St. Petersburg. The transit across Lake Baikal was by no means the least anxious part of the undertaking, and, altogether, seeing that in winter that inland sea is rendered unnavigable by the ice, there can be no wonder that the Russians are endeavouring to do away with the necessity of the voyage at any time, by making a road round its southern end. The country, however, presents almost insuperable difficulties. This only serves to call forth the persevering patient energy of a despotism "that can afford to wait." The road is scarped out of the rock, and only worked at in winter, when the peasants are frozen out of their ordinary labours. One of the means employed to split the rocks is to make enormous bonfires of trees when the temperature is very low; the action of heat on the stone causing huge masses to crack, and enabling the workmen to dislodge them. This is but a slow process, several years having already been spent on it, and many more will be required to complete it.

Mr. Michie's experience will be particularly useful to future travellers in one respect, by impressing on them what to avoid. He says: "We were too late and too early all the way through." How necessary it is to pitch on the right season for this really *overland* route will be seen when the reader learns that in Russian Siberia—

Between the autumn and the snow there are "no roads," and no Russian travels at that season under the most urgent circumstances. In the post regulations it is laid down that travellers can demand to be driven at the rate of ten versts per hour in summer, eight in autumn, and twelve in winter, December to March. These rates are, in practice, greatly increased in summer and winter, but in the month of October it is hard work to average even the Government speed.

Whatever inconveniences this unlucky choice as to time may have caused Mr. Michie, none of their effects are visible in the tone of the narrative. The traverse was accomplished without any dangerous mishaps, and it is no slight merit to say that we scarcely remember a book of travels neither characterised by startling incidents or the encounter with remarkable persons, which is yet so sustained in interest to the very close. The every-day events of this long journey—that need not, however, be destitute of comfort, as the writer shows by his own example, if proper precautions are taken—are told without exaggeration, and with just such a feeling of their importance in reference to the purpose of the book and not of the degree in which they for the moment annoyed or gratified the author, that an absence of anything like tediousness of detail is perfectly achieved. The volume is, in fact, so full of matter that it would require a much longer notice than our columns can afford to give a notion of the vast fund of information it contains as to both China and Russia. Among the multiplicity of the topics fairly introduced in the four hundred pages of which the book consists, we find an opinion deliberately asserted that will jar against the ideas generally prevalent in England as to the

TREATMENT OF POLISH EXILES IN SIBERIA.

The fate of the exiles is by no means such a hard one as is commonly supposed. I have taken pains to inquire into this, and the more I have heard about it from persons well able to judge, the more have I been convinced that the Poles in Siberia are very much better off than the average of those in Poland. The Russians to a man condemn them, and justify their Government in the measures that have been adopted to put down the insurrection; but their feelings of loyalty to the Emperor may possibly warp their judgment. The foreign residents, who have no such influence to sway their opinions, may be considered impartial in the matter, and they, on the whole, endorse the Russian views as regards the Poles. These English residents in Siberia with whom I have conversed, assert that the Polish exiles enjoy a degree of peace, comfort, and prosperity that they were altogether strangers to in their own country. Wealth, talent, industry, and education have the most ample scope in Siberia, and are set free from those distractions which sap healthy enterprise in a country torn with civil wars. I have already given some hints of the position occupied by Russian political exiles in Siberia, and I need not dwell on the subject now, further than to say that the Poles are treated with still greater leniency and consideration. That the exiles are on the whole dissatisfied, there can be no doubt. But the more sensible of them admit that their worldly circumstances are improved by going to Siberia. Many of them are pleased at the change, and would not willingly return home, if it were open to them to do so. So long as they remain in Poland, they say, they are at the mercy of every band of malcontents who have nothing of their own to lose. In revolutionary times they are constrained, in spite of themselves, to take part in the proceedings, and to sacrifice their time, property, and everything else to schemes of which they must strongly disapprove. They never feel secure from the consequences of the folly of their hotheaded countrymen. They have no heart to work, when they are liable at any moment to be involved in ruin by the rashness of some insurrectionary party. But Siberia offers an escape from all this strife and endless conspiracy, and some of them hail with delight the sentence that exiles them to a more congenial soil. No one, indeed, who has observed in an impartial manner the conditions of life in Siberia and Russia respectively, will be disposed to doubt that the former is really the more attractive residence, and although it is remarkable, it is not incredible, that many Poles should deliberately prefer it to their own country.

The reader will find himself enabled to follow the traveller with the greater ease and intelligence by the presence in the book of two excellent maps, and a dozen spirited wood engravings, that are in every sense of the word illustrations of the text.

Naval and Military.

The *Moniteur de la Flotte* contains the following details as to the effects of the French artillery in forcing the Straits of Simonoseki. The French guns, it will be perceived, are described as vastly superior to the Armstrong ordnance:—"Our vessels, the Semiramis, Dupleix, and Tancrede greatly distinguished themselves. The admiral's frigate crushed the enemy's batteries by the rapidity of her fire, not less than 350 shots having been discharged within an hour. The English are in admiration at our artillery, which proved of great assistance to the corvettes stationed at a short distance from the forts. The reputation of the Armstrong guns is decidedly on the wane; the officer who commanded the battery of the English ship Euryalus loudly complained of them. Whilst we were removing the cannon from the forts the Japanese sharpshooters approached, and the 4-pounder swivel gun of the Semiramis opened on them, Admiral Kuper, Major Soy, of the English Engineers, and the commander of the Conqueror were amazed at the precision of the fire from this piece, which placed its shells as correctly as with the hand at a distance of 3,000 metres."

It is reported (says the *Army and Navy Gazette*) that Lieut.-Colonel Suther, who is in command of the Royal Marine Light Infantry Battalion in Japan, will, in consequence of the victory recently gained by the allied forces over the Japanese, be recommended for the vacant aide-de-campship. We are not inclined to dispute the merits of this officer for the enviable distinction, but there is a strong opinion existing in the corps that the recollection of the services rendered by Lieutenant-Colonel Williams, and the painful wounds which he received in action, should not be obliterated by the success attendant upon a single fight against an enemy extensively armed with bows and arrows.

The Dutch frigate Adolph Hertog von Nassau, 50, 400-horse power, Capt. O. A. Ulmberg, having completed her repairs at Sheerness Dockyard, left the Medway on Saturday, the 19th inst., for Batavia.

A report of the health of the Navy has been published, from which we gather that there has been a great reduction in the rate of invaliding from the East Indies and China, but this is "in no degree to be referred to any marked improvement in the health of that station, but simply to the fact that a large number of the vessels of the squadron were under orders for England, and that cases which would otherwise have been invalided were retained on board their own ships for conveyance home." The invaliding on this station is, however, as high as 61.6 per 1,000, while the average for the whole force is but 38.2.

Lieut. George Frederic Harris, 20th Foot, to be instructor of musketry vice Lieut. Charles Kyrle Chatfield, appointed aide-de-camp to the Governor of Hong Kong.

THE Ariel, 6, screw sloop, Commander Chapman, arrived at Spithead from foreign service, having sailed from the Cape of Good Hope on the

Digitized by Google

1st of September, from St. Helena on the 17th, Ascension, 28th, Sierra Leone on the 12th of October, and Rayal on the 6th inst. She brought home as passengers Lieut. Bush, R.N., Mr. Lew, paymaster, R.N., and a few naval invalids.

THE TRADE OF TIEN-TSIN.

The Consular Report for this place has only just been published. In a previous issue we noticed the delay in the transmission of these returns. The delay in this case is more extraordinary; Tien-tsin being the nearest port to our Minister at Peking, through whom, as already stated, they are transmitted to the Foreign-office. The returns are signed by W. B. Dennys for Mr. Consul Mongan, who is now in this country on leave, but returns to his post, we believe, in January next.

The returns under notice are most profuse, and we would recommend the compiler, should he again have the duty to perform, to give us the practical results with less verbosity. The comments on "Shipping and Navigation" particularly illustrate our remark. The whole of the report occupies 19 pages of the *London Gazette* of the 4th Nov.

SHIPPING AND NAVIGATION.

The shipping returns for the year 1863, as compared with the returns of 1862, exhibit an increase in the number of British vessels trading at the port of Tien-tsin equal to one-half. Indeed, the British vessels exceed all the other foreign flags, exclusive of the Americans, which visit this port by a little more than one-third. The subjoined table will fully illustrate the truth of this:—

	Shipping in 1863.		Shipping in 1862.	
	No.	Tons.	No.	Tons.
British ..	69	19,108	39	10,671
American ..	20	6,558	18	4,436
Sundry ..	45	10,610	54	11,454
Totals ..	134	36,276	111	26,561

The decrease which the returns exhibit in the number of "sundry" vessels is accounted for, first by the British merchants extensively employing small steamers in the Tien-tsin trade, and, secondly, by the British merchants having a quantity of light handy sailing vessels suitable for this trade.

First. I mentioned in my report in 1862, the decrease in "sundry" vessels as compared with 1861, and I employed the following remarks as being in my opinion explanatory of the fact:—"The increase of small steamers in 1862" (as now in 1863) "connected with the Tien-tsin trade is, however, the principal cause of the decrease of continental shipping. These small steamers, nearly all of which hoist English colours, are undoubtedly by far the most convenient class of vessels for the traffic at this port. The city of Tien-tsin stands about sixty-five miles from the village of Taku, upon a river which, owing to its insufficient depth of water and tortuous course, is extremely difficult of navigation. At the mouth of this river (Pei-ho) there is a bar, which renders it unsafe for vessels drawing more than 11 feet 6 inches of water to enter Taku anchorage; while outside in the gulf the weather is often so boisterous, and the swell so high, that vessels cannot discharge their cargoes for several days together. The convenience, therefore, of a class of steam vessels able not only to clear the bar, but to carry their cargoes right up this sixty-five miles of river navigation to the very gates of the merchants godowns, is very great."

The trouble of hiring native boats, the slowness and stupidity of the native sailors, their dishonesty, the inconvenience of transshipment, and the delay which it occasions, have induced merchants to employ light swift steamers. Three such vessels have run regularly in 1863 between Tien-tsin and Shanghai, and several others have made occasional trips at moderate intervals.

Secondly. The British merchants at Tien-tsin have a sufficient quantity of sailing-vessels of a light draught of water, which renders the chartering of continental vessels superfluous. This was not so in 1861. British vessels could not be obtained of a size small enough for the Tien-tsin trade. The British merchants had, therefore, to charter continental vessels. But the freight of German and Danish vessels has fallen in the market. The five or six British steamers, which trade between this and Shanghai, have engrossed the trade which belonged to continental vessels in 1861, and British merchants like British vessels better than those flying the flags of other Powers.

COASTING VESSELS.—FOREIGN AND NATIVE.

The foreign vessels that visit Tien-tsin are, in the vast majority of instances, engaged in a merely coast trade. The merchants, foreign and native, in Hong Kong, Canton, and the other southern ports, charter foreign ships to transport their merchandise to Tien-tsin; and the merchants, foreign and native, in Tien-tsin employ foreign vessels to export their merchandise to Shanghai, Hong Kong, Canton, and other southern ports; the foreign ships and steamers generally touch at Shanghai, or make Shanghai their destination. The coasting trade at Tien-tsin, the only trade of the port, in the great majority of cases, is done by native or foreign Shanghai houses.

Not only are foreign vessels employed in a coasting trade between this port and Southern China, but they import and export native produce. Foreign vessels bring up to Tien-tsin, not only foreign manufactures, but sugar, rice, tea, oil, medicine, paper, and other native produce for which there is an extensive market at this port; and foreign vessels carry away not merely re-exports, but beans, peas, cotton, wool, hides, fruit, medicine, and other produce of Northern China, as well as the native junks. For particulars of the coasting trade, I beg to refer to my report on the trade of Tien-tsin, in 1861-62.

The native junk is rapidly disappearing from the highways of commerce; the native merchants do not engage them; the principle of marine insurance annihilates the native craft: "Can you insure?" is a question which the Chinese merchants almost invariably put. Eighty southern junks came in 1863, one-third of their holds were empty; one hundred and twenty-seven came in 1862. The eighty junks which entered in 1863 contained rice, sugar, tea, oil, paper, medicine, fruit, preserves, silk pieces, native hardware, wood, prepared opium, birds' nests, fish, sharks' fins, &c., &c., &c.; and they took away peas, beans, salt, fruit, vegetables, fish, wheat, barley, millet, medicine, ginseng, &c., &c. The coasting trade done in this consular district by the native junk is very great.

FOREIGN TRADE IMPORTS.

The Import Return for 1863, given below, will sufficiently indicate the nature and extent of the trade transacted at Tien-tsin during 1863. Except cotton manufactures, the returns for 1863 compare very favourably with those for 1862.

These returns describe the total quantity of about 250 articles, imported in 69 British, 20 American, and 45 vessels of various flags; total, 134 vessels, of 36,276 tons; total value, 7,704,492 taels, less 341,992 re-exports. Of this total opium figures for 2,285,651 taels; shirtings, 516,215; English camlets, 15,210; Dutch, 80,000; sugar, 1,361,920. Next follows the market values of these articles, which might have been given by adding another column to the import tables. The following comments are also appended:—

MANUFACTURED COTTON.

The import of cotton manufactures has in 1863 steadily fallen off. The civil war in America, and the defective supply of cotton in England, fully accounts for this. Merchants' manufactures, when brought into competition with native cotton manufactures, owing to a rise in their price, ought, as a matter of course, to go to the wall. Foreign cotton manufactures in 1861 sold at Tien-tsin for about half the prices of native cottons. As a consequence, the people of the towns and villages scattered through Chi-li and the neighbouring provinces purchased foreign cottons as being cheaper than their own cottons; but the country population adhered to their native manufactures. The country people, who work a great deal at rough employments, when manufactured cottons sold at one-half the price of native cottons, bought the native rather than the foreign, because the native lasted much longer than our Manchester goods. Native cottons, though not so comely, are much better adapted for the rough work of the rural population.

The scarcity of cotton has raised the price of Manchester goods so near the price of native cotton manufactures that not only the country people, but the town and village population, purchase their home manufactures instead of merchants' goods. Till the normal state of the cotton market returns, and, as a consequence, till the prices drop very much lower than the prices current in 1863, the native cottons must rule the market.

WOOLLENS.

The import of woollens has been unfavourable. In the trade report for 1862 I explained the cause. At Tien-tsin, and throughout North China in general, the winter months are dry, but the cold is very severe; as a consequence the Chinese prefer cottons or silks lined with fur for winter dresses rather than foreign woollens. In upholstery a good deal of woollen cloth is used, but for the most part the woollens are Russian, not English. The English woollens imported into Tien-tsin are too dear, of the wrong colour, and too heavy for the natives. Upon the whole, then, the market for British woollens remains insignificant.

OPIUM.

This import maintains its high character; one hundred and eighty-two chests of Malwa have been imported in 1863 more than in 1862; and though the Shensi crop of native opium was fair, the Chinese favour the Indian, not the native drug. The native opium is, though very much cheaper, insipid, and very few of the Chinese smoke native opium, unless it is mixed with the Indian. If they can get the Indian of course so much the better, but a Chinaman reduced to a state of poverty, to which the habit of excessive opium smoking invariably leads, unable to purchase the Indian, mixes the native with the Indian, or even gathers up the cinders of Indian opium twice smoked, and smokes them a third time.

Malwa opium is sold for about six hundred taels, while native Shensi opium is sold for about four hundred taels. In 1862 native opium was offered in the market at six hundred and fifty taels; this rise in the price of native opium was caused by political disturbances in Shensi, ultimately calmed down by means of bribes and donations, which threatened with extinction the whole trade of that province. The quantity of Indian imported into this district depends entirely on the state of the Shensi crop. When the Shensi crop is deficient, the demand for Indian opium increases, and *vice versa*.

Of the opium imported into Tien-tsin, from 150 to 200 chests a month are purchased for consumption in the capital. What Peking consumes in the native drug I do not exactly know; it must, however, be large.

PRODUCE OF CHINA AND THE STRAITS.

The returns for 1863 show very favourably as compared with those of 1862. This trade is partly in native hands. The raw material is imported by foreign merchants while the prepared material falls to the lot of native merchants. I should judge that one-half, or, perhaps, a little more, of this trade, is carried on by Chinese. The native houses in Tien-tsin have agents in Hankow, Canton, Singapore, acute in business transactions. It is only in dealing with places in which Chinamen do not exist that the native merchant meets with a difficulty; but wherever Chinese reside, the native merchant can do business very much cheaper than the foreign houses in China; and, moreover, his knowledge of the tastes and habits of his countrymen guarantees him against any gross mistakes, especially with reference to prepared commodities.

FOREIGN TRADE EXPORTS.

The export returns of 1863 compare favourably with those of 1862.

These returns embrace the quantities of all goods exported in the same number of vessels as the imports.

Digitized by Google

DUTIES PAID.

A tabular statement of the duties collected shows a total of 163,681 taels divided as follows:—On Imports, 25,346; Exports, 23,437; Coast trade, 48,849; Opium, 62,838; Prepared Opium, 293; Ships' tonnage dues, 2,918.

FROM "PUNCH."

—o—

ECONOMICAL MUNIFICENCE.

With the sole addition of merited *italics*, we copy the following statement from the *London and China Telegraph*:—

"A pension of £300 a year has been voted to the Bishop of Victoria, *subject to a deduction of any sum he may derive from an appointment in England.*"—SHABBY!

CHINA GRASS.—We (*Galignani's Messenger*) stated a few days ago that highly satisfactory experiments had been made at Lille, on a small scale, with China grass and cotton mixed, an excellent stuff having been obtained from the loom, far more durable than calico, and equally capable of being dyed. A second report, presented to the Chamber of Commerce, goes into further details. Quantities of 100 kilogrammes each of China grass and India cotton having been mixed, the usual processes of spinning were gone through very easily, the only difficulty lying in the cording; but this, it appeared, would easily be obviated by habit. The weaving proceeded satisfactorily, and produced military shirting of the breadth of 76 centimetres, and weighing 17 kilogrammes per 100 metres; also calico for printing 93 centimetres broad, and weighing 16½ kilogrammes per 100 metres. The only inconvenience is that these stuffs are somewhat stiffer than those made with cotton alone; but, on the other hand, they last much longer. The earlier experiments in dyeing had been effected on small pieces; they have now been repeated on a much larger scale, and with the same success. India cotton is generally very difficult to dye, but mixed with China grass the results are equal to those obtained with the best long staple from Louisiana. China grass alone has an affinity for colours equal to that of the best cotton. After bleaching, the calico for printing, which was 93 centimetres broad, lost 13 centimetres in that sense, and gained in length 4½ metres on pieces measuring together 157 metres, a result nearly the same as that generally obtained in the best cotton stuffs. The weight after bleaching is about one-eleventh less than the original one; so that neither dyeing nor bleaching modifies the constituent nature of the stuff. With regard to strength, experiment shows that stuff made of China grass and cotton, when tried on the warp, is weaker than pure cotton in the proportion of 76 to 80, or thereabout, but that on the woof it is stronger in the proportion of 57 to 52. The report concludes with a recommendation to introduce China grass into the manufacture of stuffs hitherto made of cotton alone. Such stuffs, it may be surmised, will hold an intermediate rank between linen and pure cotton fabrics. China grass, in a raw state, consists of long herbaceous blades of a yellowish hue, but when prepared it has quite the appearance of common cotton, except that it has a sort of silky gloss which the latter has not. It is soft to the touch, supple, and free from all kinds of knots. The plant admits of being acclimatised in the south of France, and generally wherever cotton has been cultivated since the outbreak of the American war. It spreads with great rapidity, even when left to itself, and its cultivation gives little or no trouble. At Calcutta it yields three crops a-year, with stalks of the length of from six to nine feet. The Minister of Agriculture and Commerce has ordered over a quantity of China grass seed from its native country, in order to distribute it to all agriculturists who may apply for it. Regarding the cost, MM. Mallard and Bonneau, of Lille, state it as follows:—100 kilogrammes of China grass treated by their process yield 75 per cent. of cotton-like matter, 8 per cent. of refuse applicable to the manufacture of paper, and 17 per cent. of waste which is good for manure. The chemical treatment and the various manipulations requisite for obtaining the material fit for spinning cost together 1f. 57c. per kilogramme. As the cotton of Egypt nows costs 5f. 60c., the difference in favour of China grass is 4f. 3c. To this must be added 10 per cent. for the cleaning or picking and consequent waste of the said cotton, which raises the differences in favour of the new material to 4f. 59c. This is irrespective of the profit to be derived from the refuse to be sent to the paper mill. If all these calculations be correct, China grass will be a boon to mankind.

RESIGNATION OF THE BISHOP OF VICTORIA.—The Right Rev. George Smith, D.D., Lord Bishop of Victoria, Hong Kong, we hear, will formally resign the see at the end of the year. The bishop, who is a strong evangelical, and married to a daughter of a leading evangelical clergyman, the Rev. Andrew Brandram, of Beckenham, graduated at Magdalen Hall, Oxford, and was incumbent of Goole, Yorkshire, before proceeding to China. He has been voted a pension of £300 by the Hong Kong Government, and *Punch* has an amusing notice of this, which will be found in another column.

THE *Illustrated News* of the 19th November contains a series of views of the operations of the fleet in the Straits of Simonoseki, from their artist, Mr. Wirgman.

Continental Intelligence

—o—

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Nov. 25.

The general discussion on the Budget was opened in yesterday's sitting of the Second Chamber of the States-General. The "struggle" between the two parties began with a speech of Mr. J. J. Rochussen, who attacked in particular Mr. Betz, the Minister of the Financial Department. He blamed that Minister because he had no system at all—that *par l'art de grouper les chiffres* he had succeeded in concealing a deficit. He also rongly accused the Minister of the Colonies, alleging that his system would lead to the ruin of our possessions. Mr. van Goltstein confirmed the opinions of Mr. Rochussen; while Mr. van Zuylen van Nyeveldt, in an extremely eloquent speech, vehemently attacked both the Ministers and the Ministerial party. He made a comparison between Mr. Thorbecke and his adorers of to-day, and that Minister and his party in the years 1849-53. We came thence to the conclusion that the party styling itself "Liberal" was not liberal at all. Centralisation was now the device of the Government at home; and as concerned the colonies, there was no rule at all: the plan there was to try everything to abolish the system that had proved good for thirty years. He was, therefore, obliged to vote against the Budgets. To this conclusion came also Mr. Van Foreest, after he had launched his annual philippic against the Cabinet. Mr. Van Bosse very warmly defended the Minister of Finance, while Mr. Dullert attempted to justify the whole Cabinet. The advantage of the day was undoubtedly on the side of the Opposition. In my next letter I will give you an impartial *résumé* of the whole debate.

Mr. Fransen van de Putte has laid before Parliament the documents referring to the measures against Messrs. Roorda van Eysinga and Nosse.

His Majesty has returned from his seat "het Loo" to the Hague. The Prince of Orange still remains at Compiegne.

COMMERCIAL.

COFFEE.—Market firm, with a fair business doing at full prices. For good ordinary 43½c. is willingly paid. At this price 978 b. ex Maria Catherina were sold. The 85,092 b. offered to day at public sale by the Trading Company were all sold at firm prices.

TEA.—The market was very active during last week. At private auction were sold 196½-ch. finest New Season Kaisow Congou at 117 to 120 c.; 239 ½-ch. finest Congou at 85 to 88 c.; 444 ½-ch. extra fine New Season Congou at 84 to 85 c.; 126 ½-ch. finest Oopack Congou at 91c.; 398 ½-ch. finest Oopack Congou at 91 to 94 c.; 218 finest Kaisow Congou at 121 to 123 c.; 123 ½-ch. do. at 114 to 116 c.; 200 ½-ch. Pouchon at 53 to 73 c. The private sales consisted in 63 ½-ch. Souchon ex Highflyer and 64 ½-ch. finest Kaisow Congou at prices kept secret.

SUGAR.—The market is in a more favourable condition. A large business could have been done were holders willing sellers; they declined, however, the offers, waiting for the auction of to-day. The private sales of the week consisted in 4,500 kr. at 1f. to 1¼f. under September prices.

RICE.—Market firm, but little on offer; waiting for better prices.

SPICES.—Dull, for want of orders. Cinnamon is paid with 87c. Nutmegs, Mace, and Cloves without transactions. Prices nominal.

TOBACCO (Java).—The market is in the same condition as at our last report. Only 248 lb. Java ex Wedie were sold. Stock, 11,062 lb. Java. On the 30th of November and the 1st of December important public sales are announced.

COTTON.—Met a good sale, and again rather dearer for export.

BANCA TIN.—Dull, 60½f.

INDIGO.—Market quiet.

GUTTA PERCHA.—5,500 kils. ex Jhr. Mr. van de Wall van Puttershoek were sold at firm prices.

HIDES.—499 p. Java ox, part damaged, ex Nicot were sold by inscription.

ARRACK.—Only 60 casks Batavia were sold at prices that did not transpire.

MONEY.—Bank discount 7 per cent.; open market, 6½ to 7 per cent.; N.W.S., 2½ per cent., 61¼; 3 per cent, 72½; 4 per cent, 95 11-16ths; Handelmaatschappy, 136½ per cent.; Maatsch., Handel, and Nyverheid, 65 to 68 per cent.; Change on London 3m., f.11.50., short, f.11.72; Paris 3m., f.45.75; short, f.46.65; Hambro, f.34.50; short, f.34.70.

SHIPPING.

ARRIVALS.—Nov. 16, at Brouwershaven, Robert Dickson, from Batavia; 15, at Texel, Wilhelmina, from do.; 16, Drusus, from do.; 17, at Brouwershaven, Nereus, Jason, Twee Gezusters, from do.; 17, at Texel, Bosphorus, Cornelia, Koophandel, Rotterdam, from do.; 19, at Brouwershaven, Balaklava, from do.; 20, Gvootmeester Nationaal, from do.; 21, Jacobus Martinus, Dageraad, from do; 19, at Texel, Sjofroken, from do; 20, Krimpenerwaard, from do.; 22, at Brouwershaven, Dageraad, Frederick Warren, from do.; 23, Burgemeester Hoffmann, from do.; 22, at Texel, Sliedrecht, from do.

DEPARTURES.—Nov. 16, from Brouwershaven, Maria Diederika, for Melbourne.

READY TO SAIL.—At Brouwershaven, Dorothea Henrietta, for Java; St. Jan, for Batavia; at Texel, Doesborgh, for Batavia; at Flushing, H.M.'s corvette, Prins Maurits der Nederlanden, for Java.

FREIGHTS.—Quotations of Messrs. Fauchez and de Vletter, shipbrokers, Rotterdam:—For Batavia: Fop Smit (549 tons); T. C. Schotel (632 tons), 18f. to 20f. For Batavia and Sourabaya: Koophandel (531 tons), Graaf Dirk III. (598 tons), Æolus (690 tons), 18f. to 20f. for Batavia, 25f. to 30f. for Sourabaya. For Batavia and Samarang: Baron van Heemstra (752 tons), 18f. to 20f. for Batavia, 25f. to 30f. for Sourabaya. For Samarang: Maria Magdalena (403 tons), Noord Braband (736 tons), 25f. For Macassar: Koning Willem III. (422 tons), 45f. For Padang: Whampoa (462 tons), 30f. for heavy, 45f. for light goods. All per last of 2,000 kilos., or 120 cubic feet Amsterdam. For Melbourne: Susanna E. Vonck (959 tons), 30f. to 50f., and 15 per cent. per 1,000 kilos., or

Digitized by Google

40 cubic feet English. For Decima and Kanagawa: Japan Packet (266 tons), 60f., and 15 per cent. per last of 80 cubic feet English.

LOADING.—At Amsterdam.—For Kanagawa and Decima: Libra, Joan Melchior Kemper, Ferdinand and Louis, D. T. Visser. For Padang: Maria Agnes. For Macassar: Quatre Bras. For Batavia: Friesland, Pollux, Anna and Sophia. For Batavia and Sourabaya: Willem Hendrik. For Samarang: Mathelde and Simonetta, Johanna, Madura, Christina, Nicot, Stad Leyden. For Sourabaya: Sourabaya Packet, Willem Daniel, Capella.

PASSENGERS INWARD.

From JAVA: [Per Twee Gezusters, Captain Bergman, Mr. C. J. M. Reh; per Nereus, Captain Planten, Mrs. Akker and family, Mrs. Schluter and children; per Cornelia, Captain Croese, Messrs. Haertlein and family, Ziedtes Desplantes and family, three children of Mr. Heyting: per Rotterdam, Captain Adriaans, Mr. Heykoop ten Ham with family, and 107 soldiers; per Grootmeester Nationaal, Captain Giesse, Mr. W. Willemse.

PASSENGERS OUTWARD.

To Batavia: Per St. Jan, Captain P. Lommerse, Mr. A. Koene Lieutenants C. van Vleuten and H. F. Scheggers, and 100 soldiers.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

NOVEMBER 23.

Now that the ratifications of the Treaty of Peace between Denmark and the German great Powers have been exchanged and the Duchies of Schleswig and Holstein formally ceded to Prussia and Austria, Herr von Bismark, the Prussian Minister for Foreign Affairs has issued a circular to the Prussian Consuls and Consular Agents abroad, directing them to take under their immediate protection the vessels with their crews and cargo belonging to the Duchies, and to treat them in every respect as if they were Prussian, and the Consular fees to be levied are to be not higher than those paid by Prussian ships and cargoes.

It is further ordained that as those Duchies have in the present temporary state of affairs no publicly recognised Sovereign, and as after their cession to Prussia and Austria it is clear that their vessels cannot sail under Danish colours, as they have hitherto done, whilst their own Schleswig-Holstein flag is not only unrecognised by other maritime States, but unknown beyond the frontiers of the Duchies, their vessels shall be admitted to the privilege of sailing under the Prussian flag. The practical importance of this concession will not appear perhaps to your readers as very great on first reading this, but they must consider that by now being legally permitted the use of the Prussian flag, the Schleswig-Holstein vessels, of which there are several employed in the carrying trade in the Far East, can now be chartered for the conveyance of goods between the ports of China and those of Japan, a privilege not enjoyed by the flag of Hamburg or Bremen, or, indeed, of any other German State. By this mail copies of the above-mentioned circular go out to the Consuls, Vice Consuls, and Consular Agents of Prussia in China, Siam, and Japan, where Austria has no such representatives. I may here observe that great discontent is manifested by the shipowners of Trieste and other ports in Austria at this absence of Consular representation in the Far East, where, of late, considerable attempts have been made by the Austrian flag to obtain a part of the lucrative carrying trade, but which threaten to become altogether abortive from the want of support and protection of recognised Consuls. Now that the Austrian Parliament has just been convoked, the Trieste Chamber of Commerce and the merchants and shipowners of that port are preparing a petition to that Assembly setting forth the grievance of their unprotected condition in the Far East, and praying for the appointment of Austrian Consuls in the principal commercial ports of China, Japan, and Siam. It is now more than two years ago that the head of one of the German firms in Shanghai offered his services in undertaking the duties of the Austrian Consulate at that port without any reward or remuneration, but his generous offer has been "under consideration" ever since, and no answer has yet been sent out to him.

Accounts received from the Amoor state that the steam navigation on that river had increased in a wonderful manner of late, there being no less than twenty-five steamers of different sizes in full activity every day. Trade, however, at Blagovessensk was remarkably dull, though the dulness was only of a temporary nature, being attributed to the fact that the Amoor Company is liquidating its affairs, it being resolved to wind up. The company's stores at Nicolayefsk and Charabofka are already closed, and measures are being taken to sell off the remainder of the goods on hand in Kamtschatka and at Sirjetensk. The company's river steamers have been purchased by the Russian Government.

By Imperial Ukase the fortifications of Omsk, in Siberia, are ordered to be razed, and the garrison removed. The town, which is one of the principal telegraph stations of the great Siberian line, is to be placed in future under the orders of the resident telegraph engineer of the district.

Mr. H. Ebell is appointed Consular Agent for Prussia at Macao, and Mr. J. Truelsen in the same capacity at Ningpo.

COMMERCIAL.

COFFEE.—Since last mail the market has been in a very lively condition, and a further advance of fully ¼ sch. bco. per lb. has been established. Sales of the week, 32,000 bags.

SUGAR.—Raw continues in favour, though there is no alteration to notice in values. Some extensive sales are reported, chiefly in W.I. descriptions. In Refined a fair amount of business has been done at previous quotations.

RICE.—The dealings were this week not extensive, but prices of all descriptions are well supported, and the market closes firm.

SPICES.—Cassia Lignea is in good request, and higher prices are willingly paid. Flores, on the other hand, is dull, and might be had somewhat cheaper. Ginger commands an easy sale; 700 bags of Bengal ately arrived found immediate buyers at 4⅝ sch. bco. per lb. Mace, Nutmegs, and Cloves calm. In Pepper little doing, but with a firm market.

SPELTER.—On the whole the market has not been so lively as last week, but the prices paid are a shade higher. Sales about 5,000 centners, at from 14 mks. 7 sch. banco to 14.11. Market closes dull.

Discount, 3½ to 4¼ per cent.

Monetary and Commercial.

A circular forwarded to the shareholders of the Ceylon Coffee Estates Company (Limited) by the secretary states as follows:—"In handing you dividend warrant for the half-year just past I am instructed by the board to inform you that the reports from the estates continue to be so satisfactory that it is hoped that the profits of the first year's working will amount to a sum equivalent to double the guaranteed dividend of 10 per cent. on the paid-up capital." Of the profits 10 per cent. is divided amongst the proprietors, being the amount guaranteed to them by the Agra and Masterman's Bank, and the remaining 10 per cent. it is proposed to carry to the reserve fund.

In our advertising columns will be found a notice for the issue of debenture, on behalf of the Municipal Commissioners of Singapore.

At a meeting of the creditors of Messrs. Galbraith, Bigland, and Co., in the East India and China trade, who failed on the 20th of October, a statement was submitted by Messrs. Harding, Pullein, and Co., showing liabilities, secured and unsecured, for about £162,000, of which £55,957 is expected to rank against the estate, while the assets are estimated at only £17,806. After much discussion it was determined to wind up under a deed of assignment.

In the Bankruptcy Court the sanction of the Court was given for a reward to be offered for the apprehension of Thomas Hall Gladstone, of the firm of John Gladstone and Co., of London, and chairman of the Intercolonial Bank (Limited), who has absconded—it is believed to New York. The bankrupt is said to have taken with him a box containing 300,000 dols.

The report of the Hudson's Bay Company, to be presented on the 28th inst., recommends a payment of interest (on account of dividend) of 8s. per share, being 3s. more than at the corresponding period of last year. Active preparations have been commenced for the construction of the electric telegraph to British Columbia and the Pacific.

Formal notice is given that the Agra and Masterman's Bank (Limited) intends to apply in the next session of Parliament for an Act authorising the subdivision of the original shares of £100 into two shares of £50 each.

COTTON EXPORTS TO INDIA AND CHINA.

The following is from Sam Mendel's table of exports from London, Liverpool, and Clyde, for the month ending Nov. 16, 1864, and for eleven months ending Nov. 16, 1862, 1863, and 1864:—

	Plain Cottons. Yards.	Coloured Cottons. Yards.	Printed Cottons. Yards.	Twist. lbs.
HONG KONG AND WHAMPOA.				
Month ending Nov. 16, 1864	479,800	154,300	94,100	26,000

ARTICLES OF IMPORT.

TEA.—During the past fortnight heavy arrivals of new season's teas have come to hand, and have been freely offered by the importers, and the result has been a fair amount of business doing, but prices in most instances have ruled in favour of buyers, whilst, owing to the magnitude of the quantity offering, the trade have scarcely been able to taste all the samples. The Public Sales passed off without material change in prices for old teas, but a few of new season's, offered without reserve, went rather lower. Low and broken leaf and dusty kinds of Congou show little alteration. Good common is only in limited request to 11½d. to 1s. per lb. Flavory kinds of old import remain as before. The late advance in common to fair blackish leaf kinds has been fairly maintained. Fair to good Kaisows of new import have been freely offered, and the sales made show a decline of ½d. to 1d. per lb.; fine to finest maintain about former value. In second class Monings and Wopaks sales have been irregular, but the decline established since our last is fully 1d. per lb.; Fine to finest meet with but little attention. In new-make Canton kinds or Tayshans there has been no alteration. Common to good Oolongs have sold at a further decline of fully 1d. per lb.; fine to finest have been better supported. Souchongs of old import remain very difficult of sale. New season's have been only taken in small quantities, and prices are rather nominal. Flowery Pekoes show no change. The arrivals of Canton Scented Tea have been large, and being freely offered, prices for the fair to good qualities have given way fully 1d. per lb., both on Capers and Orange Pekoes; fine to finest have, however, realised former prices. Foo Chow kinds of Orange Pekoe are in active request, and sales continue to be made at extreme prices. Foo Chow Capers show no material alteration. Uncoloured Japans have met with only a moderate demand, and prices remain much as before. A small public sale of Assam Teas went off with spirit at an advance of 1d. to 2d. per lb. on the Pekoe kinds. In Green Teas there has been rather more doing, the late arrivals having given a better assortment than has been available for some time. Prices, on the whole, have been fairly maintained for all the good qualities; low descriptions have, however, sold at a decline of 1d. to 2d. per lb. Canton-made Gunpowders remain very difficult of sale, even at a decline of 1d. to 2d. per lb. for new season's, whilst those of old import rule very low.

TEA.—At New York there has been less activity and less buoyancy in the market. The business in lines for immediate use continues pretty large. Among the sales we notice 1,500 uncoloured Japan, 3,500 Oolong, 650 Green, &c. Current prices are about 5 cents higher than our quotations:—Hyson: Fychow kinds, common to fine, duty paid, $1.15 to 1.50. Young Hyson: Canton made, 75c. to 85c. Gunpowder: Taiping and Common Fycho, Congou, $1.15 to 1.25.

SILK.—We have had an unusually quiet fortnight in silk, the improved position of the Money Market having apparently no effect; importers, however, continue to be firm holders, there being nothing in the news from China to induce them to press sales. Japan Silk has been almost entirely neglected, and our quotations must be considered nominal. Deliveries from 1st to 24th inclusive. China, 2,740 bales; Japan, 835 do.; total, 3,575 bales. Tsatlee, No. 1, 26s. 6d.; Taysaam, No. 1, 24s. 6d.; Mibash, No. 1, 28s. to 28s. 6d.

COTTON.—The London market opened for the week with a good demand, and afterwards became even excited, prices advancing 1d. to 2d. per lb., but the rise was not fully maintained, and business is now flat. At Liverpool, also, prices of every description advanced on Monday, but on Tuesday and Wednesday was less extensive, the tendency being in favour of buyers. China and Japan were eagerly purchased early in the week at fully 2d. advance; but sellers have since supplied the market more freely, and about ¼d. of the advance was lost. To arrive and for future delivery increased purchases have been made, particularly in Egyptian, at an advance about corresponding to that of the general market, part of which has, however, been lost during the past two days. Yesterday (Friday) the market was dull, and prices were fully ½d. to ¾d. per lb. lower.

SUGAR.—At the close of last week there had been established a decline in prices of fully 6d. per cwt. The present opened with a sluggish demand; rates again declined 6d. per cwt. where sales were effected, and prices still continue weak. On the 22nd at auction 1,400 bags Siam partly sold at 36s. to 40s. 6d. Some parcels of Manila were sold on the 24th at 29s. 6d. to 30s.

COFFEE.—Business finished last week with an active demand, and sales of Plantation passed off with spirit at an advance of fully 1s. per cwt. Quotations are again higher this week. Altogether it may be stated that since the beginning of the month prices of Plantation are as much as 3s. to 4s. per cwt. higher, and of Native 1s. 6d. to 2s. Mocha has advanced 2s. per cwt.

RICE.—The rise established last week was 3d. to 6d. per cwt. This week the market is generally firmer. On the 22nd, at auction, 1,500 bags, cleaned, sold partly at 13s.

CAMPHOR.—Sales of China to a fair extent have been made at 82s. 6d. up to 85s. per cwt., and there is still demand at the higher figure, notwithstanding considerable increase of supply.

CASSIA LIGNEA.—1s. to 3s. per cwt. cheaper, and dull at the decline. Of 2,100 cases at auction, only one-fifth was placed at 88s. to 93s. per cwt. for 2nd to fine 1st pile. Buds: Quiet at the previous value, with very limited sales. 29 boxes at auction all retired.

DRUGS.—Cubebs: Again cheaper; of 251 bags at auction, one-third sold at 88s. per cwt. for good but stalky. Galangal Root: Remains steady; 105 bags sold at auction at 15s. 6d. to 16s. per cwt. for good quality. Rhubarb: Middling to good quality very firm, but lower sorts flat and cheaper. Of 151 cases at auction, about half sold at 6s. 2d. per lb. for fine round; 4s. 6d. to 4s. 8d. middling flat; 4s. 1d. to 4s. 3d. round; and 1s. 2d. to 2s. 9d. mouldy.

GUMS.—Benjamin: Flat; and 68 cases Sumatra at auction were all retired. Damar: Some inquiry for good quality: only 10 cases at auction, and those retired. Gamboge: Scarce and firm: of 31 cases at auction, three-fourths sold at £12. 15s. to £14. 5s. per cwt. for middling to good pipe, and £9. 10s. to £11 ordinary to middling dark and broken.

GUTTA PERCHA.—Flat: and 55 baskets at auction, all retired.

INDIA RUBBER.—Really fine quality, especially Java and Batavia,

Digitized by Google

wanted, and held above our present highest quotations of 1s. 4d. Penang worth 1s. 2d. to 1s. 3d. per lb. 103 baskets Singapore and 15 baskets Penang at auction all retired; but 78 cases Assam sold at 9d. to 9¼d. per lb. fair lump and ball.

HEMP.—Manila: This market has been steady; and of 2,277 bales at auction, about one-third sold at £27 10s. to £28 per ton good roping, and fair business done privately at £25 to £27 for ordinary to fully fair current quality.

HORNS (DEER).—Fine small are scarce and dearer: and of 17 tons Madras, 2 tons Bombay, and 2 tons Singapore, at auction, the bulk sold at 62s. 6d. per cwt. for 1 lb. average, 35s. to 48s. 6d. for 2½ to 1½ lb., and 30s. 6d. per cwt. for 3½ lb. average.

JAPAN WAX.—110 boxes middling block sold at 59s. to 60s., and one lot at 61s.

OILS.—Anniseed: Subsequently to our last notice sales continued to be made at 6s. per lb., but quite recently the reduced quotation of 5s. 10d. has been accepted for some small parcels. Cassia: Very dull, and offering in vain at the reduced price of 7s. 9d. per lb. Cinnamon: Steady; and of 6 cases at auction, one-third sold at 2s. 6d. per oz. for good heavy. Mace and Nutmegs: Firm; and of three cases at auction, one sold at 2¾d. per oz.

SAGO.—Is generally 6d. per cwt. cheaper, and of 3,188 packages at auction, one-third sold at 21s. to 22s. 6d. per cwt. for fair to good large, and 19s. to 19s. 6d. per cwt. for fair to good small. Flour: Quiet: very little doing: no change in value. Tapioca: 327 cases fine Singapore (flour in tins) sold freely at 3d. to 3¼d.; 146 bags Penang Tapioca were bought in.

SPICES.—Cinnamon: We quote, 1st sort, 1s. 10d. to 3s.; 2nd sort, 1s. 6d. to 2s. 6d.; 3rd sort, 1s. 6d. to 2s.; 4th sort and jungle, 1s. 3d. to 1s. 7d. per lb. Cloves: Firm; and 30 cases Penang sold at auction at 1s. 2½d. to 1s. 4d. per lb. for good to fine; 343 bags Zanzibar retired at 4d. Mace: Steady; and of 23 cases Penang and 9 cases Singapore at auction, three-fourths sold at 11d. to 1s. 11d. per lb. for ordinary red to fair palish. Nutmegs: Are about 1d. per lb. lower, and of 193 cases Penang, and 114 cases Singapore at auction, two-thirds sold at 2s. 9d. to 3s. 9d. for fair to very good bold, and 11d. to 2s. 1d. inferior small to fine medium. Pepper (White): Is again rather easier, and of 1,750 bags Singapore at auction, half sold at 3¼d. per lb., and 7,786 bags Penang mostly sold at 3d. to 3¼d., with Trang at 3¼d. to 3½d. Black: Continues steady; 100 bags Singapore at auction retired, and 278 bags Penang sold at 5¼d to 5½d. per lb. for middling.

TERRA JAPONICA.—Cutch Pegue: Continues to improve gradually; of 987 packages at auction half sold at 22s. to 23s. per cwt. for good. Gambier: Flat and cheaper; 889 bales at auction all retired; limited business done privately at 23s. to 24s. per cwt. middling to good; small sales for arrival also made at 23s.

SHELLAC.—Has experienced a somewhat improved demand, and is generally the turn better in value. Of 766 packages at auction, nearly two-thirds found buyers; Orange at £6. 10s. to £7 per cwt.; thin red Orange £5. 10s. to £5. 12s. 6d.; Liver £5. 2s. 6d.; Button £5. 2s. 6d. to £6. 2s. 6d.; Native £5 to £5. 2s. 6d.; similar rates have prevailed privately.

MISCELLANEOUS—Galls: China and Japan are better: 15 cases China sold at auction at 61s. per cwt. for good, and 301 cases Japan at 50s. to 52s. 6d. good. Musk: Very little doing in Tonquin; but 2 tins Cabardine at auction sold at 13s. to 14s. 3d. per oz., being 1s. to 2s. dearer: 8 tins Grain retired. Rattans: Steady; and 1,643 bundles damaged sold at auction at quite the previous value. Sapan Wood: Firm; 18 tons Siam at auction sold at £9. 7s. 6d. to £12. 10s. per ton. Soy: Generally held for more money, nothing of any consequence doing. Star Anniseeds: A small recent arrival, 50 cases, sold at auction at £5. 17s. 6d. to £6 per cwt. for good, and £5. 15s. to £5 17s. 6d. slightly mouldy. Sticklac (Siam): Continues very flat. 155 cases at auction all retired. Turmeric: No China offering, and very little doing in Java. Vermilion: Neglected at the recent reduction, and 24 cases at auction were all retired.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 15s. to £8; nail rod, £9. 10s.; hoops, £10. 10s.; sheets, single £11. 10s.; Staffordshire bars, £9. 10s.; rails, £7 to £7. 5s.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and Sheathing, £98 to £100 per ton; yellow metal, 8¼d. to 8½d. per lb.

TIN.—100s. to 101s. for block; 101s. to 102s. for bar. Tin plates, best charcoal, I.C., 29s. to 29s. 6d. per box.

LEAD, &c.—English pig, £20. 5s.; W.B., £22. 10s.; shot, patent, £23. 15s.; sheet, £21. 10s.; spelter, £21. 5s.; zinc, English sheet, £28; quicksilver, £8.

The following is from the Circular of Messrs. French and Smith:—There has been very little alteration in the prices of metals since the date of our last circular. Copper and Tin are a shade firmer. Scotch Pig Iron is about 1s. per ton lower. For Spelter the quotation is £21. 15s., and Zinc, £26. In other metals no variation.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

From BANGKOK.—At NEW YORK: Eastward Ho!

FREIGHTS AND CHARTERS.

Since our last issue the arrivals from the Eastward have been very numerous, and, consequently, there will be some difficulty experienced in placing them all for the outward voyage. Berth freights have not improved, and coal freights are very scarce.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £34 to £35 and £1. 17s. 6d. For Shanghai: £45 and £2. 2s. 6d. For Manila: £1. 5s. For Ceylon: £24 and £1. 2s. For Batavia: £25 to £26. For Singapore: £25 and 22s. For Penang: £27. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have invited tenders for the conveyance of 219 tons navy provisions, &c., from the River Thames to Hong Kong.

CASUALTIES.

The Highflyer, Smith, from Shanghai, which arrived in the River Thames, 15th November, had thrown a large portion of her cargo overboard during the passage. Liverpool, 18th November.

The Hurry Puddemsey, for Singapore, in coming out of Queen's Basin during the gale this afternoon, struck against the wall, injured her stern post and rudder, and will return into dock.

The Aberdeen, from Swansea, for China, has put back to Penarth through stress of weather, leaky.

The Helen's Bank, Lawson, from Colombo to London, drove ashore at Scilly on the morning of Nov. 18, but got off with assistance, making very little water, and was towed within the pier. Her bottom is supposed to be much damaged, but it cannot be ascertained until the ensuing spring tides.

The Neville, Robinson, from Liverpool for Shanghai, bore up from 48 N. 9 W. to Plymouth on the 20th Nov., with the loss of bulwarks, stanchions, and boats.

Amsterdam, 18th Nov.—The Nereus, Planten, from Batavia to Rotterdam, which arrived at Brouwershaven, 17th Nov., in entering got aground off Hompelvoet, but was assisted off by a steam tug and brought into the roadstead.

The Robin Hood, Darlington, from London for Hong Kong and Canton, foundered three miles west of Dungeness, on the 22nd November, after having been in collision with the Spirit of the Ocean, ship, from Quebec, which vessel was running "up Channel." The master and crew of the Robin Hood took to the boats and were landed at Dover. The Robin Hood had on board a fine cargo, and about 600 tons Government stores.

Off ASCENSION.—Oct. 20, Tweed, from Singapore, for London; 25, Vellore Didier, from Batavia, for Boston; 28, Vriendschap, from Batavia, for Rotterdam.

AT ST. HELENA.—Oct. 6, Nor'-Wester, Smith, from Manila, and sailed, 7, for New York; 7, Jason, van Bueren, from Batavia, and sailed for Rotterdam; 11, Holmsdale, Ferris, from Foo-chow-Foo, for London; Straatsraad van Ewyck, Ham, from Batavia, and sailed for Amsterdam; 13, Algernon, Mowat, from Ceylon, and sailed, 14, for London; 13, Ajax, Ramsey, from Batavia, and sailed, 13, for Rotterdam; 13, Three Bells, Simpson, from Pasaroeang; 14, Eleanore, Brookman, from Padang, and sailed, 16, for New York; 15, Hougomont, Flamank, from Shanghai, and sailed for Liverpool; 15, Yokohama, Sin, from Yokohama, and sailed for London; 15, Peeress, Rowland, from Batavia, and sailed, 21, for Falmouth; Vyf Vrienden, Johan, from Batavia, and sailed, 16, for Rotterdam; 18, Niemen, Knight, from Hong Kong, and sailed, 20, for New York; 19, Edith, Sydney, from Padang, and sailed for New York; 22, Thos. Blythe, Hart, from Macao, and sailed, 24, for Falmouth; 23, Alicia Annie, Fraser, from Manila, &c., and sailed, 25, for Liverpool; 27, Cornelia, Burns, from Hong Kong, and sailed for New York; 28, Chaa Sze, Shewan, from Hong Kong, and sailed for Liverpool.

Off ST. HELENA.—Oct. 8, Volunteer, from Singapore for Liverpool; 27, Shakespere, from Shanghai for London.

At TABLE BAY.—Sept. 23, Lord Clarendon, Buratel, from New York, and sailed 28, for Shanghai; Oct. 1, Annie Comrie, Hall, sailed for Colombo; Hollinside, Ridland, sailed for Galle; 2, Cashmere, Maddison, from Clyde; and sailed 4th for Galle. Oct. 11, Salatiga, Kettler, from Batavia, and sailed 13 for Middleburg; 21, Mary Goddard, Pairle, from Batavia,

At ALGOA BAY.—Oct. 3, Argali, Winn, sailed for Colombo; 8, Dione Stephens, sailed for Colombo; 14, Dorothea; Anne, Norbye, sailed for Singapore.

AT MAURITIUS.—Oct. 12, from Batavia, Oranje Nassau, van Hees (with damage); 15, from London, for Yokohama, Seringapatam (British barque), Wyeth (with damage); from Batavia, for Rotterdam, Joseph Willem (Dutch ship), Bik (with damage); 6, Foong Suey (str.), Gray, sailed for Singapore; 8, Matchless, Nicolin, sailed for Galle.

SHIP LAUNCH.—On the 12th inst. the clipper barque Simon Hobley was launched from the building-yard of Messrs. Allen and Warlow, at Pembroke. This vessel has been built for S. Hobley, Esq., of Caernarvon, especially for the China trade. She is of the following dimensions: Length, 145 feet; breadth, 30 feet; depth, 17 feet 6 inches; 600 tons O.M. To be commanded by Captain Blake, and will be registered at the port of Liverpool.

Dr. Curtis on Marriage, Nervous Debility, Spermatorrhœa &c, with Plates. Post free by the Author, 12 stamps; sealed ends, 20.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Infallible Lotion, the result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Curtis on Manhood should be in the hands of young and old. It is an ably-written medical treatise on diseases of error and effects of climate."—Sunday Times, March 23, 1856.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the source of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.

N.B.—Agents in India—Von Lintzgy, Loll Bazaar, Calcutta; Athenæum office, Madras; Hinnam, Queen's-road, Hong Kong, China; Observer office, Colombo, Ceylon; Esperance, Bombay; Times office, Malta, price half a dollar or one rupee. Consultations daily from 10 to 3 and 6 to 8.

London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S OINTMENT AND PILLS have over and over again proved the best friend to persons afflicted with ulcerations, bad legs, sores, abscesses, fistulas, and other painful and complicated complaints. Printed and very plain directions for the application of the Ointment are wrapped round each pot. Holloway's alterative Pills should be taken throughout the progress of the cure, to maintain the blood in a state of perfect purity, and to prevent the health of the whole body being jeopardised by the local ailment. Bad legs, old age's great grievance, are thus readily cured without confining the patient to bed, or withdrawing from him the nutritious diet and generous support so imperatively demanded when weakening diseases attack advanced years or constitutions evincing premature decrepitude.

The P. and O. mails due here on the 13th arrived at Suez on the 30th Nov., with dates from Hong Kong to 30th Oct. They will reach London on the 12th or 13th inst.

List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer Massilia, Dec. 4, from Southampton.—To Penang: Capt. and Mrs. White. To Shanghai: Mr. Herbert Elias, Mr. G. Stanford. To Hong Kong: Mrs. Smith and two infants, Mr. Dent. To Ceylon: Mr. and Mrs. J. Walker, three children, and servant, the Rev. J. Allcock, Mr. H. Bois, Capt. Rutherford, Mr. H. C. Park. From Marseilles, Dec. 12.—To Singapore: Mr. and Mrs. H. W. Wood and lady friend, Mr. Geo. Crichton, Mr. J. Crum, Mr. A. J. Gunn. To Shanghai: Mr. J. W. Brondbent. To Hong Kong: Mr. T. Caw, Mr. H. H. Nelson, Mr. J. Sloane, Mr. R. Calderdon. To Ceylon, Messrs. T. G. Davis, R. E. Hope, J. T. Green, and John Fraser, Mr. and Mrs. Schweitzer.

Per P. and O. steamer, Dec. 20, from Marseilles.—To Singapore via Bombay: Mr. and Mrs. Ottman. From Suez.—To Ceylon: Mr. Coomarad Swamy and servant.

Per P. and O. steamer, Dec. 20, from Southampton.—To Hong Kong: Messrs. Jas. Henderson, A. Leigh, and J. Maitland, Mrs. Wilkinson and infant, Miss M. Wedgewood, Mr. G. Martin. To Ceylon: Mr. J. Bannatine, Mr W. Mayon, Miss E. H. Jones. To Shanghai: Mr. Carritt. From Marseilles, Dec. 26.—To Hong Kong: Mr. and Mrs. Ryrie, Mr. Pastorius. To China: Mr. W. A. Foster. To Shanghai: Mr. and Mrs. Tyers. To Ceylon: Messrs. F. Pater and Fraser.

Per P. and O. steamer, from Marseilles, Jan. 12, 1865.—To Hong Hong: Mr. M'Donald.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The steamer *Chusan* arrived at Shanghai on the 18th from Yokohama, *via* the Inland Sea, calling at Nagasaki. Her dates being from the latter port to the 12th October, and the former the 4th. The *Chusan* left at Yokohama the following steam vessels, viz.:—*Wokee, London, Yeddo, Argus*, and *Island Queen*. At Nagasaki: The *Bahama* and *Carthage*. Passengers per *Chusan*, from Yokohama: Captains Briggs, Endicott, and Andrews, Messrs. Gibb, Daly, Gordon, Urquhart, Cooper, Elliott, and Kirby, and the officers and crew of the American steamer *Takiang*, sold to Japanese.

By Messrs. Jardine, Matheson, and Co.'s steamer *Rona*, arrived at Shanghai on the 18th, the dates from Yokohama *via* Hakodadi are up to the 12th Oct. The fleet had paid the visit to Yedo and returned. No particulars published as to the official interviews which took place. We may judge, however, that the visit had produced a good effect, as 1,000 bales of silk were expected or had arrived at Yokohama; and there was an inquiry for foreign manufactured goods. The *Rona* brought over a quantity of silk.

On the position of the Prince of Nangato the *North China Herald* has the following:—

The question whether Choshiu did or did not act under instructions from the Tycoon in opposing the passage of foreign vessels through the Straits of Simonoseki is one of considerable interest, as its solution must affect our relations with the Government. If Choshiu's assertion that he was authorised to act as he did can be proved to be correct, explanation and apology must be demanded from those who gave him that authority. And if any hesitation to comply with our demand be shown, pressure will have to be exerted. It seems at first to have been taken almost for granted that Choshiu's statement was correct, and that, in conquering him at Simonoseki, we had conquered, not an obnoxious chieftain, but a representative of the Tycoon. But this impression was hastily formed, and must, we think, be dispelled by the consideration of facts which have subsequently come to light. It is difficult to understand how Choshiu can, at the same time, have been engaged in fighting foreigners at Simonoseki under instructions from the Tycoon, and in fighting against the troops of the Mikado at Kioto. If this were indeed the case, the existence of a secret understanding must be inferred between that Prince and the Tycoon as distinct from the Mikado. But this is highly improbable, and the improbability is increased by the frequent assurances given by the Government to the foreign ministers that measures were in progress for attacking Choshiu and reducing him to subjection. It will be remembered that the Prince of Kiushiu sent a message, conveying a similar assurance to Admiral Kuper when the allied fleet entered the Inland Sea; and a recent number of the *Japan Commercial News* contains translations of two documents which, if genuine, must dispel all doubt on the subject. One purports to be a memorial from Satsuma to the Tycoon, drawing attention to Choshiu's rebellious conduct, and to his persistence in fighting with foreigners, thereby incurring disgrace which caused all his countrymen to be shamed. It concludes by advising the destruction of his race as the only adequate punishment for his many crimes. Subsequently to the receipt of this despatch the Tycoon is said to have issued an order calling on twenty-one Daimios of the provinces of Kiushiu, Shikoku, and Chiungoku, which are adjacent to that of Nagato, to utterly destroy the servants of the rebellious Prince.—

"Because the servants of Mats'daira Daizen no Dabu have threatened the Emperor with arms, thus committing high treason, they are speedily to be punished by the Tycoon. Wherefore now, all Daimios with revenue above 10,000 kokus are commanded to utterly destroy them. Owari Zen Dai-nangon is to command in chief, Mats'daira Echizen no Kami is to be second in command. Be ready against the time when the Tycoon goes forth to inflict punishment."

It appears, further, that one of Choshiu's palaces at Yedo has been destroyed and given up to be sacked, and that others

Digitized by Google

which he possesses there are to be similarly treated. A sovereign would hardly adopt this course towards a subject with whom he is on terms of good understanding, and who was so devoted to him as to have lately incurred heavy loss while endeavouring to carry out his behests. The suggestion which has been made that Choshiu's failure alone has drawn down upon him the wrath of the Tycoon does not seem probable. The rebellious acts against the Mikado were committed previous to the action at Simonoseki, and troops were at once sent up from Yedo to the assistance of the Mikado. It was imperative on the Tycoon to act with vigour in suppressing rebellion, and it is not likely that Choshiu would obey his order to fight the foreign fleet at Simonoseki while the Tycoon was taking measures by collecting troops and calling loyal Daimios into the field to crush his power. We think, therefore, that Choshiu's endeavour to direct the wrath of foreigners against the Tycoon will fail. With so strong circumstantial evidence tending to disprove the existence of any understanding between them, nothing save the production by Choshiu of the Tycoon's orders to fire on foreign vessels passing through the Straits will, we imagine, satisfy the foreign ministers of the truth of his allegations.

NAGASAKI.

A correspondent, writing under date the 5th Oct., informs us of the sale of Messrs. Dent and Co.'s steamer *Cosmopolite* to the Prince of Higo for the sum of 120,000 Mex. dols. The steamer *Fusi-Yama*, with forty-four men and a few officers of H.M.'s 20th Regt., had put into Nagasaki for repairs. One of her engines had broken down, but the Japanese workmen in the Nagasaki factory succeeded in setting it to rights.

The *Arracan* (Ham. barque) from Hong Kong to San Francisco, put into Nagasaki for water on the 2nd leaving on the 3rd. The *Carthage* arrived on the 2nd, and the *Australian* on the 5th. The *Water Lily* which left Shanghai on the 12th September had not made her appearance. Freights improving and there are at present no vessels lying disengaged in port.

CHINA.

TIEN-TSIN.

A correspondent, under date 8th Oct., gives the following account of the races :—

Three glorious days lent their assistance to a pleasant meeting. The horse races certainly were a failure, but those for ponies were very good; and as the result showed a fair division of the spoil, the meeting may be pronounced a satisfactory one to the public. As was the case last autumn, the rains rendered the old course unavailable, and a new one was chosen between the Treaty Joss House and Tien-tsin. This, thanks to the well-directed energy of the clerk of the course, was brought into very fair order.

FIRST DAY.
Thursday, 6th October.

1st Race.—The Town Plate.—Value 40 taels. For Chinese and Tartar ponies not otherwise entered, except for the "Lama Miau Stakes." Weight for inches. Once round (a little over a mile and a quarter).

Mr. Scammony's g. c. p. Greyfriar	1
Mr. Hagelstange's g. c. p. Challenger	2
Mr. Ainslie's c. c. p. Marlbrook	3
Mr. Pavillon's d. c. p. Amber	4
Mr. Grueler's g. c. p. Shindy	0

Marlbrook took the lead, which he maintained till about a quarter of a mile from home. Here he was passed by Greyfriar and Challenger, the two finishing an exciting race by a dead heat. Marlbrook well up. The deciding heat, after a good race, was won by Greyfriar by two lengths.

2nd Race.—The Tze-chu-lin Stakes.—Value 50 taels. For Chinese ponies. Weight for inches. Half a mile.

Mr. Florence's g. c. p. Birdlime	1
Mr. Wadman's s. c. p. Enamel	2
Mr. Waverley's s. c. p. Hippogriff	3
Mr. Martin's g. c. p. Query	0
Mr. Ainslie's b. c. p. Malay	0
Mr. Grueler's b. c. p. Doxology	0

Birdlime soon assumed the command, and came in an easy winner by some lengths. Time 1.05.

3rd Race.—The Hai-qwan-tze Cup.—Value 150 taels. For all horses. Arabs, 9.10; stud bred, 10; Colonials, 11; English, 12.7.

Mr. Grey's br. s. h. Basilisk	1
Mr. Corduff's b. s. g. Dangerous	2

Basilisk cantered round, winning by several lengths. Time 3.17.

4th Race.—The Maiden Plate.—Value 75 taels. For China ponies that have never run before. Weight for inches. One mile and a-half.

Mr. Jackson's g. c. p. Grand Stand	1
Mr. Florence's g. Quicklime	2
Mr. Martin's d. Banting	3
Mr. Waverley's g. Simpcox	4
Mr. Martin's y. Maskee	5
Mr. Harras' b. Panic	6
Mr. Grueler's b. Blackmail	7

Maskee and Bunting kept the lead for the first mile, when they were joined by the rest. At the straight, Grand Stand and Quicklime came away, and the former won a good race by half a length. The rest were outpaced. Time 3.49.

5th Race.—The Troopers' Plate.—Value 50 taels. Once round. For horses imported by the army. Arabs 10.7. Studbred and Colonial 11. Former winners of flat races 7lb. extra.

Mr. Pavillon's b. h. c. g. Spider	1
Mr. ——'s b. h. c. g. Venture	2

Spider cantered in an easy winner.

6th Race.—The Ta-lien-wan Cup.—Value 50 taels. For China ponies. Weight for inches. Winner of "Tze-chuhl-in Stakes" 5lb. extra. One mile.

Mr. Corduff's g. c. p. Sir Michael	1
Mr. Florence's g. c. p. Magic	2
Mr. Wadman's s. c. p. Enamel	3
Mr. Waverley's s. c. p. Hippogriff	0
Mr. Grueler's br. c. p. Doxology	0
The Confederate's g. c. p. Botheration	0

Sir Michael made the running at top speed, and kept the lead to the distance; Magic here joined him, and a good struggle ensued, resulting in favour of Sir Michael by a head. The rest beaten off. Time 2.21.

SECOND DAY.
Friday, 7th October.

1st Race.—The Lama Miau Stakes.—Value 50 taels. For China Ponies. Weight for inches. One and a-half mile across country.

Mr. Pavillon's d. c. p. Amber	1
Mr. Scammony's g. c. p. Grey Friar	2
Mr. Ainslie's c. c. p. Marlbrook	0

Marlbrook was left at the post. Amber led at a good pace, taking his jumps cleverly. Grey Friar followed well in hand to within a quarter of a mile from home, where he swerved outside the flag, losing the race, which was otherwise his. This was a well ridden race. The injudicious placing of this race on the same day as the Challenge made few entries and a poor field.

2nd Race.—The United German Cup.—Value presented. For all horses. Weights as in Hai-quan-tze Cup. Winner of that race 7lb. extra. Two miles.

Mr. Grey's b. s. g. Laughing Stock	1
Mr. Corduff's b. s. g. Dangerous	2

Laughing Stock was first all the way, and won by two lengths. Time 4.28

3rd Race.—The Challenge Cup.—Value 60 guineas. For China ponies. Weight for inches. To be won in two consecutive meetings by ponies the property of the same owner. Two miles.

Mr. Florence's g. c. p. Birdlime	1
Mr. Corduff's g. c. p. Sir Michael	2
Mr. Jackson's g. c. p. Grand Stand	3
Mr. Florence's g. c. p. Magic	4
Mr. Martin's g. c. p. Query	0
Mr. Corduff's g. c. p. Dismay	0

Sir Michael and Birdlime went away some lengths in front, Grand Stand, Magic, and Dismay keeping together, and this order was maintained for a mile, when Dismay was beaten. The race lay between the two leading ponies, who came up the stretch neck and neck. About a hundred yards from home Birdlime drew a-head, and won by two lengths; Grand Stand taking the third place from Magic by half a length. Time 5.11.

4th Race.—The Mantchow Stakes.—Value 50 taels. For China ponies. Weight for inches. Winners at this meeting 7 lb. extra. Three-quarters of a mile.

Mr. Florence's g. c. p. Quicklime	1
Mr. Grueler's br. c. p. Doxology	2
Mr. Wadman's s. c. p. Enamel	3
Mr. Martin's y. c. p. Maskee	0
Mr. Waverley's g. c. p. Simpcox	0
Mr. Scammony's g. c. p. Cui-bono	0

The first part of this race was between Enamel and Quicklime. Within the distance Doxology came up and passed Enamel, but could not reach Quicklime, who won by two or three lengths. Time 1.46.

5th Race.—The Kathay Cup.—Value 100 taels. For all horses. Weights as in "Hai-quan-tze Cup." Winner of St. Leger 7 lbs. extra. One mile and a quarter.

Mr. Grey's b. s. g. v. "Laughing Stock"	w.o.

6th Race.—The Peking Cup.—Value 75 taels. For China ponies. Weight for inches. Winner of Challenge Cup or Maiden Plate 5 lbs. extra, or of both, 7 lbs. extra. One mile and a quarter.

Mr. Corduff's g. c. p. Sir Michael	1
Mr. Florence's g. c. p. Birdlime	2
Mr. Florence's g. c. p. Magic	3
Mr. Waverley's s. c. p. Hippogriff	0
Mr. Martin's d. c. p. Banting	0
Mr. Martin's g. c. p. Query	0
Mr. Grueler's b. c. p. Blackmail	0

All went away on even terms, and kept together for half a mile, when Magic took a decided lead. In the straight he was joined by Sir Michael and Birdlime, and the three ran on together till within a few yards from home, when Sir Michael drew ahead and won cleverly by half a length.

7th Race.—The Tien-tsin St. Leger.—Value 100 taels. For all horses. Weights as in Hai-quan-tze Cup. Winner of that race 7 lbs. extra. One mile.

Mr. Grey's b. s. h. v. Basilisk	w.o.

THIRD DAY.
Saturday, 8th October.

1st Race.—The Amoor Cup.—Value 80 taels. For China ponies. Weight for inches. No penalties. Two miles and a half.

Mr. Florence's g. c. p. Magic	w.o.

Digitized by Google

2nd Race.—The Great Australian Cup.—Value 200 taels. For all horses. Weights as before. Three miles.

Mr. Grey's b. s. g. Laughing Stock	1
Mr. Grey's b. s. h. Spartacus	2
Mr. Corduff's b. s. g. Dangerous	0

At the word Laughing Stock (who was ten lengths in front) went away. Dangerous—brought to the post to make a start—pulled up. Spartacus joined his stable companion, and the two cantered over the course.

3rd Race.—The Hard Lines Cup.—Value 50 taels. Presented. For China ponies. Winners at former meetings excluded. Weight for inches. One mile and a quarter.

Mr. Corduff's g. c. p. Sir Michael	1
Mr. Florence's g. c. p. Quicklime	2
Mr. Martin's d. c. p. Maskee..	0
Mr. Martin's g. c. p. Query	0
Mr. Waverley's g. c. p. Simpcox	0

All well together to the straight, when Sir Michael and Quicklime left the rest—the former winning by three lengths.

4th Race.—The Consolation Stakes.—Value taels —. Weight for inches. For all beaten ponies. One mile.

Mr. Grueler's b. c. p. Doxology	1
Mr. Waverley's s. c. p. Hippogriff	2
Mr. Martin's d. c. p. Banting	3
Mr. Wadman's s. c. p. Enamel	0
Mr. Hagelstange's g. c. p. Challenger	0
Mr. Ainslie's c. c. p. Marlbrook	0

All got away (Challenger with a slight lead), and kept together till near the distance, when Doxology passed them, and won cleverly by two lengths. Marlbrook weighed for this race, and came on to the course, but the starter did not see him in time. This was unfortunate, as he was looked upon as a likely winner.

SHANGHAI.

The English Mail of the 26th August arrived out on the 10th October. The dates are down to the 20th. Business appears to be more active with the cool weather. In reference to the fires noticed in our last, the Municipal Council had authorised $100 to be distributed amongst the police, and $50 to the sailor of the *Coquette*. The secretary stated that Sergeant John Eagan had been selected by the superintendent to proceed to Kiukiang, for the purpose of being employed as sergeant of police under the orders of the Municipal Council at that port. The Engineer's report brought to notice several encroachments on the thoroughfare.

The new police cells at the Hong-que station were approaching completion, and one would be ready for occupation on the 17th.

It had been necessary to let the incomplete portion of the Honan road sewer to Zie-Kie, at double the former contract price, this increase being caused by the influence of the late contractor, who had circulated reports magnifying the difficulties of the work ; as, however, there was but a short length wanting, the excess on that portion would make but a slight difference in the total cost.

From the *Friend of China* we see that Messrs. Nicholson and Boyd's workmen are busily engaged at Pootung in putting together no less than three iron hulls, each for Chinese to move about in the cotton districts. We need not say that they are not large vessels, and for the matter of size might have been brought out whole, on a ship's deck, as was a very nice little boat by the *Anglo Saxon* the other day, built by Lewis and Stockwell, Blackwall, to the order of Mr. Henry Evans, of the firm of Evans and Co. the Bund, Honque, and christened after his domestic hearth, the *Donnington*. This compact little craft, with engines of nominally ten-horse power, but working up to fifty, made by the celebrated Bolton and Watt —the oldest machine factory firm in England — made her trial trip, to the intense satisfaction of some half-a-dozen experienced steamship travellers, invited for the occasion. A more comfortable little craft could not be manufactured, it being possible even to write at a table in the saloon, so little motion has she when under weigh. Her speed, against tide, was over twelve miles an hour, and with the current she flies. Her length over all is fifty-two feet; breadth of beam, nine feet; height of cabin, a room in which a comfortable bed may be made on the top of some thirty bales of silk, if she were so laden, nearly six feet. With a vessel like this it would be possible to do a run to Soochow and back in a day, and still have time to pay a visit to the manufactory of Macartney's pills.

The performances at the Lyceum Theatre keep up the reputation which was gained on the first night of the appearance of Mr. Lewis's company. *The Quiet Family* and *Our Nelly* were played to a well-filled house, and the artistes did ample justice to their respective parts.

Some time has now elapsed since we, *North China Herald*, have had occasion to direct attention to any eccentricity on the part of the French police; but we regret now again to be obliged to remark unfavourably on the conduct of one of their number. On Friday a Chinaman came down from Soochow to see some friends who were living at Shanghai; but being new to the place, wandered about all day without being able to discover their residence. Being poor and disinclined to incur the expense of a lodging, he went on searching till midnight, when his wanderings were stopped by the energetic action of an *agent de la sureté publique*, who valiantly stabbed him in the back as he was running away from the dreaded "foreign devil." The policeman, seeing a Chinaman abroad at a late hour, naturally made towards him, suspecting him to be after no good, and equally natural the Chinaman, unaccustomed to foreigners and to Shanghai Municipal regulations, ran off. The suspicions of the policeman were naturally increased by this conduct, and he would have been fully justified in arresting the man on suspicion. But what excuse he can allege for stabbing an unarmed man as he was running away, when he had no certainty of his guilt, it is difficult to conceive. His brutality, however, did not end here; indeed, the subsequent part of the story adds to the wantonness of the outrage. It would have seemed natural that, after having succeeded, by so very unnecessary a display of energy, in checking the flight of the object of his suspicion, he would at once have sought assistance, and caused him to be removed either to the hospital or the police-station. But such treatment would have been too good for a Chinaman. Having disabled his victim, he allowed him to remain bleeding on the ground until the morning, when some neighbours laid him on a little straw under a shed.

The minutes of the last meeting of the Municipal Coucinl contained the announcement that the Taotai has refused his assent to the imposition of a tax of 24 per cent. on brothels, and has thereby deprived the Council of at least 5,000 taels of the increased revenue which had been anticipated during the present year. The superior morality of celestial legislature ignores such institutions, and dares not afford countenance to vice by recognising the imposition of a check on its extension. But is the assent of the Chinese authorities absolutely necessary to the imposition of a tax on Chinese living in the foreign settlement? Sir Frederick Bruce has certainly laid down the principle that the Chinese have a right to tax their own subjects on their own territory. But he has not said, publicly at least, that the Municipal Council would be wrong in levying taxes which had not received the sanction of the local authorities.

The *North China Daily News*, of the 20th October, publishes the report of Mr. John Clark, engineer, on the shore line of the foreign settlements.

A meeting of the Asiatic Society was held on the 12th October. The following gentlemen were proposed by Sir Harry Parkes, and seconded by Doctor Henderson: G. F. Seward, Esq., U. S. Consul General; M. le Baron Von Radowitz, H. P. M. Consul General; Theodore Probst, Esq., H. P. M. Vice Consul; E. Schmidt, Esq., Chairman of the French Municipal Council; R. W. Little, Esq., of Kiukiang, and Theophilus Sampson, Esq., of Canton.

The routine business having been closed, the paper for the evening, entitled "First Impressions of Tien-Tsin," by E. C. Bowra, Esq., was read by Mr. C. T. Jones, in Mr. Bowra's absence. A lively sketch of the appearance of Tien-Tsin, and of the manners and customs of the natives, was given, and the writer's "Impressions," favourable and the reverse, were very fully dilated upon. At the close of the paper the thanks of the meeting were voted to Mr. Bowra for his interesting and amusing communication.

Some of the state dresses recently presented by the Emperor to Colonel Gordon, R. E., were exhibited to the Society, by Colonel Gordon's permission, as favourable specimens of national official costume. The famous yellow jacket, which is one of the most highly prized Chinese decorations, a set of official caps, and ornaments in jade stone and rich embroidery, attracted considerable interest.

The following case of interest to charterers had been decided in the Consular Court:—

Mr. Lawrence, for the plaintiffs, the captain and owners, stated that the action was brought to recover the sum of £250, payable under the charty-party of the ship *Esperanza*, for ship's ordinary disbursements at port of discharge, from the consignees, Messrs. Dow and Co.

The ship had been chartered by Messrs. Robertson and Co., of London, and re-chartered to a Mr. Wilks, by whom the ship had been consigned to the defendants, who were also endorsees

Digitized by Google

of the bill of lading. Intelligence had been received of the failure of Mr. Wilks, and the master, of course, looked to Messrs. Dow and Co. for payment, as consignees of ship and cargo. The defendants disputed their liability, on the ground that the sum claimed was a portion of the freight mentioned in the charter-party, and was payable by the charterers, Messrs. Robertson and Co. He (Mr. L.) should contend that whatsoever decision the court might arrive at with respect to the balance of unpaid freight, which was the subject of another action, that the defendants were clearly liable for ship's disbursements which were payable in Shanghai, and that, as endorsees of the bill of lading, they must accept the responsibilities thereof, at all events so far as payments at the port of discharge were concerned.

F. Muscell, captain of the *Esperanza*, said :—I received 560 tons of coal on board my ship at Sunderland. I arrived at Shanghai on September 20th. I received notice of the failure of Mr. Wilks from my owners, and from Messrs. Robertson and Co. (Charter-party handed in. The question was whether under the charter-party Messrs. Dow and Co. were liable to pay the £250.) I was ordered by Messrs. Robertson and Co. not to deliver the coals. Consequently I refused to deliver them until an understanding as to the freight should be arrived at. I considered myself entitled to the £250, both from the terms of the bills of lading and of the charter-party.

Mr. Myburgh, on behalf of the defendants, called

T. S. Borradaile: I act for Messrs. Dow and Co. I received this bill of lading some time ago of a cargo of coal by the *Esperanza*. It was endorsed by Robertson and Co. We received it from Mr. Wilks. We have advanced money on it to the extent of 2,083.3. taels. We refuse to pay the £250 on disbursements on the ground that we are not liable by the charter-party. I don't think we are liable under the bill of lading or the charter-party to pay any freight at all.

JUDGMENT.

It appears that Messrs. Robertson and Co. re-chartered the ship and sold the coals to John Wilks, and that he consigned the ship and coals to the defendants under advances.

The defendants, on their part, prove that they hold the bill of lading in question for value to the amount of 2,083 taels, advanced by them to John Wilks on account of these coals, which amount is probably about half of their value; and the defendants contend that they cannot be held liable to pay disbursements on account of the ship, as said disbursements could only be paid as part of the freight, and the conditions of the bill of lading incorporate those of the charter-party, which expressly provide that all freight is to be paid in London by the charterers of the ship, according to the special agreement set forth in the charter-party.

The Court has to apply in this case the law as laid down in Abbott, that where there is a clear original contract under a charter-party, for the payment of freight, "and the endorsees of a bill of lading do not stipulate at the time of receiving the goods to pay the freight, as the law will not raise an implied promise from the mere receipt of the goods, where there is such an express agreement between the owner and charterer, an endorsee, under such circumstances, is not liable for freight." (10th Ed. p. 321). The Court also has the advantage of being guided by a recent decision given in the Supreme Court of Hong Kong, in a similar case to the present one (Mulliken *v.* the P. and O. Company), in which the Acting Chief Justice is reported to have declared the above doctrine to be undisputed, and his lordship further held that the first section of the Bills of Lading Act (10 and 19 Vic. c. 111), instead of transferring the liability to the payment of freight with the cargo, simply transfers the contract in the bill of lading, whatever that may be. In that case, as in the present one, the contract in the bill of lading exempts the holders from payment of freight, and makes it payable by the charterers. The Court, therefore, holds that the defendants are not liable to meet this claim for ship's disbursements, which is only another term for advances on account of freight, and the Court therefore gives judgment for the defendants, with costs.

We (*The North China Daily News*) have been favoured with a memorandum relative to the Kin-toan beacon, which, as our readers are aware, is situated about twenty miles below Wusung, on the right bank of the Yang-tsze. This beacon, solidly constructed of the most durable materials, was built in the year 1855, under the supervision of the late Inspector General of Customs, Mr. Lay. At the time of its erection it was on the edge of the river, and every tide surrounded it with water. It is now, however, about twelve hundred yards from low water mark, and its great distance in shore of course militates against its usefulness. No better proof of the quickness with which new land is formed in the muddy rivers of China could be afforded than by this extraordinary deposit of mud on the south bank of the Yang-tsze. The beacon, which has for some time been gradually falling out of repair, will within a few days be restored to its former state. The river face will be re-stained in alternate red and white squares, and will thus be rendered more conspicuous than it is at present. It is also in contemplation to place a light on its summit, which will transform the beacon by day into a lighthouse at night; and a second light in such a position on the river face that when opened by a ship coming up or going down it will serve as a danger signal. The rapid extension of the bank has rendered this latter precaution necessary. Some of our readers have doubtless visited the beacon, but to those who have not, a short description will not prove uninteresting. Situated, as we have said, about half-way between Wusung and the mouth of the Yang-tsze, it forms a very convenient shooting-box, and we can, from personal experience, vouch for the presence of pheasant and wild duck in respectable numbers in its vicinity. Built in six stories, and resembling in its outward formation the chimney of a glass manufactory, it would afford shelter to a large party of sportsmen out for a week's shooting. The upper stories are in excellent preservation, and only want a slight refitting in the matter of windows, &c., to render them as comfortable as they need be. Starting into the country, and walking for some five miles through what, but for the prevailing flatness, would be an extremely pretty landscape, we come on a succession of small snug farmsteads, and a few collections of houses, which we can hardly dignify with the name of villages, and whose only claim to the name lies in the presence in each of a tea-shop or two, a small joss-house, and a public well.

Here may be seen the Chinese as they are over the greater portion of the face of the country, and as they would universally be but for the mixed influence of foreigners. They are quiet and inoffensive, ready to enter into conversation, readier still to laugh good humouredly at the foreign dress, the foreign tongue, and especially at foreign Chinese. They are hospitable to the full extent of their means, and the small children tumble over one another in their anxiety to bring fire for the foreigners' cigars, while the old lady or old gentleman is pressing the red haired one to swallow a cup of execrable tea. There we see no foreign tools—the hammers and axes, the saws and chisels which for aught we know may have been in use before the flood, are there in all their pure and primitive simplicity. No foreign cloth forms either the substratum of the villagers' clothes, or the secondary or tertiary formation of patches. Native manufactures are, per force, exclusively patronised, and, as a rule, from the silk button on the top of the cap to the thick-soled shoes which adorn all alike, foreign looms have had nothing to do with supplying the materials for clothing. No long ells of T-cloths, no camlets or lastings, contribute to make up the outward man. Unaided by foreign science, uninstructed in foreign lore, the inhabitants of these little inland hamlets live almost as isolated from the external world as though they were plunged into the wilds of Siberia, or lost in the plains of Thibet.

Although within some thirty or forty miles of our settlements, they rarely see a foreigner, and, fortunately for them, their poverty preserves them from the raids of marauding rowdies. A trip to these villages will well repay the visitor. He will find himself surrounded by Chinese life in its simple and most unadulterated form, he will witness the traces of the oldest civilisation in the world, and he will learn more of the true Chinese character in one day than he could gain in the model settlement by years of intercourse with "romancing" compradores and the other semi-Europeanised natives who, for the most part, make up the circle of a foreigner's Chinese acquaintance.

Besides all this, a visit to the Beacon and its neighbourhood will furnish some valuable information as to the state of the river and the appearance of its rapidly increasing banks. It will also rub off the dust of Shanghai life, and will probably result in a respectably filled bag.

The recent outrage on four foreigners near Soochow has been fully inquired into by Baron de Radowitz and Messrs. Alabaster and Probst, who set out for that purpose shortly after its occurrence was made known in Shanghai. The result of the investigation has only confirmed the facts of the case as we have already stated them; and a semi-official account, which appears in the *North China Herald*, concludes with the following plain statements :—

From these facts, which were all elicited on the spot, it follows :—

1. That the foreigners gave the first cause for all that befel them, by their own misconduct in the village of Machuang; and their sufferings from the cruel treatment they underwent can, consequently, only be looked upon as a too severe, but not undeserved, punishment for their guilt.

2. That (and the responsibility for this guilt is in no way lessened by the measure of the guilt of the Europeans) a continued flat refusal of the duties of the Chinese authorities is proved, in the most direct contravention of all treaty stipulations bearing upon this point, and directly contradictory to the assurances recently given to European representatives of Treaty Powers by the highest Chinese authorities, for which refusal they will have to bear all the consequences.

It will remain for the British and Prussian representatives to settle this matter with the Chinese Government, but there is no doubt that this expedition will be looked upon by the authorities in our neighbourhood as a proof that the foreign authorities here will spare no trouble to arrive at the true facts of such cases, as this is the only way to form an unvarnished and just judgment on the same.

The steamer *Far East* was to leave for London on the 21st.

HANKOW.

A correspondent from this port gives an account of a fire on the 12th Oct. The fire-engines of two steamers are mentioned, but none of the settlement. Surely the residents of Hankow

Digitized by Google

have not neglected to supply themselves with engines, while there are several lying at Shanghai for sale.

At about half-past three o'clock in the afternoon smoke was noticed breaking out from a Chinese house, and the conflagration spread so rapidly that at midnight an area of about three miles in circumference was in flames. The foreign settlement was not injured; but many houses owned by foreigners were totally destroyed. Messrs. Siemssen and Co.'s, Wilkinson and Co.'s, and Dr. Falconer's houses were burned to the ground. Messrs. Smith, Kennedy and Co.'s godowns and Messrs. Hagemeyer and Co.'s dwelling-house also suffered very severely. The loss of property must have been enormous, as it is estimated that at one moment there were no less than fifteen hundred houses in flames. The death of forty natives has been ascertained, and it is probable that many others fell victims. Most of the property owned by Europeans is supposed to have been insured. Our correspondent speaks highly of the services rendered by the fire-engines of the *Huquong* and *Sze-chuen*.

Another letter says:—"Hankow was the scene of a fire, such as one rarely sees in a lifetime. It commenced about a quarter of a mile from the water edge, and burnt steadily towards the river, extending, however, as it worked its way, on the right hand and the left. The houses occupied by Messrs. Wilkinson and Co., by Messrs. Siemssen and Co., and a host of others were entirely destroyed. The back portion of Smith, Kennedy and Co.'s premises was also burnt, but, fortunately for the insurance offices, all the valuable contents appear to have been saved. The crowd in the streets was perfectly awful, one could see men and women trampled under foot, and not a few lost their lives in this fire. I should say the area consumed by this fire was at least a quarter of a mile square. The destitution amongst the Chinese will, of course, be great. The fire commenced at half-past three in the afternoon, and had burnt itself out by midnight."

AMOY.

The news from this port is of an alarming kind, being to the effect that the rebels are within fifteen miles of the port. That the intelligence is so far to be relied upon we judge from the fact that the merchants have been placing their goods and treasure as fast as possible on board ship. The *Azoff* was detained for one day on her way down in order to make these shipments; and for the same purpose the *Pekin* was detained for two days on her way up. As our readers are aware, there is a large traffic in native boats for a considerable distance up the Amoy River, and this traffic has been entirely stopped in consequence of the rebels being so close at hand. The number of foreign vessels in port will, of course, be a sufficient security for the lives of foreigners on shore, should the worst come to the worst. In the meantime, those most interested in the truth or falsehood of the intelligence now conveyed show by their action that the news is quite reliable with regard to rebels or marauders being in strong force near the port.

These are most probably a force of fugitives from the north who have collected together in sufficient strength to resume the offensive, and the unprotected state of Amoy has perhaps attracted their attention. What will come of it we do not attempt to conjecture. In the meantime, the principle of protecting the treaty ports will quite justify any hostilities on our side, and when the news reaches Shanghai no time will be lost we may be sure. It will be war to the knife now, unless the rebels continue to speak softly, in hopes of getting supplies of arms and ammunition. There are some who think that the affair is a new insurrection altogether, not connected with the Taipings, but we fear this is not so. The reports are too crude for us to say anything further at present.

HONG KONG.

The Mail of the 10th of September had not arrived out up to the morning of the 26th of October, being then forty-five days out.

The steamer *Azoff*, from Foochow to the 16th, Amoy to the 18th, and Swatow to the 19th of October, had arrived at Hong Kong. During her passage down she had fine weather. Amoy was in a state of great consternation, and had been for some days when the *Azoff* left, as the rebels had come down, and were fighting within fifteen miles from the town. H.M.S. *Swallow* and *Dove* were lying, with steam up, ready for any emergency. No vessels were allowed to leave the harbour; and most of them had been chartered by native or foreign residents, and valuables placed on board of them. H.M.S. *Adventure*, which left for Shanghai, will, it is understood, call at Amoy to see how affairs are looking there, and render any additional assistance, if necessary, in conjunction with the other vessels stationed at that port. A further notice will be found under Amoy.

A short time ago we (*China Mail*) called attention in our columns to a proceeding undertaken by some of the old members of the London Scottish Volunteers, with the view of getting up a cup to be shot for by that distinguished corps. The name selected was "The China Cup." We expressed at the time our cordial approval of the measure, and predicted that the example would probably be followed by volunteers in England, thus leading to a very pleasant interchange of civilities. The example has already been followed, we understand, nearer our own doors. It has just come to our knowledge that the volunteer corps in Hong Kong and Shanghai contemplate getting up a prize, open to all the volunteers of Great Britain; and as this wears more the aspect of a national cup, the promoters of the London Scottish Cup have waived their claim to the title of "The China Cup," choosing in place of it, and more happily, we think, the name of "The Celestial Cup." The former name would almost imply the necessity of accompanying the gift with a saucer. On the above subject we have received the following letter:—

To the Editor of the *London and China Telegraph.*

SIR,—I observe in a recent Hong Kong newspaper that $450 had been subscribed in that city towards the "China Cup" to be shot for at the next Wimbledon Meeting, by the members of the London Scottish Rifles.

Perhaps some of our Hong Kong friends can inform me, through your valuable journal, *why* the London Scottish are to have the exclusive right of competing for this prize—all the prizes presented here are open to all the rifle corps of Great Britain, and no distinction whatever is made.

I myself am a Scotchman, and have not a word to say against Lord Elcho's fine corps; but, in order to keep up the good feeling which ought to exist amongst Volunteers, I do not think the London Scottish should be alone privileged to shoot for the "China Cup" and all the remaining Volunteers of Great Britain to be excluded.

I am, Sir, your obedient servant,

London, Dec. 3, 1864. A VOLUNTEER OFFICER.

The following is from the *Daily Press*:—

"The Spanish laws in Cuba touching the coolie trade are partly strict and well framed, much to the chagrin of the slave dealers, who are continually at loggerheads with the various officials. The secret of this must be that these large folks squeeze as many bribes as they can, and quarrel when they are not satisfied. After the eight years' service specified in the agreement, all coolies landed here after 1860 are not allowed by the Spanish authorities to stay in Cuba without a master. Otherwise they must leave the island at once. Fancy how can a poor coolie find his way back to China, with only $4 a month, and this invariably expended in little comforts, of which there are none given to them whilst employed. There is no other alternative for him but to die a slave. The Government then see them hired for different periods at $9 per month, one-third of this money is kept in a special fund for hospital, &c., in case of need. I understand there are about 14,000 Chinamen thus under the protection of the Government, but I firmly believe it is nothing else but an official speculation. Some of the coolies they say are well off by mere chance or economy; but I doubt it, and if true, there are but few, very few indeed.

"When the six vessels which left Macao last season laid in the port of Havana, people were saying that many Chinese were willing to pay even $100 each to return to China. The *Luisita* and others immediately offered to take 300 coolies for $80 each, fed by the ship, but the report turned out to be false; and I am sure it was only a *canard* cleverly circulated by the coolie dealers for their own ends. On their arrival in Havana the coolies are all sent to good airy barracoons in the country, where they are fed, fattened, and sold at $350 to $600 each. That is to say, when a planter goes there, they are mustered out and chosen like pigs, and on payment of the money their contracts are transferred on the spot. I witnesssd this myself two or three times when I went on purpose to Ferran and Dupierrie's barracoon in the place called Cerro. Once sold they are made to work like horses. The planters used to beat them severely in former times, and no wonder that many of them ran away and committed suicide."

The crew of the British barque *Truro* (of London) arrived in Takow on 8th Oct. from a place called Lukong, to the northward of Tai-wan-foo. The vessel run ashore at midnight of 18th Sept., and would have got off at high water had not the natives come down and taken the ship. The crew arrived in a miserable plight, having been stripped of their clothes; they were wearing gunny bags, twenty in number, including the captain. The vessel nearly all belonged

Digitized by Google

to the captain, and was not insured. She was from Shanghai, bound to Manila in ballast. Ten of the crew were to leave Takow for Amoy in the *Vindex*, and the rest for Swatow per *Racer*. The crew were taken on board the Customs' hulk at Takow; one was badly wounded in the hand by the bursting of a pistol.

NETHERLANDS INDIA.

JAVA.

The London mails of the 26th August arrived out on the 2nd October.

Mr. F. L. Anthing, President of the Court of Justice at Batavia, has been allowed two years' leave of absence, on account of ill-health. Mr. A. Volz has been admitted Consul for Baden-Baden at Batavia.

The *Javasche Courant* gives an elaborate report on the trade and navigation of Java and Madura during 1863. It states that the value of the goods imported during that year amounted to 64,273,247f., against 64,805,341f. during 1862; giving a difference of 532,094f. in favour of that year. That of the exports amounted to 109,162,388f., or 1,354,511f. less than in 1862.

The Government Sugar Sale, held on the 10th October, averaged f.17.11¼ per picul. 46,000 piculs were sold. The greatest portion was taken for Dutch account.

There has been a mutiny on board the Dutch ship *Anna Digna*. The men refused to work, and threatened the chief mate; but were arrested, and the case was before the Court.

SUMATRA.

News has been received that a meeting had been held at Padang Oelak Pandan, at which several Pasoemah pangerans and inferior chiefs and about a thousand men were present. A buffalo was killed on the occasion, and an offensive and defensive league solemnly entered into to remain opposed to the Dutch rule. Further advices state that the natives at Pasoemah were busily engaged in the manufacture of gunpowder, and that a strong fortification is being made a little above Kebon Djatti.

In the newly subdued district of Kesam an attempt had been made to repeat the ancient customs of revenge. Through the prompt intervention of the authorities two of the ringleaders were arrested and banished.

The people of Kikim, Redjang, and Lebong countries are busy with the roads and bridges. Cotton in the first-named country had suffered much by the late heavy rains. In the latter, trade with Bencoolen had been brisk. At Djambi, also, the trade with Singapore had been brisk and the people quiet. Owing to the increasing prosperity, land was rising in value.

A correspondent writes from Padang on the 27th of September:—The main feature in the month now drawing to its close is the establishment of a branch of the Java Bank at Padang, the president, Mr. Wiggers van Kerchem, having arrived by last month's steamer for that purpose, attended by Mr. Vesteegh, to whom the management is to be entrusted for the time being. The circle of its operations will be the same as in Java, as may be seen from the advertisements in the *Sumatra Courant*. The bank notes have been immediately issued and accepted by the Government offices. Discount has fallen to the Bank rate. A couple of months ago it was almost impossible to get an acceptance at the public sales department discounted even at 8 per cent.

BANDA.

The Governor of the Moluccas arrived on the 13th August and on the 16th held a meeting, which was attended by all the proprietors of spice gardens, when the Government resolution of 30th April, No. 41, abolishing the monopoly of the spices in this country, was read. The proprietors of only four estates declared themselves willing to agree to the conditions of abolition offered by the Government. After a speech made by the Governor, and some discussion on the subject, the meeting was adjourned to the 19th. On that day the greatest portion of the park proprietors handed the Governor a petition to the Governor-General praying—

1. For a free disposal of the half of the product of the spice estates of the petitioners during 1865, 1866, and 1867, under the condition to deliver the other half in the government stores without diminishing the rights and privileges on either side.

2. For an immediate execution of that part of the resolution in which a remission of the mortgages on the estates existing in favour of the Government is enacted.

The petitioners bound themselves after the expiration of the abovenamed years, namely on the 1st January, 1868, to agree unconditionally to the abolition of the monopoly. The governor promised to send in the petition to the Government, and the meeting was closed.

TERNATE.

On the 30th August, the Netherland Indian schooner *Tuino* arrived in the roads. The crew declared that they left Macassar ten months ago for Ceram-laut and Torres Straits; they had lost the greatest portion of their rigging and their anchors during the voyage, and had often been attacked by the natives on the south (?) coast of New Holland, and at last arrived at Tomboekoe, on the east coast of Celebes. The owner and master, G. J. Fabrituis, died three months ago, and the crew preserved his corpse in salt and tobacco, in order to prevent any suspicion of foul play. The whole crew, with the exception of four men, had died of *berri-berri*.

TIMOR.

On the 21st August the British surveying schooner *Beatrice*, Commander J. Hutchison, arrived in the roads of Koepang to recruit crew and take in fresh provisions. This schooner came from Adam's Bay, on the north coast of New Holland, south of Melvill Island. According to the officers of above ship a new English settlement, under the superintendence of Colonel Finniss, pensioned secretary to the Government of South Australia, was in contemplation, and the banks of the Adelaide River were considered to be the most suitable part of the country. The grounds and compounds have already been marked out, and would be disposed of by lottery.

On the same day thirteen persons arrived at Koepang who had belonged to the *Keepsake*, of North Shields, which vessel, bound from Melbourne to London, *via* Koepang, was lost off Timor (north coast of Savoe Island). Of the thirteen persons two were passengers. They were all, with the exception of one man, the carpenter, who wished to remain at Koepang, sent up to the British Consul at Batavia by the steamer *Menado*. The captain sold the wreck, inventory, and cargo by auction; they realised 2,560f.

SIAM.

The *Siam Times* of the 29th September has an exceedingly opportune article entitled "Railway to China," of which the following is the main portion:—

A correspondent whose letter appeared in our issue of the 15th instant seems to think the King of Siam is not very favourably disposed towards laying down a railway to connect his kingdom with that of China. The obstacles raised are several, as labour, expense, running it through wild independent states, &c. But these objections, when we consider the many advantages his Majesty must derive from the introduction of the railway, are of small moment, for the work once begun these difficulties will vanish.

We would, on reflection, propose the line to commence at Bangkok, and not Ayuddhia, as first suggested, and run to Sarapury, thence to Gorath (Korat), and Cambodian River, through MeKong Pass, in the Himalaya range, from whence it might join any line from Eastern to Western China, or end at some of the principal towns on the upper branches of the Yang-tsze River. This would at once bring an influx of trade into Siam, which, without a railway, can never be introduced. There is already a considerable trade from Gorath, and the towns and States north of it, to Bangkok, the mode of conveyance being by means of bullock, horse, and elephant trains, with carts on some parts of the route. In this way the raw silk is brought down from the Laos and Western Chinese territories, with copper, gums, cardamums, and other valuable products, and foreign and native goods are taken back in return. The transportation of goods on the Cambodia River, after passing up to about the latitude of Bangkok, is said to be difficult, from the strength of the rapids; and goods passing up that river to the northern regions have to be taken out of the boats, and conveyed by other means to the several places of trade. The natural route of trade for all those northern territories is from Bangkok, and this is clear from the fact that traders have for a long time adopted it.

Western China is not yet sufficiently known to say definitely what place it would be best to run it to; but, on examining the map, it will be seen that the Yangtsze River, on which such an immense foreign trade has grown up during the past few years, rises not far from the Me-Kong Pass, and as commerce is pushing itself in that direction, this road should be made to meet it. The general course of the road would be nearly due north, and would pass through some twelve or fifteen degrees of latitude. The fact that men of science, wealthy merchants, and rulers, have for several years had their attention drawn to this subject, shows that it will not be long before a railway will be constructed either from some part of Burmah or Siam to Western China.

The great forest mentioned by our correspondent, on the line of the railway, instead of being an obstacle, will doubtless be found a great advantage. Timber to a great amount must be had, and it would at once be converted into use for the rail. And besides, timber is an article in great demand, and those virgin forests, with a railway passing through them, would be a source of immense traffic and profit. This line of rail would run through large districts rich in mineral produce, iron, copper, antimony, tin, lead, and coal; and it is known that the iron and coal are of a superior quality. Here then we have materials for construction and traffic; but the iron for the rail and locomotives, with some other things, will have to come from England or America.

The expense of the rail would of course be great, and there must be a considerable loss of time in arranging preliminaries, before any work

Digitized by Google

could be commenced, and professional men must arrive from foreign parts to survey the country. But, again, his Majesty seems disinclined to meet the expense, as the engineers who were sent for to superintend the Royal Mint have all suddenly died. The expense attendant on similar casualties could easily be provided against, by effecting an insurance on their lives before they left England, the premium being kept up by those who engage them. This plan is simple enough.

The difficulty of dealing with the independent tribes which belong neither to Siam nor Cochin China must be overcome in the same manner as greater difficulties of a similar nature have been removed in other countries. A well arranged diplomacy has removed far more, and greater obstacles than this. If these tribes were of a very savage hostile nature, we should doubtless have heard long since of ravages made on adjoining territories, and thereby lead to their subjugation; but as such is not the case, there is every reason to suppose they would be favourably inclined to treat with any great power.

It is impossible at this stage to make any estimate for native labour, &c., though we believe it would not be higher than in Bengal, and the expenses of procuring locomotives, &c., from England would be about the same.

Tribute bearers had arrived from Tringanu and Kalantan, and the Rajahs of those States solicited a continuation of the favour and protection they had so long enjoyed at the hands of his Siamese Majesty. The tribute from Tringanu consisted, besides 2 trees of gold and silver, of 2 sarongs, woven with gold thread, 4 catties of pemsem camphor, 4 pieces of white flowered cloth, 24 pieces of white cloth of 50 cubits each, 4 pieces of chepo cloth, 200 bundles of Pakhu rattan, instead of sago, 400 coils of stone rattan, 200 bundles of Pakhu rattan, as usual; 100 large T'oi leaf mats, 400 clubs, 400 pearl shells. The Rajah of Kalantan thus describes his gold and silver trees:—"The gold tree is six cubits high, having eight rows of branches, 638 flowers, 980 leaves, eight fixtures to sustain the branches, two pairs of snakes, four pairs of birds. At the summit of the tree is a large triple flower. The silver tree is, in height, branches, branch holders, flowers, snakes and birds, a duplicate of the gold tree." The extraordinary workmanship exhibited in these trees is stated to be well worthy of inspection.

Captain Baker, of the Hamburg barque *Warsuta*, was fined $40 for severely beating the Ghaut Serang, who was unable to procure a native crew for his ship. On arriving at the Bar the old crew refused duty, and were accordingly discharged without wages. Other men could not be engaged for some time, as they feared they would be treated in a like manner.

Mr. Cisco, the steward of the Oriental Hotel, expired on the night of the 21st September, from a wound received by the accidental exploding of a loaded revolver which had been incautiously left on the counter of the bar-room, and on being taken up by a comprador, who had called there on business, it went off, and the ball, no larger than a buck shot, after striking the counter, lodged in the unfortunate man's abdomen. The dying man stated in the presence of both British and American Consuls the cause of his death was quite unintentional.

The *Siam Times* complains grievously of the want of police protection at Bangkok, and calls for the enforcement of the provisions of the various treaties since 1855, by which "all foreign subjects coming to Siam are to receive from the Siamese Government full protection and assistance to enable them to reside in Siam in all security."

We take the following from Messrs. Markwald and Co.'s circular, dated Bangkok, 8th October:—

Since date of our last printed report of the 16th August, communication between this and Singapore has been very irregular, owing to the steamer *Chow Phya* having broken her shaft; the same is now replaced, and said steamer is beginning to run again as usual. Latest dates from Europe were to 26th August. Shortly after date of our last several native traders commenced buying white sugar for the Bombay market, and prices advanced suddenly from ½ to ¾ tical per picul. Supplies were chiefly of high numbers, of the lower grades only small lots were offered. The season is nearly over, and after this month we cannot expect fresh arrivals until January next, when the new crop begins. Brown sugar is likewise scarce, and none but inferior is brought to market.

COCHIN CHINA.

SAIGON.

The following notices to mariners are contained in the last *Saigon Courier* received at Singapore:—

"In the last voyage that has been made from Saigon to Bangkok, the steamer *L'Allom-Prah* has seen a rock not marked on the charts, and which according to observation is situated in latitude north 12 dgs. 25 mins. 30 secs., and east of *Paris* 99 dgs. 19 mins.

"Navigators are to take notice, that the buoys which mark the coral bank situated in the Donnai, twenty miles south of Saigon, have been raised. They are replaced by beacons established on the banks of the river, in a manner to indicate well the course to avoid the top of the bank, on which large vessels may touch at low water. One buoy alone has been conserved at the centre of the bank."

MALACCA STRAITS.

SINGAPORE.

Dates hence are to the 3rd November. The London mail of the 26th September had not come to hand.

The *Straits Times*, in announcing the fact that "the transfer of Government to the Colonial-office had been finally decided not to take place," remarks: "Well, so, it would seem, has terminated a most persevering agitation by the community here—a community ordinarily little disposed to disturb itself about anything else than the rise and fall in piece goods, and the prices of Straits produce; and we may conclude with tolerable certainty that years will pass away before any action half so energetic and continuous will be commenced in the same matter again. Our transfer to the Colonial-office, when it does take place now, will, in all probability, be the result not of any effort made here, nor the consequence of our wants and necessities,—it will most likely be decreed to us by the Imperial Government itself, and in the furtherance of purely Imperial purposes: When the French have grown in military strength at Saigon, and when, perhaps, Russia or some other European Power has obtained the nucleus of empire in the East, and our own ascendancy and influence is threatened—or should the work of the last seven years in China and Japan have to be done over again,—then, perhaps, England will feel the difficulty of governing her chief *point d'appui* in the Far East by the present circuitous system. Yes, the commercial and general local interests of Singapore have been unable to push their way, and we must only wait until Imperial necessity comes into accord with them."

A court of inquiry, consisting of Mr. Willans, the police magistrate, and Mr. Kirby, the officiating master attendant, had sat to inquire into the circumstances attending the loss of the *Seahorse*, of Liverpool, R. F. Carty, master, and had reported that they "did not consider it a case of culpable negligence deserving of punishment," and that they were "of opinion the loss of the vessel was owing entirely to the want of a proper chart of Gaspar Straits, the vessel having been despatched from Liverpool insufficiently supplied with charts." It appears the ship struck on a coral rock, said to be about 2 miles E., ½ N., from Jelaka Island, and in forty-five minutes had twelve feet water in her hold. The tide fell, and the vessel became firmly fixed on the rock, which, from the report of divers sent down by the Dutch Resident of Biliton, appears to be a small pinnacle with deep water all round. Any attempt to save the vessel was useless, and she became a total wreck.

The prahus from the eastward of the Archipelago have this year come in greater numbers than for several years back, so that it does not appear that the efforts of the Dutch to deflect this portion of our trade to their own ports have been very successful. However, this forms but a small item now in our year's commerce, and the condition of affairs at home has tended very much to depress business at the present moment. It appears that produce orders are greatly curtailed.

The Governor has been pleased to make the following honorary appointments:—T. Scott, Esq., Justice of the Peace, to be a police magistrate for the station of Singapore. Mr. A. Cateaux has been appointed Consul for Belgium at Singapore. The Governor has prohibited any interments taking place in the Government burial-ground at this station after the 31st of December next. The Governor has granted Mr. C. B. Plunket, Police Magistrate and Commissioner of the Court of Requests, Prince of Wales's Island, leave of absence for one year, to visit Europe, on medical certificate. Captain W. S. Mitchell, Officiating Assistant Resident Councillor, to be Police Magistrate and Commissioner of the Court of Requests of Prince of Wales's Island, during the absence of Mr. C. B. Plunket, or until further orders.

On Cochin-China, and on our article on the subject, the *Straits Times* had the following, which we marked for insertion some mails since:—

THE LONDON AND CHINA EXPRESS.

PUBLISHED on the departure of the Mails *via* Marseilles on the 10th, 17th, and 26th, contains a Summary of European, American, and General News; Commercial and Shipping Reports, and Special notices of Trade with the FAR EAST.

Subscription 54s. per annum, including Postage. Export Supplement 12s. extra.

The London & China Telegraph.

LONDON, MONDAY, DEC. 5, 1864.

THE GOOD EFFECTS OF CHOSHIU'S PUNISHMENT.

THE advices received from Japan by the present mail are but meagre, and, as might have reasonably been expected, supply no details of the results gained by the diplomatic action that must necessarily have followed the punishment inflicted on CHOSHIU. The telegrams of intelligence from Japan that appeared in the Morning Papers of the 3rd are admitted to have been "very indistinctly transmitted, rendering the reading "of several passages uncertain." One paragraph of the news from Japan was thus given:—"Prince Nangato is said to "decline [telegraphed *tirne*] payment of the indemnity." As we are not told in what language the telegram was transmitted, we are unable to exercise a judgment as to what the word *tirne* can be intended to imply. But as the telegram was first published in the Evening Editions of the 2nd, the word "time" was given instead of the other unintelligible monosyllable. Every one will at once see that in a written hand the two words might be scarcely distinguishable one from the other by the eye. The sense alone would tell an Englishman what was meant; but if the telegram was manipulated by a foreigner such a blunder might easily occur. The true reading, therefore, we have little doubt is, that "Nangato has asked "*time* for the payment of the indemnity." The tone of our last advices clearly showed that he was thoroughly humbled. His boasted batteries had, as we knew they would, proved utterly ineffectual against the shell and science of the allied fleets. And as if to furnish another striking illustration of the classical proverb that "whom the Gods intend to destroy they first deprive of his wits," NANGATO turns rebel to his own Sovereigns at this very juncture, and marches off to the attack of Kioto that large army which might have rendered the embarkation of his seventy-two cannon a very difficult or impossible task. It will be seen that the *North China Herald* adopts the opinion put forth from the first in our columns, that the accusations made by this traitorous Daimio against the TYCOON will demand the strongest corroborative evidence. The TYCOON will certainly have been informed of the style of defence put forward by his vassal, and we shall learn probably by the next mail how the assertion of his complicity in the violation of a solemn treaty has been rebutted. The great fact brought by our present advices is that the late warlike demonstration in the Straits of Simonoseki has produced all the good effect that could have been hoped for. The Inland Sea is really and practically opened to the traffic of the individual merchant. The steamer *Chusan* had arrived at Shanghai from Yokohama, having taken her route through the passage so long barred. The Daimios, as we have before experienced after a similar crisis, seized immediately on the opportunity of entering into extended commercial relations with the foreigner. One of the wealthiest of them forthwith buys a steamer at an outlay of $120,000. The covert restrictions on trade so recently complained of are at once removed, and silk comes down in large quantities for shipment. Best of all, the TYCOON must have acquired the to him invaluable conviction that a close alliance with the foreigner and the utmost possible development of trade is the surest way of keeping the immense population of his Island Empire employed and contented, and of reducing his Daimios to the condition of wealthy subjects from that of nearly independent and always unruly chieftains.

MALACCA STRAITS.

(*Continued from Page* 683.)

It seems somewhat remarkable that the progress of the French in Cochin-China, which was lately brought prominently before the notice of the people in the Straits by the publication of several Siamese papers, should at the same time have been attracting a more than usual amount of attention at home. The last numbers of the *London and China Express* have contained several articles on the subject; that of the 16th July publishing a copy of the treaty, made about a year ago, with the Prince of Cambodia, and which created a considerable stir at the time. Those who have perused this treaty will be struck with its exact correspondence in almost every particular to the reports which got abroad here concerning it at the time it was made. It places the Kingdom of Cambodia beyond all doubt under the protectorate of France, and gives to the French representative who may be sent to reside at the Cambodian capital the power to veto any privileges which Cambodia may, after this, desire to extend to other European nations. The *London and China Express* claims to publish this treaty for the first time, and we are quite prepared to admit that it does; because we know of only one copy of the treaty which found its way into non-official hands; this copy we saw in Singapore about three weeks after its original had been signed—and from the fact of its publication, combined with the style of the well-written articles which have accompanied it, we are inclined to think that the *London and China Express* has committed the conduct of this question to a gentleman with whom the people of the Straits are well acquainted indeed. Be this as it may, however, it is most desirable that the proceedings of the French in the neighbourhood of their Eastern Settlement should be well known to our Government and to the people at home. We do not advocate a niggard jealousy either of the progress of French influence or the increase of French territory in the Far East; for undoubtedly there is truth in the assertion of Admiral Grandiere, made at the late coronation of the Viceroy of Cambodia, that the "genius of their civilisation" should give the French predominant influence over the inferior native States in their immediate neighbourhood. But we are, at least, bound to protect the independence of one native State, from the borders of which the French are not very far removed; and without a perfect knowledge of the views, as well as the actual acquired rights of France in the neighbourhood, this would be difficult to do. It will be the duty of the English Government to so use its influence in Siam that, while the integrity of that kingdom is maintained, no cause of collision with France ever occurs, for in such an event the history of our own and our ally's arms teaches us what the result will be. One of the best means to avert after-collision is to have present rights and duties clearly defined and stated now; and for this reason, perhaps, the late Cambodian events are not to be regretted. The respective rights of Siam and Annam would have been a moot point and might have led to difficulties, whereas the assumption by France of first influence, however unjustifiable, will prevent any difficulty arising on this score. Siam has had taken from her a long held and legitimate foreign influence; but she has, perhaps, had secure to her thereby greater safety for her own integrity. One of the most remarkable pieces of information which the papers published by the *London and China Express* contain is that the French have given, or are about to give, back to Annam the three provinces of Gindinh, Bienhoa and Dinh-Tuong, with the exception of the citadel of Mitho, the city of Saigon, and some port in Thu-Daomot; the consideration for these cessions being the recognised protectorate of France over the whole of Lower Cochin-China. France will thus be saved the cost of an expensive government of a large territory, and be able to centre her strength and her trading energy in the few reserved commercial points; which will now become outlets for the products of the whole of Cochin-China. In point of fact, the actual power of France will be doubled, while the expense of governing will be reduced more than one-half. Nor will it be difficult for the French Government, with an undisputed protectorate over both Cambodia and Siam, to force into her hands the entire commerce of these two countries. But, on the other hand, it is impossible not to accept of this last movement somewhat in the light of an assurance that the French Empire in the East has not in view large territorial acquisitions, and, that such native States as maintain a careful and inoffensive policy may be preserved in their integrity and independence.

The *Free Press* complains of the almost total want of protection for British commerce against piracy:—For some months past several Chinese piratical junks have been carrying on operations in the China Sea, and they are known to have destroyed a ship belonging to this port and to have nearly taken a French gunboat loaded with treasure, while they have probably done a great deal of mischief which has not yet come to light. Suppose they chose to take up a position near Pedra Branca, to intercept vessels passing through that channel, have we any force here to oppose them? We are afraid the answer must be doubtful. The *Leven* is the only efficient Government vessel at present in our harbour, and however able she might be to cope with a single junk, it is no disparagement to say that she might find the issue doubtful if opposed by three or four heavily armed Chinese pirates. This seems to have been the case with the French gunboat, which was obliged to retreat from three junks. It is a pity that we should be left from time to time in this comparatively helpless state. Singapore is a place at which intelligence of the presence of pirates in the neighbouring seas is very quickly received, and it would only be prudent that there should always be stationed here a sufficient force to enable pursuit to be given at once. This would save the annoyance of knowing that the trade was unprotected, or of being obliged to send out useless vessels of the *Hooghly* or *Pluto* class to be set at defiance by the pirates.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

DALZIEL—At Hong Kong, on the 16th Oct., the wife of W. R. Dalziel, Esq., P. and O. Co.'s office, of a son.

GYE—On the 17th Oct, at Shanghai, the wife of James Gye, Esq., Shanghai Medical Hall, of a son.

MELBOURN—On the 23rd Oct., at Batavia, the wife of George Melbourn, Esq., of a daughter.

MARRIAGES.

MELLISH—WATERWORTH.—At St. John's Cathedral, Hong Kong, on the 22nd Oct., by the Rev. Dr. Irwin, Edward Mellish, of the Bank of Hindustan, China, and Japan, to Sarah, eldest surviving daughter of John Waterworth, of Cheltenham, Gloucestershire.

DEATHS.

BROWN—On the 11th Oct., at Shanghai, drowned, alongside the steamer Formosa, Mr. Brown, third engineer of that vessel.

CISCO—On the 21st Sept., Edward L. Cisco, steward of the Oriental Hotel, Bangkok, accidentally shot, aged 34; a native of Baltimore, America.

ODELL—On the 30th Aug., of consumption, on board the Eastward Ho! in the Java Sea, near the island called Two Brothers, Mr. John F. Odell, of Williamsburg, New York, U.S. America, aged about 28 years. Mr. Odell has been a resident of Bangkok more than three years—a superintendent of the printing office of the American Missionary Association nearly two years—and hoped to continue here and serve his Divine Lord and Master a series of years longer as an assistant missionary, but failing health compelled him to abandon all hope of remaining longer in this climate.

TAYLOR—Lost overboard at sea, from the American steamer Monitor, on the night of 24th Sept., John W. Taylor, 1st officer of Monitor.

WHITTALL—On board the steamer Hydaspe, whilst on her passage from Shanghai to Hong Kong, at 1 A.M. on 23rd Oct., C. Whittall, Esq.

WOODWARD—At Amoy, on the 1st Oct., on board the American steamer Monitor, Marcus Lincoln Woodward, aged 35 years.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—Dec. 2, at Queenstown, from Maulmain, Sarah Park; at London, from Yokohama, Natal; 1, off Mount's Bay, from Maulmain (?), Standard; 5, at Deal, from Colombo, Cleughs, Helen's Bank; from Shanghai, Wild Deer, City of Quebec; Nov. 29, off Mount's Bay, from Colombo, Braemar; Dec. 5, at Deal, from Rangoon, Wologda; Nov. 30, at Falmouth, from Rangoon, Shamrock.

DEPARTURES.—Dec. 2, from Liverpool, for Yokohama, Jane; for Hong Kong, Monsoon; for Singapore, Advance; 3, from London, for Cardiff and Hong Kong, Whinfell.

LAID ON.—At Liverpool, for Galle, Lepanto; for Singapore, Jessie Beazley.

SPOKEN.—Certia (?), Liverpool to Galle; Tamana, Clyde to Hong Kong, 14 N., 26 W., 21 days out; Valdivia, Macao to London, Oct. 17; Palestine, Ceylon to London, Nov. 18, 24 S., 34 W.

At St. Vincent, C.V., Nov. 10, from Gibraltar, H.M.S. Tamar, and sailed 11th for China.

The Admiralty have engaged freight in the Banian for the conveyance of Government stores from the River Thames to Hong Kong.

SHIPPING INTELLIGENCE.

ARRIVALS.

At SHANGHAI.—From London: Oct. 12, Tamberlane; 14, Isles of the South; 19, P. C. Munro. From Newcastle: 12, Grenadier. From Cardiff: 13, Zingra; 19, Allandale. From Shields: 13, Edith. From Newport: 16, Princess of Wales. From New York: 13, Anna, and Mercurio; 18, Apollo.

At HONG KONG.—From Swansea: Oct. 18, Decount. From Newcastle: 20, Salvia.

At SINGAPORE.—From Cardiff: Oct. 24, Woizlava. From Amsterdam: 23, Maria Adolfina.

DEPARTURES.

From SHANGHAI.—None.

From HONG KONG.—For London: Oct. 16, England.

From SINGAPORE.—For London: Oct. 26, Lieut. Oswin. For Cork: Nov. 3, Kirkonnel.

BOARD OF TRADE RETURNS.

The Board of Trade returns for the month and ten months ended the 31st October do not present that amount of increase in the principal items that characterised the earlier months of the year. There is a considerable decline in the value of exports, as compared with the same month of last year, which is chiefly to be ascribed to the falling off in the exportation of cotton yarn and cotton manufactures, though there are many other articles of minor importance which assist to swell up the general total. The total declared value of Exports for the month last past is £12,871,491, against £15,082,332 in October, 1863, and £9,846,835 in 1862; which is a decrease on the former period of £2,210,841, but an increase on the latter of £3,024,656. For the ten months of the present year the total of the Exports is £136,275,652, against £119,377,045 in 1863, and £103,519,269 in 1862; which is an increase of £16,898,607 as compared with 1863, and of £32,756,383 as contrasted with 1862. The present Returns give also the value of the principal articles of Import for the nine months ended 30th September, which is stated at £160,974,110, for the present year; £133,166,725, for 1863;

Digitized by Google

and £121,275,498, for 1862—so that the ratio of increase is much larger in the present than in last year.

The following are the results exhibited in relation to the course of trade between Great Britain and the ports and countries of the Far East :—

EXPORTS TO CHINA AND HONG KONG.

For the Month ended 31st October.

	1862.	1863.	1864.
Cotton yarn	2,224	218.020	40,000 lbs.
Cotton manufactures	1,203,746	5,624.602	2,504,781 yds.
Worsted stuffs	930,060	1,003,000	599,225 „
Woollen and worsted cloths	65,624	61,570	109,565 „
Lead	681	651	391 tons

Value for the Ten Months ended 31st October.

Cotton yarn	£183,693	£170,075	£218,660
Cotton manufactures	1,182,762	969,071	1,626,207
Worsted stuffs	327,517	523,613	786.701
Woollen and worsted cloths	208,631	268,350	260,291
Lead	159,165	256,933	145,340

The Cotton Manufactures exported to the other great centres of trade in the East with which our readers are principally interested present quantities and values as under :—

For the Month ended 31st October.

	1862.	1863.	1864.
Ceylon	781.561	2,661,282	1,068,919 yds.
Singapore	949,550	1,019,825	463,145 „
Java	1,064,115	1,873,415	957,833 „
Philippine Islands	—	1,959,891	3,126,223 „

Value for the Ten Months ended 31st October.

Ceylon	£257,719	£348,627	£371,983
Singapore	536,500	502,515	558,331
Java	455,061	299,790	484,882
Philippine Islands	252,329	317,204	546,257

Of Cotton Yarn, the export to Ceylon for the month of October was 11,416 lbs., against 75,000 lbs. in the same month of 1863, and 32,100 lbs. in 1862. The value for the ten months is £26,081 in the present year, against £53,619 last year, and £26,654 in the year preceding that. To Singapore the quantity for the month is 15,200 lbs., against 193,620 lbs. in 1863, and 24,000 lbs. in 1862. The value for the ten months of the three years is, beginning with the present, respectively £92,167, £183,274, and £93,699.

IMPORTS.

Raw Cotton still presents that wonderful development which we have had occasion to notice during the entire year. The figures are as follows :—

For the Month ended 31st October.

	1862	1863.	1864
British India	480,642	446,833	675,607 cwts.
China	8,468	2,696	37,804 „

Value for the Nine Months ended 30th September.

British India	£9,044,484	£17,358,230	£24,862,133
China	21,151	1,520,670	4,945,209

Of Sugar, the quantity imported from Java and the Philippine Islands in the month of October was all of the 3rd and 4th quality—23,487 cwt. of the former, and 3,863 cwt. of the latter. The quantities and values given in the present returns show the alteration in the import produced by the new scale of duties :—

Quantities for the Ten Months ended 31st October.

	1862.	1863.	1864.
2nd quality (equal to Brown clayed)	35,999	3,419	438 cwts.
3rd (not equal to Brown clayed)	316,783	689,334	29,328 „
3rd (equal to Brown Muscovado)	—	—	100,075 „
4th (not equal to Br. Muscovado)	—	—	80,778 „

☞ The present Returns furnish the Declared Values of the merchandise Imported into, and of the British and Irish Produce Exported from, the United Kingdom for the nine months ended the 30th September, for this and the two preceding years :—

EXPORTS.

To	1862.	1863.	1864.
Singapore and Eastern Straits	£907,906	£1,034,379	£970,756
Ceylon	430,933	654,677	627,286
Hong Kong	925,259	1,041,046	1,347,773
Netherlands India (Java, &c.)	646,377	412.541	649,055
Philippine Islands	378.262	436,312	616,739
Siam	16,831	11,958	15,129
China (exclusive of Hong Kong)	1,594,299	1,771,873	2,308,522
Cochin China, Camboja, and Tonquin	—	35,000	—
Japan	—	73,526	431,821

IMPORTS.

From	1862.	1863.	1864.
Singapore and Eastern Straits	£1,664,850	£1,137,275	£1,340,577
Ceylon	1,838,468	2,511,920	2,399,851
Hong Kong	128,805	816,729	2,366,519

Literature.

Travels in Central Asia; being an Account of a Journey from Teheran, across the Turkoman Desert on the Eastern Shore of the Caspian, to Khiva, Bokhara, and Samarcand; by ARMINIUS VAMBERY. London: John Murray, Albemarle-street.—In a preface the modest tone of which is in strong contrast to a description of his qualifications given further on in the volume, the author tells us that he was impelled from early youth by a particular inclination to linguistic science; and that to investigate into points connected with the origin of the language of Hungary, his native land, was the principal and the moving cause of his journey to the East. Under the same impulse he resided for years at Constantinople, where he became so thoroughly imbued with the language and literature as to be "transformed into a Turk—nay, into an Effendi." When, therefore, he determined on pushing his way into Central Asia, he deemed it advisable to retain this character, and to pass as an Oriental. He went even further, and joined himself to a band of "hadjis," some of whom were on their way back from Mecca to the far distant region of Chinese Tartary. To get admission into this company, Mr. Vámbéry assumed the garb and demeanour of a dervish. How far the philological importance of his mission, on which he was despatched by the Hungarian Academy of Pesth, may justify such a religious imposture we have at present no means of forming an opinion, as the results of his researches are to be laid before the scientific world "after maturer preparation." It is clear, however, that the course chosen was an unlucky one to be adopted by an inquirer, and must have been a great impediment in the way of obtaining information; for we read—"I had only to touch upon a question relating to ordinary life, or to show such a curiosity for some matter or other, to make men wonderingly ask what a dervish, whose proper business was only God and religion, had to do with the affairs of this transitory world." Another drawback, still more to be lamented perhaps, is encountered at Bokhara :—

I then proceeded to the book bazaar, which contains twenty-six shops. A printed book is here a rarity. In this place, and in the houses of the booksellers—for there is the great depôt—many are the treasures that I have seen, which would be of incalculable value to our Oriental historians and philologists. Their acquisition was in my case out of the question; for, in the first place, I had not the adequate means, and, in the second, any appearance of worldly knowledge might have prejudiced my disguise. The few manuscripts that I brought back with me from Bokhara and Samarcand cost me much trouble to acquire, and my heart bled when I found that I was obliged to leave behind me works that might have filled many an important history [hiatus ?] in our Oriental studies.

Under this cloak of sanctity, and assisted by letters of recommendation from the Turkish Embassy at the Court of Teheran, M. Vámbéry succeeded in penetrating where there is no record of any European having been since the days of Marco Polo. Nature, too, appears to have done her part toward fitting the author for his perilous task; for in the account of his interview with the Emir of Bokhara, he tells us that "I had long forgotten the art of blushing," and that "my triumph was entirely owing to the flexibility of my tongue (which is really impudent enough)." Whether his qualifications were all natural or all acquired, the reader may rejoice in the possession of a book full of novelty, the scenes in which really throw us back, in many of their characteristics, to that most fascinating of all our dream-books, the "Arabian Nights." The route traversed has but to be pointed out to stimulate curiosity to the utmost, for when before have we had an itinerary traced out like this :—Northwards from Teheran to the Caspian Sea, the south-eastern corner of which was crossed in a small coaster; then north, and north-east, across the deserts to Khiva; an excursion northwards from that capital to Kungrat close to Lake Aral; back to Khiva, and eastwards to Bokhara and Samarcand; then southwards, through Karshi, Kerki, Andkhuy, and Maymene, to Herat; from thence to Meshed and back to Teheran. In addition to the excitement afforded by the dangers of the passage across the various deserts,—in one of which the author and his brother-dervishes owed their lives to the humanity of some Persian slaves, who shared their scanty supply of water with them—and by the other adventures incident to so many journeys all performed under the mutual convoy afforded by a caravan, the constant anxiety created by the fear that the author's disguise would be discovered, keeps the adventurous interest of the narrative always at the highest. Only once was M. Vámbéry seriously disconcerted, and that was by a sharp young lad, the son of the present ruler of Afghanistan, who was acting as his father's viceroy at Herat. The interview is thus described :—

True to my dervish character, on appearing I made the usual salutation, and occasioned no surprise to the company when I stepped, even as I

Digitized by Google

made it, right up to the Prince, and seated myself between him and the Vizir, after having required the latter, a corpulent Afghan, to make room for me by a push with the foot. This action of mine occasioned some laughing, but it did not put me out of countenance. I raised my hands, to repeat the usual prayer required by the law. Whilst I was repeating it, the Prince looked me full in the face. I saw his look of amazement, and when I was repeating the amen, and all present were keeping time with me, and stroking their beards, the Prince half rose himself from his chair, and pointing with his finger to me, he called out half laughing, and half bewildered, "Vallahi, Billahi, Schuma, Inghiliz hested" (By G—, I swear you are an Englishman). A ringing peal of laughter followed the fancy of the King's young son, but he did not suffer it to divert him from his idea; he sprang down from his seat, placed himself right before me, and clapping both his hands, like a child who has made some lucky discovery, he called out "Hadji, kurbunet (I would be thy victim), tell me, you are an Englishman in tebdil (disguise), are you not?" His action was so naive that I was really sorry I could not leave the boy in his illusion. I had cause to dread the wild fanaticism of the Afghans, and assuming a manner as if the jest had gone too far, I said "Sahib mekun (have done), you know the saying—'He who takes even in sport the believer for an unbeliever, is himself an unbeliever.'. Give me rather something for my Fatiha, that I may proceed further on my journey." My serious look and the hadis which I recited quite disconcerted the young man. He sat down half ashamed, and excusing himself on the ground of the resemblance of my features, said that he had never seen a Hadji from Bokhara with such a physiognomy. I replied that I was not a Bokhariot, but a Stambuli; and when I showed him my Turkish passport, and spoke to him of his cousin, the son of Akbar Khan, Djelal-ed-din Khan, who was in Mecca and Constantinople in 1860, and had met with a distinguished reception from the Sultan, his manner quite changed; my passport went the round of the company, and met with approbation. The Prince gave me some krans, and dismissed me with the order that I should often visit him during my stay, which I accordingly did.

The Turkoman seems to be the great curse of Central Asia, passing his life in plundering, or making slaves of all around him. Their incursions have for centuries been depopulating vast districts:—

Amongst the Tekke Turkomans are reckoned at the present hour more than 15,000 mounted robbers, who are intent upon kidnapping expeditions night and day. One can easily form an idea of how many houses and villages are devastated, how much family happiness destroyed, by these greedy freebooters.

Their custom is to make no reservation in favour of such as belong to the same sect of Mahometanism as themselves. Our author once put the question to a robber renowned for his piety, how he could make up his mind to sell his Sunnite brothers as slaves, when the Prophet's words were, "Every Mussulman is free." "Behey," said the Turkoman with supreme indifference; "the Koran, God's book, is certainly more precious than man, and yet it is bought and sold for a few krans. What more can you say? Yes, Joseph, the son of Jacob, was a prophet, and was himself sold. Was he in any respect the worse for that?"

The leader of the band of dervishes with whom Mr. Vámbéry travelled was Hadji Bilal, the chief priest of the Governor of Chinese Tartary, from whom our author derived some reliable information as to the way in which that territory is administered. Each of the provinces has two authorities, one Chinese and military, the other Tartar-Mussulman and civil. The Chinese appear to exercise their functions so impartially that the inhabitants prefer their rule to that of the Mussulman khans around them. Even the Mollahs extol the conscientiousness of the Chinese officials, although they deal with their religion in the most unsparing terms. So also the Tartars are never tired of praising the art and cleverness of their rulers, and there is no end to their laudatory strains when they once begin to speak on the subject of the Djong-Kafir (great unbelievers), *i.e.*, the genuine Chinese. True to this notion, Hadji Bilal accounted for the taking of Peking by the Frenghis (Franks), by saying that they employed cunning, and having stupefied the inhabitants with opium, marched easily into the slumbering city. With all this it must be remembered that Russian accounts represent the Mahometan subjects of the Emperor of China as in active rebellion.

Mr. Vámbéry devotes his last chapter to the progress of Russian influence in Central Asia. He considers that the real line of operations for that Power is to be sought along the left bank of the Jaxartes:—

Here we find the Russian outposts supported by an uninterrupted chain of forts and walls, pushed on as far as Kale Rehim, distant thirty-two miles from Tashkend, which may be regarded as a key to all conquest in Central Asia. This route, which traverses fewer deserts than any other, is also in different respects well chosen. An army would be here indeed exposed to more surprises; but these can be resisted more easily than the fury of the elements. On the eastern frontiers of Khokand also, beyond Namengan, the Russians continue to move nearer and nearer, and in the time of Khudayar Khan many collisions had already taken place there between the Khokandi and the Russians.

The author sums up his views on this point by expressing his surprise at England's indifference to the plans of Russia in the part of the world referred to, reminding us that accounts received at the end of October positively affirm the fact of the Czar's forces having taken possession of the very city of Tashkend above mentioned. Every page of the book, however, teems with suggestive memoranda; and as a last recommendation, we must not forget to mention that a very excellent and clearly designed map enables one to accompany the writer with the greatest ease through regions hitherto strange even to the scientific geographer.

Mémoires sur la Chine; par le Comte D'ESCAYRAC DE LAUTURE. Paris: Librairie du Magasin Pittoresque.—The new part of this sumptuously got-up publication is devoted to "Government." The eminently characteristic illustrations are even more numerous than in the preceding portions of the work, and the style of their execution and the way in which they have been "worked" do great credit both to the engraver and printer. M. de Lauture embraces his subject under the six heads of—Central Government; Civil Functionaries; Administration; the State Finances; Military Staff; and lastly, gives a copious Administrative Vocabulary in Chinese and French. The sovereignty of the Son of Heaven extends, it appears, over China, Mantchuria, Mongolia, Dzoungaria and Eastern Turkestan, and Thibet. The country is often called "the eighteen provinces," which denomination, though to be tolerated in a geographical sense, would be entirely at fault speaking administratively. Under fourteen Governor-Generals there are 183 Foo, or prefects of the first class, and 65 of the second; 147 sub-prefects of the first class, and 1,303 of the second. All offices are to be purchased, and the author, strange to say, is rather in favour of this mode of appointment as opposed to competitive examination; for he says, "if we attentively compare the magistrates by examination and those by purchase, it will be admitted that the latter, whose minds have not been ground down under a tedious and ungrateful course of study, are the more useful servants of the State." Corruption is universal.

It is so thoroughly admitted, that the salary is never taken into consideration. The sub-prefect or tchi-heen of the present day takes his 1,500 taels only because it is necessary to his standing that he should not be paid less than he himself pays his chin-min. There was some talk a few years ago of abolishing all salaries; but the authorities were compelled to recede from an act that would have been nought else than an official recognition and a direct organisation of robbery.

M. de Lauture estimates the revenue of the Chinese Empire at more than £20,000,000; but the public contributions are apportioned with as little equity as they were among the different provinces of France before the Revolution. The assessment is bad, because the land is overcharged, whilst houses and shops, &c., pay nothing. The custom-houses in the interior, which yield little to the State, fetter the transactions of trade and produce smuggling—a school of rebellion and brigandage. This part of his subject is wound up by the following observations:—

For organising an armed force worthy of the name, for re-establishing order in the insurgent provinces, for putting an end to exaction and peculation by the regular payment of its functionaries, and, lastly, for repairing the canals and providing for other useful works, the Government cannot depend on its present revenue, the insufficiency of which is evident. On the other hand, it cannot without danger make any notable increase in the taxation—unless with the consent by vote of the people, or at least without leaving to them the uncontrolled raising and appropriation of the provincial and municipal funds. But a loan would be just now a very easy affair for it: it might be guaranteed by the customs revenues, which are rapidly augmenting, and by the salt-receipts. It might, I think, be obtained at 12 per cent. European capitalists might take it up. In any case, as capitalists are not wanting in China, and as the confidence inspired in the Chinese public by European banks is very great, I conceive it would be easy for those banks to attract deposits of capital that is now kept in the background, and would never be offered direct to the State, and to get a considerable commission out of the loan of that very capital. Such a commission would be like a fine on the bad reputation of a Government that will be no longer able to plunder its people when Europeans have placed themselves between it and them.

The Chinese and Japanese Repository for November opens with "The Route to China by way of Russia and Siberia," which is a reproduction of an account of a journey overland from St. Petersburg that was published in *The Times* some weeks back. The other articles are "Copper Smelting in Japan," from the original Japanese; and the history of "Su-wu, the faithful Ambassador to Tartary," who existed in the century before the birth of Christ. The gem of the number is, beyond all doubt, the commencement of a treatise on "The Japanese Language and Grammar," by the Editor, accompanied by an engraving of the syllabaries that form it; and, lastly, we have the first part of a "General Description of the Island of Formosa," from notes made by Mr. Consul Swinhoe.

LOADING.

At LONDON.—For Yokohama: Eliza Shaw, Belina. For Nagasaki: Rifleman. For Shanghai: Challenger, Pegasus, Fychow, Star of China. For Hong Kong and Canton: Banian, White Adder, Devana. For Hong Kong and Foo-chow-Foo: City of Aberdeen, For Amoy and Foo-chow-Foo: Merse. For Singapore: Norfolk, Dewa Gungadhur. For Singapore and Penang: Ferozepore. For Batavia, Samarang, and Sourabaya: Skimmer of the Seas. For Colombo: Echo, Percy Douglas, Frances, Emperor, Princess.

At LIVERPOOL.—For Yokohama: Jane, Aden. For Shanghai: Alarm, Invincible. For Hong Kong and Canton: Canton. For Batavia and Sourabaya: Helvetia. For Manila: Iberica, Sales. For Colombo: Lizzie Scott.

At GLASGOW.—For Shanghai: Glencoe. For Batavia and Singapore: Mary Hamilton. For Ceylon: Princess of Wales.

At GREENOCK.—For Galle: Belle Creole.

SPOKEN.

BARNAVE, Bordeaux to Batavia, Oct. 18, on the line, 25 W.
WAALSTROOM, Amsterdam to Japan, Nov. 17.
J. C. MUNRO, Cardiff to Shanghai, Sept. 12, 11 N., 112 E.
CARACTACUS, Hong Kong to London, Sept. 18, 1 N., 107 E.
KELVIN, China to New York, Sept. 19, on the line, 107 E.
FRIGATE BIRD, Shanghai to London.
LEWE VAN NEYSTEIN, Tjilatjap to Amsterdam, 18 S., 4 W.
GLOUCESTER, London to Singapore, Sept. 30.
WILLIAM AND RICHARD, Liverpool to Ceylon, Nov. 4, 37 N., 18 W.
BELTED WILL, London to Hong Kong, Nov. 18, 48 N., 12 W.
NONPAREIL, Liverpool to Shanghai, 32 days out.
LAUDERDALE, Liverpool to Shanghai, 30 days out.
COROMANDEL, Cardiff to China, Oct. 24, 7 N.. 27 W.
OITHONA, London to Hong Kong, steering S., Sept. 21, 9 S., 29 W.
CESTRIAN (ship), Liverpool to Galle, lat. 2, lon. 26 W., 27 days out.
RAPHAEL, Sumatra to Marseilles, Oct. 26, 12 N., 28 W.
ARGO (ship), of Rotterdam, for Java, Oct. 26, 6 N., 22 W.
ZEEMUTH, Amsterdam to Batavia, Oct. 29, 7 N., 24 W.
OCEAN PEARL, Sunderland to Singapore, Oct. 30.
FORTUNA, Batavia to Rotterdam, Nov. 13, 33 N., 31 W.
THAMES (barque), Colombo to New York, Oct. 17, 34 S., 25 E.
CHANTICLEER, Canton to London, Oct. 23, 27 S., 4 E.
MERCURIO, New York to Shanghai, North of Formosa.
BOLDEN LAWN, from Macao, off the Cape.
VALDIVIA, from Hong Kong, off the Cape.
ZEENYMPH, Amsterdam to Batavia, Oct. 28, 7 N., 23 W.
THEODORA MACHTILDA, Amsterdam to Batavia, Oct. 5, 23 S., 29 W.
ALYA (?), Swansea to Ceylon, Nov. 2, 9 N., 28 W.

VESSELS EXPECTED.

From JAPAN.—At LONDON: Natal, Yokohama, Amoy, Marmora, and Witness. At LIVERPOOL: Jane and Isabella, Marion, Vigil, Vampyre, and Gyrn Castle. At NEW YORK: Osborne, and Brilliant.

From CHINA.—At LONDON: Ethel, Monarch, Belle, Zodiac, Stirlingshire, Valdivia, Shakespeare, Catherine Howard, Willie, Claremont, Finzel, Southern Cross, John Banks, Waverley, Napoleon II., Horsa, Ben Lomond, Solent, Wild Deer, Marquis of Londonderry, Carausius, John Temperley, Aboyne, Caractacus, Gresham, Assyrian, City of Quebec, Chanticleer, Thomas Blyth, Essex, Bride of the Seas, Cumberland, Coulnakyle, Canute, Philomela, Adriatic, P. J. F. Burchart, Isabella Robinson, Zelia, Vimeira, Zarah, L. Wharncliffe, Gloucester, Lorton Vale, Iceni, S. Ralston, Wm. Thompson, Marlborough, Ocean Queen, Theodore and Julie, Amelia, Magnus, Josephine, Sappho, Charles Davenport, Sarah Newman, and Yaratilda (Sept. 24), Leichardt (Oct. 2), Queen of Nations (Oct. 6), Rajah of Cochin (Sept. 19), Harkaway and Lord Raglan (Sept. 23), Taeping (Oct. 7), Coulnakyle (Sept. 28), Cathaya and Peterborough (Sept. 29), and England (Oct. 7). At LIVERPOOL: Geologist, Chaa Sze, Buckham, Everest, Delhi, Wm. Dawson, Affghan, Sea Snake, Thomas Bell, Lord Dalhousie, Cornelia, Inamhore, Regina, Edward Percy, Henriette Cornelis, Victoria, Montgomery, Australia, Ann Forster, Brockham, General Windham, Providence (Sept. 23), Veronica (Sept. 28), Patna (Sept. 30), and Samarang (Oct. 1). For QUEENSTOWN: Alida (Sept. 24). At NEW YORK: Dorchester, Regnago, St. Paul, Cornelia, Mary, Roslin Castle, Cassiterides, Queensland, Maggie Leslie, Samuel Russell, and Bedford.

From MANILA.—At LONDON: Beatrice, Seaforth, Labrador, Jupiter, Constance, and Staffordshire. At LIVERPOOL: Indiaman, Alicia Anne, Kathay, Gondola, Frederick, Royal Mint, Peveril of the Peak, Earl of Mar and Kellie, North (Oct. 1), and Olano (Oct. 5). At FALMOUTH: Der West, St. Paul, Voladora, Fagel, and Ocean Empress. At NEW YORK: Bengal, Continent, Franklin, Julia Ambridge, Peruvian, and Rattler (Sept. 20).

From SINGAPORE.—At LONDON: Oscar, Confidence, Pet, Polly, Queen of India, William Simpson, Miss Nightingale, Eddystone, Najade, Rangoon, Dunkeld, and Warren Hastings (Oct. 20). At LIVERPOOL: C. H. Soule, Victory, Agra, Beloochee, Tigris, and Simoon (Oct. 18). At FALMOUTH: Sarah Jane and Queen Bee. At BORDEAUX: Leon. At NEW YORK: Ocean Home, Gertrude, Caroline, Rudolf, and Panic. At BOSTON: Ceylon, Aristides, and Magnet.

From PENANG.—At LONDON: Marengo, Sunium, Golconda, Black Eagle, Bothwell Castle, Spitfire, and Isabella (Oct. 13). At CORK: Ceylon. At BORDEAUX: Sophie.

From BANGKOK.—At NEW YORK: Eastward Ho!

FREIGHTS AND CHARTERS.

In outward freights we have nothing new to report, all export business continuing without animation. Coal freights from the outports also continue scarce, and but little business is doing in chartering homewards.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £34 to £35 and £1. 17s. 6d. For Shanghai: £45 and £2. 2s. 6d. For Manila: £1. 5s. For Ceylon: £24 and £1. 2s. For Batavia: £25 to £26. For Singapore: £25 and 22s. For Penang: £27. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have invited tenders for the conveyance of 2 tons ball cartridge, 104 tons porter, and a few tons of light-measurement stores from the River Thames to Hong Kong, also for 12 tons rockets and sticks, to Shanghai.

CASUALTIES.

The Mary Goddard, Pairle, from Batavia to Rotterdam, which put into Table Bay October 21, had sprung a leak off Agulhas, on the 16th and 17th, and would have to discharge.

The Choice, of Shields, Crozier, from Colombo to London, which went on shore in St. Margaret's Bay during the night of Nov. 25, was assisted off, after discharging part of her cargo, and towed into Ramsgate by two steam tugs, with rudder disabled, very leaky, and ten feet water in her hold; she is now discharging.

The Alexandrina, Dalrymple, arrived at Texel November 25, from St. Helena, with part of the cargo of the Kiandra, from Batavia, condemned at that island.

The Fingel, which passed Anjer 12th Oct., reports that three days previously she boarded the Cumberland (ship), from Foo-chow-Foo to London, ashore on Magdalen reef. She was hove off, and proceeded for Singapore much strained, and making too much water to proceed home.

The Wm. Chandler, Brown, from Liverpool for Singapore, put into Portland Roads on the 29th Nov. with bulwarks carried away, cargo shifted, 2 boats lost, and 3 men injured.

AT ST. HELENA.—Oct. 30, from Batavia, Alexander, Dogen, and sailed 1st Nov. for Amsterdam; from Shanghai, Gresham, Bayley; from Java, Helena and Anna, v. Aalburg; from Batavia, Anthony van Hoboken, Hazewinkle, and both sailed 31st for Amsterdam; from Padang, Vooruit, Strot, Nov. 2; from Samarang, Idar Elisabeth, Amer., Oct. 29; from Cape Good Hope and Ceylon, H.M.S., Orontes.

OFF ST. HELENA.—Nov. 1, Adriatic (barq.), from Hong Kong for London.

AT TABLE BAY.—Oct. 22, Aldebaran, Driver, sailed for Batavia; Skimmer of the Waves, Hammond, sailed for Galle.

THIRD REPORT OF THE
SCINDE, PUNJAUB, AND DELHI BANK CORPORATION
(LIMITED).

HEAD OFFICE—No. 80, KING WILLIAM-STREET, LONDON, E.C.

Branches at Bombay, Calcutta, Kurrachee, Lahore and Umritsur.

SUBSCRIBED CAPITAL, £927,780; PAID-UP CAPITAL, £392,778; RESERVED FUND, £24,674. 1s. 6d.

Court of Directors.

CHAIRMAN—WILLIAM PATRICK ANDREW, Esq. (Chairman of the Scinde, Punjaub, and Delhi Railways).

DEPUTY-CHAIRMAN—FRANCIS WILLIAM RUSSELL, Esq., M.P. (Chairman of the National Discount Company, Limited).

HARRY BORRADAILE, Esq. (late Bombay Civil Service, Director of Scinde and Capetown Railways).

ARCHIBALD BOYD, Esq. (Director of the Union Bank of London).

WILLIAM DENT, jun., Esq. (late of Messrs. Dent and Co., China).

Sir STUART ALEX. DONALDSON (late Colonial Secretary and Treasurer, New South Wales).

WILLIAM MACKINNON, Esq. (Messrs. Mackinnon, Mackenzie, and Co., Calcutta).

Sir CHARLES NICHOLSON, Bart. (late President of the Legislative Council, Queensland).

JOHN THORNTON, Esq. (late Member of the Board of Revenue, North-Western Provinces of India).

THOMAS WILLIAMS, Esq. (Director of the Scinde, Punjaub, and Delhi Railways).

GEORGE WORMS, Esq. (Messrs. G. and A. Worms, London), Director of the General Credit and Finance Company.

Auditors.

WILLIAM DENT, Esq., 2, Moorgate-street.

J. EDMUND ANDERDON, Esq. (Director of the Bank of London).

Messrs. COLEMAN, TURQUAND, YOUNGS, and Co., 16, Tokenhouse-yard.

Bankers.

The BANK OF ENGLAND. | The UNION BANK OF LONDON.

Solicitors—Messrs. THOMAS and HOLLAMS.

Manager—T. G. CRAIG, Esq. IN INDIA—NEALE PORTER, Esq., Managing Director.

Branches in India.

BOMBAY—T. G. YOUNG, Esq., Manager. | LAHORE—W. J. OLIVER, Acting Manager.
CALCUTTA—R. W. C. MERINGTON, Esq., Manager. | UMRITSUR—EDWIN MORTON, Esq., Manager.
KURRACHEE—R. E. K. WILKINSON, Esq., Manager.

Agents.

MADRAS.—THE ORIENTAL BANK CORPORATION. | SYDNEY.—The COMMERCIAL BANKING COMPANY of Sydney; and Messrs. MACDONALD, SMITH, & Co.
HONG KONG.—Messrs. DENT and Co. | ALEXANDRIA (Egypt).—Messrs. G. WOLLHEIM & Co.
CEYLON.—Messrs. ARMITAGE BROTHERS.

At the THIRD HALF-YEARLY MEETING of the Shareholders in this Company, held at the London Tavern, Bishopsgate-street, on Tuesday, the 29th November, 1864, the following Report was presented:—

The Bank has now Branches in operation at Bombay, Kurrachee, Lahore, Umritsur, and Calcutta, and is represented by agencies at Madras, Hong Kong, Ceylon, Sydney, and Alexandria.

The Lahore and Umritsur Branches were opened on the 6th April and 2nd May respectively; the Calcutta Branch on the 18th July. The result of the operations of these Branches cannot be brought into account before the the 31st December next.

The shares last issued at £2 per share premium were taken up and paid upon to the extent of 7,889 out of 12,500 offered to the shareholders, and according to advices by last mail from the Bombay Branch, the 1,000 shares placed at the disposal of that Branch, had all been allotted to the public at £5 per share premium, which premium, together with a deposit of £2 per share, had been paid. The total amount realised by premiums—viz., £24,674. 1s. 6d., has been carried to the reserve fund. No returns have yet been received from the other Branches as to the disposal of the shares appropriated to them.

The accounts for the half-year ending 30th June last, as per annexed statement, which have been duly audited, show a gross profit of £26,613. 12s., including balance brought forward 1st January, 1864, after deducting interest on current and fixed deposits.

From this sum £9,270. 9s. 4d. has been deducted for current expenses, and £12,433. 8s. 1d. for rebate on bills and commission on acceptances running, including a due provision for bad and doubtful debts, leaving a balance of £4,909. 14s. 7d. at the credit of profit and loss, which the Directors propose to carry over to next half-year.

London, Nov. 22, 1864. W. P. ANDREW, Chairman.

The Scinde, Punjaub, and Delhi Bank Corporation (Limited).

BALANCE-SHEET MADE UP TO 30TH JUNE, 1864.

DR. LIABILITIES.

DOCKS.
PORT OF AMOY, CHINA.

AGENTS and Commanders are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING, SPARRING, and RE-FITTING VESSELS of all sizes, and for CLEANSING and PAINTING Iron Ships, at moderate charges.

Their large Granite Dock, 286 feet long on the blocks, with 19 to 21 feet water in the entrance at spring tides, and fitted with Caissoon Gate and Steam Pumps, is in complete working order, and is well supplied with every description of materials.

EUROPEAN FOREMEN superintend the work in all departments.

Amoy, 1st January, 1864

SINGAPORE MUNICIPAL LOAN.—The Municipal Commissioners of Singapore, having power under Act XXV. of 1856 of the Legislative Council of India to borrow money on mortgage of the rates and taxes, hereby give notice, that a LOAN of SEVENTY THOUSAND DOLLARS (70,000 dols.), for a term of eight years, will be REQUIRED in all 1865, for which bonds of not less than 500 dols. each will be issued, bearing interest at the rate of 7 per centum per annum.

The said loan has been sanctioned by the Local Government under Section XXXV. of Act XXV. of 1856 of the Legislative Council of India.

Banks through which money can be remitted and bonds received are the Oriental Bank Corporation, Chartered Mercantile Bank of India, London, and China, Chartered Bank of India, Australia, and China, and the Asiatic Banking Corporation.

Tenders should be sent to the undersigned by the 15th January, 1865.

By order of the Commissioners,
C. R. RIGG, Secretary.

Town-hall, Singapore, 21st Sept., 1864.

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY HER MAJESTY and the ROYAL FAMILY.

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard 's Own, Ess Bouquet, Military, Royal Yacht Club New Perfume—Extract of Flowers, Eugenie, Napoleon II., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM. — A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s CHERRY TOOTH PASTE gives the Teeth a pearl-like whiteness, protects the enamel from decay and imparts a pleasing fragrance to the breath.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON adapted for universal use, and the most serviceable and convenient Hair Brush ever invented. Letters Patent Granted Nov. 6, 1853.

Merchants and Shipper supplied on liberal terms.

2, THREE KINGS COURT, LOMBARD-STREET, LONDON.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., Three King-court, Lombard-street, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d. Testimonials from artists of the highest order, and from individuals of undoubted respectability may be inspected. **Messrs. Jno. Gosnell and Co have been appointed Perfumers to H.R.H. the Princess of Wales.**

THE UNDERSIGNED LICENSED PILOTS FOR THE PORT OF SHANGHAI, CHINA,

BEG to inform SHIPMASTERS, that their Schooners DANIEL WEBSTER and A. J. WESTEWELT will be found at the OUTSIDE PILOT STATION on the YANG-TZE-KEANG, with thoroughly qualified PILOTS on board.

To regular traders the undersigned are known to be among the oldest and best Pilots on the River :—

DANIEL MARTIN.	JOSEPH SHERMAN.

HOLLOWAY'S PILLS.—DESIRABLE POSSESSION.—Without health no amount of wealth, no means of pleasure, are of the slightest value. It is inconceivable how small a disturbance of the animal functions begets wretchedness, and how readily it may be rectified by a few doses of some purifying regulating medicine, such as these world-renowned Pills. These have proved the best friend to mankind in every grade in every land, and under almost every circumstance. Holloway's Pills purify the blood, rectify digestion, stimulate the liver and kidneys, and regulate the bowels. When fevers, influenza, and other ailments are epidemic, these Pills should be taken occasionally by everyone to keep the blood and system free from the seed of the prevailing pestilence.

Calcutta ...	Aminta ...	A1 12 yr.	1132	Vict. D.

31, Great St. Helen's, E.C.

GELLATLY, HANKEY, and SEWELL will despatch the undermentioned clipper SHIPS as under:—

Ports.	Ships.	Class.	Docks.	Date.
Calcutta ...	Robinson Crusoe ...	A 1 12yrs	E.I.D.	Dec. 20.
Calcutta ...	Cornwallis...	A 1 12yrs	E.I.D.	Jan. 20.
Bombay ...	Evelyn ...	A 1 12yrs	...	Dec. 20.
Shanghai ...	Fychow ...	A 1 14yrs	E.I.D.	Dec. 20.

For Freight or Passage apply to GRINDLAY and Co., 55, Parliament-street, S.W.; or to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

SHANGHAI DIRECT.—The FYCHOW, A 1 fourteen years; 715 tons register; JOSEPH MATHERS, Commander, will leave the East India Docks on the 17th Dec. This beautiful vessel was built at Aberdeen last year by Messrs. Alex. Hall and Co., especially for this trade, and is strongly recommended to shippers. Has splendid cabin accommodation.

For Freight or Passage apply to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

THE NIGHTWATCH, for MALABAR COAST, calling at Mangalore, Cannanore, Calicut, and Cochin, will receive goods in the St. Katharine Docks al day to-morrow, the 6th inst., and leave the Docks the following day.

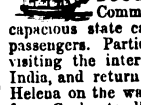
Apply to TOULMIN, LIVINGSTON, and Co., 31, Great St. Helen's, E.C.

COLOMBO, CEYLON, Direct—having the greater portion of her cargo engaged and shipping, the magnificent clipper ship PRINCESS, A 1 for thirteen years, KINGSLY HUNLEY, Commander; loading in the West India Docks. This splendid vessel, having a full poop, has unrivalled accommodation for the comfort and convenience of passengers.

For Freight or Passage apply to W. A. WINCKLEY, 23, Birchin-lane, Cornhill, E.C.

COLOMBO DIRECT.—The beautiful clipper ECHO, A 1 12 years, 369 tons register, is now loading in the West India Dock, and having a large portion of her cargo engaged, will be promptly despatched.

For Freight or Passage apply to SUART and SIMPSON, 9, Clement's-lane, Lombard-street, E.C.



COLOMBO.—Notice to Passengers.—The fast-sailing ship PERCY DOUGLAS, A 1, 781 tons, J. P. HAMON, Commander. Has large, airy, full poop and capacious state cabins, and splendid accommodation for passengers. Parties desirous of avoiding the winter and visiting the interesting Island of Ceylon and coast of India, and return in the ship, may do so, calling at St. Helena on the way home. Steamers constantly running from Ceylon to all parts of India. Passage out to Ceylon, 45 guineas; ditto out and return, 75 guineas.

Apply to the Captain, on board; or to TOULMIN, LIVINGSTON, and Co., 31, Great St. Helen's, E.C.

With Immediate Despatch.

DIRECT for COLOMBO, the splendid British-built clipper ship FRANCES, A 1 thirteen years, 489 tons register, F. W. HILL, Commander; lying in the London Docks. This magnificent ship is confidently recommended to shippers.

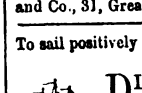
For Freight or Passage apply to TOULMIN, LIVINGSTON, and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.

With Immediate Despatch.

DIRECT for BOMBAY, the nearly new clipper-built ship FRANCIS K. DUMAS, 1,209 tons register, J. LEMIEUX, Commander; East India Docks. This splendid vessel, built this year, will be found a first-rate opportunity to shippers requiring despatch.

For Freight or Passage apply to TOULMIN, LIVINGSTON, and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.

To sail positively on 20th Dec.; all Goods to be alongside by 17th.



DIRECT FOR CALCUTTA.—The fine British-built ship AMINTA, A 1 12 years; 1,132 tons register; G. M. MAXTED, Commander; lying in the Victoria Docks. This splendid vessel, built in 1862, and now well known in the Calcutta trade, offers an excellent opportunity to shippers desirous of quick despatch.

For Freight or Passage apply to ALEX. HOWDEN, SONS, and Co., 19, Birchin-lane; or to TOULMIN, LIVINGSTON, and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.

POOTUNG DOCK

OPPOSITE TUN-KA-DOO CATHEDRAL.

D. MUIRHEAD, Superintendent.

THIS MAGNIFICENT DOCK IS NOW READY TO RECEIVE VESSELS.

IT IS THE LARGEST DOCK IN THE EAST.

THE DIMENSIONS AND DEPTH OF WATER BEING:—

Length over all	380 Feet.
Length on Blocks	340 "
Width at top	125 "
Width in the bottom	50 "
Width of Dock Entrance	75 "
Depth of Water at High-water, Neap tides	16 "
Do. Do. Spring tides	21 "

There are Four powerful Steam Pumps capable of Pumping the Dock DRY in four hours, and the Caisson can be floated and Vessels enter or leave the Dock at any state of the Tides, advantages not possessed by any other Dock in China.

On the dock ground is kept a large staff of carpenters and blacksmiths, under the superintendence of experienced European foremen.

There is also a most complete machine and engineering establishment attached; thus efficient work of every description necessary for the repair of vessels and machinery is secured with the least possible detention.

The hire of the dock for a period of three days after the caisson shall have been in its place is 1 tael per ton, and for the hire of the dock for each day over and above the said three days 7 candareens per ton per day.

The Pootung Dock Company will not be responsible for any damage occurring to vessels by any unforeseen accidents to the caisson or otherwise, nor for the docking and undocking of vessels.

Steamers shall pay on the gross tonnage.

The tonnage on which dockage shall be charged shall be that reported to the Consulates.

Captains of vessels before leaving the Dock must approve and sign their Dockage Bills, and give the Superintendent the name of the vessel's Consignee.

All Dockage Bills shall be signed by the Superintendent and the Chairman of the Dock Company for the time being, and they will be collected through the Commercial Bank of India.

All communications in respect to Docking to be addressed to the Superintendent either at the Pootung Foundry, at the Dock itself, or to the undersigned.

HOGG BROTHERS, Agents Pootung Dock Company, CHAOU-FOONG-HONG, NANKIN-ROAD.

Shanghai, June 25, 1864.

IMPORTANT ANNOUNCEMENT.

JOSEPH GILLOTT,

Metallic Pen Maker to the Queen,

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions, which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street, New York; and 37, Gracechurch-street, London.

To Alexandria: Mr. and Mrs. Kennard, Mr. E. and Miss Kennard and two servants, Messrs. Goddard, Etheridge and Baker, Mr. and Mrs. R. D. Wood, Miss and Mrs. Wood, junr. and child.

Per French steamer Dec. 19, from Marseilles to Hong Kong: Mr. Michael Moss.

Per P. and O. steamer, Dec. 20, from Marseilles.—To Singapore via Bombay: Mr. and Mrs. Ottman. From Suez.—To Ceylon: Mr. Coomarad Swamy and servant.

Per P. and O. steamer, Dec. 20, from Southampton.—To Hong Kong: Messrs. A. Leigh and J. Maitland, Mrs. Wilkinson and infant, Miss M. Wedgewood, Mr. G. Martin, Mrs. Williams and infant, Miss Williams, Mr. F. F. Williams, Mr. D. Neish, Rev. F. Davies, Lieuts. F. W. Lewis, and G. D. Murant, Captain W. A. Haswell, R.N., Commander J. W. Armstrong, and C. E. Stephens. To Ceylon: Mr. J. Bannatine, Mr. W. Mayou, Miss E. H. Jones. From Marseilles, Dec. 26.—To Hong Kong: Mr. and Mrs. Ryrie, Mr. Pastorius. To China: Mr. W. A. Foster. To Shanghai: Mr. and Mrs. Tyers. To Ceylon: Mrs. Jackson, Messrs. F. Pater and Fraser. To Singapore. Mr. A. Gunn.

Per P. and O. steamer, Jan. 4, 1865, from Southampton.—To Hong Kong: Mr. and Mrs. H. G. Bush, Mr. J. A. Bromley. To Ceylon: Miss Wodehouse, Mr. Thompson, Mrs. C. Morison.

From Marseilles, Jan. 12, 1865.—To Hong Kong: Mr. M'Donald, Mr. and Mrs. A. Hancock. To Shanghai: Mr. and Mrs. Morgan. To Ceylon: Mr. and Mrs. Faviell.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The dates from this port are to the 18th of October. The London Mail of the 10th August arrived out on the 2nd October.

A visit of all the Foreign Ministers to Yedo appears to have been the great diplomatic corollary to the warlike operations in the Straits of Simonoseki. The *Japan Herald* of the 17th October says:—"On the afternoon of the 5th Sir Rutherford Alcock, and all the members of the British Legation; Mons. Leon Roches, the French Minister, with Mons. Mermet de Cachon, his Japanese Secretary; the American Minister, General Pruyn; the Dutch Consul-General, D. de Graeff van Polesbroek—all proceeded up to Yedo with detachments from the squadrons now here, viz.—English: Pelorus, Tartar, Leopard, Argus, Perseus, Cormorant, Havoc; French: Semiramis, Dupleix; Dutch: Metulen Kruis, Amsterdam. In the course of three days many rumours were afloat as to the result of this visit—one, apparently well authenticated, that henceforward silk would be allowed to come down freely, and that an idea concocted and almost ready to be carried out by the Japanese Government, of creating a government monopoly for the purchase of silk, had altogether broken down. On the following Saturday the Foreign Ministers returned. It can be readily comprehended that there might be the most satisfactory reason for not permitting the whole proceedings to transpire; and all that we could report as well-founded authentic intelligence went only thus far—that the return of the Foreign Ministers might be taken as indicating the more or less effectual attainment of their object, and that the present political position, and the necessity for adopting immediate measures for the cessation of the continued interferences with the trade of the port, more especially as regards silk, were matters not lost sight of, and we then remarked that some material result might be daily looked for. After a few more dailiances, and we incline to think after the necessity for yet another turn of the screw by the British Minister, the more satisfactory position of affairs which will be found reported in our 'Market' columns commenced, and supplies, first only of Mybash and Sinchu, and then of Oshio, Coshiu, and Hatchogee, began to arrive freely. In the meantime we became informed of changes of the most significant character which were taking place in the internal politics of the country."

The treason of Choshiu has been the means of reviving one of the ancient customs of Japan. Evidently the Daimios are not in future to reside on their domains in solitary grandeur till they fancy themselves independent Princes. Amongst the laws framed by Iyeyas for the government of the country was

Digitized by Google

one by which the Daimios were compelled with their wives and families to live alternately at Yedo (instead of Miako as formerly) and in their provinces. So late as 1862 this important law was reversed. The highest Daimios were released from the service thus far, that the highest class were compelled to visit Yedo once only in seven years, and then only for 100 days at a time; the second class once only in three years; the third class remaining as theretofore; whilst in all cases their wives and families were released from the obligation to remain in Yedo, and permitted to return to their provinces. Amongst the important news now brought us is the fact that a decree has passed by which this has been again reversed, the original order of things reconstituted, and the obligation of the Daimios to reside in Yedo again re-asserted. We are also made aware of the issuing by the Mikado of a decree for the entire degradation of Choshiu. That personage, it will be recollected, had entered into engagements with the Admiral commanding-in-chief to pay such indemnities as should be fixed by the foreign representatives for past outrages on foreign flags, and all the expenses of the expedition and a ransom for Simonoseki. Envoys from the Prince, however, have had some communication with the Foreign Representatives, one object of which was to solicit *time* and indulgence for the amount and payment of these indemnities. The result of these interviews has not transpired.

[It is clear, therefore, that the reading of the telegram contended for in our "leader" of the 5th of December was the correct one. The razing to the ground of Choshiu's palace at Yedo, mentioned in the same telegram, and confirmed by the accounts received this day, appeared in full in *The London and China Telegraph* of the 28th of November.]

No political importance seems to be attached to the attack upon the Dutch Consulate-General at Yedo. It seems very doubtful whether it was an attack or anything but a drunken quarrel among the Yakonins, in which one was killed and some five or six wounded.

The effect produced by the united demonstration recently made by the foreign powers is thus lucidly stated by the *Japan Herald*:—

It is long since, in the conflict of parties or of nations, a single blow has been productive of such decisive and far-reaching results—a proof that it must have been well directed and well delivered. Within the last week two decrees have appeared which furnish curious and conclusive evidence, that upon the strength of the victory over Choshiu at Simonoseki, and the discouraging effect of his crushing defeat upon the boldest and most hostile of the Sako Daimios, it has not only been determined utterly to destroy this Prince,—but a few short weeks ago so puissant and menacing to Mikado and Tycoon alike,—but to reverse a great political revolution effected in 1862, when all the Daimios were released from their enforced residence at Yedo and their bondage to the Tycoon. The order liberating them from this galling tribute of suite and service, which the Daimios had wrung from the weakness of the Tycoon two years back, has now been cancelled in the most peremptory terms. And what is more wonderful, it is generally believed that obedience will be rendered to this sudden mandate. The Daimio of Kanga, one of the wealthiest and most influential of his class, has declared himself ready to return, it is said; and his palace is under repair. When it is considered how much of expense and inconvenience this compulsory attendance at the capital of the Tycoon entails in journeying to and fro with an enormous retinue—and all that is humbling to the pride of semi-independent Princes in its conditions, it may well be a matter of surprise that the Tycoon, having once yielded his right, should be able to take back the concession. Not two months ago his councils were distraught with dangers and perils on every side, threatening both his life and his dynasty. Menaced with deposition from Kioto if he did not expel the foreigner from Yokohama, with instant reprisals from foreign Powers if he attempted it, and in no small danger of being thrust from his seat by Mito's and Choshiu's forces united (already ravaging the suburbs of Yedo under the name of "Lonings") it is difficult to realise so sudden and complete a resumption of kingly power and strength.

The second decree is not from the Tycoon, but the Mikado, stripping Choshiu of name, title, rank, and territories, and casting him forth from the possessions of his ancestors a nameless, masterless, and friendless man—in a word, a Lonin! This, of course, comes from his second attack on Kioto. The violation of the sanctity of the Mikado's palace by a desperate and sanguinary assault appears to have constituted an unpardonable crime. The object, there can be no doubt, was to seize the person of his Suzerain, and compel him to depose the Tycoon in his own favour, besides supporting him with all the authority the Mikado wields with his Daimios against the then imminent attack of the allied squadrons. But it is a remarkable fact that this decree does not seem to have been launched at his devoted head, like a thunderbolt from the Mikado's hands, until after the forces of the foreign Powers had inflicted a terrible defeat upon the arch-enemy of all powers, spiritual and temporal!

It remains to be seen whether the Mikado really exercises the power attributed to him, akin to that of the Popes of a bygone age, when a bull of ex-communication stripped Kings and Princes at one blow of possessions, friends, and adherents. The danger now seems lest our arms, and the strong position made by the presence of foreign troops at Yokohama, may not make the Tycoon too strong, and indispose him to follow out a policy of conciliation and mutual concession, which can alone promise internal peace and satisfactory foreign relations. The events of the last few weeks, and of the last few days more especially, show that we had not over estimated, but much underrated, the influence which might be exercised by the Treaty Powers firmly asserting their rights, and with a strong hand punishing the Daimio who outraged them with persistent violence and hostility.

There is much yet to be done, and wise counsels are needed to steer the Treaty Powers to a calm and secure haven, through all the shoals and breakers of Japanese politics and Oriental diplomacy. But that we have at length entered upon the right track, after many painful and feeble efforts to find some easier passage, must be plain to all, and a subject of hearty congratulation. The great work has been done—the rest is matter of time. We have gained a position hitherto wanting,—one that insures respect for our prowess if not for our rights; and we may fairly hope the same firm hands that have placed us there, will prevent our straying back to the bewildering and profitless maze from whence we have but just emerged, and keep us steadily advancing until the goal is reached. Peace and security, with all reasonable facilities for trade and intercourse—such facilities in both directions as may be equally advantageous to the foreigner and the native, are all that we require. And these seem more nearly within reach now, than at any time since the treaties were signed.

We stated in our last that the *Rona* had taken to Shanghai a quantity of silk. We are now enabled to state that she had on board over 200 bales, that the mail steamer *Cadiz* brought thither 1,756 bales, and that the settlements were to the extent of 2,500. This increased activity of trade, combined with the favourable intelligence from this side, had produced a rise in the prices, and Mybash was quoted at $600.

The Netherlands representative had given an official contradiction to a statement that appeared in the *Commercial News*, to the effect that "the Dutch were to receive $130,000 as an indemnity for the *Medusa* having been fired upon in the Inland Sea."

The Royal Marines landed from the *Conqueror* on the 4th October, and marched to their huts on the Bluff.

The price paid by the Japanese Government for the *Takiang* was $65,000.

Her Britannic Majesty's Consul had given publicity to a complaint received from the Governor of Kanagawa with respect to injuries sustained by a Japanese pregnant female, in consequence of being ridden over by a foreign horseman, in the hope that such publicity might induce the individual who caused this accident to offer through the Custom-house some compensation to the sufferer. The offender is suspected to be a Dutchman, from his dress and appearance.

The preliminary steps taken for establishing a Chamber of Commerce at Yokohama were noticed in our issue of the 28th November. At the meeting held for that purpose, Mr. Rickerby, the Agent for the Central Bank of Western India, called attention to the subject of the dollars at present in circulation. It appeared that he and Mr. Rickard, Agent for the Oriental Bank Corporation at Yokohama, had, some days previously, called a meeting of a number of firms, at which Mr. Rickerby brought forward a proposal to check the present system of classifying dollars introduced by Chinese Shroffs, the result of which is that at present large numbers of perfectly good dollars of full weight and purity are daily rejected by the Chinese servants of the banks and mercantile houses in receiving deposits and paying cheques or orders, merely from some peculiarity in mint mark, colour, or sound. This proposal had been put by Mr. Rickerby into the form of a preliminary agreement, and circulated through the place for signature, but two of the banks and a majority of the leading firms declining to support it, the proposition had, necessarily, to be withdrawn. This step, therefore, Mr. Rickerby had to announce—expressing at the same time his regret that he had failed to induce the community to adopt his proposal, and stating his conviction that, within some twelve months, the evil he was attempting to nip in the bud would attain the same dimensions as in China, and that the stoppage of it then would be infinitely more inconvenient and more difficult than at present. He went on to make an explanation on behalf of his friend Mr. Rickard, of the Oriental Bank, rebutting statements which had been freely made lately, that all the low class dollars had been introduced indirectly by the Oriental Bank Corporation, who paid them to Government. Such, he granted, had been at first his own impression, unable as he was to account for the enormous percentage of copper and low class dollars which had been brought to him by the troops and sailors during the past eighteen months, in payment for small drafts, in which his business had been very large. But, on inquiry from Mr. Rickard, he had found that it was not the fault of the Oriental Bank Corporation. For twelve months they had not supplied the Government with a

Digitized by Google

single dollar as far as he knew. The Government officials had, contrary to the expressed advice of the Oriental Bank Corporation manager, bought their dollars elsewhere for themselves, and of such bad quality that the bank, though forced by their agreement to take them, only did so on condition that Government demands should be paid in the same coin, which has accordingly been done for the past year. Mr. Rickerby repeated that he believed the majority of inferior dollars did come from the fleet and troops in this way, and thought that the Oriental Bank Corporation were quite blameless in the matter. Mr. Rickerby concluded by formally withdrawing his proposition to facilitate the currency of all good dollars to which there was no other objection than some peculiarity of mint mark or sound, and said that of course his Comprador must go on as before, rejecting all such coin as would be refused when he had to pay it away.

The case of H. T. Lyas, master of the British ship *Little Edith*, v. Aspinall, Cornes, and Co., had been tried before Mr. Consul Winchester. This was a claim to recover the sum of $210.00 demurrage on account of the *Little Edith's* detention during three days beyond the period named in the charter-party agreement, at $70 per diem. In giving judgment the Consul remarked that the plaintiff appeared to have deluded himself, with a most resolute determination, on the obtaining certain flat small boxes of tea, notwithstanding he was told that they could not be given to him. A cargo of tea meant a cargo of tea in any of its accustomed shapes, and as might suit the interest or convenience of the shipper; but the plaintiff in this case, after he had been told plainly, on or about the 20th Sept., that he would not get any other chests of a lesser size, continued constantly asking for such lesser chests up to the 3rd Oct., and neglected to ask for such quantity of chests of the larger size as the ship would stow; such quantity of larger chests having been sent on board on the 7th only, after Mr. Cornes had found it necessary to take Mr. Mcdonald on board the ship to find out what additional number she could take. Again, it was quite clear that due diligence was not used in the loading of the previous part of the cargo, namely the cotton, as the captain was bound to use; and it may fairly be taken for granted that Messrs. Aspinall and Co. were disappointed on account of what a respectable merchant in Yokohama, Mr. Joseph, has sworn to be "the delay and unsatisfactory proceedings on the part of the captain," and that consequently instead of 3,000 piculs promised to be shipped by Mr. Joseph, only 2,000 piculs were shipped, leaving a space of 1,000 piculs to be otherwise provided for by the charterer. On these grounds judgment was entered up for the defendants, and, as a matter of course, the costs against the plaintiff.

CHINA.

TIEN-TSIN.

Dates from this port are up to the 15th of October. There was nothing reported from Peking; indeed, there has been nothing since Mr. Wade assumed the charge of the embassy. We hope that nothing portentous will come out of this lull. When Sir Frederick Bruce held the reins the arrival of the mail used to bring us some accounts of his negotiations with Prince Kung, which gave us an insight into the wily Minister and the plain John Bull diplomacy.

Business in imports continued very stagnant, and little improvement can be expected until cotton goods can be laid down at a much lower figure than their present cost. The opium business is growing smaller every year, which is to be accounted for by the fact that the growth of the native drug is largely on the increase in the North, and this can be sold much cheaper than the foreign drug. The export of cotton continues very brisk, and the price is firm at 15 taels per picul.

It is reported that the Spanish Minister, M. Deillas, has negotiated a treaty with the Chinese Government, which was signed in one of the temples at this port on the 11th Oct. A copy will be sent home by this mail in charge of M. Toledo. The Minister is on the point of starting for Peking, where he will take up his residence, pending the exchange of ratifications. The weather is described as exceedingly fine, but getting cold, and the Chinese predict a severe winter and early closing of the river.

SHANGHAI.

The dates are now down to the morning of the 26th October, five days later than received per French mail on the 5th inst. No later dates had been received from England than the 26th August (reported in our last).

The leading item now is the blowing up of another steamer (American). The following account is from the *North China Herald*:—

"Some excitement was caused in the settlement by the blowing up of the steamer *General Ward*. The tug had taken the *Tasso* in tow to place her alongside the S.S.N. Company's wharf, brought her safely to her moorings, and had just turned astern to place her in position when the explosion occurred. The captain of the *Tasso* was at the time standing on the deck-house; hearing the noise, and judging the cause, he jumped on to the deck for shelter. So soon as the smoke and steam cleared away sufficiently to enable him to see around him, he found that the *General Ward* had entirely disappeared, that the *Tasso*'s mizen-mast head and bulwarks on the port side were blown away, the house was seriously injured, and the furniture and crockery in the cabin were destroyed. The captain of the tug, who had been standing on the deck of the *Tasso*, on the opposite side to the captain, at the time of the explosion, was lying apparently dead, with blood running from his head; the mate of the steamer was in the *Tasso's* foretop, and a Chinese woman who had been on board was lying dead on the deck with her head nearly cut off. The anchor, still attached to the chain, was blown over the *Tasso's* fore top-gallant-yard arm, over which it was hanging, the other end of the chain being still fast to the sunken steamer. Captain Fuller, of the *General Ward*, died in a few seconds; the mate and the Chinese engineer were taken to the Shanghai General Hospital, dangerously injured, and, we regret to say, that the former has since died. Capt. Fuller is supposed to have been killed by a large piece of the boiler, which fractured his skull, and cut a large gash over his heart; he had also suffered other serious injuries. The cause of the accident is not known, and will probably never be ascertained; but in all probability it was referable to some neglect on the part of the engineer—a Chinaman. The *General Ward* belonged to a Boston firm; we have not heard whether she was fully insured. Messrs. Angel and Co., as agents of both the vessels, have requested us to give publicity to the expression of their thanks to the officers and crew of the *Rattler* for aid rendered after the unfortunate occurrence."

On the evening of the 16th Oct. an attempt was made to break into Messrs. Jardine and Matheson's silk factory; but fortunately Mr. Major heard the thieves before they had effected an entrance, and on his going to the spot with a revolver they took to flight. He fired two shots, wounding, as it was afterwards found, one of the thieves, and attracting the attention of a policeman, who was so near the house that he came up in time to see three men running away, to whom he at once gave chase. One, who fell almost immediately, was captured, and on being subsequently taken to the station-house, was found to have been wounded, not severely, in the chest. The other two pursued their flight along the Defence creek, but were met by another policeman who had heard the shouts, and found their retreat cut off. One jumped into the water, but finding it impossible to get ashore without being captured, swam about until he was exhausted and was drowned. His comrade in the meantime got off. The wounded man confessed that they had been endeavouring to break into the house, and said he belonged to a gang of Cantonese whom he would point out, who lived in a village outside the limits of the settlement. He was accordingly sent into the city on Friday, in order that he might direct the native authorities to the spot.

On the subject of the steamer explosion Messrs. Nicholson and Boyd have addressed a letter pointing out the incompetent men engaged as engineers, and stating that in this case the man was a Chinese, and had been promoted from cook to engineer!!!

A sand storm of some severity passed over the settlement. Vast clouds of sand hovered over about the shipping and the Pootung side of the river. It drifted to the southward, but the effects of it were felt in the settlement. The air was oppressive, and particles of sand found their way all over the place.

The following circular has been issued by the committee appointed to select a site for a new cemetery:—

The situation of the present cemetery in the midst of the dense population of the English Settlement, its very limited extent and crowded state, have induced the Municipal Authorities to recommend its being closed so soon as an appropriate site can be fixed on elsewhere.

The Committee appointed at the Land-Renters' meeting of August 8th "to act as Trustees for the public" in this matter, after mature deliberation, beg to offer to the community the following scheme for a new cemetery as that most likely to meet the views of the majority of those interested.

Digitized by Google

The site originally chosen by the Municipal Council, beyond Mr. Markham's farm on the Soochow Creek, having been condemned as too distant, the committee advertised for tenders for land nearer the Settlements. But all the tenders sent in were for lots in unsuitable localities, or too high priced, and the committee decided to join with the French Municipal Council in the purchase of one hundred mow of land in the rear of the Jesuits' cemetery near the Beloochees' rifle range. Negotiations for this land are proceeding favourably, and it is hoped that the purchase may be effected at a cost of not more than 100 taels per mow.

The land purchased, will be divided, as may seem best, into two equal portions, which will belong to the French Council, the other passing under the control of the Land-Renters' Committee. By this arrangement the cemeteries will be together, and can be reached by the same road, while all risk will be obviated of the complications which would arise if a general cemetery were established under the mixed control of the French Council and the Committee.

The cost of purchasing and laying out the whole fifty mow, together with the roads, is estimated at tls. 20,000, but the Committee propose for the present to expend more than half of that sum. A portion of the land, immediately enclosed, a chapel and lodge erected, and the roads laid out as for that portion laid out under a general plan for the whole fifty mow, which can be extended as circumstances may hereafter require.

The committee hope to raise a considerable portion of the tls. 10,000 required by the sale of lots with exclusive right of burial, and they intend appealing to the community to make up the balance by voluntary subscriptions. As the closing of the present cemetery is not an optional measure, but one rendered absolutely necessary on public and sanitary grounds, the commitee feel assured that the appeal to be made to the liberality of the residents of Shanghai will not be in vain.

The *Friend of China* has showed up another squeeze, and writes:—

"Our Shanghai Taotai had not long been in office ere he brought to the notice of Mr. Commissioner Dick circumtantials proof of a system of black mail levy on native shippers by foreign craft. This system would seem to have been in operation for some time; payments being made, not on each item, but in lumps quarterly. Of course there was no direct demand; though why the money should be paid was easily enough comprehended. To wit: The firm of Hungkee would have cargo go to Hong Kong by a vessel leaving as to morrow at 10 A.M., before business hours at the Customs. It is already 3 P.M.: how is it to be done? A nod is as good as a wink. Six hundred taels a quarter from one native is too much; and hence the bobbery. Several young men are involved in this mail-bag business we hear — natives of Ningpo or Canton, and it is possible that some of them may grow a head shorter before long, while the others will only get out of prison on heavy disgorge of old plunder. Mr. Commissioner Dick's feelings were greatly pained at the occurrence, and he has pointed out to his superior how very difficult it is to manage other than white men at the toll-bar."

HANKOW.

A correspondent, alluding to the fire which recently occurred at this port, says that the insurance offices are heavier sufferers than was at first supposed. Several Chinese have been killed, since the event, by the falling in of walls, while searching for property amid the ruins. The crew of a French gunboat, which was lying off Hankow at the time, are said to have behaved very discreditably during the fire.

KIU-KIANG.

A correspondent informs us that a band of 40 or 50 Chinese burglars broke into the native Custom-house at that port on the night of the 3rd October, and succeeded in carrying off a quantity of sycee, after killing two night-watchmen. Nothing has been yet heard of the thieves, who are believed to have been discharged braves, although, of course, the native authorities are interested in their detection, inasmuch as it was Chinese money which was stolen.

NINGPO.

By the subjoined we find that Mr. Consul Fittock is now at the tedious work of trying rowdies. It is to be regretted that the powers to Consuls do not admit of more severe sentences:—

Before W. H. Fittock, Esq., Consul; J. S. Hudson, W. H. Gracie, Assessors.

John Macduin, aged about 42 years, born in Ireland, was convicted of being, on the 1st of October inst., on the inner waters of the province of Chekiang, over 200 *li* from Ningpo, without a passport, contrary to the provisions of the 9th Article of the Treaty of Tien-tsin; and of there threatening the life of Tsing Cha-foo, a boatman, with a revolver; also, on the 2nd day of October, of illegally boarding and then aiding in robbing a Chinese boat of about 130 000 copper cash. It was thereupon adjudged, that the said John Macduin, for so threatening the life of Tsing Cha-foo, should be imprisoned for one year, to commence from the date of judgment, and to be continued in Her Majesty's gaol at Hong Kong, with hard labour; and, for the second offence, of aiding in robbing the Chinese boat, to a further term of twelve months imprisonment in Her Majesty's gaol at Hong Kong. This being his second conviction, the said defendant having been sentenced, on the 14th August, 1863, to one year's imprisonment for piracy, the court further decreed that the said John Macduin be deported from the dominions of the Emperor of China.

(Signed) W. H. Fittock.

AMOY.

The following is an extract of advices from Amoy, per *Chanticleer*, which come down to 27th October.

There is no reliable news of the rebels, but they are said to be still in Chung-Chow, and have issued proclamations requesting the inhabitants to return to the city, as they do not wish to harm them, but only overthrow the Government. This information is given by an escaped Christian Chinese, who states also that they do not injure any calling themselves Christians, and have not destroyed the chapels, though they have burnt several large public buildings. He states them (the rebels) to be fine men and well armed, and that the first force that attacked the city were well mounted. The number of them is said to be increasing, but is variously estimated from as low as 80 to as high as 30,000. But report also states them to be merely a band of robbers. No European has as yet seen any of them, and no one in Amoy seems to know the exact truth as to what they are, or their numbers.

HONG KONG.

The English mail of 10th Sept. arrived out on the 26th Oct., the day of the departure of the last mail (French). The dates are now down to the 1st. Nov. The new commander of the forces in China, General Guy, had arrived out, as also Chief Justice Adams. The items of news now added are very scant.

The steamer *Far East* arrived from Shanghai for London leaky, and after discharging part of her cargo the leak was stopped. She was to proceed on the 1st of November.

The *China Mail* on the late *fracas* between the soldiers and police says:—"Our attention has been called to the verdict lately given by the coroner's jury against the eleven 99th men at the inquest on the body of an Indian constable at Peddar's Wharf. It is urged, and with some force, that if eleven men are put in prison and ultimately placed upon trial because some one man among them must have committed the murder, it is very strange and inconsistent that the three policemen whose pieces were fired when Private Lonsdale was killed should not also be similarly dealt with; nay, that the whole picket of police who, of their own accord, broke loose from duty, neglecting the commands of their officers, should not have a verdict recorded against them. That picket resolved itself into a rabble, in defiance of all orders, and with intent to do harm to human life. One of this rabble of policemen fired his musket, while two constables not belonging to the picket also fired theirs. The latter individuals have escaped detection; but the picket itself, when they had become a riotous body of armed Indians, should have had a verdict given against them as being legally sharers in the murder of Lonsdale. So at least we have heard it argued out of doors. The coroner did not take such a view with regard to the policemen; but with regard to the soldiers he addressed the jury so decidedly that they felt compelled to give the verdict they gave. Whether the case will be pressed against the 99th men or withdrawn we cannot say; the Attorney-General will determine the question when he has seen the evidence; but we do think that there is considerable analogy between the two cases, and that the policemen were just as much rioters as the soldiers."

We hear that the gas works are rapidly approaching completion, and we anticipate the lighting of the city to some extent before the end of the year. The difficulties in laying the mains have been great, owing to the rocky nature of the ground, which, in most cases, has required to be opened by blasting. The principal public buildings, jail, clubs, churches, Government-house, &c., are now prepared for the consumption of gas, and a large portion of the street lamp-posts arrived out, and are being set up. The price to be charged for the gas is $4.50 per thousand cubic feet, and when the whole resources of the works are brought into action, and the quantity of 200,000 cubic feet per diem is consumed, the shareholders will, we expect, realise a good return for their capital.

NETHERLANDS INDIA.

BATAVIA.

Dates are to the 2nd November. The London mail of the 10th September arrived out on the 22nd October, and that of the 17th September on the 26th of October.

Mr. J. de Wal, Counsellor of the Supreme Court of Netherlands India, has been appointed President of the Court of

Digitized by Google

Justice at Batavia. W. H. du Cloux, Esq., Director of *Middelen en Domeinen*, has been permitted to retire from the service on a pension. This gentleman has since been appointed Agent to the Java Bank at Samarang. We have to announce the death, rather suddenly, of Dr. Wassink, Head of the Medical Department of Netherlands India.

The telegraph-office now receives despatches in other languages besides Dutch and Malay.

The Court of Justice has found Dr. Smeets, late practising at Bandong, guilty of manslaughter, he having, through carelessness, caused the death of a child by administering strychnine for santonine powders. The Doctor having left Java, has been declared refractory to the law.

There has been a slight disturbance at Tagal. The *Jaxasche Courant Extra* says that the barracks of the Pradjoerits were attacked by a body of marauders on the morning of the 28th October at 4 o'clock. They took away seven muskets, and afterwards attackod the house of the Regent and that of the Djaksa, killing two men and wounding five. On their retreat they murdered a European labourer and wounded two other Europeans and a Chinaman. On receipt of the news the Resident immediately followed in pursuit and succeeded in arresting four of the rascals. It is said that a certain radhen Hadji is the leader of this band, which is composed of about sixty fanatics, who, it seems stood at bay whenever they reached any of the holy tombs in the neighbourhood. Those who escaped fled into the forests of Gantoengan. Troops had been sent from Samarang, and no further disturbances had taken place.

Later news had corroborated the report that dissensions had arisen between the leaders of the rebellion, and particularly between Mas Nata Widjaya and pangeran Praboe, and bloody fights had already taken place between their respective followers.

BORNEO.

The despatches received from the President of the Western District state that the settlement of Sintary has been continually disturbed by rebels up to the 14th September. On that day an attack was commenced by the rebels, but they were beaten back by the guns from the fort and from the steamers *Celebes* and *Onrust*. They remained at a short distance from Sintang, and tried to throw up works there.

According to information received from the Governor of Labuan, which dates 22nd August, nine Javanese seamen and three Javanese women had arrived in the course of the year at Mahiad and Palawan, who stated that they had belonged to a Dutch ship lost in the China Sea; had saved themselves in the launch, and had found their way to Maghiad without having been molested by the Solorese. The captain had saved himself in another boat. The native chief at Maghiad, Datoe Mohammad, asserts, however, that these seamen had murdered their captain, and afterwards abandoned the ship. The following articles were found in their possession, to-wit, an American clock, like those used on board vessels, a gold and a silver watch, a gold and a silver watch chain, together with a bill of exchange value £25, dated June 12, 1863. All is being done on the part of the part of the Governor of Laboean, as well as on that of the judicial authorities at this place, to obtain more light on this affair, which would appear to stand in close relation to dark and criminal deeds.

STRAITS OF MALACCA.

SINGAPORE.

Dates are to the 7th November. The London mail of the 26th September arrived out on the 30th October.

Notwithstanding the apparent negative that has been given to the prospects of our Transfer (remarks the *Straits Times*), the community here seem resolved to continue their efforts and their agitation in the same direction; at all events, the newspapers here and at Penang are apparently agreed not to let the matter drop. It has been suggested that as we are rejected by the Imperial Government, and must according to report, remain under India, we should set to work to try and get the Settlement proclaimed a distinct residency, with a legislative council of its own. No doubt such an arrangement would give us many advantages over our present anomalous position; but it still falls very far short of transfer to the Colonial Office in the benefits which it would confer upon this place, and as we are slow to believe that the question has been finally settled against us at Home, we prefer to hold on to our original demands.

The Calcutta hurricane has affected Singapore in two ways both for the painful interest it creates as a disaster to property of almost unparalleled magnitude, and because it directly and powerfully affects the mercantile interests, in so far that it will withdraw a large portion of freightage which is coming crowding in from China. The merchants, with a steady eye to the main chance, were already turning the calamity to good account, and large accumulations of all descriptions of marine stores were being bundled off to the scene of disaster.

Mr. D. C. Presgrave is appointed, as a temporary arrangement, to officiate as Police Magistrate and Commissioner of the Court of Requests at Prince of Wales' Island. The Hon. Lieutenant-Colonel Man resumed charge of the office of Resident Councillor, Prince of Wales' Island, on the 28th Oct. The Hon. Lieut.-Colonel Macpherson resumed charge of the office of Resident Councillor, Singapore, and Secretary to Government, on the 31st October. Lieutenant Henry Burn, late Indian Navy, resumed charge of the office of Master Attendant and Shipping Master at Singapore, on the 31st October.

The formation of a company for the cultivation of sugar in the Johore territory has been postponed, from considerations suggested by the state of the money market.

The *John Bright* and the mail steamer *Benares* had a close race of it on the way down from Hong Kong. The *John Bright* sailed two hours before the mail, and arrived here some four hours before her, having completed the passage in little more than four days and a half.

Mr. J. D. Vaughan, the police magistrate, has published a pamphlet on "the proposed route across the Isthmus of Kraw," by way of comment on the Report of Captains Frazer and Forlong, read before the Royal Geographical Society in January last. Mr. Vaughan sums up his conclusions as follows:—

There would be a saving in time, it is true, between Ceylon and Cochin China, but the question with the French would be whether as a mere speculation it would not be more profitable to touch at Singapore, a place representing a trade of 30 millions sterling, per annum (including that of Netherlands India; or at Kraw which represents no trade at all.

And, again, whether the saving in time would be compensated by the loss sustained in avoiding Singapore. In spite of all that can be written in favour of the Kraw route, the unbiassed mind will have to admit eventually that the centrality of Singapore, in connection with Java, the Islands of the Eastern Archipelago, Australia, and China, will ever make it the most eligible post for the meeting of steam lines.

The saving in time, too, Mr. Vaughan conceives to be overstated:—

Instead of fifty-six hours being saved on the Ceylon and China line, I make it forty-five, or eleven hours less than the time claimed by the authors of the report; and instead of nineteen hours on the Calcutta and China line in favour of the Kraw route, I show forty hours to the benefit of the present route. If we use the rate of calculation employed in the report, we shall find that forty-two hours saved on the Ceylon and China line would effect a saving of about 1,350 rupees on each trip; a sum that could not possibly defray the expenses of the Railway and Transit Company. From the above statement it is perfectly clear that the undertaking would be unsuccessful in a pecuniary point of view, independent of the expenses incurred in conveying mails, &c., for Singapore to their destination.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BONHAM—On the 4th Dec., the wife of Mr. F. C. Bonham, of 13, Victoria-grove, South Kensington, of a son and daughter, who only survived a few hours.

BOOKER—On the 29th Nov., at the Parade, Edmonton, the wife of Frederick Booker, of a son.

CAREY—At Foochow, on the 25th Oct., the wife of H. W. Carey, of a son.

FITTOCK—On the 1st Dec., at Southsea, the wife of James Fittock, Esq., prematurely, of a son, stillborn.

GEIGER—On the 30th Oct., at Richmond-lodge, Batavia, the wife of H. W. Geiger, Esq., of a daughter.

GITTINS—On the 29th Nov., at Stowting-hill, near Hythe, Kent, Mrs. Gittins, of a daughter.

GROSVENOR—On the 4th Dec., at Clapton, the wife of A. W. Grosvenor, Esq., of a son, who survived only a few hours.

NOBLE—At Hong Kong, on the 28th Oct., the wife of Henry Noble, of a daughter.

ULLETT.—On the 8th Dec., at Blythe House, the wife of R. B. Ullett, Esq., of a daughter.

MARRIAGES.

CHARTERIS—KEPPEL.—On the 30th Nov., at Quidenham Church, by the Hon. and Rev. Edward Southwell Keppel, rector of the parish and uncle of the bride, the Hon. Frederick William Charteris, Commander in the Royal Navy, and youngest son of the Earl and Countess of Wemyss and March, to the Lady Louisa Keppel, daughter of the Earl and Countess of Albemarle.

COLLINS—BORTON—At St. John's Cathedral, Hong Kong, on the 25th Oct., by the Rev. J. J. Irwin, D.D., Henry Collins to Francisca Theodora, eldest daughter of James Borton.

MATON—MANUEL—At St. John's Cathedral, Hong Kong, on the 29th Oct., by the Rev. J. J. Irwin, D.D., George Henderson Deaton, Government Marine Surveyor, to Margaret, second daughter of the late Rev. William Manuel, D.D., of Clapton, Middlesex.

DEATHS.

ALLAN—On the 3rd Dec., at 3, Albert-terrace, 191, Renfrew-street, Glasgow, Alexander Allan, Esq., late of Stirling, Law Agent. Friends will please accept of this intimation.

Digitized by Google

Beard—On the 18th Nov., at Portman-place, Maida-hill Catherine Charlotte, relict of Nathaniel Beard, Esq., and daughter of the late Sir Thomas Carr, of Beddingham Sussex, aged 80.

Dallin—On the 23rd Oct., at Hong Kong, on board the ship Monitor, Otto Dallin, carpenter, aged 23.

Fuller—Robbins—On the 21st Oct., at Shanghai, killed by the explosion of the steam-tug General Ward, Capt. D. S. Fuller, aged 55, and J. B. Robbins (mate), aged 35.

Knevitt.—At Rio (drowned) Edward Knevitt, Esq., Assistant-Paymaster H.M.S. Egmont.

Luard.—On the 9th Dec., at the residence of his father, 3, Gloucester-gardens, Hyde-park, deeply lamented, Captain Charles George Luard, of the Royal Artillery.

Pesctunger—On the 23rd Oct., at Hong Kong, at the Argus Hotel, Mrs. B. J. Pesctunger, native of Hanover, aged 52.

Thornton—On the 28th Oct., at the Seaman's Hospital, Hong Kong, Thomas Thornton, seaman ex ship Elizabeth Dawson.

Verfke —On the 12th Oct., at Yokohama, deeply regretted by his brother officers, Capt. the Hon. A. E. P. Verelker, H.M.s 20th Regt., aged 34; third son of the Right Hon. Viscount Gort.

COMMERCIAL REPORT.

CHINA IMPORTS.

Cotton Yarn—Has not met with any demand during the past fortnight, and the value of the article shows a decline of $1 to $2 per picul since the date of last report; the sales effected amount to 70 bales. Grey Shirtings: The sales reported under date of 14th instant appear to have supplied the wants of the dealers for the present, and during the past fortnight settlements have been limited to 2,850 pieces; prices are quoted slightly lower, and the market for these goods is very dull. White Shirtings: There is not any material change to notice in the value of these goods, but the inquiry for them has been extremely limited, and not more than 2,000 pieces have found buyers during the fortnight. T-Cloths: Prices of T-Cloths have receded to the extent of about 10 cents per piece during the fortnight which has elapsed since the date of last circular, and the demand shows a great falling off. The settlements effected amount to about 7,200 pieces, in addition to which some 1,200 pieces of sea-damaged goods have been moved off by public auction. White Spotted Shirtings, Dyed do., Brocades, White and Coloured: These goods maintain their value, and have met with an average amount of inquiry in this market since the departure of last mail; the sale reported consist of 550 pieces of Dyed Spotted Shirtings, and 1,250 pieces of Coloured Brocades. Damasks: Have found buyers to the extent of 250 pieces at previous rates. Chintzes: 500 pieces have found buyers. Handkerchiefs have been placed to the extent of 1,200 dozens.

Woollens.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: A fair amount of business has been transacted in these goods in this colony during the fortnight, estimated at about 1,200 pieces of Spanish Stripes, and 132 pieces of the other qualities. Sales of 546 pieces of Assorted Spanish Stripes are also reported from Foo-chow. Long Ells: The value of these goods remains as under date of last circular, with sales of 1,360 pieces reported, while in Foo-chow some 200 pieces HH Scarlet have found buyers at $9.25 per piece. Camlets: 610 pieces placed in this market at previous rates. Lastings: The transactions of the fortnight are put at 500 pieces. Blankets: These goods have met with a moderate amount of inquiry during the fortnight, and have been sold to the extent of 550 pairs, exclusive of 150 pairs of damaged sold at public auction.

Metals.—Iron, Flat, &c.: There is not any very material change noticeable in the value of iron, although the market is not perhaps quite so firm as it was some weeks ago. The transactions in this colony are estimated at 2,400 piculs of nail rod; 400 piculs of bar, and 50 kegs of wire. In Canton about 5,000 piculs of all kinds have found buyers. Lead: Has declined in value in this colony, and only 80 piculs have found buyers. In Canton sales of 2,000 piculs are reported. Tin: 100 slabs sold. Tin Plates: 200 boxes have changed hands. Steel: 250 tubs have been sold in Canton.

CHINA EXPORTS.

Tea.—Canton.—About thirteen chops of country Congou have come forward during the fortnight; the quality whereof is by no means unexceptionable. The settlements of that description have been trifling, owing to the unreasonable demands of the teamen. Canton Congous continue in moderate request. In Scented Teas only a small business has been done, quotations being unaltered. There has been some little demand for fine Canton Greens for France, but rates are unchanged.

Foo-chow-Foo.—The market has been quiet during the fortnight, the business having run on the better flavory kinds of Congous, which, being scarce, have advanced 5 mace. Broken leaf and common, being still wanted for Australia, have been fully maintained, tending up. Taking the inferior quality of the stock of Oolongs into consideration, prices are well maintained, and do not exhibit a decline of more than 2 taels on the high opening rates. Congous: 14 800 chests, 12,280 half-chests, and 1,000 boxes, at 6 to 13¾ taels for dusty and broken leaf; 13 to 17½ taels for common to good common; and 17½ to 24 taels for flavory to good flavory. Souchong: 965 chests and 228 half-chests at 17 to 27 taels for common to fair. Pekoe: 506 chests at 20¼ to 27 taels for fair to good. Oolong: 15,000 half-chests and 2,266 boxes at 16 to 22 taels. Scented Teas: 1,600 boxes dust at 9½ to 10 taels, and 4,230 boxes medium kinds at 20 to 27¼ taels.

Shanghai.—Black: Only a limited business is reported at prices which show no change on previous quotations, although in many cases they have been very irregular. The settlements have been as follows:—7 chops Oopacks at tls. 24 to 26; 6 chops of Oonahams at tls. 19 to 24; 5 chops of Ningchow at tls. 23½ to 27; and 7 chops of Hohows at tls. 17 to 19.7.5., which lay down in London at 1d. to 2d. per lb. over last mail's quotations. Arrivals from Hankow are small, and the stock is very much reduced. Green: A very limited business is reported, most buyers still refusing to come into the market unless at a considerable reduction on previous rates. Some small settlements have been made which establish a decline of about three taels on Shanghai packed and Pingsueys, two chops of the latter having been taken at taels 32 to 35½ proportion. Stocks continue to increase, but holders of country teas will not give way in their demands, and are storing their stocks.

Hankow.—The market has maintained a quiet tone throughout the past fortnight, chiefly owing to the high rate of exchange and the scarcity of good teas now offering, the present stock (with very few exceptions) consisting of coarse coming on 3rd crops. The teamen have evinced more anxiety who sell during the last few days; as yet, however, no reduction can be quoted in prices. Settlements for the fortnight are 30 chops (including 1 contract sent to Shanghai), making the total settlements for the season 630 chops, and leaving a stock on the market of about 50 chops. Quotations are:—Oopacks, common HH., 19 to 20; Oonams, do., 16 to 17.

Kiukiang.—Arrivals of new Green have increased the stock to 52,000 half-chests (including 6,600 contracts), but not a single settlement has been made, nor have buyers exhibited any disposition to purchase; on the other hand, the teamen appear unwilling to force their teas on the market. The teas to hand exhibit an inferior make as compared with those of last season, probably owing to the hurried manner of preparation (the rebels being in close proximity at the time of manipulation). Receipts since the commencement of the season amount to 68,000 half-chests, of which 9,000 are contracts, and 7,000 settlements.

Yokohama.—Little or no business has been done in this article. Prices have still a downward tendency, estimated at 100 piculs. Quotations are as follows:—Common nominal, $8.00 to 12.00; good common, 14.00 to 18.00; medium, 19 to 23; fine, 24.00 to 30.00; old common, 4.00 to 12.00.

Raw Silk.—Shanghai.—The market during the fortnight has been very active, settlements baing estimated at 3,000 bales. The arrival of the 26th of August with higher quotations, and a considerable decline in our rate of exchange, led to large transactions. Prices have advanced 10 to 25 taels per picul, and purchases have been taken from all descriptions. The supply from the interior having been moderate, the stock is considerably reduced. From Japan 1,986 bales have arrived. The present unsold stock is 4,000 bales against 11,000 bales same period last season, and 11,500 the season before. Tsatlees: No 1 chops, 470 to 480 taels per picul.

Yokohama.—The visit that the Foreign Ministers paid to Yedo has been productive of a great deal of good. In consequence of their urgent representations, silk has again come down to Yokohama freely and in considerable quantities, and it is confidently expected that it will continue to do so. All the Silk that arrived at first had been contracted for, or advanced upon, but after a little while large parcels were put on the market, and an active demand arose which caused prices to reach an unprecedented height, say $600 for Mybash; within the last two or three days, however, the market has become more quiet, and prices are a little lower, with a downward tendency. The settlements of the last fortnight may be estimated at about 2,500 bales. The unsold stock on the market is not heavy, but supplies are coming down daily. Mybash, best parcels offering $585 to 595.

Drugs, &c.—Cassia: Settlements are reported of 500 piculs a $15.65 to 15.70. The stock is reduced to 600 pls., but as supplies are shortly expected, rates may give way. Cassia Buds: At small lot of 8 piculs has arrived, for which the extreme rate of $59 to 60 is asked. China Galls: Since the departure of the last mail, advices have been received of the failure of the expected crop; the old stock of 100 piculs is now consequently held at $14, which is an advance of 1¼. Vermilion: As last quoted, say $14½ per box of 50 catties. Rhubarb: The old stock of 130 piculs remains untouched, the views of the holders continuing quite unreasonable. Musk: No settlements, a small chop of 30 catties of fair quality has arrived and is held at $95 per catty; another chop of 100 catties being too inferior for export to Europe, is being shipped to the north of China. Galangal: Nominally $2 to 3, no buyers for Europe. Essential Oils: None on the market. Camphor.—Hong Kong: 400 piculs have been sold during the fortnight at $19 per picul, and there is not much demand for the article either for India or the home markets. No further supplies arrived, and stock on hand amounts to only about 300 piculs.

COTTON.

Hong Kong.—*China Trade Report:*—The rumours of an armistice in the United States have completely prostrated the market, and the few sales reported have been made to the Chinese. The total sales of the fortnight hardly reach 3,000 bags, whilst fully 10,000 bags are added to the stock. The nominal quotations are, Shanghai new $25 to 27, old $25 to 26. Shanghai new $27 to 28. Japan $33, nominal.

Shanghai.—The last report was dated October 7, for the mail per Aden. During the fortnight our market has steadily but slowly declined, and, no doubt, had the cotton come forward as freely as anticipated, or even had cotton at present in Shanghai been dry and saleable, a greater decline would have taken place. The quantity of cotton on the market which purchasers are inclined to take is very limited. Our last advices of the Liverpool market, and the excessive rates of exchange here, conduced to lower rates. Prices asked for good Shanghai cotton are this day tls. 18 to 18 50, at which there is very little offering. The Chinese, we are glad to state, are receiving some severe but wholesome lessons with regard to wet cotton, and many of them must be losers by having it thrown on their hands. They are necessitated to open it out and dry it, and their resources for such operations do not improve the article either in staple or colour. There is no doubt that cotton at tls. 14 to 15 would pay growers well, and it might not therefore be unreasonable to expect a decline to these figures; still if the next mail brings no extraordinary advices, we do not anticipate any serious decline. The market it is anticipated will be maintained by the demand consequent on the necessity to load such a number of ships laid on expressly for cotton, and the anxiety to fulfil contracts and disputes between buyers and sellers by contract as to quality of Cotton have thrown the market into considerable confusion but, of course, this will have only a temporary effect; already purchasers are giving way and making some concession to sellers, which in the declining state of the market is probably advisable. In the meantime only a few houses are buying, preferring to wait news by the mail. The decline in Ningpo rates is, if anything, greater than those here, being from

Digitized by Google

$33 (last mail's quotations) to $27.50 to 28.50. Tien-tsin cotton good quality, has been sold at tls. 18, showing a decline of 2.50 per picul during the fortnight. Small parcels of Hankow have arrived, but no sales have transpired. Large supplies are looked for shortly from all quarters, kept back, no doubt, by the late rains and by the fear of sending forward cotton which has been wet, and which the owners, learning wisdom, considered advisable to detain and dry before bringing on the market.

TIEN-TSIN.—The receipts of new staple have been very small up to the present time, contract parcels excepted, which have come in freely. We estimate the settlements on the market at 800 bales, on foreign account, at tls. 14.2.0 to 14.7.5 per picul. Purchases, we hear, have been made by Chinese for shipment principally to Amoy and Foochow, at tls. 14.8.0 to 15.5.0 per picul. We quote best staple to-day tls. 15.0.0, and as supplies are likely to come forward in large quantity during the present month, we look for easier rates, unless advices from the south should, in the meantime, tend to keep prices up.

NINGPO.—The nominal quotation is $29.30 per bale of 118 to 120 catties, but the panic prevails here as elsewhere amongst shippers, owing to rumours of an armistice in the United States, and it may be said that there are no buyers at anything near the quotation.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Shanghai (per Tael.)	6 months sight.	6s. 7¼d. to 6s. 8¾d.	6s. 8d. to 6s. 9d.
At Canton, At Hong Kong, At Macao	6 ditto	4s. 9¼d. to 4s. 9½d.	4s. 10d. to 5s. 0d.
At Singapore	6 ditto	4s. 9d. to 4s. 9¼d.	4s. 9¼d. to 4s. 10d.
At Manila	6 ditto	4s. 6¼d.	4s. 7d.

At Shanghai, Bills on India, Rs. 314 to 315 per 100 taels. At Hong Kong, Rs. 223 to 224 per $100. Bar Silver at Shanghai, 111 taels; at Hong Kong, 9 to 10 premium. Mexican dollars at Shanghai, taels 73 per 100, and Exchange on Hong Kong, 28 to 29 discount.

SHIPPING INTELLIGENCE.

ARRIVALS.

At KANAGAWA.—From London: Oct. 9, Medina.

At SHANGHAI.—From London: Oct. 10, Weymouth; 14, Isles of the South; 19, Tamerlane and P. C. Munroe. From Newcastle: 12, Grenadier; 22, Sea Nymph. From Cardiff: 13, Zingra; 19, Allandale. From Shields: 13, Edith; 20, Jeanie Douglas. From Newport: 16, Princess of Wales. From New York: 18, Apollo; 20, Guiding Star; 21, Queen of the Seas, Costa Rica, and Jubilaum.

At FOO-CHOW.—None.

At HONG KONG.—From Swansea: Oct. 18, Isabell.

At MANILA.—From Liverpool: Oct. 13, Ercilla. From Cadiz: 7, Carmencita.

At SINGAPORE.—From Cardiff: Oct. 24, Woiziava; 29, Marrianne; Nov. 6, Ocean Bride. From Hartlepool: Oct. 31, Queen of Commerce. From Amsterdam: 23, Maria Adolfini.

At PENANG.—From Glasgow: Oct. 11, Hoang Ho.

DEPARTURES.

From KANAGAWA: For London: Oct. 3, Lucknow; 10, Comus.

From SHANGHAI.—For London: Oct. 13, Toficombe; 22, Rifle; 23, Far East (str.); 24, Cleveland. For Cork: 24, Elizabeth Ronneberg.

From FOO-CHOW.—For London: West Derby, Gauntlet, and Cour de Lion.

From HONG KONG and CANTON, &c.—For Liverpool: Oct. 14, Mount Stuart, Elphinstone. For Hamburg: Oct. 18, Catharine; 19, Gustav and Ernst. For London: 25, Cambula.

From MANILA.—For London: Oct. 14, President, Harbitz. For New York: 13, Horatio.

From SINGAPORE.—For Marseilles: Nov. 7, Ocean.

From PENANG.—For London: Oct. 13, Isabella; 29, Wellington. For Bordeaux: 23, Concorde.

LOADING.

At KANAGAWA.—For London: Alfred Hawley, Gabalva, Little Edith, Mountain Ash. For Liverpool: Amelia.

At SHANGHAI.—For London: Avondhue, Agincourt, Beemah, Canadian, Countess Russell, David Melvor, Glenclune, Bosworth, Delhi, Spirit of the Deep, Diligentia, Carrizal, John Staunton, jun., Palawan, Queen of the Ocean. For Liverpool: Gwallior, Queen of the East, Sir W. F. Williams, Spec, Sailor's Home, Savior Faire, Ærolite, Ariadne, Constance, Coringa, Dennis Horton, Her Majesty, Norah, Gleame, Roodee. For New York: Clara Babuyan.

At FOO-CHOW.—For London: Ellenborough and Verbena (full), Carisbrook, Prince Alfred, Blencathra, Lord Clyde, Langdale.

At AMOY.—For New York: Falcon.

At HONG KONG and CANTON.—For London: Xulla. For Liverpool: Melbreck, Jas. Vinnicombe. For Hamburg: Emily. For New York: N. B. Palmer.

At MANILA.—For London: Sea Belle. For Liverpool: C. S. Lemon. For Falmouth: Malvina Vidal, Ocean Home. For New York: Windward.

At SINGAPORE.—For London: Maid of the Tyne, Northumberland. For Boston: Borneo.

At PENANG.—For London: Southern Cross.

FREIGHTS AND CHARTERS.

KANAGAWA.—To London: Cotton and tea, £3. 10s., and silk, £4. 10s. per ton of 50 cubic feet.

SHANGHAI.—To London and Liverpool, £3. 10s. to £4. per ton. Nominal.

FOO-CHOW.—The present rate is £3. 10s., but in consequence of large arrivals expected, it is not likely to be maintained.

HONG KONG AND CANTON.—The following is from George Holme's Circular:—Xulla (627), on the berth for Port Elizabeth and London, at £3. 5s. per ton; Violet (496), to Foo-chow for London, £3. 7s. 6d.; Maribelle (1,019), to Shanghai for Liverpool, at £3; Kite (188), Foo-chow to Europe, at £4. 5s.; Bonnie Lassie (352), Foo-chow to New York, £3. 5s.; Lucknow (352), Bangkok to Europe, £4. The rates to Rangoon and back are 70 to 72½ cts.; if ordered north 20 to 25 cts. extra. To Bangkok and back, 45 to 50 cts. per picul; 25 to 27½ cts. extra if to Shanghai.

MANILA.—The English barque Sea Belle has been fixed for London with 100 tons Clayed Sugar at £2. 10s. per ton, and 5,000 quintals Tobacco a £4 per 50 cubic feet. The Ocean Home has engaged for London or Liverpool, 2,000 bales Hemp, at £4. 10s. per ton. The American ship Windward loads for New York with Hemp at $18 currency per 40 cubic feet.

SINGAPORE.—Although arrivals of seeking vessels have been numerous rates for Europe show an improvement, the rate for dead weight is £3, and measurement £4 per ton.

PENANG.—The British ship Southern Cross engaged about half her cargo on arrival at £3 per ton for dead weight, £3. 10s. light freight, £4 measurement, but since receipt of the advices of the disasters to shipping in the Calcutta river, an advance of 5s. per ton has been obtained for the remainder of her room.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—Oct. 9, Antares, Bordeaux to Saigon; 14, Pillen Elena, Cardiff to Shanghai; 17, Prince, Liverpool to Hong Kong; 21, John Ritson, Sunderland to Sourabaya.

From UNITED STATES to CHINA, &c.—Oct. 20, Blondel, Boston to Singapore; 22, Capella, New York to Batavia.

From CHINA to ENGLAND and CONTINENT.—Oct. 6, Iona, from Sarawak to Queenstown; 9, Staffordshire, Manila to London; 12, Fiazel, Shanghai to Liverpool; 17, Lord Dalhousie, Hong Kong to Liverpool; Everest, Canton to Liverpool; Marquis of Londonderry, Shanghai to London; 19, Great Western, Nagasaki to London; 20, Sarah Newman, Shanghai to London; and 21, Eastern Queen, —— to London.

From CHINA, &c. to UNITED STATES.—Oct. 9, Samuel Russel and Queensland; 17, Daniel Drape, Bangkok; 11, Mary, Shanghai, from Foo-chow to New York; 18, Endeavour, Foo-chow; Maggie Leslie, Amoy; all to New York.

CASUALTIES.

SHANGHAI.

The tug steamer General Ward, Captain Fuller, has been totally destroyed by the explosion of her boilers. All on board, except one Chinaman, appears to have been killed, and he severely wounded.

HONG KONG.

The steamer Far East has been obliged to put into Hong Kong, in consequence of a serious leak. After discharging 400 tons of tea the leak was discovered, stopped, and the tea re-shipped, and she was to proceed on her voyage on the 1st November.

COMMERCIAL POSTSCRIPT.

COTTON.—The sales on the London Market for the past week were 10,000 bales on the spot, and 200 to arrive. Prices at the opening showed an advance of ⅛d. per lb., but business afterwards became dull, and quotations now rule about the same as last week. At Liverpool, also, East India descriptions have been in active demand by the trade, and prices of the better descriptions advanced fully 1d. per lb. over last week's rates. The limited inquiry of the past two days has, however, caused part of the advance to disappear. China and Japan have been heavy of sale.

TEA.—At New York, November 26, a steady market, with a firm business. Sales 4,270 half-chests Oolong, and 300 green, at previous rates.

According to a circular of Messrs. Arles, Dufour and Co., of Lyons, the silk trade of that city remained dull until about the end of last month, when a better feeling arose, owing principally to the partial recovery of financial confidence and the reduction in the rate of discount. Prices now show a considerable increase of firmness, and even a slight advance has been obtained on French, Italian, and Levantine saw silks, the stocks of which are small, and will soon be exhausted In China sorts, also, there has been more doing, but in the demand for Japan silk there has been no improvement, and buyers are looking for lower rates, should the present anticipations of important arrivals from that quarter be confirmed.

ARRIVALS NOT INCLUDED IN THE TABLES.—Dec. 6, off Dungeness, from Java, Decima; 8, at Falmouth, from Batavia, Peeress; 7, at Havre, from Maulmain, Ville de Basle; at Queenstown, from Maulmain, Susan M. Dudman; 9, at Falmouth, from Manila, Der West; 9, off Plymouth, from Shanghai, Essex; 10, at Queenstown, from Maulmain, Melicete; 11, at London, from Hong Kong, Adriatic; 8, at Texel, from Batavia, Wilhelmina Maria; 12, at London, from Hong Kong, Chanticleer.

DEPARTURES.—Dec. 7, from Cardiff, for Shanghai, Egeria; 8, from Antwerp, for Singapore, Indus; 9, from Cardiff, for Galle, Henry Cook; 10, from Rotterdam, for Batavia, Æolus; 12, from London, for Colombo, Percy Douglas; for Singapore, Norfolk; for Moreton Bay and Foochow-Foo, Ziba; 12, from Liverpool, for Batavia and Sourabaya, Helvetia.

SPOKEN.—Dutch barque, Batavia to Rotterdam, 80 days out, Nov. 22, 32 N., 37 W.; Vriendschap, Batavia to Rotterdam, Dec. 3, 45 N., 20 W.; Waterwitch, Liverpool to Shanghai, Oct. 30, 8 S., 31 W.; Flora Belg. barque), Swansea to Hong Kong; Nov. 10, 2 N., 22 W.; Berwickshire, Liverpool to Hong Kong, Nov. 12, 5 N., 23 W.; Lewe van Nyestein (Dutch barque), Batavia to Amsterdam, Oct. 25, 17 S., 5 W.; Thos. Blythe, China to Queenstown, Nov. 2, 6 S., 17 W.; Wm. Stairs, Penang to London, Aug. 15, 2 S., 89 E.

LAID ON.—At London: For Colombo, Palestine; at Liverpool, for Batavia and Sourabaya, Silvercraig; for Yokohama, Raphael.

Digitized by Google

At Table Bay.—Oct. 26, Parmenis, Laird, sailed for Singapore.

Casualties.—The Harry Puddemsey, Moir, from Liverpool, for Singapore, put into Milford, Dec. 8, with rudder braces carried away, having been struck by a sea and experienced heavy weather.

A carriage, several cases of castings, and a quantity of merchandise were sent up by the divers on the 6th Dec. from the wreck of the Robin Hood.

ROBBERY OF TRAVELLERS FROM INDIA IN EGYPT.

A Malta letter of the 3rd states that the last passengers from Bombay had their luggage opened by persons connected with the railway during the journey from Suez to Alexandria, and while the property was in charge of the Egyptian authorities. Colonel O'Connell, R.A., is said to have lost among many other things £250 in sovereigns; Captain Mann, R.A., and Colonel Woodfall also suffered severely. Money, jewellery, and boots appear to have been most sought for; ladies' dresses seem to have been little valued. The robbers must have been hurried, as those things which they considered not worth keeping were put back in the wrong trunks. One gentleman, on opening his box, found the whole of his wardrobe gone and replaced by a crinoline. The robbers must have been cunning rogues, for the well-used luggage with many tickets on it, indicating that the owners were old hands at travelling, and, therefore, unlikely to put valuables into their trunks, was untouched. The Pacha, the English Consul, and the other authorities have been informed of these robberies, with a view of recovering damages.

THE STRAITS TRANSFER.

(THE TIMES.)

The busy settlement of Singapore is rich in the industry of 70,000 Chinamen and of half that number of Malays. Situated almost immediately under the Equator, its atmosphere is cooled by frequent showers and its environs are adorned by all the fragrant shrubs and gigantic vegetation of the torrid zone. Singapore is the queen of a cluster of unnumbered islets, were everything that yet is strange and unfamiliar in this matter-of-fact world is found or fabled, and Singapore is also the portal of that great Eastern Archipelago which is certainly destined hereafter to play a first-rate part in the world's history. The present prosperity of this great port is, however, dependent upon a necessity which the cutting of a ship canal may any day take from it. It is the great house of call between the Western and the Eastern World only for want of a water way across an isthmus. Commerce is, on this account, forced down southward many a league, and the harbours of Singapore are always crowded with ships, and her hotels are, through the same agency, noisy with American bowling-alleys and loud Anglo-Saxon argument, and other evidences of progress and civilisation. Singapore, therefore, has a right to take much pride in herself, and, like any other prosperous Eastern beauty, to think herself no small prize. She is just now anxiously considering upon whom she shall throw herself away. The English Colonial-office and the Indian Government are the two swains between whom her affections, or rather her calculations, are vibrating; and there is a very edifying controversy in the Singapore papers as to which may be expected to be the more indulgent lord, and which may be made to minister most extensively to the comfort and extravagance of the settlement.

Singapore was bought by the East India Company some half century since from some barbarian black Sultan who claimed title to it. No doubt Sir Stamford Raffles showed great judgment in recommending its acquisition. It is wonderfully well placed as a common emporium; and it is impossible not to see that in case of war the occupation of this point in sufficient force would command for good or for evil the trade with China. To the East India Company in those days when they were traders and Sovereigns, Singapore was at once a sword and a purse. But the time has come when the governing power cares little for commercial profit and nothing for extended empire. The profit does not go direct into the Treasury, and the empire is under the guardianship of the general Imperial Government. The Government of India no longer feels any obligation to keep up expensive outlying stations in order to check the undue advance of foreign Powers in the Archipelago or to protect the trade to China. In their eyes, Singapore has lost all claims to special admiration on account of her strategic position, or even her commercial convenience. "What is she worth?" "What does she bring?" are the only questions that have weight now in Calcutta. Unfortunately, Singapore is not in this point of view especially desirable. She is very rich and very prosperous, but she is also very selfish and very extravagant. It has been proved by a sufficiently extended experience that a state of deficit is the normal condition of her finances. She is a wife who has a very fine property, but she spends it all upon herself and leaves a large balance of debt to be paid by the already embarrassed husband. Under these circumstances the affection of the Indian Government has somewhat cooled, and she finds a great abatement of the earlier devotion. It is remembered, however, that "the Indian Government has borne for years a deficit balance-sheet without a murmur, besides showing great liberality in the assistance it has always given to works of public utility; and, while a large portion of the Singapore community are for putting themselves under the immediate jurisdiction of the Colonial-office, others retain a certain interested fidelity to the old Indian connection. Singapore is thinking aloud just now, and both the Home Government and the East India Government are sufficiently interested in the subject of her thoughts to make it worth their while to listen to her. If she pass over to the Colonial Government, she doubts whether her annual deficit will be handsomely paid, as before, and no question asked. She fears, too, that under the new connection she would get no contributions to her enterprises of public utility. She is, moreover, very much afraid that, "as the Colonial Secretary has to find berths for relations of obnoxious members of Parliament, who are in nine cases out of ten not fit to hold a very inferior position at home," Singapore as a Crown colony would have to provide for these Parliamentary encumbrance. On the other hand, she knows that the Colonial-office does not levy taxes, and the Indian Government does. Singapore is in a mortal fright about the Indian income-tax; and the stamp duties payable in rupees are an abhorrence to the Bay of Islands. That annual deficiency hangs heavy upon her conscience, and there is a sad suspicion that she will not be allowed to go on for ever running up annual bills to be paid without a murmur by an exemplary Government. Such are the present thoughts of Singapore, and under their influence application has been made to the Colonial-office to know whether she will be allowed to transfer herself from the torrid amenity of the Governor-General of India to the cold propriety of Downing-street. An encouraging reply was first returned. Before, however, any decisive answer was given, she has, we believe, been rather rudely asked whether she is quite sure she is solvent. The question has caused considerable excitement, and some indignation, in the settlement. It is thought that the British Treasury and Colonial-office ought to have known that the applicant was already insolvent, and the demand for some proof that she is in good case, and has a surplus revenue, is taken in Singapore as a proof of a mean and mercenary disposition, unworthy of a generous Government, and insulting to a handsome Eastern dependency.

The islets of the Straits are said to produce pirates, cannibals, flying monkeys, gigantic serpents, and vampire bats, in addition to such expensive delicacies as shark fins, sea slugs, and birds'-nest soup. Very few of these things have hitherto found their way to England among our imports; but we fancy we detect the presence of a very lively young vampire in this last bundle of despatches. From what she has already done with the black-skinned Indian, we imagine Singapore would be a very powerful bloodsucker if transferred to the fair, florid, and sanguineous carcass of a Western country. We picture it to ourselves already gently fanning the wound, and vigorously pulling at the vein. There are, we believe, two regiments of Sepoys and a few guns on the Governor's Hill, just sufficient to keep the Chinaman in tolerable order. But if Singapore were a Crown colony, garrisoned and fortified by the Imperial Government, we cannot tell how many regiments of European troops would suffice for its dignity, or what amount of fortification would be necessary for its safety. There is much better opportunity for a few wars among the native Powers of the Archipelago than ever existed in New Zealand. There would be no difficulty in making an unanswerable case for spending twenty millions of money at Singapore, and they would be as well laid out as equal amounts often have been in other colonies. We may be sure that the good-tempered, hospitable inhabitants would receive our soldiers with open arms, and would never be jealous of any amount of fortifications we might build, or complain of any amount of money we might spend. We should very soon be told to think of the position which Singapore holds, and what her influence must be upon the future destinies of those great island continents—or rather upon our future destinies as linked with theirs—and we should be asked, what is twenty millions, or a hundred millions, as the price of a lock upon that treasury of the future—a lock of which we might keep the key? We have heard something of this sort before, and we should hear a great deal more of it if Singapore became a Crown colony. We have nothing to say against it, except that we shall rejoice most sincerely in any amount of strength and prosperity and magnificence that Singapore can attain, if she can arrive at it by the profits of her own trade or by the generosity of the Peninsular and Oriental Company, to which she is already so much indebted, or by any other means which do not bring her into the Parliamentary Estimates. But we do most sincerely assure her that if she is so fortunate as to now have her annual deficit paid without a murmur, she is better off as she is than she could possibly be with us. England wants no more insolvent colonies.

[Readers of our paper will know that the writer of this article is very much in error on many points. We shall notice more fully in our next. —Ed. *L. and C. T.*]

MERCANTILE CONSULS.

(To the Editor of the *London and China Telegraph.*)

Sir,—In your issue of Nov. 28, I notice a remark by your Hamburg correspondent upon which I think some observations may be usefully offered. Your correspondent says:—"Two years ago the head of one of the German firms in Shanghai offered his services as Austrian Consul at that port without any reward or remuneration; but his *generous offer* has not been accepted," &c. The words which I have italicised your correspondent evidently uses in the most innocent manner, and I am aware that an impression prevails extensively to the effect that, in volunteering to act as Consuls without remuneration, merchants are usually actuated by entirely disinterested motives. In saying a word or two to controvert this opinion, and to point out some of the evils which arise from this practice, I am simply repeating statements which have been frequently urged in all the newspapers in China, and, inasmuch as I am quite ignorant which German firm it was which tendered for the contract to do the Austrian Consulship at Shanghai, my remarks can have no personal bearing of any sort. The fact is, individuals and Governments in Europe too frequently lose sight of the consideration that Consuls in the East, and, above all, in China, are in name only functionaries of a similar class to those who in civilised countries are appointed principally for the purpose of seeing to the due execution of navigation laws. The difference between a Consul—say at Bordeaux or Riga, and an officer bearing the same title at Shanghai or Hankow, is as wide as that existing between an ordinary police magistrate and one of the highest judges in the land. The treaties which in the East place exclusively under Consular jurisdiction the subjects of the respective European States confer necessarily upon the Consuls themselves functions and responsibilities of the most extensive nature, which, in order to ensure their fair discharge, ought most imperatively to be entrusted to independent and disinterested persons. A reference to Lord Elgin's Blue-book will show that in 1858 the Chinese Commissioners protested strongly against the future appointment of mercantile Consuls by any nation, knowing, as they did, that with the exception of England and France, all the European Powers were represented at the ports by merchants, frequently of the most indifferent character; and in the Treaty concluded with Portugal two years ago, there exists an express stipulation that no merchants should, for the future, be appointed as Consuls for Portugal. This clause was probably introduced owing to the knowledge, on the part of

Digitized by Google

Prince Kung, of the atrocities perpetrated by Macaoese at different times and places, who were actually in partnership with the worthies holding Consular commissions from the Portuguese Government; but this clause was entirely disregarded, and merchants continued to act as before in the capacity of Portuguese Consuls. It may be added that these functions having of late years been confided to the representatives of an English house of the highest probity, the Chinese Government has probably not had cause to complain of any injury from this source; but as it has recently refused to ratify the treaty with Portugal, no doubt the violation of the clause in question was made one of the grounds for so doing.

Austria, the country to which your correspondent especially refers, has, as yet, taken no steps to conclude a treaty with China, but her great ally —? antagonist—Prussia, has already followed in the steps of England and France, and obtained recognition at Peking. The Consuls appointed under her treaty are all merchants, and as a fair criterion of the consequences which are inevitable in such appointments, I may repeat a story I have heard from a well-authenticated source, that the first official act performed by one of the principal German Consuls in China was to endeavour to obtain a reduction in the regular duty on sugar, in favour of one of his own shipments of this commodity; and many other instances could be adduced to show that Consular functions, when confided to merchants, are but too frequently made the means of obtaining individual profit. The fact that the national character inevitably suffers by such acts should at least cause a Power which, like Austria, is always distinguished by a certain chivalrous feeling of honour, to prefer incurring a certain amount of expense, if the object in view is at all desirable, rather than to incur odium through an illjudged economy. The interests of Austria, however, can scarcely require an expensive staff in China. It is very doubtful whether she can have a score of subjects at present residing at all the ports put together, and her shipping in the Chinese waters is as yet very insignificant. One *charge d'affaires* to intervene in the rare case of a Customs' dispute, or of any offence committed by or against an Austrian subject, would probably amply suffice for her international requirements, whilst abstinence from the appointment of mercantile Consuls would greatly redound to the credit of her Government. In order further to point out, in conclusion, how awkward may sometimes be the position of a merchant acting as Consul, it is only necessary to suppose the case (which, indeed, has actually happened) of a native firm doing business with the *merchant* having occasion to sue him before the *Consul!* Or let us suppose (what has also more than once occurred) a Consul calling upon the Chinese authorities to take proceedings against a native, against whom he, as a merchant, has a claim. It would be giving too much credit to human nature to suppose that where official influence is necessarily so powerful it would not overbalance strict justice. One of the most amusing cases of this kind I can recall, is in connection with a Peruvian "Consul" at Canton, who had come to China as agent for one of the coolie kidnapping firms at Callao, and had also a duly authenticated commission as Consul for Peru. This ingenious functionary, the only Peruvian at Canton, addressed a despatch to the Viceroy somewhat in the following terms:— "I, the Consul L ——, have received an application from the Peruvian merchant L —— requesting permission for the establishment of a coolie barracoon, and I have the honour to support this application, &c., &c." Fortunately the Viceroy saw through the scheme, and taking no notice of either Consul or coolie agent, the Peruvian functionary one day absconded, leaving nothing but debts behind him. I think that were a few facts such as these duly weighed by the European Governments, they would abstain for the future from making these objectionable appointments. M. H. L.

London, December, 10.

MR. LAY'S PAMPHLET ON CHINA.

Mr. Hardwicke publishes a pamphlet on "Reasons for the Dissolution of the Naval Force under Captain Osborn." This will be noticed in our next.

PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY.

On the 6th inst., the twenty-fourth annual general meeting of the Peninsular and Oriental Company was held at the company's offices, Leadenhall-street; ARTHUR ANDERSON, Esq., in the chair.

The CHAIRMAN, in moving the adoption of the report, said that he should confine his observations to two points. The first related to the cyclone and its effect upon the company's vessels and property. The *Bengal* had been taken by the force of the cyclone and landed high and dry upon the land. The officers of the company reported that it would require a considerable expenditure to float the *Bengal*, but when floated he hoped that she would be fit for service again, as her hull was quite uninjured. Much credit was due to the company's servants in Calcutta for preparing the *Nubia* to be ready for the conveyance of the Australian mail. The *Hindostan* was an old hulk, and she did not stand for anything in the company's books. The transit through Egypt was a most important thing for the company. He recollected the time when the cost of transit through Egypt was £15, but now it was reduced to £2. 10s. (Hear, hear.) But, after all, that was not the most important consideration. The Pacha of Egypt did all that he could to improve the transit, and for this purpose he looked out for persons who would be most competent to act as guards on the Egyptian Railway. With this view he looked out for an English general manager and traffic manager, and the board were at that moment engaged in taking steps to fulfil his intention. With regard to the new contract which had been entered into with the Government of Egypt, he thought it was only right to mention the names of Mr. Davidson and Mr. Ritchie, who, after the principle had been agreed to by his friend, the deputy-chairman carried out the details of the agreement in a masterly manner. He would only observe, in conclusion, that the present Viceroy of Egypt endeavoured to promote, as far as he could, the material prosperity of the country which was the great thoroughfare between the East and the West (Hear, hear.)

Mr. HADOW, the deputy-chairman, seconded the motion.

Mr. GLIDDON complained that the items of expenditure, which amounted to £2,300,000, were set forth in such a general manner as to make it impossible for the shareholders to deal with them in an efficient way. Items of expenditure to the amount of £1,033,000 and £155,460 were lumped together in such a way as to be utterly worthless for any purpose of information. He thought the details of these large sums ought to be set forth in the account. During the last five years no progress had been made by the company, while the capital had been increased one-third, and the value of the company's ships had been increased one-third. During the last five years they had incurred losses to the amount of £500,000, and he considered they ought to have a dividend equivalent in some respect to the perilous nature of their voyages. He thought the company should provide for the accommodation of second-class passengers.

Mr. JONES believed that if there had been an enlarged dividend there would have been increased opposition to the directors at home, and that the Government would ask for a diminution of the amount which they paid for the conveyance of the mails. With regard to the conveyance of second-class passengers, he thought better arrangements ought to be made by the directors. But what he principally rose for was to ask whether there was any intention on the part of the board to fortify some station at Bushire or the Persian Gulf, with a view to protect the company's vessels in the event of a war with Russia, for it appeared by the last accounts that Russia was looking for an extension of territory which would bring her to the northern frontier of India.

The CHAIRMAN said that it was impossible at present to give an account of the losses which had been sustained by the company on land on account of the cyclone. There was no necessity for replacing the *Hindostan*, which was a mere hulk. With regard to the accounts, they would require a cartload of papers if they gave all the details which the hon. proprietor required; but every proprietor was free to examine the books of the company, and to see for himself whether the accounts were accurate or not. (Hear, hear.) With regard to second-class passengers, they were ready to take them when there was room for them. But it was not to be expected that, when all their space was claimed by first-class passengers, they should take second-class passengers. (Hear, hear.) During the last year, although the passenger fares had been diminished, there was an increase of £50,000. The freight for goods and specie had not been so large, owing to the competition of the French company. With regard to the observations of Mr. Jones, he could only say that the last Russian war had been very profitable to the company. (Laughter.) With regard to the iron of their vessels, they looked out for the best. They tried steel for shafts, and had broken one. Such had been the result of their experience in this matter.

The motion was then put and adopted, as was a resolution for the payment of the dividend. A vote of thanks was passed to the company's officers in Calcutta, "for fitting out the *Nubia*" with the celerity they did, and to the chairman and directors, which terminated the proceedings.

The report of the directors is as follows:—

The capital account shows that the company stood possessed, on the 30th of September last, of stock in ships, less the amount deducted for depreciation, £2,524,766. 10s. 1d.; also of freehold and leasehold property in England, and docks and premises at Calcutta, Bombay, Hong Kong, Singapore, and other stations, £158,962. 4s. 7d; and stock of coals, naval and victualling stores, amounting to £339,688. 10s. 7d.; also cash at bankers', investments, bills receivable, balances in agents' hands, and debts due to the company, £557,751. 4s. 2d.; making the total assets £3,581,168. 9s. 5d. The capital received from proprietors at that date amounted to £2,100,000; and there had been received on debentures £498,090; total capital, £2,598,000; the liabilities of the company, in bills payable and otherwise, amounted to £525,441. 16s. 5d.; making the total capital and liabilities £3,123,444. 16s. 5d., and showing a surplus of £457,726. 13s. This surplus is represented by the balance at the credit of the general reserve fund. The revenue account shows that the gross revenue or income of the company, from freight, passage-money, postal service contracts, and other sources, amounted, for the twelve months ending 30th September last, to £2,346,203. 0s. 2d.; that the expenditure and charge on revenue, including interest on debentures, with the reserves made for insurance, wear and tear, and depreciation for the same period, amounted to £2,120,544. 2s. 3d., leaving a net profit of £225,648. 17s. 11d.; deduct dividend 3½ per cent., and additional payment 1½ per cent. for the half-year ending 31st March, £105,000; and the half-year's dividend of 3½ per cent., now about to be recommended, with an additional payment of 2 per cent., £115,500; leaving a balance of £5,148. 17s. 11d.; which has been carried to stock account.

The proprietors' underwriting account states that the annual premium of 5 per cent. on the estimated value of the floating property of the company, covering ordinary sea risks, and credited to this account, for the year ending 30th December, 1864, is £110,000; payment proposed to be made to the proprietors at the rate of 1½ per cent., £31,500; balance carried to the general reserve fund, £78,500. In the last annual account this fund amounted to £379,226. 13s.; add balance of underwriting account, £78,500; making the present amount, £457,726. 13s. Since the date of the last half-yearly report, the *Nyanza* has been launched and completed; and this vessel will start for her first trip to Alexandria on the 12th instant. It was stated in the same report that the *Columbian* had arrived at Southampton for repair and refit, and to receive the new engines which had been prepared for her. It appeared, however, on examination, that the cost of these repairs and refit, and of adapting the ship to the peculiar requirements of the company's service, would exceed the estimated expense, and the directors accordingly availed themselves of the offer of an eligible vessel of about 2,500 tons, with engines of 500-horse power, recently laid down by Messrs. Scott, of Greenock, the parties interested in her agreeing to take the *Columbian* as she was, in part payment for the new ship. The engines, prepared by Messrs. Day and Co., of Southampton, for the *Columbian*, being thus made disposable for another vessel, the directors have contracted with that firm for the construction of a new hull of about 2,500 tons to receive them. This ship is named the *Surat*, and that building by Messrs. Scott and Co. the *Mongolia*.

The directors have also entered into a contract with the Thames Iron Works and Ship Building Company for a new screw ship of 2,000 tons, the

Digitized by Google

engines for which, of 450-horse power, are being constructed by Messrs. Miller and Ravenhill. The ship is to be called the *Tanjore*. The extent of the company's business at some of their foreign stations, and the rapidity with which the operations of coaling the steamers, and transshipping the mails, passengers, and cargo have to be performed, have rendered the construction and employment of several steam-tugs necessary; and as some of these have been built and brought into active service during the last year, vessels of this class are now added to the prefixed list, namely, the *Ansari*, *Colaba*, *Mazagon*, *Dragon*, and *Kelpie*.

Although the cyclone at Calcutta occurred a few days after the close of the financial year, the proprietors will doubtless look for some information as to its effects on their interests in the present report. The directors are happy to state none of the company's ships on a voyage came within the range of this destructive hurricane, and that they have not to deplore any loss of life. The vessels at the company's moorings at Garden Reach at the time were the *Bengal*, the *Nemesis*, the *Nubia*, and the hulk *Hindostan*. The *Bengal* was driven on shore on the opposite side of the river, and the efforts made to get her off had not been successful at the date of the despatch of the last mail. The *Nubia's* masts were carried away by the sheer force of the wind; and on the morning after the gale the unusual power of the tide drove the *Hindostan* upon the *Nubia* and the *Nemesis*, forcing these two vessels from their moorings, and causing considerable additional damage to both. In the end, the *Hindostan* rolled over and sank, and the *Nubia* and *Nemesis* were secured. By dint of great exertions on the part of the company's staff, the *Nubia* was made fit to start with the mails and passengers seven days after the usual date, and the run to Suez having been performed in twenty-one days, the delivery of the last mail from Australia, &c., was accomplished within four days of the proper time. The company's property on shore, especially the newly erected coal sheds, sustained much damage, and the restoration of these and other buildings will involve considerable expense.

The company's contract for the mail service to and from the Mauritius was for five years from March 8, 1859, subject to twelve months' notice on either part; but such notice was not given, and an agreement has been entered into between Her Majesty's Government on the part of the colony and the company, to carry on the service from year to year, with an annual increase of £6,000 to the subsidy, to compensate to some extent the withdrawal of £12,000 paid annually by the French Government for the communication with Reunion previous to the establishment of the line of steamers belonging to the company of the Messageries Imperiales. With regard to the proposed fortnightly line to Australia, which has been so constantly alluded to in recent reports, the directors have only to announce that, in reply to a letter from the Postmaster-General, dated 15th September last, they stated their inability to make any abatement from the terms already submitted for the performance of that service, but that they would still be willing to undertake it on those terms.

It was stated in the last half-yearly report that a deputation of the board had proceeded to Egypt to negotiate the terms of a new contract with his Highness Ismail Pacha, for the conveyance of the passengers and cargo between Alexandria and Suez, and that a considerable abatement would probably be conceded in the railway fare for passengers. The new agreement effected by the deputation came into operation on the 1st of October, under which the through charge for each first-class passenger has been reduced from £7 to £2. 10s., the passenger, however, paying for refreshments during the journey. The double line of rails between Alexandria and Cairo is progressing rapidly, and large orders for rolling stock are in course of execution in this country. The directors are enabled to congratulate the shareholders on the fact that the navigation of the company's large fleet has not been attended by any casualty involving a charge on the underwriting account during the last twelve months; but the occurrence of the cyclone at Calcutta (whether the *Bengal* is floated or not) will create very heavy and immediate expenses in the refit of the injured vessels, and the rebuilding and repair of the company's coal sheds, workshops, and other property on shore.

The paid-up capital of the company remains the same as at the close of the financial year of 1862-3, namely, £2,100,000, and the debenture debt stands at £493,000. The number of new ships recently built and in course of construction has, however, rendered a call of £5 on the new shares necessary; this has been made payable on the 2nd proximo, and the requisite notice has been issued to the proprietors. A reference to the abstract will show that the revenue account for the year exhibits a satisfactory result, and the directors are therefore enabled to recommend the usual dividend of 3½ per cent., with an additional payment of 2 per cent.; the amounts payable under this report will consequently stand as follows:—Dividend, 3½ per cent.; additional payment, 2 per cent.; underwriting account, 1½ per cent.; in all, 7 per cent. And these payments will be made free of income-tax, in one warrant, on the 28th instant.

TRIAL TRIP OF THE "NYANZA."

The official trial of the Peninsular and Oriental Company's new paddle-wheel steamer *Nyanza*, named after the lake discovered by Messrs. Speke and Grant at the supposed source of the Nile, took place on Wednesday, the 30th Nov., at the measured mile in Stokes Bay. This vessel was built by the Thames Ironworks and Ship-building Company, from designs by Mr. G. C. Mackcow, the naval architect to that company, and her engines were constructed by Messrs. Rennie, of Blackfriars-road, London. The *Nyanza* is 310 ft. long, 36 ft. in width, and 30 ft. deep from top of keel to deck, her tonnage (builders' measurement) being 1,988 11-94, and her displacement at the draught on trial of 17 ft. 9 in. fore and aft was 2,964 tons. She had on board 493 tons of coal, 46 of water, 75 of stores, and 57 of kentledge, giving a total weight of 671 tons. Four runs were made at the measured mile, and in spite of a very strong wind (force 6) from the S. W., the following very satisfactory result was obtained:—

	Steam.	Vacuum.	Revolutions.	Time.	Speed
First run	26¼ lb.	26½ lb.	25 lb.	4m. 55s.	12·203
Second run	25 "	26 "	24¾ "	4m. 0s.	15·000
Third run	25 "	26 "	24½ "	5m. 8s.	11·688
Fourth run	26 "	26 "	25 "	3m. 58s.	15·126
Mean	25⅝ lb.	26¼ lb.	24⅞ lb.		13·504

The engines worked throughout the day in a most satisfactory manner, not the slightest trouble being experienced from hot bearings, priming, or any other cause. They are on the oscillating principle, cylinders 78½ inches diameter, and stroke 7 ft., the proportions being considerably stronger than usual, in order to prevent liability to accident. The surface condensers contain 43,000 ft., or nearly nine miles of solid-drawn copper tubes, fixed in Muntz's metal tube plates, arrangements being provided so that the engines may be worked, if required, as an ordinary injection engine. The circulating water in the condensers is driven by centrifugal pumps, each of which is worked by an independent engine. The air pumps are worked by large eccentrics on a straight intermediate shaft—a plan by which the crank in the centre of the intermediate shaft is rendered unnecessary, and which has been adopted by Messrs. Rennie in all the paddle-wheel engines lately constructed by them. The boilers are on Mr. A. Lamb's patent flue principle, with his improved "scroll" superheaters. We understand that these engines are the largest oscillating paddle-wheel engines using surface condensation which have ever yet been constructed on the Thames. The *Nyanza* has a spar deck, with direct and commodious accommodation fore and aft between decks. She had berths for 143 first and 34 second-class passengers, with large capacity for cargo and mails. Among the numerous company on board at Wednesday's trial were Messrs. Dinnan and Luke, Admiralty inspectors; Messrs. Rubie and Murray, Board of Trade surveyors; Captain Hands, C.B., Admiralty superintendent of packets at Southampton; Mr. Peter Rolt and Lord Allan Churchill, representing the builders of the ship; Messrs. John and George Rennie, the constructors of her machinery; Mr. Olding, assistant-manager of the Peninsular and Oriental Company; Mr. A. Lamb, the company's resident engineer at Southampton; Captain Engledue, superintendent at Southampton; Captain Lovell, Captain Jamieson, Captain Curling, Dr. Alexander Beattie, &c. The *Nyanza* left Southampton on the 12th inst. with the Bombay mails.

Continental Intelligence

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Dec. 7.

In my last letter I referred to the masterly speech of Mr van Zuylen van Nyeveldt, the aim of which was not only to oppose the Ministry, but principally to explain why he had left the camp of the Liberals. Liberalism was not now what it had been in bygone days; it was now rather Thorbeckianism, an alloy of a baser material. I need not tell you that the Minister for Colonial Affairs got his share of the many accusations brought against the Ministry in general, nor need I state that the Ministerial party stood up as one man to defend by protest the Cabinet. The Ministers of the Interior, Finance, and Colonial Affairs defended themselves with the greatest energy against the charges brought against them. This debate occupied five days, and the worst of it was that when Chapter I. (Royal Household) was brought forward for discussion, the House was neither further advanced nor wiser than at the beginning; for it was accepted—as had been the case with Chapter II. (Institutions of State)—without any deliberation. During the discussions respecting Chapter III. A (Foreign Affairs) the Minister spoke very highly of the exploits of the squadron in the Japanese waters during the action in the Straits of Simonoseki. The Government (so said Mr. Cremers), was always inclined to act in that quarter with energy, but now that the wish has been fulfilled, the Government was of opinion that it would be better to assist the Japanese Government if it fulfils its obligations, rather than to bring it into difficulties with those Daimios who were their enemies. After a short debate this Chapter was accepted by 53 against 13 votes. Both the Chapters respecting ecclesiastical affairs occasioned but little debate, as was the case with that of Justice; though in respect to the latter many complaints were heard of the alleged supineness of that Minister. Only eighteen members voted against the Chapter.

When the Budget of the Minister of the Interior was brought forward a very great number of speakers took part in the discussion. Every one had his own remarks upon the question, whether those remarks had anything to do with the matter or not. We have had an elaborate answer from the Minister, which occasioned several replies, and I think that this Chapter will pass tomorrow. Mr. Thorbecke, however, experienced a slight defeat. An increase of 4,300 guilders for the building commission having been refused him, in consequence of an amendment of Mr. van Bosse.

On Saturday last the House had the expected interpellation of Mr. Rochussen respecting a judgment passed by the High Court of Justice of Netherlands India, delivered on the 6th of September, by which a *loeta* was acquitted, who had pulled down coffee-trees that had been planted by order of Government. The interpellation, to which no political idea was attached, or at least as little as possible, produced no result, because the Minister had not been made acquainted with all the particulars

Digitized by Google

of this remarkable case. The motion next proposed ("that the House, after having heard the Minister of Colonial Affairs, is of opinion that the interest of the State requires that the pulling down of coffee-trees planted by order of Government should not remain unpunished, and that measures should be taken against it, passes to the order of the day,") has been postponed, after a few words from Mr. Rochussen, to be brought forward again if necessary, and when the Minister has made the necessary inquiries.

The news brought here from Tagal, where some Europeans have been murdered, has caused great sensation. The particulars of the case are, however, yet incomplete; and the intelligence, which may arrive here, per English mail, about the 12th of December, is anxiously looked for.

It is with much regret that I have to announce the death of Mr. Cores de Vries. He died at Wiesbaden, aged 50 years, and only four months after his return from Java.

Amsterdam is full of joy, because, after many difficulties, they have now brought together the necessary sums required by the Canal Company. The difficulties respecting the national monument for 1813 have also ceased, for Prince Frederick has given his approbation to the Ebenhuezer model.

The Bill for the abolition of the newspaper duty (stamp duty) has been at last presented to the House, but a long time may yet elapse before it will be finally passed.

It is said here that Queen Victoria has been pleased to offer to Captain J. E. de Man, commander of our squadron in Japan, the dignity of C.B.

COMMERCIAL.

COFFEE.—A good market, and several parcels Java brought more money, viz., 1,500 b. ex Jedo, 45½ cents; 1,200 b. ex Adriana Petronella, 46 c.; 607 b. ex Australia at 47 c., 2,300 b. ex Bosphorus and Vyf Vrienden at 45 to 49½ c. Besides a good business was done in Macassar sorts at 40½ to 42 c. Stock: Trading Company, 279,300 b.; private, 24,700 b.

TEA.—Market unaltered. Some parcels imported from London were sold at full prices. Stock, 9,950 ¼-ch.

SUGAR.—Dull. 4,184 kr. Java, ex Frederica Warren, were sold at prices that did not transpire; it is, however, supposed at 1½f. under those of September. Private stock, 7,900,000 kils.; Trading Company 18,076 kr. The quotation is: Java, white, 37f. to 42f.; grey, 35f. to 36f.; brown, 27f. to 31f.; Manila, grey, 31f. to 35f.; brown, 26f. to 30f.; Mauritius, grey, 31f. to 35f.; brown, 26f. to 30f.

RICE.—There are no transactions to report; the holders are, however, rather firmer by the reports from abroad. Stock, 61,300 b.

SPICES.—For Nutmegs there was some demand. Stock, 832 casks. Pepper, 880 b., were sold at 20½ c. entr. ex Sjofroken. Stock, 2,200 b. Cinnamon, No. 3, 88 c., without stock. Cloves, No. 2, 1864, are willingly sold at 32 c. Mace dull. Stock 560 casks.

TOBACCO.—(Java). Different parcels (6,000 b. together) were sold at full prices. Stock, 14,461 b. Java, 1,550 b. Manila Cagayan.

CIGARS (MANILA).—At public auction, were sold 40,000 2a Habano Manila at 30f. to 30½f.; 16,000 3 a do., at 25f. 5,000 Imperials at 51f. to 51½t.; 16 ½-ch. Malang, at 31½f.

COTTON.—Steady, with little doing.

BANCA TIN.—1,000 bl. were sold at 58½f.; private stock, 71,032 bl. Trading Co., 68,131 bl. Since the last auctions 109,239 blocks were delivered.

INDIGO.—Firm, but no transactions.

HEMP.—Dull.

RATTANS.—1,045 b. ex Bosphorus, and 850 b. ex Koning Willem II. were sold.

HIDES.—No transactions to report. The imports from the 1st Jan. till November, consisted in E.I., 77,972 p. in 1864; against 92,916, in 1863. Stock E.I. 8,973 p.

MONEY.—Easier; Bank discount, 6½; open market, 6½ to 7; N.W.S., 2½ per cent., 60½; 3 per cent., 72 1-16; 4 per cent., 95½; Handelmaatschappy, 137½. 'Change on London, 3 mo., f.11.52½; 2 mo., f.11.60; short, f.11.72½; Paris, 3 mo., f.45,86; 2 mo., f.46.05; short, f.46.50; Hamburgh, 3 mo., f.34.75; 2 mo., f.34.87; short, f.35.10.

SHIPPING.

ARRIVALS.—Nov. 25, at Brouwershaven, from Batavia, Frederik Hendrik; 26, at Texel, from St. Helena, Alexandrina, with a part of the loading of the Kiandra; 27, at Texel, from Batavia, Staatsraad van Ewyck; 28, at Flushing, from do., Louis Meyer; 29, at Brouwershaven, from Tjilatjap, Fortuna; from Batavia, Vyf Vrienden; Dec. 5, at Brouwershaven, from Batavia, Ægidia and Pauline; at Zierikzee, from Sourabaya, Ajax; 6, at Brouwershaven, from Pasoeroean, Three Bells.

READY TO SAIL.—At Nieuwe Diep and Texel: Sourabaya Packet, for Sourabaya; Friesland, for Samarang; Libra, for Kanagawa; Maria Agnes, for Padang; Joan Melchior Kemper, for Japan; Koning Willem III., for Macassar; Koophandel, for Batavia; Susanna, for Melbourne; Graaf Dirk III. and Æolus, for Batavia; Machtilda Simonetta, for Samarang; Doesborgh and Pollux, for Batavia.

LOADING.

AT AMSTERDAM.—For Kanagawa and Decima: D. J. Visser; for Macassar, Quartre Bras; for Batavia, Anne and Sophie, Ferdinand and Louis, Almelo.; for Batavia and Samarang, Galilei; for Batavia and Sourabaya, Willem Hendrik; for Samarang, Johanna, Madura, Christina, Nicot, Stad Leyden; for Sourabaya, Willem Daniel, Capella, Baltimore.

AT ROTTERDAM.—For Decima and Kanagawa, Japan Packet; for Macassar, Koning Willem III.; for Batavia and Sourabaya, Graaf Dirk III., Delft; for Samarang, Maria Magdalena, Noord Brabant.

FREIGHTS.—Unaltered.

PASSENGERS INWARD.

FROM JAVA.—Per Dageraad, Captain Duinker, Major Weber, Captain von Windsheim, Mrs. Gieseken and six children; per Staatsraad van Ewyck, Captain Ham 99, Mr. Weddingen and family, Major Uhlenbeck and family, Lieutenant H. von Biehl, Mr. Hanegraaf and family, Mrs. Albrecht and Laumers; per Vyf Vrienden, Captain Johan, Mr. Loree and child, Mrs. van Gent and two children, ten soldiers; per Ægidia and Pauline, Captain Hoogland, Mr. Kerkhoff and family, nine soldiers.

HAMBURG MARKET REPORT.

COFFEE.—The favourable result of the Dutch sales produced a good impression in this market, and ever since then the prices have been gradually rising with a brisk demand, so that since last mail the sales by private contract have amounted to the considerable figure of 115,000 bags. In consequence of this the stocks in warehouse are much reduced, and the market offers at present but a very imperfect assortment. Should the frost set in before the arrival of fresh supplies, there is no saying to what extent prices may rise during the winter. Present stock 5,500,000 lbs. against 12 millions of lbs. last year, and 13 millions in 1862.

SUGAR.—Prices have been gradually sinking since last mail, and may be quoted now fully 8 to 10 sch. bco. per 100 lbs. cheaper. The sales, however, have been satisfactory in extent. Among them were 3,000 bags of brown clayed Manila at 16 mks. bco. for delivery on arrival. In the refined market the tendency has been to decline, and prices are likely to go lower. Sales 30,000 loaves.

RICE.—Market steady, with a fair amount of business in cleaned descriptions. No dealings to report in rough grain.

SPICES.—Cassia Lignea continues in favour, and the late rise is fully established. By the sale of 1,400 chests yesterday at 9¼ sch. bco. the stock in importers' hands has been cleared off. Cassia Flores firm, and will probably be higher, as the stock in warehouse is greatly reduced. A better feeling prevails for Ginger, but hitherto there is no improvement in values. For Pepper there is a fair demand, 2,500 bags of Singapore lately arrived have found purchasers at 3⅛ sch. bco. In Mace, Nutmegs and Cloves a steady consumptive demand at former quotations.

SPELTER.—This market was for several days in a torpid state, but a favourable reaction has again set in, and there have been some considerable transactions, though the prices rule in favour of buyers. 6,000 centners were done at 13 mks. 12½ sch. bco. for the spring, and 5,000 centners of favourite marks fetched 14 mks. ex-warehouse.

SHIPPING.

SAILED.—*Zanzibar* to Hong Kong and Manila, *Princess* to China, *Arizona* to Manila, *Che-Foo* to Macassar.

ARRIVED.—*Fayel* from Manila. Amongst the late arrivals from the Far East are Mr. Bohstedt, from Ningpo; Mr. Hesse, from Hong Kong; and Mr. Ohlengschlaeger, from Batavia.

SWITZERLAND AND JAPAN.

In our last impression it was stated that the Swiss Diet had received intelligence of the arrival shortly of a Japanese Embassy to Europe. The communication was made officially to the Bund by Mr. Brennwald, the First Secretary to the Swiss Embassy in Japan, who has lately returned from the East and is now staying at Berne. The Embassy will consist of two of the principal Ministers of the Tycoon and five lesser Daimios. The Japanese Government sends a friendly greeting to the Swiss Confederation and assures them that the new Embassy, after the completion of their mission to France and England, will then certainly pay a visit to Switzerland. From Berne the Embassy will subsequently proceed to Vienna, Berlin, and St. Petersburg. Mr. Brennwald states that the Embassy that visited Europe last year fell into disgrace on their return to Japan, and the members were imprisoned for having overstepped their instructions and acted without authority.

In consequence of a petition from fifty-three Swiss commercial houses at Trieste, seventeen at Smyrna, and thirteen at St. Petersburg, as well as from others in China and elsewhere, the Swiss Executive Council has sent in a Report to the Diet, recommending the latter to grant Swiss subjects abroad the right of using the Swiss flag in vessels that they may own, and to authorise the Executive to furnish the needful papers to prove their nationality. It is true they have no ports of their own, but that does not seem to be an insuperable difficulty, as in the ports of most countries they would be received and treated on the footing of the most favoured nation. Nor does there appear any difficulty in an international point of view, though of course the preliminary step would be to communicate with other maritime nations and obtain their recognition of the new flag proposed to be created for sea-going Swiss vessels. The Greek flag is a creation of this century, and the present Italian tricolour has but just superseded the Neapolitan, the Tuscan, and the Sardinian, but both have been recognised by all maritime States. It is stated that for many years a vessel called the *Paradoxe*, belonging to a Swiss shipowner, and commanded by an Indian captain with a crew of Malays, has been trading in the Indian Archipelago under the Swiss flag—a white St. George's cross in a red field; and that another under the same ensign was last year captured by Federal cruisers and lawfully condemned for attempting to break the blockade and enter the port of Charleston.

PORTUGAL.—A Lisbon telegram states that the French Sisters of Charity at Macao will be replaced by Portuguese sisters.

THE *Illustrated London News* of the 10th December contains a large sketch of the storming of the Prince of Nangato's stockades by the Naval Brigade and Marines.

Mr. PENDER, of Manchester, M.P. for Totnes, is now in better health, and was able to address his constituents at Totnes this week.

THE Rev. H. Huleatt, formerly military chaplain in Hong Kong, delivered a lecture on China on the 6th instant at the Horns, Kennington.

LONDON, TUESDAY, DEC. 13, 1864.

THE TAIPINGS AGAIN.

ACCOUNTS from Amoy report the hostile appearance of marauders within fifteen miles of that port, supposed to be a band of fugitive Taipings from the provinces of Keang-soo and Che-kiang, which have been successfully cleared of their devastating presence. Although it is not certain that they are Taiping rebels, yet the probabilities point to the supposition being correct; and it may prove to be the remnant of th CHUNG WANG'S forces defeated at Nanking, and led on by the son of that valiant chief, who inherits the bravery of his father. Doubts are entertained whether it was that redoubtable rebel who suffered decapitation, or only a make-believe of the Imperialists; but we have no reason to question the report by any subsequent disclosures to the contrary, so we may conclude that it was the real "Simon Pure" who suffered for his treason to the EMPEROR. In all likelihood it may be the certainty of this fact that has stirred up the last of his adherents to avenge his death, by an attack upon the open port of Amoy, where the detested foreigner who sided with his enemies was to be found. There has been ample time for them to have reached so far south after the fall of Nanking and Hoochow; and as we afterwards heard of marauding bands being seen in the tea districts of Ngan-whei and Foo-kien, it is probable that they have reached the seaboard by the trading route through that country. As the latter province has not hitherto been visited by these locusts they would find there fresh pastures to ravish, and leave their desolating track behind. We may hear, in consequence, that the black Tea district, of which Foochow and Amoy are the shipping ports, has suffered by their presence, so as to injure the ensuing crop. Should this unwelcome news prove true, we trust that the Naval and Military authorities will despatch succour without delay to protect our interests at this treaty port, and if necessary aid the constituted authorities in driving them beyond the stipulated boundary of thirty miles' radius, as at Shanghai and Ningpo. No doubt the Philo-Taipings, headed by their quasi-supporter, the *Daily Press*, will raise the "hue and cry" against such a step; but it is to be hoped these will not deter the authorities from protecting British life and property at Amoy by a decisive onslaught against these land pirates, as the Navy does against sea pirates. In such emergencies our gallant men-of-war are ever on the alert; and it is satisfactory to learn, by the accounts referred to, that H.M.S. *Dove* and *Swallow* were at anchor in the harbour, with their steam up, when the news left, ready to render assistance should the foreign settlement be attacked. That danger was imminent seems apparent from the wealthy Chinese flying on board the junks with their valuables; while the merchant shipping were requested to remain in case the English and other foreign residents would have to fly for succour and for safety on board. If these sanguinary rebels enact similar scenes of murder and rapine among the industrious inhabitants of Amoy as they did at Shanghai, it will bring home to the sceptical residents in the south of China the bloodthirsty character of these wretches who have for so many years spread a curse over the North.

NO MORE BANKS IN CHINA.

COMPETITION in banking, as in any other pursuit of a legitimate character for the extension of commerce, when conducted within reasonable bounds, invariably results in benefiting the public on the one hand, and the competitors on the other. While the merchant derives profitable advantages from the use of banking capital, the shareholders of the banks receive good dividends from their investments, and the trade of the country where their monetary operations are carried on is developed to its full extent. But there is a point beyond which these operations may prove detrimental to all concerned, if they result in overtrading and illegitimate speculation, by affording undue facilities to over-sanguine or inexperienced merchants with slender capital of their own to fall back upon in case of failure. Then it is time for prudent bankers already well-established to check the outflow of capital, by restricting discounts, and for new competitors in the financial field to pause before they risk their capital in fresh ventures. To this point has foreign banking in China reached; and it is admitted by all experienced merchants in England connected with the trade of that country, that the number of banks now in operation are more than ample for the requirements of legitimate trade. Any further extension of their number is looked on with apprehension by those who are thoroughly conversant with that trade; and if the operations of the existing banks be not restricted, there is every probability of commercial disaster to old houses and ruin to new firms. There is no doubt but that the large losses in tea and silk shipped during the past year are attributable, in a great measure, to the undue facilities afforded to junior establishments by the banks in China, when requiring accommodation. Frequently these tyros, in dealing with the astute Chinese merchants, have foolishly raised the prices of the staple products by displaying an unbusinesslike eagerness to bid against each other in order to secure the earliest shipments of the season; from which the teamen at Hankow and the silkmen at Shanghai of course reaped the advantage. To afford such overtrading merchants unlimited facilities for carrying on operations is simply to ruin the trade altogether as a profitable pursuit, and banking accommodation becomes the high road to bankruptcy—a result from which China traders have been more exempt hitherto than those of any other country within our commercial relations. As we have before stated, there are at present more than sufficient banks to conduct the discount and exchange business of the open ports in China, and our readers may judge for themselves if this be not the case when the formidable list is placed before them—comprising *eight* separate head establishments in England, France, and India, with *twenty-one* branches in China and Japan, according to the following details extracted from the *Friend of China*, which has a very pertinent article on the subject:—

We here furnish a list of the banks at present existing in China—senior of all being the Oriental Bank Corporation, first established in Hong Kong in November 1844, under the designation of the Bank of Western India (of Bombay). This bank has branches at Hong Kong, Shanghai, and Yokohama. Next in seniority is the Commercial Bank of India, with branches at Hong Kong, Shanghai, Foochow and Hankow. Third in establishment is the Chartered Mercantile Bank of India, London, and China, with agencies at Hong Kong, Shanghai, and Yokohama. Then comes the Agra and United Service, Limited, with branches at Hong Kong and Shanghai. The next in formation, if we remember aright, being the Chartered Bank of India, Australia, and China, with branches at Hong Kong and Shanghai. Which of the following was established in China before the other, we cannot say: Bank of Hindustan, China, and Japan, called by natives the Japan Bank. The Central Bank of Western India has branches in Hong Kong, Shanghai and Yokohama; and the Comptoir d'Escompte de Paris, with branches at Shanghai and Hong Kong.

In addition to this we have to add the Asiatic Bank, the Scinde Bank, and the Bank of India, with agencies in China.

From the foregoing it will be seen that the majority of the China banks or branches owe their origin to projectors in India, and that there is no one of purely local foundation with its head establishment at Hong Kong or any of the open ports. This latter question has been mooted for the past two years, but hitherto without any signs of the proposition reaching a mature point. In the interim, certain parties in Bombay, who apparently had profited by the extension of the Indian banks to China, start a new project, to be called "The Bank of China," with its head quarters in Bombay. This new scheme naturally roused the latent energies of those who had broached the suggestion of having an independent *Bank of China* raised upon local subscriptions chiefly. Accordingly they issued a prospectus to that effect, and solicited the co-operation of subscribers at Bombay. The appearance of this unexpected document, backed by the names of many influential firms in Hong Kong and Shanghai, immediately roused the ire of the Bombay projectors, and they denounced the counter-scheme as a scan-

Digitized by Google

dalous affair—as if an independent body of merchants may not have a local bank under their own control, and shareholders to participate in the profits of their own business given to such a bank. The conduct of the Bombay company in the matter is, to say the least of it, preposterous and absurdly petulant. It would have been more decorous on their part to have withdrawn from the field, in deference to the principle of allowing local enterprise to obtain an independent footing in China. Instead of pursuing this honourable course, a meeting of the shareholders was convened, when a resolution was passed approving of the report of the promoters to prosecute the undertaking with rancorous feelings against the China scheme. In that report they also take occasion to cast reflections on one of the most influential firms in China, for not "cordially assisting their undertaking," after communicating privately with them, but "joined in projecting a rival institution;" insinuating as much as that they had committed a breach of faith. The assertion of those disappointed promoters may be taken for what it is worth, but that the firm alluded to behaved in the manner described, no one who is acquainted with the high integrity of its partners would for a moment believe. Whether either of these embryo banks will sink or swim is a matter of indifference to the public; but it is of importance to know if the present extravagant facilities for mercantile speculation in China be augmented by an increase in the number of banks. As the exponent of all prudent men on this head, we would advise intending shareholders to be chary in subscribing to any new project, as we require "No more Banks in China."

THE TRANSFER OF THE STRAITS SETTLEMENTS.

IT is with no small degree of surprise that we learn from the Singapore journals, to hand by the French mail, that our contemporaries have received information, on what they consider semi-official authority, that there is to be no transfer of the Straits Settlements from the Indian Government to the Colonialo-ffice after all. The announcement is made in quite a pathetic and desponding tone. After years of patient solicitation, and memorialising Her MAJESTY'S Government praying for removal to the fostering care of the parent State from that of a neglectful stepmother, with hopes buoyed up in full expectation of a favourable issue to their application; just as the Singaporeans are going to quaff a goblet to the success of the new *régime*, it is dashed from their lips by the unwelcome announcement. "Be of good cheer!" say we to the patient residents of the Straits. Our contemporaries are premature in their conclusion, for the question is by no means decided against. Had such been the case, we are in a position to state that the news would have reached us among the first, and our contemporaries received the information through our columns long before the roundabout rumour by way of Hong Kong had come to them. The feeling here, in well-informed quarters, is that the question of transfer will be carried.

Without impugning the testimony upon which the announcement is made, let us examine its value as given in the *Straits Times*:—"It is stated that Sir HERCULES ROBINSON, who, it will "be remembered, was president of the commission appointed "by the Home authorities to investigate and report upon the "condition of the Settlement, has transmitted by the *Ganges* "copies of despatches which he had received from home, and "by which it seems that our transfer to the Colonial-office has "been finally decided not to take place." Now these despatches must have been forwarded by the mail of the 26th August; and, allowing more than the usual *despatch* for their being copied and re-copied in the realms of red-tapism, it must have been the middle of the month, if not the beginning of it, that the matter passed under review of the Ministry. Why, as we write, that is *four months ago;* so we have no hesitation in saying that the so-called *final decision* has been simply a financial point of objection put forward by the cautious CHANCELLOR of the EXCHEQUER at that time, but which has been since passed over without further notice; otherwise we feel confident such an important piece of news would have oozed out somewhere, and there are too many anxious friends of the Straits on the alert here to allow the intelligence to escape them. We look upon it as the old story of "The three black crows," and would refer to a letter at page 707.

However, there are some communications which have risen out of this report pertinent to the question at issue, that are worthy of remark. Amongst these is a letter in the *Singapore Free Press* signed "ANTI-TRANSFER," which smacks considerably of gubernatorial inspiration. From it we gather that the members of the Indian commission were jubilant upon the prospects of a longer term of office than they anticipated; and in the gladness of their hearts they became magnanimous on the occasion, holding out the hand of good fellowship to the reformers, saying that bygones should be bygones, and that everybody ought to be content in making the most of the existing situation. The writer thus expresses himself on this point:—"It appears to me that we should make rather the best of "our present connexion, seeing that the promised new one ob-"jects to have anything to do with us, and when you say that "so far as taxation is concerned our burdens would be no "heavier under the one than the other, you seem to forget "that while the Home Government objects to have us from the "fear that we should be a burden on it in case our revenue "fell short, the Indian Government has borne for years a deficit "balance-sheet without a murmur, besides showing great "liberality in the assistance it has always given to works "which, although they do not come under the head of Public "Works, are still works of public utility; while on the other "hand, were we under the Colonial-office we could not expect "the Home Government to afford any aid whatever to any of "our undertakings, and if we did expect it we should most "assuredly be disappointed." What a wretched idea this writer has of a free and independent colony with its responsible executive, as the future condition of the Straits Settlements would be under the Colonial Department! The picture drawn by this sapient publicist of their relationship to the Indian administration, compared with what they may become as colonies having a constitution for self-government, is as different as that of a puling, sickly child under the neglect of its monthly nurse, of the Mrs. Harris' school, and that of a vigorous son abroad in the world working out an independent livelihood for himself, so that one day he may be of assistance to his parents in time of need. Witness the Australian colonies as an example of this kind. Our knowledge of these embryo nations is of earlier and longer experience than that of the British settlements in the Far East. Well do we remember the struggle of the Port Phillip colonists to throw off the shackles of New South Wales for a free Legislature and responsible Government, just as the residents of the Straits are striving to get rid of their Indian incubus. In this they succeeded; and what has been the result? The former dependency, of a dependency, is now the richest jewel in Britannia's colonial diadem, and the independent colonists who have made it what it is, boldly reject the felonry thrown on their shores in defiance of all the red-tapists and obstructives in Downing-street—which a wise and prudent Ministry have consented to, in justice to their demands. So may the Straits Settlements reject the convicts from India, which are maintained at a heavy cost to the local revenues, and become flourishing and free colonies, as a rich field for commercial enterprise, which has been the only source from whence they have derived the prosperity they possess. But for the merchants and shipowners, what would their condition be at the present time? In all probability mere cantonments, where the military governors and commissioners with Indian troops might be idly watching, or actively suppressing, the incursions of marauders from the peninsula, or Malay pirate prahus off the coast. In spite of the obstacles thrown in the way of their advancement, let us see what are their elements of progress as self-supporting colonies. We have ample evidence of this before us in the document drawn up by the "Proprietors and Merchants of these Settlements in England," and presented to the UNDER SECRETARY of STATE for the COLONIES, on the 30th September, when these gentlemen learned that there was some hitch about the transfer on account of their financial state. The following extract fully illustrates the progressive capabilities of this fine group of Settlements, to become in time the most flourishing colonies in the Indian Archipelago:—

With respect to the first of these obstacles to the assumption of the administration by the Imperial Government, we respectfully submit that the elasticity of their financial resources is confirmed by many years' experience. Increase of revenue has, in fact, kept pace with increase of trade and population, or in other words with increase of wealth and numbers. In 1852-53 the trade of the three settlements was valued in the public returns at £8,719,550, and in 1862-63 it was £16,906,496, showing that in ten years time it had increased by £8,186,946, or at the rate of 93.$\frac{18}{100}$ per cent. In the same ten years the revenue had risen from £77,533 to £186,625, an increase of nearly 142 per cent. A more recent period will show that the revenue continues progressive. Thus in the year 1859-60 the revenue amounted to £125,453, and in 1862-63, deducting four months' stamp duties, it was £178,660, being an increase within

Digitized by Google

the brief period of three years, of 42,$\frac{11}{100}$ per cent. Increase of revenue bears a still greater ratio to population than it does to trade. The Census of the population gave in 1850, the number of inhabitants at 223,344, and that of 1860 made them 278,773, an increase of little more than 22 per cent. In so far, then, as elasticity in financial resources is concerned, we may safely assert that the Straits Settlements far exceed the great majority of Her Majesty's colonies, and equal the most prosperous of them, the gold colonies of Australia, with Hong Kong—which is of the same character as themselves. Besides the general revenue of the three settlements, it should be added that they have a separate municipal one, yielding at present about £40,000. Judging by the long experience of forty-five years since the foundation of Singapore, and the adoption of the principle of free ports, there can be no ground for doubting a continuance of the financial prosperity of the Straits Settlements, for we may safely say that it would be difficult to produce any one year in the last six-and-thirty in which the revenue did not exceed that of its immediate predecessor. Even with the present sources of revenue there can, in our opinion, be no doubt but that an income can readily be realised for all the ends of a wise, liberal, and economical expenditure.

JAPAN AND COCHIN-CHINA.

(FROM OUR PARIS CORRESPONDENT.)

The late operations in the Straits of Simonoseki have attracted considerable attention here, although not so much as on your side of the channel. There seems to be no suspicion entertained of the good faith of the Mikado or the Tycoon, although a correspondent of the *Moniteur de la Flotte* says:—"The affair of Simonoseki has produced the greatest effect on all the Daimios and the Government of Jeddo. The Prince of Nagato was the hero of the Japanese; his fall is the severest lesson that could have been given to Japan." It is maintained here that the telegram was rightly construed which informed Europe that the Prince had *refused* to pay the indemnity, and a correspondent, writing from Japan on the 15th October, says that in consequence of that refusal he was condemned by the assembly of Daimios, sitting as a court of justice, to the confiscation of all his property and the loss of his honours. To this is added, what I have not yet seen in any English paper, that besides the palace of the Prince being destroyed, all his retainers, to the number of 400, half being women and children, have been put to death by order of the tribunal. Moreover, adds the writer, it is reported that the Mikado has ordered the Prince to be decapitated, and his head to be exhibited over the ruins of his late palace, and that an expedition is being prepared to take possession of his province. The same correspondent says that the Tycoon was about to have an interview with the Mikado in order to arrange all matters connected with foreigners. There is another bit of news current here to the effect that four officers commanding the Japanese, when they saw the batteries taken and the soldiers routed, felt it their duty to inform the Prince that he ought to try and make peace, and that when the messengers were despatched to treat with the Europeans, these four officers committed suicide in the Japanese manner, in order to prove that their advice was not dictated by the fear of death. The assertion of the superiority of the French rifled guns over the Armstrong's is industriously repeated with embellishments. It is said amongst other things that the Dutch were very much impressed in that sense, and had written to their Government accordingly. For the present, I think we cannot condemn our own arms upon such evidence, especially in the presence of the good opinion of the American, quoted in the *London and China Telegraph*. Still, if the fact be as the French correspondents and journalists will have it, no one is so much interested in knowing it as the English. It is the practice here to cover everything with the varnish of asserted superiority, but we know well enough that nothing has stood England in such good stead as wholesale, honest, fearless faultfinding. If Armstrong is not all that can be desired, the sooner we know it the better. We have too much confidence in our metal to want its faults filled in and bronzed over.

We are not yet informed whether the French Government has accepted or repudiated the convention made by its representative in Cochin-China, but the universal impression abroad is that the latter is the case, and that the three Annamite provinces are to remain French possessions. This impression is rather strengthened by the announcement that Rear-Admiral de La Grandière will go back to Saigon for two years more, in order to complete the organisation of the colony. The steam-frigate *Imperatrice Eugénie* is now being fitted at Toulon for the French Admiral, whoever he may be, in command of the squadron in the Chinese and Japanese seas. It is said that Admiral de La Grandière will be allowed some months of repose in France, and then return to his command with the rank of vice-admiral. The Ministerial journals tell us that under his administration the colony has entered upon a course of incredible prosperity—which is good news, but does not agree exactly with other accounts of the condition of commerce at Saigon.

The *Japon*, transport, brings home three young Annamites, selected from the boys of the native company of the *Dupêrre*, who are to act as interpreters for the convicts carried by that vessel to the Isle of Bourbon, and then to proceed to France. We are told that the admiral selected these three as the best of the company, and that all their comrades begged to be allowed to go, and were only consoled when promised that they should have their turn at some future time. "The enthusiasm was then at its height; tears were dried up, and all promised to conduct themselves in the most exemplary manner, that, like their three comrades, they might have the opportunity of seeing France. These young imaginations, excited by the accounts which are current in every village since the return of Phan-tan-gian from his mission, can form no idea of anything so glorious as a voyage which will enable them to see for themselves what is related about the *great country*, as, in their simple language, they call France." It is said that the monks have obtained a very important concession in Cochin-China, in the province of Mytho, where they intend to establish an agricultural colony.

There is no doubt that, whatever may be the feelings of the Annamites towards France, the French people are becoming more interested in Chinese and Japanese matters every day. The sales that attract most attention are those consisting of the wares of those countries. A sale of such articles, announced as belonging to a Mr. Marks, of London, occurred on the 29th of last month, when the prices obtained were unusually high. Two large garden-stools or table supports, enamelled, fetched a sum equal to £248, and two other lots of enamelled ware went for £68 and £62 odd respectively. A crystal ball fetched no less than £52; five pieces of old china brought £108; five other pieces, £78; two pieces of old Japanese porcelain, £60; and two Chinese vases, £60. Paris would seem a better market than London for such articles at the present moment. I may quote, also, as a proof of the attention attracted by Chinese art, the facts that the makers of fancy articles of furniture are producing a large number of imitations of Chinese ware, some of them very tasteful indeed; that Chinese and Japanese patterns are making their appearance on silks, damasks, and paper-hangings; and, lastly, that a new theatre is being built at the junction of the two new boulevards named after Richard Lenoir and Prince Eugène, in pseudo Chinese style, decorated with porcelain, or rather *faience* tablets. Thus the invasion of the Far East has its effect on Western habits and tastes.

The following has been published by the Paris papers:—

We have received, *via* Holland, a letter from Japan three days later than the news already published. It has been already stated that the Prince of Nagato having refused to pay the war indemnity stipulated in the Treaty of Peace signed by him, a judgment of the criminal tribunal of Yeddo had decided that his two palaces should be razed to the ground and his servants put to death. We now learn that this singular and sanguinary sentence was approved of by the Mikado and by the Tycoon—the spiritual and temporal sovereigns of Japan—and that the number of servants killed in execution of it was 420 men, and 215 women and children. The Prince, on learning those facts, was deeply concerned, and sent to the capital his first minister on board the English corvette *Barossa*, which was placed at his disposal by Vice-Admiral Kuper. The minister on arriving at Yeddo waited on the representatives of France, England, Holland, America, and Russia, and besought them to intercede with the Tycoon in favour of the Prince, his master, who had decided on executing all the provisions of the treaty, and immediately paying the sums due. Such was the situation of affairs at the last date.

COLONEL GORDON MADE A C.B.—In our outward issue of the 10th we notified the gratifying intelligence that Lieut.-Colonel Gordon, R.E., the gallant commander of the late successful campaign against the Taipings, has been rewarded by Her Majesty with the title of Companion of the Honourable Order of the Bath for his valuable services in China. We look upon this as a preliminary step to the further honour of knighthood, when he returns to England to pay his respects at Court. At the departure of the first October mail from China, we learn that Colonel Gordon was at the camp of Fong-Wong-sai, sixteen miles from Shanghai, still overlooking the drill of the new embodied Chinese disciplined force. In all probability his services would be discontinued there about the end of that month, when he is expected to leave Shanghai for England by the first mail in December, if not before. We are confident that he will meet with a hearty reception on his arrival at home, after so many years of service abroad, where he has raised the character of our nation for honour and bravery as many have done before him.

THE TELEGRAPH TO PEKING *VIA* KIACHTA.

The following paragraph has been published in the daily papers, but to our readers we communicated this intelligence in our issue of the 10th Nov. We shall be glad to see the line put to some practical use :—

A telegraphic despatch has reached St. Petersburg announcing that the telegraphic service is now organised as far as the frontiers of China. The line passes by Kasan, Omsk, and Irkoutsk, where it divides into two branches, one to Irbit, and the other to Chadrinsk. The total length of the line is 5,438 versts (five-eighths of a mile each). The works have all been completed in three years.

THE TRANSFER QUESTION AND THE RAJAH OF JOHORE.

(To the Editor of the *London and China Telegraph.*)

SIR,—As you reproached the Tumongong of Johore, in one of your late issues, for attempting to monopolise the sale of gambier in his dominions, it is but just to that potentate to inform you that the last news from Singapore informs me that all intention of such a design has been strenuously denied by him ; at the same time it is stated that such denial should be taken in a "diplomatic sense," consequent on the pressure exercised by the Chamber of Commerce. The same mail brought the dirge of the *Straits Times* on the transfer of the Straits Settlements. I have to request that you will kindly reassure the good people in the Far East on this important subject. There is, I believe I may state, more vitality in the transfer question than ever, and every chance of its being brought to a satisfactory conclusion.—Your obedient servant,

Δ

London, December 5, 1864.

EXTRA PARLIAMENTARY SPEECHES.

CHINA AND JAPAN.

The Right Hon. A. H. LAYARD, M.P., Under-Secretary of State for Foreign Affairs, addressed his constituents at Southwark on the 2nd inst., and made the following allusions to China and Japan :—

He would refer to another matter, which had been equally the subject of misrepresentation. He had alluded to it last year, and he reverted to it again now to show how the policy of the Government, the policy of Lord Palmerston had been justified by the results. It would be remembered that Lord Palmerston was accused of unnecessarily meddling with China, and with desiring to provoke a war with the Chinese people, in order that we might take possession of their country, as we had taken possession of India. It was, of course, at the time difficult to disprove these assertions, and mere assertions of motives it was always difficult to disprove. All they could say when intentions were imputed that were unfounded was that they did not exist; the disproof must abide by the results. (Hear.) But he (Mr. Layard) had been personally blamed in connection with this matter, because it was said that he had voted against Lord Palmerston on a question connected with China, which he well remembered, seeing that he lost his seat for Aylesbury in consequence. But there was no analogy between the two cases. He held that the policy pursued by Lord Palmerston in regard to China some years ago was wrong, and the vote he then gave was directly in favour of the policy which the Government had now carried out. What he complained of on a former occasion was, that Lord Palmerston was hurrying us into a war with China instead of endeavouring to settle the points of difference between the two countries by protocols and diplomacy. But now the question was reversed ; we were at peace with China, our relations with the Court of Peking were as amicable as were our relations with any Court in the world, and any differences which arose were discussed between our Minister and the Minister at Peking in the same way as differences were discussed with the Minister of any other Power at which this country was represented. And that was the right way. He thought it wicked on the part of a powerful civilised country to take advantage of its strength to impose upon a half-civilised country, with which we might have differences. (A voice : How about Japan? (Hear, hear.) True, that to a certain extent we had been engaged in hostilities in China, but not with China, but in defending the treaty ports against those who were in arms against the Government of China. A very large trade had sprung up in those ports, and one of the principal stations, Shanghai, was threatened by the rebels. These rebel Taipings were a great body of marauders, without any settled form of government, who went about sacking and destroying towns and villages, and in short all that came within their reach. If we had not assisted the Chinese Government to oppose them we must have incurred great loss, and have run the risk of all those Chinese ports being shut up against European trade one after the other. It would have been expensive to have sent a large force of British troops to defend the place and drive back these Taipings, and it was thought more advisable, therefore, to assist the Chinese. The French did the same, and that policy had been successful; the Taipings had been routed and broken up, Shanghai was now free, and Nanking was the same. The ruin caused by these marauders might be imagined when they heard that in the once densely populated city of Nanking a man had while it was under their rule, flushed pheasants, but no sooner had they left than the Chinese began to flock back to it rapidly, and it has now again become populous. The Chinese were a thrifty and industrious people, who took a large quantity of our manufactures, and with whom, therefore, it was of great importance that we should keep on good terms in order to promote the development of our trade in that quarter of the world ; and this was the object and this was the result of the policy which had been pursued. He observed that in the attacks upon the Government on account of their Chinese policy, none of the members of the Opposition took any share. No alternative policy was ever proposed. They said what the government was doing was wrong, but they never said what was right. (Hear.) The only alternative brought forward was that suggested by Mr. Cobden. (Loud cheers.) All that that hon. gentleman said was worth listening to, but anything more impracticable, or more likely to lead to a general war and to universal confusion, than the plan that hon. gentleman proposed he did not know. Mr. Cobden's proposition was that they should withdraw from Peking and Shanghai, and take possession of four or five islands which were to be opened as free ports. But that would have been a declaration of war against China. We had no more right to take those islands than France had to take the Isle of Wight. (Hear.) And if we had done so, France and Russia and America would of course have made similar claims, and the consequence would have been great difficulty and confusion, and in all probability war, while the only alternative policy was that which Lord Palmerston's Government adopted, and that had proved successful. (Cheers.) Those who now heard him could hardly understand the amount of foreign trade carried on in China. The total estimated value of the British and foreign trade of China was £104,248,000, of which £41,936,000 was carried on at the port of Shanghai. It was true that a good deal of this trade was carried on between the cities, and was not *bonâ fide* foreign trade, but as to the greater part of it, it was European trade, and British trade more especially ; and it was growing and developing with great rapidity. He now came to Japan, about which some gentlemen at the bottom of the room had just asked a question. Last year the Government were denounced for making what was called a wanton and bloody attack on the town of Kagosima. Now he would not believe that any British officer would wantonly sacrifice the life of any one. ("Oh, oh," and cheers.) A friend below cried "Oh, oh," but he (Mr. Layard) again said that no Englishman would voluntarily sacrifice the life of any one — certainly no officer who held a commission in Her Majesty's service would do so; and when the statement was made he said at once, and unhesitatingly, that it could not have been the case. It was true that a part of the town was burned, but the population had been removed beforehand, and in a few months the whole town was rebuilt. These Japanese cities were not like ours. They were built, not of lath and plaster, but of lath and paper, and if one was set on fire the others followed in quick succession. But if they were quickly destroyed they were rapidly restored. He regretted the destruction as much as any one, but it was a necessity which could not be avoided. Well, we had recently been again engaged in hostilities with the Japanese. So far as our Government was concerned, there was the most anxious desire to be at peace with Japan. They wished to extend our commerce with them, to be at peace with them, and to benefit our own country by extending our trade with them, but things might arise which were beyond our control, rendering hostilities absolutely necessary. Such was the case in the recent war—a war not with the Japanese Government, but with a Daimio, a sort of nobleman, who had taken upon himself to raise certain forts, and to block up the entrance to an inland sea which communicated not only with a considerable portion of Japan, but with an important part of the archipelago. If we had acquiesced in this, it would have encouraged others of these powerful noblemen to follow the same example, and we should probably soon have found ourselves in a war with the Government of Japan. It was this consideration which led our Minister, in conjunction with those of Holland, France, and the United States, to attack the forts which opposed the entrance of our ships, to silence the batteries, and force the entrance into the inland sea. (Hear.) It was said they were cowards for attacking so weak a people; but he (Mr. Layard) held that the course taken was a humane course, and one calculated to prevent war and save life. (Hear.) The Japanese were, indeed, the most singular people under the sun. When the batteries were silenced some men from the fleet were sent to remove the guns, but the Prince, the Daimio, who was more a pirate than anything else, protested, and said that the guns were his property. When, however, he found that the admiral insisted, he not only assented, but sent some of his own men to help to get the guns on board, and also sent presents of fruit and flowers to the admiral. Close to the batteries was the town of Sukemalaki, which was not interfered with at all. Then as to the effect of this act upon the Government of Japan, and our trading relations with that country. For fifteen months the trade, which was principally in silk, had almost stood still. In 1860, 2,392 bales had been sent down ; in 1861, 5,283 bales ; in 1862, 5,486 bales; and in 1863-4 only 700 bales ; but when the Japanese Government heard that the batteries of Nagato had been destroyed they again opened the trade in silk, and in a few days 3,000 bales were brought down. No one would wish to enter into a war unnecessarily, but there was cause when it was essential that examples should be made. With regard to European politics he had only to say that, having been, as usual, during the recess, to Italy, he was highly gratified with the progress which he had observed in that country.

Lord CLARENCE PAGET also alluded to the engagement as follows :—

We have been engaged, in conjunction with our allies the French, and other great European nations, in an affair in the waters of Japan, to which I wish for one moment to refer. One of the powerful Daimios of that kingdom had thought fit, without the consent of the Tycoon, to shut up the inland sea of Japan—a sea which may be fairly and aptly compared to our own channel—and to assert the right to close it against the commerce of all nations whatsoever. Well, we and the other great European nations united with common accord—and this is another proof of the good fellowship which happily exists between this country and the other Powers—they united together in chastising those insolent Daimios ; and thus you had another chapter added to the records of the skill and valour of your officers and seamen. (Hear, hear.) We have not for an instant entertained the idea of occupying the territory or seizing any of the provinces of the Daimios. (Hear, bear.) All that we have done is to vindicate our right to free and unfettered ingress and egress to and from those inland waters, and when Parliament meets and discusses this matter I am satisfied that all parties will be found to agree that the course lately pursued by the Government in Japan was justified under the circumstances.

COTTON FROM CHINA.

The following appears in *The Times*. We observe some errors in regard to dates to and from China, &c :—

Sir,—In the cotton trade circular just issued by Messrs. Neill Brothers, occurs the following rather startling statement, of which it would be desir-

Digitized by Google

able that the public should have some explanation. On the subject of cotton supply from China Messrs. Neill say:—

"The dissatisfaction which imports from that country have caused, the recent panic in the trade, and the fact that prices are even now 4d. and 5d. per lb. lower than last year, have already reduced the quantity afloat to a bagatelle."

The advices from which the last returns of cotton afloat from China were made up reached at latest to the 9th of October, and the latest telegraphic news from England in China at that date was to the last week in August. On the 1st of September prices of cotton were still within a trifle of their highest point, and although there had been rumours of peace in America, such as we have had every few months since the war began, nothing had occurred which would hinder the shipment of a single bale of cotton—no symptom of the "recent panic" had appeared. As to the "fact of the present price," one is at a loss to conjecture how it could be communicated in time to prevent shipments two months ago. Possibly, however, Messrs. Neill may in their next circular demonstrate the immediate effect of the present price on the past shipments by instancing the fact that the cotton afloat advised on the 26th of November was only 106,000 piculs, while on the 3rd of December it had increased to 124,000 piculs, the market meantime having considerably improved.

The unsatisfactory results of former imports of Chinese cotton will probably be judged by the Chinese according to the price realised, and, while we still offer fifteenpence for cotton which that industrious and thoroughly mercantile nation can grow with a good profit for sixpence, I do not think they will trouble themselves much about the dissatisfaction caused to the buyers. The tendency of the paragraph—and this alone makes it worthy of public notice—is to convey the idea that unless the present ridiculously high prices of cotton are maintained, the large crops grown in 1864 (the first year which has had the full effect of the stimulus of extreme prices lasting long enough to give confidence to growers) will not be sent to us. The absurdity of such an idea, however, is manifest to any one who will give it a moment's consideration. Before the war the Indian surplus crop was sent to us, and in 1860 to a very considerable amount, although the prices realised ranged in that year from only 2½d. to 4½d. per lb. Native speculators may certainly endeavour to hold back supplies in hopes of forcing prices, but we may confidently rely on their neither eating nor otherwise consuming the cotton, and the crops of 1864 are just as certain to us, even should the article decline at once to nearly its nominal value, as if we had them already stored in our warehouses.

Cotton trade writers generally still industriously keep up the notion that the course of prices of this staple depends upon American politics and the state of the money-market, studiously ignoring the fact demonstrated by the figures given below—that owing to the increased supplies from all quarters on the one hand, and the permanent decline of demand from economising of material and substitution of other fibres for clothing on the other hand, our supplies of cotton, independently of America, are now in excess of the requirements.

Supplies of cotton to the United Kingdom from other countries than the United States, but including latterly small receipts of American Cotton from Matamoras and through the blockade:—

	Bales.		Bales.
1858	577,000	1862	1,445,000
1859	744,000	1863	1,932,000
1860	784,000	1864	2,600,000
1861	1,194,000	1865 (estimated) ..	3,500,000

Stocks of cotton on December 2,	1863. Bales.	1864. Bales.
At Liverpool	249,500 ..	383,800
At London	43,500 ..	117,700
At Havre	26,200 ..	61,800
Total	319,200 ..	563,300
		319,200
Increase of stock in 12 months		244,100

THE IMPORTS OF COTTON AND THEIR CONSEQUENCES.

(ECONOMIST.)

Many people who only live from day to day in the money market—and of such there are by far too many—are surprised at the revival of the export of gold to Alexandria, and of silver to India. But the real ground of surprise is that the revival has not taken place earlier; that the high value of money was able to stay the export of gold and silver so completely as it did stay it. The extent to which the cotton import—the *value* of the cotton import—has grown, is not enough kept in men's minds. The figures are, for the first nine months of the three last years, as follows:—

	1862.	1863	1864.
United States	£408,158 ..	£438,401 ..	£1,594,489
Bahamas and Bermudas	205,949 ..	1,578,639 ..	3,422,227
Mexico	104,672 ..	860,636 ..	2,261,430
Brazil	1,061,732 ..	1,658,749 ..	3,373,959
Turkey	163,102 ..	542,208 ..	1,565,160
Egypt	2,655,130 .	6,379,790 ..	11,354,653
British India	9,044,484 ..	17,358,230 ..	24,862,133
China	21,151 ..	1,520,670 ..	4,945,209
Other countries ..	862,723 ..	1,325,008 ...	2,955,006
Total	£14,527,101	£31,662,331	£56,334,266

The wonderful effect which the high price has had in stimulating the import—not only from one place or country, but from all countries—is very remarkable. But this is not the feature of capital importance. The point to be considered is this: we are importing, in *value*, 75 per cent. more of cotton than we imported last year, and most of it, as the figures show, is from new regions and countries which will not on a sudden take commodities in exchange, but will have cash—will have money. If we look at the *Oriental* demand, as we may call it, of India, China, and Egypt, taken together, the comparison runs:—

VALUE OF COTTON IMPORTED FROM INDIA, CHINA, AND EGYPT.

1862	£11,720,765
1863	25,258,690
1864	41,161,995

If we remember how powerfully this demand affected us last year, how it forced up the Bank rate at this very period 2 per cent. in a week, and to 8 per cent., we shall not be surprised that we now feel to some extent the milder effect of an agency so augmented.

An idea prevails in some quarters that our exports to the East have grown to such a magnitude as to counterbalance the largely increased imports of cotton. But the figures of the Board of Trade tables do not countenance such an idea.

THE EXPORTS OF BRITISH AND IRISH PRODUCE AND MANUFACTURES.

	1862.	1863.	1864.
Egypt	£1,637,252 ..	£2,967,708 ..	£4,478,083
India	11,350,837 ..	13,021,949 ..	14,345,139
China (exclusive of Hong Kong) ..	1,594,299 ..	1,771,873 ..	2,308,522
	£14,582,388 ..	£17,761,530 ..	£21,131,744

Whereas the imports have been:—

	1862.	1863.	1864.
Egypt	£8,716,815 ..	£11,845,621 ..	£14,792,635
India	17,095,803 ..	26,371,998 ..	33,871,971
China (exclusive of Hong Kong) ..	8,415,905 ..	9,163,528 ..	8,235,986
	£34,228,523 ..	£47,381,147 ..	£56,900,592

So that the balance of trade, as indicated by the bare figures of the direct commerce, is more against England than it ever was.

We do not wish to infer from these figures that there must be a sudden drain to the East of enormous and overwhelming magnitude. Such is not our opinion. There are many circumstances which must be taken account of besides the mere figures of export and import when we consider the state of the exchange between different countries. For example, at the present moment it is said that some of the rich natives of India are so displeased at the price at which their cotton was recently sold here, and are so sanguine as to the future, that they are sending over money to buy cotton in Liverpool; they will not permit, if they can help it, the price of cotton to be brought down by temporary despondency here. And there are various other circumstances which may in one way or another alter the interchange account of two nations. But, on the whole, there is this great force upon the edges of the market which must have its due effect, which must prevent the speedy arrival of *cheap* money.

Naval and Military.

—o—

The Queen has been graciously pleased to give orders for the appointment of the under-mentioned officers who served in the late engagement at Simonoseki to be ordinary members of the military division of the third class, or Companions of the Most Honourable Order of the Bath, viz.:—Captain John Montagu Hayes, R.N., Captain William Montagu Dowell, R.N., Captain John Hobhouse Inglis, Alexander, R.N., and Lieut.-Colonel William Grigor Suther of the Royal Marines, Lieutenant-Colonel Charles George Gordon, of the Royal Engineers, sometime employed in the service of his Imperial Majesty the Emperor of China.

The Duke of Somerset has bestowed the vacant captain's good-service pensions on Captain Charles Farrel Hillyar and Captain George Sumner Hand, C.B. The first-named officer reckons twenty-seven years and six months' sea time; and the last, twenty-nine years and six months. The Duke has conferred the post of Aide-de-Camp to the Queen on Lieutenant-Colonel George Lambrick.

Captain Sherard Osborn, C.B., went on board his ship, *Royal Sovereign*, on the 30th Nov., for the last time as her commanding officer, Captain Osborn resigning his command of the ship, the completion of his captain's service in sea time entitling him to flag rank on the Active List. The *Royal Sovereign* maintains a present complement of 104 officers and men, comprising one senior lieutenant, one surgeon, one paymaster, one chief engineer and three assistants, three warrant officers, and 94 seamen, marines, and stokers.

LAUNCH OF A STEAMER FOR THE EGYPTIAN PILGRIMS.—The launch of the first of the new steam ships for the Egyptian Navigation Company (*Azizich*) took place at the Thames Iron Works, Orchard-street, Blackwall. The new company has been promoted by the Pacha of Egypt, and the chief shareholders are the leading Egyptian dignitaries. Its primary object is the diversion of the pilgrimage traffic from the infidel French and American hands, into which it has strangely fallen, and hereafter the most scrupulous follower of the Prophet will make the voyage to and from Constantinople and Alexandria with a good conscience. Already some purchased steamers are on the passage, but they are inadequate, the running of Egyptian steamers for the pilgrims proving as attractive as excursion trains to our own working classes. It has therefore been necessary to increase the fleet of the company, and the Pacha and the shareholders after deliberation put the matter into the hands of the Peninsular and Oriental Company, requiring three first-class steamers of the ordinary proportions and with the same style of fittings as the latest vessels. The other two are in an advanced state for launching, one in the yard of the Messrs. Wigram, and the other in the yard of the Messrs. Samuda. There, it is expected, the demand for steamers will not stop, the attractive accommodation of steamers in all respects like those of the Peninsular and Oriental Company, and specially fitted for the harems of the pilgrims, promising still increased accessions to the traffic. The special fittings for the harems are, however, restricted to first-class passengers, and the main saloon, so appropriated, has three movable partitions, with separate deck communications, closets, &c., each division making up sixteen beds for wives, besides the necessary sofas for the attendants. The partitions have been made movable so as to admit of the steamers being at any time withdrawn from the pilgrim traffic employed as transports. The second-

Digitized by Google

class accommodation, contemplating only four wives for each pilgrim, does not indeed stand in need of special fittings, beyond a capacious sofa for the middle-class lord and a rug for the eunuch; four berth passengers being usually stowed in each state-room in the second-class of a Peninsular and Oriental steamer. In the third-class the pilgrims, who, it may be presumed, have quite enough to do to keep one wife, have no privacy afforded them, and are supposed to rough it out much in the same manner is steerage passengers on board a New York liner.

THE WILL OF THE LATE RICHARD GIBBS, ESQ.—The will of Richard Gibbs, Esq., late of the City of London, tea broker, and of Upper Tooting, Surrey, was proved in London on the 29th October, by his relict, the sole executrix. The personalty was sworn under £100,000. After making several bequests, he leaves to his wife a life interest in the residue of his property, with power of disposition over a certain portion. The ultimate reversionary residue is left amongst some of his nieces and others. To his partner, William Weston, Esq., he leaves the option of retaining £10,000, at 4 per cent. interest, from which annual sum of £400 annuities of various amounts to twelve persons are to be kept up, the bequests being chiefly to individuals who had been or were in his employ; and on the decease of these annuitants the principal sum of £10,000 will revert to twenty-three charitable institutions. The legatees are numerous, and the legacies are to be paid free of duty. There are specific bequests of pictures, &c., to many of his friends, members of the City Club, and to one of the "Round Table." To each of his clerks who had been four years in his employ he leaves a legacy of £100, and £20 to each of the others; also £10 to each of the porters, and legacies to his servants. His business, carried on under the firm of Messrs. Gibbs and Co., he states, "was founded and reared up by him, and with the assistance of his partner, has met with success, after many years of indomitable perseverance and industry;" and at the conclusion of his will are these words: "I thank Almighty God for inclining my heart from childhood to feel 'for others' woes.'" The will bears date July 4, 1864, and his death occurred by an accident on the 7th of October last, in his seventy-fifth year.

THE TELEGRAPH FROM CANADA TO THE PACIFIC.—Intelligence from Vancouver Island states that Dr. Rae had reached Victoria, overland from Canada, on the mission of a trans-continental telegraph. He is the surveyor of the route, and considers that the connecting of Canada with Vancouver Island by telegraph direct is but the work of two years. Already 1,200 miles of wire had arrived east of the Rocky Mountains, and 600 more was on its way to Vancouver Island, making in all 1,800 miles, the distance from Red River to Victoria.

Monetary and Commercial.

A meeting of the creditors of Messrs. Ackroyd and Whitakert in the China trade, was held at Bradford, when a composition, of 11s. 6d. in the pound, under guarantee, was offered, and will probably be accepted with that condition ensured. The liabilities are said to be £80,000, and the assets £40,000.

At a meeting of creditors of Messrs. Brown, Buckley, and Co., it was agreed "that as the accounts presented to this meeting leave no doubt that Messrs. Brown, Buckley, and Co. will, at an early period, be in a situation to pay their creditors 20s. in the pound, they be requested to wind-up their estate, and to pay as soon as possible the debts due from them to their creditors, it being understood that 10s. in the pound be paid forthwith."

The following new undertaking have been announced:—

The Telegraphic News Association (Limited). The capital is £50,000 in 5,000 shares of £10 each, with a deposit of £1 on application, and £1 on allotment. Already a large proportion of the amount necessary has been subscribed. The object is to furnish the press, and the public of England, the Continent of Europe, and the Western world, with a fuller and more regular supply of telegraphic intelligence than the present system provides. The promoters of the undertaking, after much preparation and expenditure, and favoured by circumstances of an exceptional nature, are in a position to assume this responsible function with the certainty of being able to execute it in a complete and effective manner. Special arrangements have been made for procuring early and accurate, and in many instances exclusive, information in connection with the American civil war and the progress of the new Mexican empire, while from China and the East Indies intelligence will frequently be transmitted via St. Petersburg when other sources of information are not available. According to careful estimates of the probable financial results, a large return in the shape of dividend will be secured upon a small outlay.

A numerously attended meeting of the creditors of Messrs. Halliday, Fox, and Co., general merchants, but chiefly in the East India trade, was held on the 29th November, when a balance-sheet was presented by Mr. J. E. Coleman, of the firm of Coleman, Turquand, Youngs, and Co., accountants. The direct liabilities or commitments uncovered by securities are estimated at £319,264, against which there are assets to the extent of about 307,937, including a large amount of produce. The consignments of the firm now at sea represent a total of about £1,109,000, of which £731,500 are inward and £377,500 outward shipments. The produce is valued at the prices current at the date of the stoppage, and is fully expected to realise the amount put down in the statement of accounts. The chairman, Mr. M'Kinnon, expressed a strong belief that nearly 20s. in the pound will be obtained. It was unanimously resolved to liquidate the estate under inspection, and satisfaction was expressed at the explanations afforded.

The following is the report to be presented to the shareholders of the Ceylon Company (Limited) at the half-yearly meeting on the 14th December. It recommends a dividend and bonus equal altogether to 15 per cent.:—

The directors are again able to congratulate the shareholders on the success which has attended the operations of the company during the six months previous to the 30th September. The business of the company contiuues to increase, and the reports received from the managers in Ceylon and Mauritius are very satisfactory. The accounts show that the profit resulting from the operations of the half-year may be justly estimated at £14,200, out of which the directors recommend that an interim dividend at the rate of 10 per cent. per annum, and a bonus of 2½ per cent. on the capital paid up on the 30th September, amounting together to 10s. 6d. per share, be declared, and made payable, free of income-tax, on the 17th inst. The proposed payments will absorb £9,870, and leave a balance of profit amounting to £4,330 unappropriated. The reserve fund has been credited with interest at 5 per cent., and with the premiums on the new shares allotted in India and added, will amount to £22,650. The above profit result has been submitted to, and is confirmed by Mr. Ball, the auditor of the company.

The half-yearly meeting of the Scinde, Punjaub, an Delhi Bank Corporation has been held, when the directors' report was adopted, after some discussion with respect to the non-payment of any dividend. On this point the chairman, Mr. W. P. Andrew, explained that there had not been time to acquire a large business of a character at once safe and profitable. Five of the branches have as yet produced but little, and the times have been adverse, and exchange operations hazardous. The report and balance-sheet appeared in our last.

Messrs. Smith, Edwards, and Co., of Liverpool, observe in their cotton circular:—"Considerable interest is felt at present in the movements of the Federal General Sherman, which are enveloped in much obscurity. It is surmised by some that he is marching for Augusta, and it may be observed that if this report is true, an extensive destruction of cotton may be looked for, as large stores are known to exist in and around that city. It was regarded as one of the safest depots in the South."

The biddings for £350,000 in bills on India took place on the 7th at the Bank of England. The proportions allotted were—to Calcutta, £226,200; to Bombay, £120,000; and to Madras, £3,800. The minimum price was, as before, 1s. 11½d. on Calcutta and Madras, and 1s. 11½d. on Bombay. The applications within the limits amounted to £2,230,000. Tenders on Calcutta and Madras, at 1s. 11⅞d. will receive about 9 per cent., and on Bombay at 2s. ⅛d., about 80 per cent.; all above these prices in full. These terms indicate a considerable increase in the demand for means of remittance to India, the rates paid being about 1¼ per cent. higher on Calcutta, and 2 per cent. higher on Bombay than those on the previous occasion.

The annual meeting of the P. and O. Company was held on the 6th inst., when a dividend was declared of 3½ per cent. and an additional 2 per cent., and also 1½ per cent. from the underwriting account, in all 7 per cent. A report of the meeting will be found in another column.

The amount of bullion by the P. and O. Company's steamer *Massilia*, from Southampton on the 4th inst., was:—In gold, to Madras £892; to Alexandria, £16,000. In silver, to Madras, £10,000; to Penang, £10,000; to Singapore, £23,500; to Hong Kong, £24,310; to Foo-chow-Foo, £3,100; to Shanghai, £24,955. Total, in gold, £16,892; in silver, £95,865.

ARTICLES OF IMPORT.

TEA.—A dull and heavy feeling has prevailed in the Tea Market during the last fortnight, and business has been on a limited scale, with a tendency to lower prices for most descriptions. The Public Sales, comprising 31,011 packages, of which 24,407 are printed without reserve, are passing with extreme heaviness, prices for some kinds of Congou showing a further decline. The arrivals continue to be large, and the quantity put on the market is greatly in excess of the requirements of buyers.

	1864.	1863.
Home consumption for London from 1st July to 30th November	51,974,000	48,820,000
Export from do do	26,800,000	24,496,000
Sent Coastwise from do do	25,096,000	27,363,000
Total delivered for do do	103,870,000	100,679,000

Black: Dust and broken-leaf without alteration; good common shipping quality also maintains previous value. Old season's reddish-leaf kinds of common to fair quality have sold in public sale at from 11½d. to 1s. 1d., which is fully ½d. per lb. cheaper, and similar qualities of new seasons's import have suffered a decline of 1d. to 1½d. per lb. Fair to good Kaisow kinds, which have sold from 1s. 4½d. to 1s. 6d. in public sale, must also be quoted fully 2d. per lb. lower. Fine and finest Kaisows are without change, but the transactions have been trifling. Blackish-leaf sorts of common to fair quality have sold heavily from 11d. to 1s., medium sorts up to 1s. 6d. have also been difficult to move, but prices do not show any material change. Fine and finest Monings and Oopacks have been in limited request, a parcel of extra fine Moning in half-chests has realised 2s. 10d. Souchongs have offered freely, and medium qualities are difficult to move; fine and finest have been sold to a moderate extent from 2s. to 2s. 4d. Medium to fine Oolongs have sold steadily from 1s. 7d. to 1s. 10d., but inferior qualities are neglected, and prices are gradually giving way. New Scented Teas continue to meet with ready sale at full prices. Capers from 1s. 3d. to 2s. 6d., and Orange Pekoes 1s. 6d. to 2s. 8d., and a few superfine Foochow make from 2s. 10d. to 3s.; old importations are difficult to move. Common Canton Capers have sold as low as 7½d. to 7¾d. in public sale. Flowery Pekoes without change. Green: Country kinds of medium to fine qualities find ready sale at previous rates, but common sorts are only in limited request, and sales are difficult to make, exception easier terms. Medium to fine Moyune Young Hysons have realised 1s. 7d. to 2s. 3d., and fair common 1s. 3½d. in public sale; a parcel of superfine Gunpowder sold at 3s. 7d. Hysons have been in moderate request for export, from 2s. 8d. to 3s. 2d. There is nothing to report in uncoloured Japans, but a few coloured parcels have changed hands at fair prices, chiefly Young Hysons at 1s. 4½d. The quantity afloat from China and Japan is 41,330,321, against nearly 38,000,000 last year.

SILK.—China Silk: The scarcity of good Tsatlee is more than ever felt, hence any parcels of old silk offering in second hands find ready buyers, both for export and home consumption, at full prices. Japan Silk: Some few hundred bales of Mibash surreptitiously obtained from the interior have recently arrived, and been sold at about previous rates, though the demand is far from active. The deliveries for the month are 3,177 bales China, and 988 bales Japan. In Italian Silk there has been some business lately, at rather improved rates. The miserable result of this season's crop is more than ever apparent.

COTTON.—In the week ending the 3rd inst. the renewal of peace, rumours from America unsettled the market, and the London prices declined in most cases fully 1d. per lb. The following transactions were quoted during the week:—20 bales China 15½d. for fair; 610 bales Japan 15½d. to 16d. for fair, and 16½d. for good fair. In the Liverpool market also China and Japan declined about 1d. per lb. but were more in demand at the reduction. (See "Latest.") The following figures refer to the Imports:—

SUGAR.—The market closed flatly with the week ending the 3rd inst., at a decline of 1s. per cwt. At public auction 982 bags Siam, dry, greyish yellow, and white (11s. 8d. duty), were taken in at 39s. to 40s. per cwt.; 1,100 bags old clayed Manila of good quality were reported at 29s. 9d. to 30s. per cwt. During the present week the market has again been drooping, and prices are in favour of the buyer, the small portion sold being at easier rates. On the 6th, 295 mats Penang sold at 28s. to 32s.; and next day 1,603 bags at from 28s. 6d. to 30s. 6d.

COFFEE.—The supply has been very moderate of both Plantation and Native, and prices are again fully 1s. per cwt. higher; but the market has now become a little less stiff. At auction on the 8th, 440 packages Plantation Ceylon sold at from 72s. to 83s. for fine ordinary to middling colouring; 723 bags Native were bought in at 70s. 6d. Of 330 bales and half-bales of Mocha at auction, the bulk was placed at 93s. to 95s. 6d. per cwt. for fair brownish short berry, and 85s. to 86s. 6d. middling greenish long.

RICE.—The market has been active, with large business, including speculative operations of some magnitude. 18,011 bags were all sold at auction on the 6th, at 7s. to 8s. 6d., being the full value. No business of any consequence doing in Java, and the market generally firm.

CAMPHOR.—Has further increased in value, and sales have been made privately up to 95s. per cwt. for Japan, and 90s. China. 200 chests China sold at auction at 92s. 6d. to 95s. Latterly the market has become more quiet, with less disposition to buy.

CASSIA LIGNEA.—Has further fallen in value 3s. to 4s. per cwt.; and of 2,070 boxes at auction, more than three-fourths sold at 82s. to 87s. per cwt. for common second to fair first pile, and 79s. to 81s. mouldy. Buds: Lower; and of 86 boxes at auction, about one-third sold at £11. 10s. per cwt. for good sound; moderate private sales had been previously effected at £11. 15s. for mouldy.

CINNAMON.—We quote 1st sort 1s. 10d. to 3s.; 2nd sort 1s. 6d. to 2s. 6d. 3rd sort 1s. 6d. to 2s.; 4th sort and jungle, 1s. 3d. to 1s. 7d. per lb. Nothing of any importance doing.

COCOA NUT OIL.—This market has again been very quiet, and rates have further fallen 10s. per ton.

DRUGS.—Cubebs: Flat, and 181 bags at auction all retired. Dragon's blood: Nothing doing. Galangal Root: Quiet, 90 bags sold at auction at 15s. to 16s. 6d. per cwt. for good quality. Rhubarb: At auction 262 chests, chiefly of recent importation, met with good general demand, and three-fourths sold at 6s. 2d. to 6s. 3d. per lb. for fine round, 4s. 7d. to 4s. 8d. middling flat, 4s. 4d. to 4s. 5d. round, and 1s. to 2s. 9d. low to ordinary.

GUMS.—Benjamin: Steady; and of 32 cases Sumatra at auction, half sold at £13 to £13. 2s. 6d. per cwt. for good 2nd quality, and £12. 2s. 6d. to £12. 7s. 6d. false packed. Damar: Some enquiry for good quality: but 117 cases middling at auction were all retired. Gamboge: Remains scarce and firm. 11 cases at auction, all retired.

GUTTA PERCHA.—Very flat; and of 87 baskets and 3 tons at auction, one half of the former sold at 1¼d. to 4¼d. per lb. for very low trash and inferior.

INDIA RUBBER.—Really fine quality, especially Java and Batavia, wanted; Penang has sold cheaper, 76 baskets fair at auction only realising 1s. 1½d.; of 137 packages Assam a few sold at 7¾d. to 8d. per lb. for middling ball.

HEMP (MANILA).—No auction held; moderate transactions privately at £26 to £28 per ton for fair to good roping, and £23 to £25 common.

HIDES AND HORNS.—At auction 2,920 Penang cow hides offered, 1,312 sold—light, 6d. per lb.; heavy, 5d. to 5½d.; small, 6¾d.; thirds, 4d.; 455 Penang buffalo hides sold at 4¾d. for best. Horns: Firm; 5 tons Penang and 4 tons Madras at auction sold at 41s. to 41s. 6d. for 3 lb. average, and 23s. 6d. to 24s. for 1¼ lb.

JAPAN WAX.—342 cases middling and good saucer taken out at 60s. to 65s.; 2 cases sold at 75s.

OILS.—Anniseed: Still buyers at 5s. 10d. per lb., but no sellers there at the moment. Cassia: Held with a little more firmness, but nothing doing: buyers at 7s. 9d. per lb. Cinnamon: Quiet: 5 cases at auction retired.

SAGO.—Is again rather lower, and of 336 packages at auction two-thirds sold at 19s. per cwt. for fair small, and 19s. to 19s. 6d. middling large. Flour: Quiet: Very little doing.

SHELLAC.—Has become very flat, with an average decline of 5s. per cwt.; and of 1,034 packages at auction, only one-third found buyers:

Digitized by Google

Orange, at £6. 2s. 6d. to £6. 12s. 6d. per cwt.; Liver, £5. 5s. to £5. 12s. 6d.; Button, £6. 7s 6d.; Native, £5. 2s. 6d. to £5. 10s.; pale dull Garnet, £5. 5s.; and Block, £4 to £5. 2s. 6d. Arrivals, and sales advertised.

SPICES.—Cloves: Steady; one case Penang sold at auction at 1s. 3⅞d. per lb. for good; and of 413 bags Zanzibar one-third sold at 3⅞d. to 3⅛d. 577 bags Clove stalks realised the advanced price of 2⅞d. to 2⅞d. Ginger: Quiet; but 200 cases at auction sold at 63s. to 96s. per cwt. for ordinary to good. Mace: Quiet, and of 35 cases Penang, and 25 cases Singapore at auction only one-fourth sold at 10d. to 1s. 2d. per lb. for ordinary red to fair reddish. Nutmegs: Steady; only 17 cases Singapore at auction sold at 2s. 9d. per lb. for fair bold; and 1s. 3d. to 1s. 4d. very good small. Pepper: White Singapore steady, and 2,365 bags at auction mostly sold at 3¼d. per lb.; Penang nearly ⅛d. cheaper, and of 10,970 bags at auction half sold at 2⅞d. to 3⅛d., with Trang at 3d. to 3⅛d. Black, nothing of any interest doing.

TOBACCO.—Manila Segars and Cheroots: Prices continue very high, and the supplies that came in during November were much damaged. Java: Numerous demands for good coloury lots, but they are not to be obtained, and all that the trade will have to select from are the remaining parcels of old imports; there is to be a sale of 10,000 bales in the early part of next month on the Continent, when it is asserted that scarcely any lots fit for this market will be amongst them. Japan is at present the substitute most used, but it will soon cease to be so if parcels sent on are not more carefully selected; to pay the heavy freight from that part of the world on actually bad tobacco is like throwing money away. Prices: Manila cheroots and segars, 8s. to 9s. 3d.; Manila leaf, 11d. to 4s.; Japan, 4d. to 7d. Java, 6d. to 1s. 0½d.

TERRA JAPONICA.—Cutch, Pegu: Dearer, and in good demand; 616 bags at auction mostly sold at 23s. to 24s. per cwt. for fair to good. Gambier: Very quiet, with scarcely any trade; 450 bales at auction all retired.

MISCELLANEOUS.—Galls: Nothing doing in Turkey or Bombay, which are very scarce. China and Japan again dearer; of 279 cases China at auction three-fourths sold at 60s. to 65s. per cwt.; and 281 cases Japan all sold at 50s. to 53s. 6d. Musk: Steady. 30 caddies Tonquin at auction sold at 30s. to 31s. per oz. for good picked, 19s. to 21s. middling rough, and 17s. 6d. pickings; 3 tins Cabardine sold at 12s. 9d. to 13s.; 4 tins Grain retired. Rattans: Rather lower; and 10,271 bundles Penang, and 4,710 bundles Singapore sold at 4s. to 4s. 11d. per 100. Sapan Wood: Steady, but quiet; 39 tons Manila at auction all retired. Mother o'Pearl Shells: Dearer; and of 197 cases at auction one-fourth sold at 115s. per cwt. for good. Soy: Firm; little offering; 12 hhds. at auction retired at 3s. 9d. per gallon. Star Anniseeds: Held firmly; 42 cases at auction retired at £6. 10s. per cwt. Sticklac Siam: Continues very flat; of 380 cases at auction a few only sold at 48s. per cwt. for very good. Tortoise-shell: Flat; in very partial demand, and only at low prices; of 19 cases at auction, half sold at 10s. to 14s. 6d. per lb. for inferior to middling in sorts. Vermilion: Cheaper; and of 30 boxes at auction, two-thirds sold at 2s. 6d. per lb., at which there are still sellers.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 15s. to £8; nail rod, £9. 10s.; hoops, £10. 10s.; sheets, single £11. 10s.; Staffordshire bars, £9. 10s.; rails, £7 to £7. 5s.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and Sheathing, £99 to £100 per ton; yellow metal, 8½d. to 8⅝d. per lb.

TIN.—100s. to 101s. for block; 101s. to 102s. for bar. Tin plates, best charcoal, I.C., 29s. to 29s. 6d. per box.

LEAD, &c.—English pig, £20. 5s. to £20. 10s.; W.B., £22. 10s.; shot, patent, £23. 15s.; sheet, £21. 10s.; spelter, £21. 5s.; zinc, English sheet, £26. 10s. to £27; quicksilver, £8.

The following is from the Circular of Messrs. French and Smith:—There was very little improvement in the Metal Market in November, and some metals are now lower in price than in the early part of the month. Iron: Scotch Pigs continued depressed. The present quotation is 50s. 6d. g. m. b. for cash. Welsh and Staffordshire remain firm in price. Copper has been more in demand, and there is now less disposition on the part of sellers to give low quotations. For Burra the quotation is £3 to £4 higher than at this time last month. Tin: The heavy stock keeps Tin very depressed; we have had rather more demand for shipment at intervals the last few weeks, but not sufficient to take off the fresh arrivals, so that this month again the stock here shows an increase upon the preceding; English has participated in this flatness with Banca and Straits. The quotation for Straits is 93s. to 94s., and for Banca, 95s. 6d. to 96s. The quantity of Straits tin afloat for Europe is 864 tons, against 668 tons in 1863, and 721 tons in 1862. Tin Plates have again declined in price, more particularly for coke. The quantity shipped to all parts for the past month was 58,000, against 75,000 boxes in November, 1863. For Lead there is more inquiry, with an improvement in price. Spelter remains inactive; the stock on 30th Nov., 11,820 tons, against 4,803 on 30th Nov., 1863. Quicksilver without alteration.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

Since our last issue the arrivals from the eastward, although still numerous, have somewhat decreased. The same depression, however, still exists in all export business, and but little is doing in chartering homewards.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £34 to £35 and £1. 17s. 6d. For Shanghai: £45 and £2. 2s. 6d. For Manila: £1. 5s. For Ceylon: £24 and £1. 2s. For Batavia: £25 to £26. For Singapore: £25 and 22s. For Penang: £27. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have engaged freight in the Banian for the conveyance of Government stores from the River Thames to Hong Kong, and have invited tenders for the conveyance of 2 naval boilers to Hong Kong, 12 tons rockets and sticks to Shanghai, and 39 tons naval stores to Trincomalee, all from the River Thames.

CASUALTIES.

The long boat of the Robin Hood was picked up on the 23rd November off the South Foreland, and on the following day in the stream off the North Sand Head, a few cases, supposed to be from the wreck of that vessel, which lies in the same position where she sunk. All her sails have been unbent or cut away by boatmen. Seven cases of her cargo have been washed ashore at Dungeness.

The mate of the Helen's Bank, from Colombo to London, which ran ashore at Scilly on the 18th November, reports that when she struck there were only three men and a boy on board, most of the crew having been discharged.

The Scawfell, from Sunderland to Hong Kong, took the ground in the South Outlet, on the night of 3rd December, but after discharging part of her cargo she has been got off and returned to repair.

The Diamond (barque), of and from Shields for Hong Kong, while at anchor off Yarmouth, 4th Dec., was run into by the Dispatch (schnr.), of Dartmouth, and lost jibboom, &c.

The Hero of the Nile (ship), Abernethy, from Colombo to London, sprung a leak at sea, making 8 to 9 inches water per hour, and put into Mauritius Oct. 19, where she was Nov. 7, on the slip, being recoppered.

The Julia Ambridge (schr.), McKee, from Manilla and Anjer to New York, sprung a leak after leaving Anjer, and put into Mauritius Oct. 22, and was discharging there on Nov. 7.

AT ST. VINCENT, C. V., Nov. 10, from Gibraltar, H.M.S. Tamar, and sailed 11th for China.

AT ST. HELENA.—Oct. 30, from Batavia, Alexander, Dogen, and sailed 1st Nov. for Amsterdam; from Shanghai, Gresham, Bayley; from Java, Helena and Anna, v. Aalburg; from Batavia, Anthony van Hoboken, Hazewinkle, and both sailed 31st for Amsterdam; from Padang, Vooruit, Strot; Nov. 2, from Samarang, Ida Elisabeth, Amer., Oct. 29; from Cape Good Hope and Ceylon, H.M.S., Orontes.

OFF ST. HELENA.—Nov. 1, Adriatic (barq.), from Hong Kong for London.

AT TABLE BAY.—Oct. 22, Aldebaran, Driver, sailed for Batavia; Skimmer of the Waves, Hammond, sailed for Galle.

AT MAURITIUS.—Oct. 24, from Singapore, Hammersmith, Nairn; 20, Vampire, Blandford, sailed for Singapore; 26, Elvira, Gardes, sailed for Penang; Nov. 1, Guayaquil, Dejean, sailed for Galle.

MR. CHARLES LUNGLEY, the well-known shipbuilder of Deptford, has entered into an arrangement with the Millwall Iron Works Shipbuilding and Graving Docks Company (Limited), by which he joins that company with his shipbuilding and engineering works at Deptford, and takes the general control of the united establishments as director of the works.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, of all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot is 12, RUE RICHER, PARIS.

DOCKS. PORT OF AMOY, CHINA.

AGENTS and Commanders are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING, SPARRING, and RE-FITTING VESSELS of all sizes, and for CLEANSING and PAINTING Iron Ships, at moderate charges.

Their large Granite Dock, 286 feet long on the blocks, with 19 to 21 feet water in the entrance at spring tides, and fitted with Caisson Gate and Steam Pumps, is in complete working order, and is well supplied with every description of materials.

EUROPEAN FOREMEN superintend the work in all departments.

Amoy, 1st January, 1864

POOTUNG DOCKS

OPPOSITE TUN-KA-DOO CATHEDRAL.

D. MUIRHEAD, Superintendent.

THIS MAGNIFICENT DOCK IS NOW READY TO RECEIVE VESSELS.

IT IS THE LARGEST DOCK IN THE EAST.

THE DIMENSIONS AND DEPTH OF WATER BEING:—

Length over all	380 Feet.
Length on Blocks	340 „
Width at top	125 „
Width in the bottom	50 „
Width of Dock Entrance	75 „
Depth of Water at High-water, Neap tides	16 „
Do. Do. Spring tides	21 „

There are Four powerful Steam Pumps capable of Pumping the Dock DRY in four hours, and the Caisson can be floated and Vessels enter or leave the Dock at any state of the Tides, advantages not possessed by any other Dock in China.

On the dock ground is kept a large staff of carpenters and blacksmiths, under the superintendence of experienced European foremen.

There is also a most complete machine and engineering establishment attached; thus efficient work of every description necessary for the repair of vessels and machinery is secured with the least possible detention.

The hire of the dock for a period of three days after the caisson shall have been in its place is 1 tael per ton, and for the hire of the dock for each day over and above the said three days 7 candareens per ton per day.

The Pootung Dock Company will not be responsible for any damage occurring to vessels by any unforeseen accidents to the caisson or otherwise, nor for the docking and undocking of vessels.

Steamers shall pay on the gross tonnage.

The tonnage on which dockage shall be charged shall be that reported to the Consulates.

Captains of vessels before leaving the Dock must approve and sign their Dockage Bills, and give the Superintendent the name of the vessel's Consignee.

All Dockage Bills shall be signed by the Superintendent and the Chairman of the Dock Company for the time being, and they will be collected through the Commercial Bank of India.

All communications in respect to Docking to be addressed to the Superintendent either at the Pootung Foundry, at the Dock itself, or to the undersigned.

HOGG BROTHERS, Agents Pootung Dock Company
CHAOU-FOONG-HONG, NANKIN-ROAD.
Shanghai, June 25, 1864.

REGENT PIANOFORTE ROOMS.

ADDISON AND LUCAS,

MUSICAL INSTRUMENT MANUFACTURERS,

(By Special Appointment to Her Majesty).

210, REGENT STREET, W.,

RESPECTFULLY direct attention to their ORCHESTRAL, MILITARY, and other MUSICAL INSTRUMENTS, adapted for Band or Drawing-room use, and all made with every improvement and tuned under the superintendence of the most eminent Professors, including Mr. T. Harper, Mr. C. Harper, Mr. Wells, and other members of the Royal Italian Opera, Philharmonic, &c., &c.

ÆOLIAN HARPS.—Single—12 strings, 16s., and 21s.; ditto, 24 strings, 25s. and 32s. Double (this may be used as two Single Harps)—24 strings, 30s. and 35s.; ditto, 48 strings, 42s. and 50s. each,—cases included.

ANGLO-GERMAN CONCERTINAS.—Messrs. ADDISON and LUCAS direct the attention of performers on the German Concertina to these Instruments, which are finished with the same care as their Concertinas with English fingering, and are the only durable instruments of the kind made. Anglo-German Concertinas (English-made):—20 keys, in wood case, £2. 2s.; 22 ditto, £2. 10s.; 28 ditto, £3. 3s. German Concertinas, the best of the foreign make, 6s., 8s., 10s. 6d., 12s., 21s., to £1. 15s.—ADDISON and LUCAS, 210, Regent-street, W.

BOWS.—VIOLIN BOWS, at 2s., 4s., 5s., 6s., and 8s. each, to £1. 1s.; Dodd's Prize Medal, plain, 10s. 6d.; superior, 15s.; silver mounted, 21s., 25s., 31s. 6d., and 42s. each, to £5. 5s.; tenor bows from 4s. to £2. 2s.; violoncello bows from 4s. to £2. 2s.; contra bass bows, from 5s. to £1. 1s.—ADDISON and LUCAS, No. 210, Regent-street, W.

CONCERTINAS.—1. Mahogany, 48 keys, double-action, in case £2 10 0
2. Ditto, superior, in mahogany case 3 10 0
3. Rosewood, 48 keys, five-fold, bellows, in mahogany case 4 4 0
4. Ditto, five-fold morocco bellows, in rosewood case 5 5 0
5. Ditto, extra finish, 48 metal keys, in rosewood case 7 7 0
6. Ditto, ornamented in rosewood case... ... 8 8 0
7. Rosewood, 48 keys, silver touches, improved vibrators, in rosewood case 10 10 0
8. The patent concert concertina, amboyna, bird's-eye maple, or ebony tops, inlaid, metal studs, with sterling silver touches, &c., the best concert instrument, warranted and kept in order for 12 months 12 12 0

The same instrument, prepared expressly for India, amboyna tops, strongly clamped with German silver metal studs, &c., in rosewood box, brass clamped 15 15 0

With glass studs, extra, £1. 1s.; with steel vibrators, extra, £4. 4s.

Nos. 5, 6, and 7 may be had finished in amboyna, ebony, or coromandel wood, at an extra cost of £2. 2s.

Tenor concertinas, 48 keys... ... £9. 9s. to £15. 15s.

Bass concertinas. 48 keys ... ... £12. 12s. to £16. 16s.

ADDISON and LUCAS, 210, Regent-street, W.

DRUMS.—Side, £1. 10s. to £2. 2s.; Regulation, with Royal Arms, £3. 3s. to £4. 4s.; Bass ditto, plain, £4 4s. to £5. 5s.; painted with Royal Arms, £6. 6s., £8. 8s., £10. 10s. and £12. 12s. each.—ADDISON and LUCAS, 210, Regent-street, W.

EUTERPEONS and SELF-ACTING ORGANS.—Great care and experience are necessary in the selection of instruments acted on by barrel and machinery. Messrs. ADDISON and LUCAS are able to insure to purchasers the most perfect that can be purchased. Vienna flute organs, self-acting, 85 guineas; Euterpeons, ditto, from £105 to £1,000; organs, ditto, from £21; portable organs, with trumpets, &c., from £21. Estimates and drawings free per post.—ADDISON and LUCAS, 210, Regent-street, W.

FLUTES.—Boehm's Council and Prize Medal Cylinder Flutes, old Fingering, cocoa wood, in case £8 8 0
Ditto, with sterling silver keys on all the holes 16 16 0
Ditto, entirely of sterling silver, or wood with silver keys and sockets, old or new fingering 26 5 0
Ditto, in gold, with silver keys 84 0 0
Ditto, entirely gold 141 15 0
Concert flutes, eight German silver keys, cocoa wood ... ... 30s. to 4 4 0
Ditto, eight sterling silver keys, cocoa wood ... ... £6. 6s. to 15 15 0
Ditto, octaves cocoa wood, six German silver keys, on pillars ... ...£1. 1s. to 2 2 0
Ditto, six sterling silver keys, in case 4 4 0

All the flutes are tried and proved by Mr. Benjamin Wells, who attends daily to give instruction upon the new and old systems of fingering.—ADDISON and LUCAS, 210, Regent-street, W.

FLAGEOLETS.—Flute Flageolets, cocoa wood and German silver keys, £1. 11s. 6d. to £2. 2s.; ditto, six sterling silver keys, in case, £4. 4s. The Flute Flageolet will be found a charming accompaniment to the pianoforte in dance music, &c., and being remarkably easy to sound, may be put into the hands of very young performers. The fingering is the same as the concert flute, to which instrument it will be found a valuable introduction.—ADDISON and LUCAS, 210, Regent-street, W.

GUITARS, £2. 2s., £3. 3s., £4. 4s., £5. 5s., £6 6s., £8. 8s., to £12. 12s., the finest models. Cases included with the £4. 4s. Instruments and upwards.—ADDISON and LUCAS, 210, Regent-street, W.

HARMONIUMS, IMPROVED PATENT, by Alexandre.—1. In oak case, £6. 6s. 2. In mahogany case, £7. 7s. 3. In oak case, one stop, £10. 10s. 4. In mahogany case, ditto, £12. 12s. 5. In oak case, three stops, £13. 13s. 6. In ditto, five stops, £23. 2s. 7. In ditto, nine stops, £26. 15s. 8. In ditto, 10 stops, tremolo, £27. 6s. 9. In ditto, 13 stops, £37. 5s. 10. In ditto, 14 stops, tremolo, £37. 16s. 11. In rosewood case, one stop, £13. 13s. 12 In ditto, three stops, £15. 15s. 13. In ditto, five stops, £25. 4s. 14. In ditto, nine stops, £28. 17s. 6d. 15. In ditto, 10 stops, tremolo, £29. 7s. 6d. 16. In ditto, 13 stops, £39 7s. 6d. 17. In ditto, 14 stops, tremolo, £39. 18s.—ADDISON and LUCAS, 210, Regent-street, W.

KETTLE DRUMS.—Cavalry large Drum, 22 inches, including cover ... ... £21 per pair.
Orchestra, first size ditto, 24 in., including cover ... ... 24 „
„ second ditto, 27 „ „ ... 30 „
„ third ditto, 30 „ „ ... 40 „
„ fourth ditto, 36 „ „ ... 50 „

METRONOMES (musical time indicators).—No studio is complete without this indispensable to interpret the tempi of the great masters' compositions Samson's improved, winding without key, £1. 11s. 6d., with bell, to £2. 12s. 6d.; ditto, military ditto, large size, in case, £4. 4s.; mahogany or rosewood, the best ordinary English make, with bell, £3. 2s.; ditto, without bell, £1. 6s.; tripod stand, with spirit level, £3. 13s. 6d.—ADDISON and LUCAS, No. 210, Regent-street, W.

VOCAL HORN, highly finished, £8. 8s., in case. This is especially recommended to amateurs and professors as a beautiful drawing-room instrument. Being in C, songs with pianoforte accompaniment can be played as published for the voice without transposing or the use of crooks. The tone is a combination of the French and tenor horns, and is produced without effort. Mr. C. Harper, professor at the Royal Academy of Music and the first horn in Mr. Costa's Orchestra, attends to give instructions.

MILITARY and BRASS BAND INSTRUMENTS.—Messrs. ADDISON and LUCAS respectfully direct the attention of commanding officers and presidents of band committees to the reduced rate at which they are now able to furnish the best toned and most durable military band instruments; and they confidently assert that while a great saving to the band fund will be accomplished, the musical effect of the bands using these instruments will in many cases be improved, and in none diminished. Messrs. A. and L. warrant all the instruments supplied by them to be well in tune together. To insure this, every instrument will be tested by eminent professors before being issued. Messrs. A. and L. beg to add, in conclusion, that the brass instruments now supplied by them are, in every part, English manufacture, not foreign bells and pistons put together, and are the same (with every modern improvement) that have been issued to the army for 50 years at nearly double the prices. Every instrument not approved of will be exchanged, free of cost. Estimates for sets of military band instruments furnished, with every particular respecting the most effective formation of bands. Regiments requiring efficient bandmasters will have every assistance from Mr. Lucas, Principal of the Royal Academy of Music.

1. Cornets, any model, three pistons ... £7 7 0
Ditto, four pistons 8 8 0
2. Soprano cornet, in E flat and F 5 5 0
3. Valve trumpet, crooks complete 7 7 0
4. Contra alto or flugal horn, bell upright or forward 6 6 0

21. Double bass bombardon, B flat or C, to encircle body 13 13 0
22. Eleven-keyed opheicleide 8 8 0

MUSICAL BOXES.—Small Pocket, in horn cases, two tunes, £1. 1s.; three tunes, £1. 11s. 6d.; four tunes; £2. 2s. Large, for table, by Nicole, Geneva, warranted the best, four tunes, in walnut case, £4. 4s.; four ditto, rosewood ditto, £4. 14s. 6d.; six ditto, walnut ditto, £6. 6s.; six ditto, rosewood ditto, £6. 16s. 6d.; eight ditto, walnut ditto, £8. 8s; eight ditto, ditto, £8. 18s. 6d.; 12 ditto, rosewood ditto, £12. 12s. to £16. 16s. Extra large, for table, with the new effects of flute, drum, triangle, and castanet accompaniment, six tunes, drum, bell, and castanet accompaniment, £21; six ditto, with flute accompaniment, £24; eight ditto, drum, bell, and castanet accompaniment, £25. 4s.; eight ditto, with flute accompaniment, £29. 8s.—ADDISON and LUCAS, 210, Regent-street, W.

NURSERY-BARREL PIANOFORTES.—These instruments are acted on by barrels turned by hand, performing dance and lively music with good effect, are very durable, and will be found an excellent substitute when a professional performer is not available; any pianoforte tuner can keep them in order. Mahogany, eight tunes, £14. 14s.; ditto, 10 tunes, £16. 16s.; rosewood, eight tunes, £14. 14s.; ditto 10 tunes, £16. 16s.; extra barrel, eight tunes, with case, £3. 10s; ditto, 10 tunes, ditto, £4. 10s.—ADDISON and LUCAS, 210, Regent-street, W.

ORGAN ACCORDIONS.—Fingered same as pianoforte, with stop £5. 10s., without stop £4. 10s.; in case complete. Stands with pedal, enabling the performer to use both hands, £1. 15s.—ADDISON and LUCAS, 210, Regent-street, W.

PORTABLE HARMONIUMS.—Folding into case, 3-octaves, £8. 8s.; 3½-octaves, £10. 10s.; 4-octaves, £12. 12s. each. Dimensions when folded—length, 24 inches; width, 12 inches; height, 11 inches.—ADDISON and LUCAS, 210, Regent-street, W.

REGULATION DUTY TRUMPETS.—Best make with line and tassels, £2. 2s.; ditto, electro plated, in case, £3. 13s. 6d.; sterling silver, £21.—ADDISON and LUCAS.

REGULATION DUTY BUGLES.—Best make, with line and tassels, £2. 2s.; ditto, electro-plated, in case, £3. 13s. 6d.; sterling silver for presentation, plain, with silk lines, £21; ditto, elegantly chased, £26. 5s.; ditto, all the chased work and inside of bell richly gilt, £31. 10s. to £35; silver lines and tassels, £3. 3s.; bugle pistons, to fit in bugle, brass, £2. 12s. 6d.; ditto, sterling silver, £21.—ADDISON and LUCAS, 210, Regent-street, W.

ROMAN and ENGLISH STRINGS.—In consequence of the difficulty experienced by Amateurs and Professors in procuring Roman strings, Messrs. ADDISON and LUCAS beg to announce that they import the finest that can be got, and the only kind used by the most eminent artists on the violin, harp, guitar, &c.:—Harp, English gut strings and best silver, per set, £2. 2s.; ditto, Roman gut strings and best silver, per set, £3. 3s.; guitar, Roman gut strings and best silver, per set, 4s.; violin strings, English, each—1st, 4d.; 2nd, 6d.; 3rd, 8d.; 4th, 6d.; per set, 2s.; ditto, Roman, each—1st, 8d.; 2nd, 8d.; 3rd, 1s.; 4th, 6d.; per set, 2s. 10d.; ditto Paganini 4ths, sterling silver, each 2s.; viola, best—1st, 6d.; 2nd, 8d.; 3rd, 8d.; 4th, 8d.; per set, 2s. 8d. violoncello, English, best—1st, 1s. 6d.; 2nd, 2s.; 3rd, 2s.; 4th, 2s.; per set, 7s. 6d.; contra bass, best—1st, 1s. 6d.; 2nd, 8s.; 3rd, 9s.; 4ths, covered, 12s.; per set of three, £1; violin, viola, and violoncello, 3rd and 4th strings, covered with gold coloured wire, which never tarnishes, same price as ordinary strings.—ADDISON and LUCAS, No. 210, Regent-street, W.

SAXOPHONES.—
Soprano in C or B flat £12 12 0
Do. in F or E flat 15 15 0

HOLLOWAY'S OINTMENT AND PILLS.—DANGEROUS DISEASES.—How many life-long maladies spring from neglected trifling symptoms. The pimple readily curable in the nursery becomes, through carelessness, the irremediable torment of after-life. With a knowledge of the curative power of Holloway's Ointment and Pills, those who fail to use them for extirpating the first seeds of hereditary ailments, will have to bear the punishment resulting from their folly. Holloway's remedies will remove eruptions of the skin, scorbutical diseases and scrofula, and heal every description of ulcer, sore, wound, or abrasion. By the employment of Holloway's excellent, speedy, and safe medicaments much pain and immense expense will be saved, and a great benefit conferred on the present and succeeding generation.

For Freight or Passage apply to GRINDLAY and Co., 55, Parliament-street, S.W.; or to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

SHANGHAI DIRECT.—The FYCHOW, A 1 fourteen years; 715 tons register; JOSEPH MATHERS, Commander, will leave the East India Docks on the 20th Dec. This beautiful vessel was built at Aberdeen last year by Messrs. Alex. Hall and Co., especially for this trade, and is strongly recommended to shippers. Has splendid cabin accommodation.

For Freight or Passage apply to GELLATLY, HANKEY and SEWELL, 27, Leadenhall-street, E.C.

Regular Line of Packet Ship.

FOR HONG KONG and WHAMPOA, the well-known clipper ship BANIAN, A 1 fourteen years, 760 tons register, J. MASTERS, Commander; will load in the London Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to PHILLIPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

COLOMBO, CEYLON, Direct—having the greater portion of her cargo engaged and shipping, the magnificent clipper ship PRINCESS, A 1 for thirteen years, KINGSLY HUNLEY, Commander; loading in the West India Docks. This splendid vessel, having a full poop, has unrivalled accommodation for the comfort and convenience of passengers.

For Freight or Passage apply to W. A. WINCKLEY, 23, Birchin-lane, Cornhill, E.C.

COLOMBO DIRECT (to follow the Princess), the new clipper PALESTINE, the highest class at Lloyd's, register 607 tons, Captain T. PARK; loading in the West India Docks. Has most splendid accommodation passengers.

For passage apply to W. H. TINDALL, 5, Tokenhouse-yard; or for freight or passage apply to W. A. WINKLEY, 23, Birchin-lane, Cornhill, E.C.

COLOMBO DIRECT.—The beautiful clipper ECHO, A 1 12 years, 389 tons register, is now loading in the West India Dock, and having a large portion of her cargo engaged, will be promptly despatched.

For Freight or Passage apply to SUART and SIMPSON, 9, Clement's-lane, Lombard-street, E.C.

With Immediate Despatch

DIRECT for COLOMBO, the splendid British-built clipper ship FRANCES, A 1 thirteen years, 489 tons register, F. W. HILL, Commander; lying in the London Docks. This magnificent ship is confidently recommended to shippers.

For Freight or Passage apply to TOULMIN, LIVINGSTON, and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.

With Immediate Despatch.

DIRECT for BOMBAY, the nearly new clipper-built ship FRANCIS K. DUMAS, 1,209 tons register, J. LEMIEUX, Commander; East India Docks. This splendid vessel, built this year, will be found a first-rate opportunity to shippers requiring despatch.

For Freight or Passage apply to TOULMIN, LIVINGSTON, and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.

To sail positively on 20th Dec.; all Goods to be alongside by 17th.

DIRECT FOR CALCUTTA.—The fine British-built ship AMINTA, A 1 12 years; 1,132 tons register; G. M. MAXTED, Commander; lying in the Victoria Docks. This splendid vessel, built in 1862, and now well known in the Calcutta trade, offers an excellent opportunity to shippers desirous of quick despatch.

For Freight or Passage apply to ALEX. HOWDEN, SONS and Co., 19, Birchin-lane, or to TOULMIN, LIVINGSTON and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.

Will follow the RAPIDE with immediate despatch.

DIRECT for RANGOON, the splendid clipper ship DUKE OF WELLINGTON, A 1 12 years; 724 tons register, J. KERR, Commander; lying in the West India Docks. This beautiful vessel, so well known in the India trades, offers the best opportunity to shippers desirous of despatch.

For Freight or Passage apply to TOULMIN, LIVINGSTON, and Co., 31, Great St. Helens, Bishopsgate-street, E.C.; or to EDWARD HIGGIN and Co., 2, East India Avenue, Leadenhall-street, E.C.

Per P. and O. steamer Ellora, Dec. 27, from Southampton.—To Hong Kong, via Bombay: Mr. W. H. Fraser.

Per P. and O. steamer Delta, Jan. 4, 1865, from Southampton.—To Hong Kong: Mr. J. Manger, Commander Round, R.N., Mr. J. A. Bromley, Mrs. Bird, Mr. F. D. Wakeford, Mr. Glasse. To Shanghai: Mr. H. H. Carter. To Ceylon: Miss Wodehouse, Mr. Thompson, Mrs. C. Morrison, Messrs. Hope and Davis, Miss Rothwell, Mr. B. L. Armitage, Mr. and Mrs. Byrde and three daughters.

From Marseilles, Jan. 12, 1865.—To Hong Hong: Mr. and Mrs. A. Hancock, Mr. and Mrs. H. G. Bush. To Shanghai: Mr. and Mrs. Morgan, Mr. Jas. MacKenzie. To Ceylon: Mr. and Mrs. Faviell, Mr. and Mrs. H. C. Byrde.

Per P. and O. steamer from Marseilles, Feb. 13.—To Hong Kong: Mr. McDonald.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates hence are to the 1st of November. The London Mail of the 26th August arrived out on the 17th October.

A conference has been sitting between the Representatives of Foreign Powers, and the Japanese Ministers of Foreign Affairs, at which it is understood that matters of great importance, to the end of puting the foreign relations of the country upon a more settled footing, are being discussed.

It was known that Sir Rutherford Alcock was coming home—not "recalled," as stated in the telegram, but to confer with Her Majesty's Government. The *Japan Herald* says:—

"We have to announce the probable return to Europe, at no long interval, of Sir Rutherford Alcock, K.C.B. Her Majesty's Envoy Extraordinary and Minister Plenipotentiary in Japan. The information sent by the several representatives of foreign Powers in May and June last to their respective Governments seems to have been considered so important, and to indicate so grave and critical a situation of affairs, that Her Majesty's Government deemed it necessary, in communication with France, the United States of America, and Holland, all acting in accord through their representatives here, to have fuller information than could be conveyed by despatches. Accordingly, by the last mail, Sir Rutherford Alcock received instructions to return as early as he might find it possible, to confer with Her Majesty's Government as to the measures to be taken. Fortunately, since these instructions were sent, all that looked so menacing to the relations and interests of foreign Powers, has ceased to exist, and we have now in its place a sense of security and commercial activity—thanks to the wise policy consistently adhered to by the foreign representatives on the spot. We understand, however, that it is the intention of Sir Rutherford Alcock, nevertheless, to return very shortly, in order to give Her Majesty's Government the opportunity they desire of conferring with him as to the future, and of the measures yet to be taken to secure the ground so recently gained. Some pending negotiations and arrangements, we believe, for the benefit of this port, alone detain him for another mail or two."

An address, flattering alike to the recipient and honourable to the signers, has been sent to his Excellency, signed (without, the *Herald* believes, an exception) by every one of the principal British houses in the place. The merchants express their regret that Sir Rutherford Alcock will probably so soon leave Yokohama; refer to the existing condition of affairs when he arrived here, the determined but wise policy adopted by him, by which trade has been at last restored to its usual channels and wonted vigour; that in accomplishing this he has been able to do so without causing collision between H.M.'s Government and that of the Tycoon of Japan, and securing at the same time the co-operation of the foreign Ministers at this port; and they express to him their gratitude for the beneficial results his course of policy has brought to our commerce. We regret that it is thought for the moment unadvisable to print *in extenso* this letter of the British merchants, and the reply of H. E. the British Minister.

Our contemporary confirms the statement, continuously repeated in our own columns, that all demonstrations against hostile

Digitized by Google

Daimios are most probably made with the full consent of the Tycoon, and that this was most particularly the case as regards the late naval operations in the Inland Sea. We extract the following :—

Of one thing there is full assurance, namely, that the sailing of the allied expedition was not an act of hostility to the Tycoon or against the country, but solely against a Daimio who had violated treaties by obstructing all foreign trade, and who had further committed a flagrant breach of the law of nations by firing indiscriminately on the flags of Powers at peace with his sovereign and the nation. Could there have been any doubt of this in the minds of natives or foreigners here, it must have been completely set at rest by the novel and striking spectacle we all witnessed during the week, when British and Japanese troops, each with their respective arms and widely diverse accoutrements, were brigaded together in friendly rivalry on the same parade ground, in presence of the Ministers of both countries.

The resolution to despatch the allied squadrons had evidently been taken with no undue haste or want of consideration. More than twelve months before, as may be seen by the blue-book, the then four representatives of Great Britain, France, the United States of America, and the Netherlands, signed a formal protocol, declaring the necessity of measures being adopted for the punishment of these outrages, and the removal of the obstructions to trade. This was communicated to the Tycoon without result; but it remained on record, pledging the four Powers to effective action if redress were not afforded. There is reason to believe that since the return of Sir Rutherford Alcock, the British Minister, and the arrival of Mons. Leon Roches, the new French Minister, the matter was vigorously taken up in communication with the Japanese Government; and we can only conclude that, as in the case of the recent French convention, the Tycoon must have admitted his inability to give redress within any definite period. As regards the contumacious Daimio himself, there seems to have been more consideration shown than he could justly have claimed. For more than a month before the sailing of the expedition, it was known that two British ships had been sent to the Inland Sea, and gave passage to some of Choshiu's officers, lately returned from England, where they had been studying. There is no doubt now, that advantage was taken of the occasion to offer their Prince the means of entering into direct communication with the foreign representatives, with a view to avert hostilities,—at the same time that he received distinct warning of the consequences, if he failed to profit by the opportunity of ceasing hostilities, and entering into more friendly relations.

That he did not duly estimate the value of the option offered, and threw away his last chance, more or less contemptuously, may be safely inferred from the ultimate departure of the allied squadrons. With what wisdom he acted he now knows; and upon what means of resistance he counted, we also can speak from experience. Later events give some indiction that he even then meditated the great *coup d'etat* since attempted, of an advance on Kioto, in which he signally failed. He had been so long threatened that, perhaps, he thought less of the final warning given than he otherwise would. Something, too, he may have hoped from the chapter of accidents, and, for a moment, this seemed likely to serve his turn only too well. The very day before that originally fixed for the departure of the fleet, the mail of the 27th June arrived, bringing back, to he astonishment of everyone, the Mission from Europe, and the text of a convention with the Government, signed by the envoys only a few days before they left Paris.

By this convention they bound the Tycoon to open the Straits within three months after their return, and, if at the end of that time unable, to invite or accept the co-operation of the French forces; and France, too, engaged to furnish them. I must have been evident to everyone here, that for the Tycoon to ratify such a convention was a simple impossibility. Publicly to admit his own inability to deal with a refractory Daimio, and on this plea of weakness, to accept aid from a foreign Power would have been his perdition even with his own people, and little less than an act of abdication. Still, while this convention stood, without a formal act of repudiation and disavowal on the part of the Tycoon, no expeditionary force could well move. The French could not—being bound to wait three months by their own convention—and thus the diplomacy of the French Minister at Paris had isolated France from the other Powers, and undone the work of six months, the main object of which had been firmly to unite all in one policy. It moreover flung upon France the whole cost and responsibility of an expedition, if the Tycoon did not open the Straits in a given time—which he certainly could not have done, even if he would. It is now clear that the French Government was only saved from this dilemma by the diplomacy of those on the spot. The convention was not ratified, and a few days later the allied squadron of eighteen ships, British, French, American and Dutch, left the harbour bound for the Straits.

A new era in the history of foreign relations will probably take date from this first step by a combination of four Treaty Powers for the assertion of their common rights,—so long and persistently trampled upon by the Daimio of Nagato, and now so triumphantly and satisfactorily vindicated.

The incident referred to above of the brigading together of European and Japanese troops, was as follows :—On the 19th of October some of the Japanese troops now quartered in the neighbourhood of Yokohama were reviewed by their high officials, on their military training ground on the road to Kanagawa; Sir Rutherford Alcock, H.B.M.'s Minister, and several others of the foreign officials, as well as many of the residents, were present, and returned with expressions of great gratification.

On the following day, Thursday, there was another review on a more extensive scale, upon a small lot of vacant land on the British Swamp Concession, near the German Club, which will not readily be forgotten by the many hundreds by whom it was witnessed. It was indeed not only a novel sight and a fine one to the careless spectators, but a most suggestive one to the careful observer of passing events. He, indeed, must have belonged to the former category who could that day have seen without an emotion stronger than childish curiosity the parading on the same limited space of ground, in a foreign settlement in Japan, of the gallant British troops now here, in those regimentals of scarlet, dark-blue, or green, and those accoutrements to which we Europeans and Americans have been so long accustomed, and the somewhat motley and armoured mixed cavalry and infantry of the long-descended style of the people amongst whom we dwell.

The Japanese troops were under command of Kubota Sentaro, Brigadier, in command of all the Japanese troops in and around Yokohama, the number of Japanese men-of-arms brought on the ground we have not heard. Of the English troops under review there were twelve hundred and thirty men: Twentieth, 500; Marines, 330; 67th, 140; Beloochees, 130; Artillery, 55; Engineers, 22; Military Train, 12.

A few minutes after eleven o'clock (the hour appointed for the commencement of the review) Sakai Higano Kami, Vice-Minister and Member of the Second Council; Takemoto Awadzi no Kami, Confidential Agent of the Tycoon and Principal Governor for Foreign Affairs; Shibati Hinga no Kami, Commissioner and Governor for Foreign Affairs; and the two Governors of Kanagawa, attended by a large bevy of officials, arrived upon the ground. His Excellency the British Minister dismounted from his horse, and courteously greeted the Japanese high officials, and the same attention having been paid to them by the British Admiral and the American Minister, and others, the Japanese and foreign officials, with many of the residents (amongst whom a considerable number of the fair sex were seen), were soon mingled together promiscuously in one mass. The review then commenced by the forming line of contiguous quarter distance column, and the firing of a general salute. The troops then marched past in open columns of companies, and then in quarter distance columns. Troops formed line of contiguous quarter distance columns on detatched points facing the south, deployed into line and commenced brisk firing. Direction changed, more file firing, with some volleys; troops formed line of contiguous quarter distance columns facing the east; the left battalion (Royal Marines Light Infantry), was then ordered to advance and came to the front of the brigade; the skirmishers then commenced firing; the alarm having been sounded, the skirmishers and supports formed in squares of companies, the battalions marching into echelon formed battalion squares, and another brisk fusilading commenced. Reformed. Skirmishers having been recalled, the 3rd battalion (of the 20th), were brought to the front, and deployed into line, and performed the "manual" and "platoon" exercises, under the direction of Captain Rochfort. That battalion having retired, the 2nd battalion (67th and Beloochees), were brought to the front, formed lines, fired a volley, charged, and retired into the column. The Royal Marine Battalion were then brought to the front, and performed the bayonet exercise in review order.

The contiguous quarter distance column having been again formed, the brigade advanced in review order, the fine band of the 20th playing a slow march. After a general salute, the Japanese officials prepared to depart, and on leaving the ground were greeted with three cheers from the brigade.

A new coinage of itzibus having been issued from the Japanese Mint, Colonel Fisher, the United States Consul, had sent some to be assayed at the San Francisco Mint, and had received the following report in reference thereto :—

"The assay of the three silver itzibus, forwarded by the American Consul at Kanagawa, Japan, gives the following results :—

	Properties and kind of Metals.		
Weight of piece.	Silver.	Gold.	Copper.
No. 1 132½ grs. ..	902 thous. ..	½ thous. ..	97½ thous.
„ 2 134½ „ ..	902 „ ..	½ „ ..	97½ „
„ 3 135 „ ..	902 „ ..	½ „ ..	97½ „

"The coin, it will be seen, is a little less than one-third the weight of our silver dollar piece, while the fineness, though higher than absolute standard (900-1000), is yet within the legal limits of our coinage. It is not usual in our mints to pass silver ingots containing gold, and so much as a half thousandth would be regarded as altogether out of the way. I need scarcely say, however, that the gold contained does not add appreciably to the value of this coin, which, taking the weight of 135 grains as the basis of circulation, is worth, as near a may be, 33 cents.

"To make three of the itzibus equivalent to the Mexican or American ilver dollar piece, or the American gold dollar, would be sufficiently accurate for all commercial purposes.—Very respectfully yours, B. T. Martin, Assayer."

The *North China Daily News* gives information regarding the movements of the squadron in the Inland Sea .—

"The squadron left behind at Simonoseki to prevent any attempt on Choshiu's part at re-constructing or arming the batteries, was treated with distinguished courtesy by the officials and populace on both sides of the straits, but more especially by those on the south side.. The latter had collected an army of twenty thousand men to attack Choshiu who had been placed under the ban of the Government on account of his attack on the sacred city and the guards of the Mikado. The leaders of this expedition expressed a determination to finish the work commenced by the allied Powers, but the inferior officers and soldiery seemed not to relish the immediate prospect of a collision. Meanwhile Choshiu had appointed a few high officials, who on or about the 8th October started for Yokohama in H.M.S. *Barossa*. These men on their arrival assured the foreign Ministers of the earnest desire shared by Choshiu and his advisers, that peaceful relations with foreigners should be established, and that forgiveness should be accorded for past misconduct. They also expressed a wish that Simonoseki should be opened to foreign trade, but it is feared that the Tycoon will not permit this. Sir Rutherford Alcock and the other foreign representatives received the deputation in the most friendly manner, and congratulated it on the change which had taken place in the Prince's political opinions. The Tycoon has announced his design of paying the indemnities levied on Choshiu, and of thereupon marching against him and confiscating his territories. The deputation was to have left Yokohama for Simonoseki on the 15th ultimo by H.M.S. *Tartar*. It is generally believed that the Japanese Government will not consent to the opening of any ports in addition to those at present frequented by foreigners, but as a kind of compensation for this want of liberality, the foreign concession at Kanagawa and Yokohama is to be extended, and a pledge given that no vexatious hindrances shall for the future be thrown in the way of trade. Our correspondent informs us that "the itzubu exchange is stopped," but unfortunately offers no explanation of this somewhat startling announcement. If it be true that the Government exchange is put a stop to, and that officials are on the same footing with regard to obtaining itzubus as are the mercantile community, the former must be in rather an unpleasant predicament, for it is well known that the salaries of English officials in the East, who are entrusted with interests of the most vital nature, fall far short of those obtained by clerks in small and unimportant houses. Another statement made by our correspondent must be left to speak for itself. It is as follows :—"Several murders have taken place lately, but we do not take much notice of them, as they have been for the most part justifiable." Whether these murders have been committed by Japanese on Japanese, by foreigners on foreigners, by Japanese on foreigners, or by foreigners on Japanese, we are left by our correspondent to guess.

"It is expected that the fleet will shortly be broken up. The *Perseus* was to have left for Singapore about the 22nd October. The *Euryalus* was stated to be about to leave for England in six weeks, and the *Tartar* was about to visit the Chinese ports *en route* for home. The *Tartar* has since arrived in Shanghai.

"As we go to press the arrival of the Japan mail per screw-steamer *Australian* is reported. The P. and O. Co.'s steamer *Nepaul* ran on a rock when leaving Yokohama for this port on the 1st November, and was obliged to put back and transship her cargo and mails. She now lies beached, much down by the head."

NAGASAKI.

The well-known steamer *Carthage* has been sold to the Prince of Fizen for $120,000. She was delivered on the 25th October, and fired a salute of seven guns when she hoisted the Japanese flag. Many of the vessels in harbour contributed to the salute, and the batteries on shore returned the compliment. H.M.S. *Scylla* has been ordered to Shanghai to relieve the *Rattler*, which will proceed to Yokohama and replace the *Perseus*, which latter is under orders for Nagasaki.

DANGERS OF THE INLAND SEA.

HYDROGRAPHIC NOTICES.

The undermentioned inaccuracy in the Admiralty Chart, No. 358, "West Coast of Kiusiu," has been communicated to the Commander-in-Chief from Her Majesty's ship *Scylla*.

The position of Kuri-sima (or St. Clair Island), as marked on Chart No. 358, does not agree with the latitude 30 deg. 50 min. N., and longitude 129 deg. 55 min. E., as given in the 4th edition of the *China Pilot*, page 442.

The position in the *China Pilot* is considered to be correct, as it agreed well with other bearings.

Signed,—HEMSLEY H. SHANKS, Secretary.

H.M.S. *Euryalus*, at Yokohama, 24th Oct., 1864.

The following particulars relative to Fisherman's Rock (Kanabuse), in the Straits of Simonoseki, have been furnished from Her Majesty's ship *Barossa*.

This dangerous rock, which has only four feet on its southern end and twelve feet on its northern, at low water spring tides, is sixty fathoms in length, and lies N. by W. and S. by E.

Between the north and south ends there is a depth of five fathoms rock. The south end has the appearance of two large square blocks of stone about ten yards apart; it has six fathoms close to it on its south, east, and west sides. About a boat's length to the northward of the twelve feet patch there are ten fathoms—sand.

The rock lies about three-quarters of a cable to the north of the dotted line in the Chart of Simonoseki Strait, recommended as the course, and a little to the westward of that part marked "heavy ripple." The Custom-house at Simonoseki on with Mozisaki clears it to the southward.

The following is the position of the rock :—

Mozi-saki.....S. 62 deg. W.
I-Saki .....S. 68 deg. E.
Kusi-Saki.....N. 35 deg. E.
S. extreme of Manziu N. 61 deg. E.

These bearings were obtained by triangulation.

The existence of the above dangerous reef, added to the reports received from Japanese sources of the existence of other rocks in the northern channel in these Straits, and the extreme velocity of the current, combine to render it advisable to avoid altogether the northern passage: the southern passage, adjoining the coast of Kiusiu, is recommended as being, as far as ascertained, clear of hidden dangers, and comparatively exempt from the influence of the currents.

(Signed) HELMSLEY H. SHANKS, Secretary.

H. M. S. *Euryalus*, at Yokohama, 24th Oct., 1864.

CHINA.

PEKING.

Mr. Wade, the *locum tenens* of Sir Frederick Bruce at the British Legation, has given the following decision in the appeal *in re* the Oriental Bank Corporation against the Chinese "sureties" for the defalcations of Aheen, which is in favour of the appellants.

I confirm the judgment of the Court.

It is clear that the loss shown to have been sustained by the bank was caused by the wrong-doing of Aheen, and under the guarantee signed by his securities, the appellants, they are bound to indemnify the bank.

The guarantee, which is in Chinese, the language of the appellants, is somewhat less favourable to their case in the original than in the translation laid before the Court.

It states that "Fung-heen, native of Whampos, in the district of Pwanyu, now taking service with the Liju Hong (Oriental Bank) at Shanghai, his department being the charge (or registration) of the accounts of its treasury, is an honest and trustworthy person, and for any pi-wu, wrong doing or mismanagement on his part, the (undersigned) securities will be responsible."

Aheen is no doubt here partly guaranteed as an accountant, but he is guaranteed as very much more. Indeed, what is in express words secured to the bank is his probity and fitness for trust,—not his ability or accuracy as an accountant, although for his wu—"errors, mismanagement,"—not less than his acts of pi—"injurious delinquency"—the securities hold themselves responsible to the bank.

If the discrepancy between Aheen's account tendered to the manager of the bank on the 19th of December, 1863, and his subsequent statement on the 28th December, could be so separated from his explanation of it as to authorise its being described as an error, the securities would be responsible for whatever loss the bank could prove fairly ascribable to a confusion so monstrous in the book of its guaranteed accountant.

This would have been an extreme case of *wu*—"mismanagement." But the bank proves two cases of *pi*,—"wrong doing,"—against Aheen ; first, from his admissions—a falsification of accounts, for when he admits that the money missing was unauthorisedly removed from time to time, he fully justifies the inference that some of the periodical statements found to agree so exactly with the manager's books for a series of months, were false ; secondly,

Digitized by Google

by his admissions on abstraction of the money by himself. If the right to infer the falsification be disputed, there can at least be no doubt about the unauthorised abstraction, which latter act no less than the former falls within the category of *pi*, "fraud, violence," or any wrong-doing that Aheen might be guilty of to the injury of the bank.

The steps taken by the appellants, as Aheen's securities, since the discovery of his frauds, are sufficient proof of their own construction of their obligations under the instrument they signed; and it is much to be regretted that, being Chinese, they were advised to defend this action.

THOMAS FRANCIS WADE.

True copy of enclosure in despatch, dated Peking, August 24, 1863.

EDN. D. JONES, Assistant.

H.M.'s Consulate, Hankow, Sept. 28, 1864.

SHANGHAI.

Our advices from this port are to 8th November, reporting the arrival of the London Mails of the 4th and 10th Sept. on 1st Nov., and that of the 27th Sept. on the day that the Mail closes for Europe.

The community had not succeeded in getting quite rid of the rowdy elements, as they were in almost daily receipt of tales of outrage in which foreigners generally figure prominently. As one example out of many:—The house of a wealthy Chinaman, a comprador to one of the principal hongs in the settlement, was broken into by a gang of burglars comprising ten Cantonese and three Europeans. The thieves were evidently well acquainted with the premises, as they at once pounced on a small box containing fourteen hundred Carolus dollars, avoiding other boxes which would have taken time to break open, and only delaying to snatch the bangles from the arms of some of the female inmates of the house. They are believed to have afterwards left for Soochow, with the object, no doubt, of avoiding detection by changing the Carolus dollars and selling the ornaments out of the settlement.

The necessity of strengthening the European police by a supplementary force of Chinese is the subject of discussion between the Municipal Council and the wealthy Chinese, the *Friend of China* has the following:—

"On more than one occasion we have had to question the wisdom of our Municipal Council; and certainly we question it in the remarks which their secretary has recorded as following the reading of the letter at foot from Shanghai's chief police magistrate:—

"'The Board were of opinion that if the Chinese authorities were serious in their expressed desire to aid in the suppression of crime, the maintenance of law and order just beyond the limits of the settlement, whence, the superintendent alleged, those bad characters come whose depredations were complained of, and where no foreign interference need be apprehended, would afford ample scope for the energies of a native police, and admit of their being employed more profitably as an independent body that within the area described by the Municipal boundaries.'

"A ruder rebuff to an expressed intention to aid in conserving the public peace we never knew, and we feel constrained to point out to the community that what the Che-hien desires is simply only reasonable. About two-thirds of the area known as the British, four-fifths of the French, and fifteen-sixteenths of the American Concessions are occupied by Chinese; and to expect the Municipal Council to find a police force sufficiently strong to keep robbers in check throughout would be absurd. The Chinese know this, and so keep private watchmen, one to each street, the directors of the body known as the *Pao-an-ang* tell the Che-hien. One man per street, however, is found to be insufficient, and most assuredly it is insufficient, when Europeans join with Chinese banditti in breaking open Chinese houses, as we hear of occasionally, taking bangles from women's arms, and even murdering inmates if found to resist; *ergo*, say these Chinese protectors, we must have more policemen; though if we attempt it, we shall rouse the susceptibilities of the English, and hence the request for official acknowledgment."

The consular courts have not lately been occupied with any cases of great importance. A man named O'Brien, who was accused by sundry Chinese of having been accessory to the death of a native by decapitation, and had been remanded from the 6th ultimo, was brought up, when the witnesses who had previously sworn positively to his guilt acknowledged that they had deliberately perjured themselves. He has, however, been convicted of larceny, and sentenced to one year's imprisonment. The following extract from the minutes of the Mixed Court will give old Shanghai residents an idea of the advance in ingenuity displayed of late by the Chinese compradores.

Chang Chien-tsou, a silk merchant, appeared and charged a native named Wang-Ahsi with embezzlement, under the following circumstances. It appeared that some days ago the defendant had carried a box supposed to contain a large quantity of Mexican dollars, to one of Messrs. D. Sassoon, Sons and Co.'s servants, whom he requested to take charge of it. The box was pasted down in defendant's presence and sealed with his seal. The next day he went to plaintiff's shop and made a large purchase of silk, leaving as security a bar of gold, which he said he would reclaim as soon as he should be able to obtain dollars. The silk was delivered, and some few days after, defendant returned and said that he had a quantity of dollars lodged with Messrs. Sassoon & Co., at the same time requesting that a shroff might be sent to take delivery. The whole thing was done in the most open manner. The box was produced and opened, and eight packages taken out. One of these was counted and examined, and found to be perfectly correct. The bar of gold was accordingly given up, and the box of dollars carried off. On further examination, however, it turned out that out of the eight packages contained in the box, two only were genuine, the remaining six packages being lumps of lead tied up in paper and properly sealed. The prisoner stated that he knew nothing of the affair, that he handed over the dollars as he had himself received them, and he further endeavoured to implicate Messrs. Sassoon's servant in the swindle. The Court acquitted the boy of any share in the matter, and referred the case to the Chi Hien.

A case of collision between an English steamer and a French barque is reported in the *North China Daily News* as follows:—

On Thursday last, the 3rd inst., as the steamer Promise (Messrs. Smith, Kennedy and Co., agents) was passing Woosung on her way to Chefoo and Taku, she, through some defect in her steering powers, ran into and sank the French barque General Mealin. The officers and crew of the latter vessel, with the most culpable carelessness, took no steps whatsoever to secure the safety of either the ship or cargo. The latter, consisting of French Government stores, was allowed to float away after the General Mealin sank, no precautions whatever having been taken. Immediately after the accident the barque was boarded by the pilot of the Promise, and the boat's crew of our Wusung reporter. Every effort was made by them to induce the captain and crew to work, but without avail. They were refused the use of the hammer to unshackle the chains, and had themselves to hoist the jibs in order to get her out of deep water. Their efforts were almost fruitless, although but for the carelessness and folly of the captain and crew, the barque might have been laid high and dry at low water. Under these circumstances Messrs. Smith, Kennedy, and Co., have very properly refused to pay. The question will, of course, come before the English Consul.

HANKOW.

Two fires have lately occurred, one on the Han-yang side, during the night of the 16th ult., which consumed a large number of houses; the second, on the 19th, behind Hankow, burnt fiercely for three hours, destroying about 200 houses. It was at length stopped through the exertions of numerous foreigners, by pulling down the houses in its course. A discussion is at present being carried on as to the width of a gate which the mandarins are about to construct in the "Defence Wall." The foreign community are anxious that it should be wide enough to admit of driving a carriage through it with safety, while the officials refuse to make it more than about nine feet six inches in breadth. Hence a tempest in a teapot, which will no doubt result in the discomfiture of the mandarins.

CHINKEANG.

A correspondent writing from this port says that, in consequence of the rebels having broken down the locks, the neighbouring country is exceedingly dry, and it is impossible to irrigate the fields properly. Many of the small creeks have little water left in them. The Superintendent of Customs has been exciting some disgust by interferring with a pleasant system of hoisting the foreign flag on rafts, which has been found lucrative. There is little business doing at the port now; but the Chinese predict a large increase in the spring.

KIUKIANG.

We are informed that the races, which are appointed to come

Digitized by Google

off on the 23rd instant, absorb the interest of the foreign community at this port. Training is being actively carried on, and many of the ponies promise well. The only other movement is purely religious, its object being to procure the services of a clergyman to officiate in the (projected) English Church. A meeting was to have been held on the 1st instant, at the English Consulate, to decide on the necessary steps. The salary is, we understand, to be fixed at six hundred pounds, of which one half will be paid by the English Government, and the other by the mercantile community.

A fire broke out on the morning of the 18th ultimo, which destroyed a large amount of property. The fire originated in an opium-shop, and spread thence over the contiguous buildings, which, to the number of one hundred and fifty, were soon wrapped in flames. Buildings of a more solid description were then ignited, the conflagration being increased by a strong east wind, which blew the sparks onwards from the burning buildings. Unfortunately, Kiukiang does not possess a fire-engine, and the foreign residents and Chinese authorities found that the only means of arresting the progress of the fire was to pull down some of the houses in its course. This was accordingly done, and it was thus soon got under. During this scene the town was in a state of great confusion, the residents, native and foreign, removing their goods from the houses to the open land. The Custom-house officers made praiseworthy exertions to prevent the destruction of property, and their efforts were greatly applauded by the Chinese. The soldiers also were of great service in keeping the streets clear. Little robbery was committed, and a few men caught in the act were immediately executed. The total loss amounted to thirty brick and one hundred and fifty wooden houses, besides four houses intentionally pulled down. No lives were lost, and but little property destroyed, except in the case of the removal of goods.

NINGPO.

Accounts from this city state that the disbandment of the Anglo-Chinese force quartered there, under the command of Colonel Cooke, will take place at the end of November, showing that the Celestial authorities consider the rebellion at an end. The *North China Daily News* has the subjoined remarks on the subject:—

"We are in receipt of advices to the 28th ult., by which are informed that an order has been issued for the disbandment of the Anglo-Chinese Contingent at the end of the present month. The Taotai has directed this step, but, as it is to be supposed that he acts on instructions received from higher powers, little hope can be entertained of any modification of his orders. The Chinese authorities have evidently come to the conclusion that European assistance is no longer necessary to the well-being of the province. The French contingent has also been threatened, if not actually doomed to disbandment, and the province and provincial city will for the future depend for protection on purely Chinese troops. This step appears more rash than it otherwise might, on account of the presence of large bodies of insurgents in the province of Fukien. It is well known that some months ago, when the Anglo-Chinese contingent was reduced one half, Chu Tsung-kan, Futai of Fukien, made overtures to the Che-kiang authorities to obtain the disbanded men as a guard for his province. Cold water was, however, thrown on the project, and it was never fulfilled. Those of our readers who have travelled in the interior of the province know sufficiently well that the creeks swarm with native and foreign pirates, and that but for the exertions of Cooke and his officers, inland navigation in the neighbourhood of Ningpo would be utterly unsafe. Hardly a week has passed within the last eight or nine months that parties sent out to scour the country in every direction have not returned to head-quarters with prisoners taken in various acts of outrage on the unoffending inhabitants of villages, or on the more helpless boat owners in the creeks. Even with this police system in constant operation, many complaints of loss of property, of murder, and of violence of every description are daily received by the Ningpo authorities, yet in the face of all this the Governor of the province takes on himself the responsibility of ordering the disbandment of the foreign contingents. How much more intimately acquainted must the Futai of Che-kiang be than are any of our readers with the state of the interior of the province. Yet what appears to us an act of insanity is by him considered a mere matter of course, an attempt to shake off a portion of that foreign incubus which in the eyes of the conservative Tsêng family is bringing the country to ruin. In truth, the Chinese have profited little by foreign intercourse. They are as blind to their own interests now as they were in the days when fire and sword were carried to the very gates of their capital. They look with sublime indifference on the helping hand held out by foreigners to rescue them from the pit to which they are hastening, they will not learn to act for themselves; and they refuse to allow us to act for them. In the Che-kiang province rowdyism will soon flourish, murder and piracy will be the order of the day, and the highly disciplined men whom Cooke has now in his barracks, will swell the ranks of the miscreants who so seriously interfere with the trading interests of the province, and will bring their superior knowledge to the aid of those roving bands of which they are now the sworn enemies. We need not enlarge on the unfitness of purely Chinese troops to cope with the difficulties which will present themselves so soon as the disciplined contingents shall be disbanded. Indifferent by nature, they are rendered cowardly by education. Ignorant of the first principles of military science, they may soon have to oppose men amongst whom enthusiasm will make up for lack of education. Against such they will be able to oppose nothing except numbers. The Chinese are in truth blind, and are, moreover, ignorant of that blindness. They are jealous of foreigners, and yet are unable to apply themselves to the drudgery of following out foreign scientific systems. It is truly lamentable to be thus driven to the conclusion that European intercourse has done nothing for the Chinese, and that they are still as ignorant, as jealous, and as pig headed as they ever were. Events must some time or another reach a crisis, and in the progress of those events China will most probably find herself taken in hand by European nations, and saved the trouble of thinking or legislating for herself

HONG KONG.

In Hong Kong there has been nothing of political importance to record. The eleven men of the 99th Regiment, who were committed on the verdict of a coroner's jury for the murder of an Indian constable, have not yet been brought up for trial. Other Hong Kong items and topics of discussion are thus summarised from the *Evening Mail*:—

Our "Temperature" corner has shown very satisfactory reports, the thermometer ranging more or less over or under 75 degrees. Notwithstanding this pleasant state of things, however, an article noticed the contrary to be true of the moral atmosphere. Society seemed inclined to be out of joint; quarrels were the order of the day in volunteer and other quarters; but things were at the same time beginning to assume a more reassuring appearance about Government House and the public gardens, in which latter favourable public resort the band are now to perform on stated evenings. In a correspondent's letter from Canton, the weather there was characterised as splendid; while the military examination then going on suggested the similitude of a horse-fair. From the *Government Gazette* was reproduced an official notice of the forthcoming sale of land at Kowloong, amongst the lots of which is included one suitable for the erection of docks.

NETHERLANDS INDIA.

BATAVIA.

Our dates hence are to the 15th November. The London Mail of the 26th September arrived out on the 4th of November.

A. Prins, Esq., member of the Council of India, has retired from the service. The next Government sugar sale was to take place on the 10th December. The opium monopoly had been farmed out by the Government at the following rates per month: Batavia and Lampongs f.71.00; Buizenzorg, f.85,00; Bantam, f.40,00.

Singo Troeno, the ringleader of the late disturbance at Tagal, has been killed at Brebes, whilst attempting to escape to Cheribon. He refused to surrender, and, together with his followers Deyem and Gendoeng, resisted the efforts of the widana to secure them. The two first were at once despatched, the latter was slightly wounded. At the outbreak of the late disturbance, a safe retreat for the females and children was naturally the first thing thought of. Some fled to the shipping in the roadstead, others sought refuge in the Government House, but the greatest portion of the inhabitants rushed to the mansion of M. Johannes, Esq., an Amenian gentleman, highly respected by all who know him, and an old resident on the island. This gentleman, with his usual hospitality, received all who came, and during two days gave shelter to no less than *seventy-one*

Digitized by Google

Europeans with their servants, all of whom he treated with the kindness of a father.

A committee appointed by the Chamber of Commerce at Sourabaya to examine into Mr. Montclar's manner of working at Baron Sloet's sugar mill as Poerwadadie, have reported favourably on the same. 24f. per picul has been offered for a parcel of 5,000 piculs made by said gentleman's process.

From Padang we learn that the *Johann*, which vessel had taken in a full cargo of coffee and sundries for Holland, was stopped by the Customs when ready to sail, on suspicion that she had more cargo on board than was entered at the Custom-house. It is said that the authorities insist upon her being discharged in order to ascertain the truth.

BANDA.

The long-continued drought has been very detrimental to the spice parks where many of the young trees have been scorched, and the fruit have fallen to the ground before they were ripe. The number of nuts gathered in August, though not yet ascertained, is not expected to be great. On the 6th September 28,420 lbs. of mace (product of August), and 52,012 lbs. nuts (product of February) were delivered in the Government stores. The shipments to Java on the 3rd September were 135 casks mace, 136 casks nuts, and one case nutmeg soap; and 119 casks mace, 51 casks nuts, and 2 cases nutmeg soap were ready for shipment.

BORNEO.

We are now enabled to state that the nine Javanese sailors and three native women, who had lately arrived at Mahiad, in Palawan, as reported by us in our last issue, did not belong to a Dutch ship, but probably to the Danish brig *Gazelle*, Captain H. J. Johannsen. This vessel left Batavia 29th August, 1863, for San Francisco.

The China "Tonnage and Shipping Intelligence" of 14th November, 1863, contained a report made by the *Elisabeth*, which vessel had picked up four Malay shipwrecked sailors on the 25th October in 7 deg. North, a little to the southward of the Prince of Wales bank. Said sailors deposed to have belonged to the brig *Gazelle*, which vessel foundered at sea in the beginning of October, 1863. Six of the crew escaped with their lives in one of the boats, the rest got into the other boat. Of the six, the deponents alone remained, two having died of want. The police are doing their utmost to solve this mystery.

MALACCA STRAITS.

SINGAPORE.

Dates hence are to the 21st November. The London Mail of the 10th October reached by the steamer *Salsette* on the 14th November.

The Court of Inquiry into the loss of the *Keepsake* found that she was lost through the carelessness and negligence of Ellis Swan, the master, and sentenced his certificate to be suspended for one year; which sentence had been confirmed by Governor Cavenagh, with the comment that it is "extremely lenient."

A notice appears that Mr. William Ramsay Scott was admitted a partnertin the firm of William Macdonald and Co., on the 1st of October.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

CAREY—On the 25th Oct., at Foo-chow, China, the wife of H. W. Carey, Esq., of a son

FRY—On the 14th Dec., at Manor House, Ilford, Essex, the wife of William Storrs Fry Esq., of a daughter.

LAY—On the 9th Dec., at 14, Queen's-gardens, Hyde-park, the wife of H. N. Lay, Esq. C.B., of a son.

MACLEOD—On the 10th Dec., at Gothic Lodge, Worthing, Sussex, the wife of Malcolm Anderson Macleod, Esq., of a daughter.

MCMAHON—On the 16th Dec., at 41, Grosvenor-place, the wife of Colonel Sir Thomas McMahon, Bart., C.B., of a son.

PUTTFARCKEN—On the 11th November, at Broadfield, Singapore, Mrs. Otto Puttfarcken, of a daughter.

RENNELL—On the 2nd Nov., at Singapore, the wife of Capt. H. B. Rennell, of a daughter.

MARRIAGES.

ENSDEN—GAREY.—On the 29th Nov., by Consular licence, and at the Episcopal Church, Avenue Marbouef, Paris, by the Rev. G. G. Gardiner, M.A., Richard Ensden, Esq., Japanese Secretary to H.B.M.'s Legation at Yedo, Japan, to Mary Ann, youngest daughter of the late Edward Garey, Esq. No cards.

FARNHAM—PHILLIPS.—On the 27th Oct., at Shanghai, at the residence of Captain P. Armstrong, J. C. Farnham, Esq., to Miss Annie Phillips.

HEATON—MANUEL.—On the 29th Oct., at St. John's Cathedral, Hong Kong, by the Rev. J. J. Irwin, D.D., George Henderson Heaton, Government Marine Surveyor, to Margaret, second daughter of the late Rev. William Manuel, D.D., of Clapton, Middlesex.

PFAFF—DONALDSON.—On the 5th Nov., at Trinity Church, Shanghai, by the Rev. F. R. Michell, Mr. F. J. Pfaff, to Miss Jane L. Donaldson.

YOUNG—RAMSAY.—On the 15th Dec., at St. James's Church, Paddington, by the Rev. J. M. Bellew, Major Young, H.M.'s 37th, of Lincluden, Dumfries, to Harriet Charlotte, eldest daughter of Major-General James Ramsay, of Sussex-square, Hyde-park.

DEATHS.

DOWNTON—On the 28th Oct., at Yokohama, suddenly of heart disease, Walter Downton, aged 42, private of H.B.M.'s Royal Marines, Legation Guard.

HOPKINSON—On the 17th Dec., at his residence, 2A, King-street, St. James's-square, Major-General Sir Charles Hopkinson, C.B., in the 82nd year of his age.

MACLEAN—On the 16th Dec., at Woodside, Fortrose, N.B., Lieut.-Colonel Charles Maxwell Maclean, late of the 72nd Highlanders (second son of the late William Maclean, Esq., of Dochgarroch, near Inverness), in which regiment he served nearly 44 years, aged 73.

LAMOND—On the 3rd Nov., at Pootung, Shanghai, Malcolm Lamond, shipbuilder, aged 38 years.

RUDSDELL—On the 17th Dec., at Beckingham, near Gainsborough, Henrietta, the wife of Sir Joseph Rudsdell, K.C.M.G., late Lieut.-Colonel Grenadier Guards.

SMYTH—On the 18th Dec., at 8, Onslow-gardens, Anne, widow of Major Henry Carmichael Smyth, of the Bengal Engineers, and mother of William Makepeace Thackeray.

STIBOLT—On the 31st Oct., at Shanghai, of dysentery, H. Stibolt, a native of Denmark, aged 46 years.

WATSON—On the 15th Dec., at Hampton Court Palace, aged 15, Helen Louisa, eldest daughter of the late Commodore Watson, C.B., A.D.C.

WILSON—On the 18th Dec., at Brighton, aged 15, Matilda, youngest daughter of David and Sophia Wilson, of Colombo, Ceylon.

COMMERCIAL REPORT.

CHINA IMPORTS.

COTTON YARN.—This article has not met with any inquiry at the hands of the native dealers during the fortnight which has elapsed since the date of last Circular, and the only transaction to notice is the purchase of 25 bales, Nos. 28 to 32, which are supposed to be intended for shipment to Japan. Prices show a material decline in the lower and highest numbers imported, when compared with those ruling at the date of last Circular. Some 23 bales of damaged Twist have also been moved off by public auction. The sales reported from Amoy consist of 100 bales fair quality 16 to 24 taken at $81, but the latest quotations for this yarn were not above $78 per picul.

GREY SHIRTINGS.—The sole transaction reported during the past fortnight consists of the public sale of 2,800 pieces of sea-damaged goods, and the dealers show no disposition at present to make purchases. Prices are quoted somewhat lower for all qualities. The settlements reported from Foochow amount to 1,550 pieces at $4.80 to $5. 70 for lbs. 7 to 8¼ goods. The latest sales at Amoy were effected at $4. 95 to $5. 85 for similar qualities.

WHITE SHIRTINGS.—Have not met with any inquiry since the date of last report, and there are not any sales to notice. Foochow quotations are $4. 40 to $5. 40 for 54 to 66 reed, at which 1,600 pieces had found buyers.

T-CLOTHS.—The value of these goods shows a very marked decline when compared with the quotations current at the date of last Circular. The market has been almost entirely supplied during the fortnight by sales of damaged goods, and the dealers show no desire to increase their stocks at present. The total quantity sold amounts to 10,800 pieces, exclusive of 400 pieces of 8 lbs.

AMERICAN DRILLS.—There is not any stock of American Drills on the market, but sales of 2,000 pieces of Drills of English manufacture at $5.50 per piece have been reported.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: There are not any sales of these goods to report either from this colony or Canton, and the settlements at Foochow are limited to 250 pieces assorted Spanish stripes at 85 cents per yard.

LONG ELLS.—There has been no business transacted in these goods.

CAMLETS.—Sales amount to 620 pieces at about previous rates.

LASTINGS.—100 pieces sold, in addition to which 40 pieces of damaged goods have been moved off at auction.

BLANKETS.—100 pairs settled; at auction 1,053 pairs of damaged have been sold.

METALS.—Iron, Flat, &c.: Quotations remain as at the date of last report, with sales for the fortnight of 3,570 piculs of Nail Rod, and 750 piculs of bar; nothing doing in Canton.

LEAD.—Without change in value; has been sold to the extent of 300 piculs in this colony, while 400 piculs have changed hands in Canton.

CHINA EXPORTS.

TEA—CANTON.—Three additional chops of country Congous have reached the Canton market during the past fortnight, and stocks of this description of tea now amount to 18 chops. There have been no purchases effected, and the offers made are generally 2 tls. to 3 tls. per picul below the prices demanded by the dealers. In Canton Congous the settlements do not exceed 500 half-chests, which have found a buyer at 21 tls. to 23 tls. for good to fine quality; these are, if anything, a little lower than the quotations given under date of 31st ult. for similar grades of tea. The only departure is that of the Cambalu, with a cargo of 603,900 lb. The Elizabeth Dawson is on the berth loading at £3 per ton. The settlements of Congou in Foochow between the 25th ultimo, and 9th instant amount to 30,163 chests. Common to good flavoury kinds show an advance on previous quotations of fully 1 tael per picul, and have been taken principally for the Continent of Europe and Australia; the advance having to some extent cheked operations in these grades for the English market. Quotations are put at tls. 18.5 to tls. 22.5 for good common to flavoury kinds. The departures for the United Kingdom consist of the Cœur de Lion, 701,950 lbs., Gauntlet, 919,520 lbs., Verbena, 598,500 lbs., and Ellenborough, 1,179,300 lbs. The total export for the season now amounts to 32,558,529 lbs., against 1863-64, 33,767,180 lbs., and 1862-63, 22,637,700 lbs. of tea. Souchong: 1,571 chests purchased. Oolong: Settlements amount to 18,500 half-chests. Flowery Pekoe; 884 chests have found buyers in Foochow at the annexed quotations. Scented Teas have been purchased in Foochow to the extent of 5,480 boxes at 10.7 to 31.2 taels, while in Canton 2,500 boxes of Scented Orange Pekoe and 1,500 boxes of Scented Caper have been taken at the annexed quotations, which represent the value of good to finest qualities. The settlements of Canton Greens are comprised in the purchase of 300 boxes of Gunpowders and a similar quantity of Imperial at 20 taels.

Digitized by Google

FOOCHOW.—During the fortnight a steady business has been done in Congous at gradually stiffening rates. Dusty and broken leaf have advanced 5 mace, other descriptions 1 tael, the market still tending up. Oolongs have been settled freely at lightly higher rates. The settlements of the fortnight are reported as under:—Congous: 20,700 chests, 21,500 half-chests, and 1,000 boxes, at 6t. 2m. to 14½ taels for dusty and broken leaf, 13½ to 18½ taels for common to good common, and 17¼ to 22½ taels for flavery to good flavery. Souchongs: 1,600 chests at 18½ to 36 taels for common to fine. Flowery Pekoe: 650 chests at 17 to 23 taels for common to fair, and 34 taels for fine. Oolong: 13,500 half-chests at 14 to 15½ taels for common cargo, and 16½ to 22 taels for fair to fine. Scented Teas: 5,300 boxes at 1 to 10 taels for dust, and 24 to 28½ for medium kinds.

SHANGHAI.—Black: Immediately after the departure of the mail a good inquiry commenced, and 17 chops were settled at prices which in some instances showed an advance of half a tael on previous quotations; the arrival of the 10th September mail on the 1st instant checked all business, and notwithstanding the decline in Exchange and Freights, buyers will not operate unless at a decline, which up to the present time holders have not submitted to. Settlements have been: 10 chops Oopacks at tls. 23½ to 26½, 6 chops Oonahms at tls. 20 to 24½, 9 chops Ningchow at tls. 20 to 28, and 1 chop Souchong at tls. 24. Settlements on the market, 24 chops or 10,128 chests as above. Re-shipped on owners' account, 33 chops 13,941 chests do.; together, 57 chops or 24,069 chests, making total to date 315,443 chests. Stock waiting shipment and for re-sale 52 chops or 22,460 chests. Quotations are, third crop Oopacks, taels 23½ to 26½; Ningchows, taels 20 to 28. Oonahms, taels 19 to 24; Hohows, taels 17 to 20. Green: Only a very limited business can be reported, and settlements have been confined to one chop of Pingsuey at tls. 36 proportion, and a few small parcels of Shanghai packed Teas at about previous rates. There is rather more inquiry for country tea, but holders will not reduce their demands. The arrivals from Kiukiang have been small, and the stock shows little increase.

KIUKIANG.—Our dates are to the 3rd inst. Green Teas: The teamen had made up their minds that the delay in the reopening of the market was due to a combination amongst foreigners, which they were determined to resist with an equal obstinacy; hence no settlements had yet been made, though a few chops had gone forward to Shanghai on native account, and the stock was thus reduced to 54,000 packages. Total settlements [and shipments: 18,100 hf.-chests, against 12,400 hf.-chests last year. Black Teas: Foreigners were unwilling to buy except at a farther decline of 1½ to 2 taels, and in consequence only three small chops Ningchow had been settled; the stock comprised 6 chops. Quotations, Ningchow: Medium to fair, 16 to 20 tls. Hohow: Common to good, 14 to 18 tls. per picul.

HANKOW.—There is no alteration to note in this Market since the last report of the 18th ultimo, the Teamen being still very firm in their prices, and are now seemingly more disposed to place their teas on the Shanghai market than submit to a reduction at this. We may still expect about 20 chops of common coarse teas before this season closes, but there is at present little prospect of prices declining so far as to admit of safe purchases. Settlements for the fortnight are 30 chops including 2 contracts and 5 sent to Shanghai, making the total for the season 660 chops. Unsold stock on the market about 35 chops. Quotations are: Oopacks common taels 19 to 21; Oonams ditto 16 to 17.

YOKOHAMA.—Settlements for the month are estimated at 4,600 piculs taken at a further reduction of $1 to 2. The unsold stocks are 5,000 piculs. Quotations, common, $10 to 13; good common, 214 to 21; medium, $22 to 25½; fine, 26 to $28.

RAW SILK.—SHANGHAI.—There has again been considerable activity in this market, the settlements being estimated at 3,500 bales. The improved home advices by 10th September mail, and a serious decline in the rate of exchange, as well as the certainty of a very short supply of China Silk, having influenced these large transactions. Prices have advanced 20 to 25 taels per picul, and close firm, the greatly reduced unsold stock causing the dealers to be less anxious to realise. The supply from the interior continues very moderate, and all the dealers are unanimous in their reports of a scarcity of silk up country. The mail from Japan has just arrived. Her advices as regards the further supply of silk were anxiously looked for. The settlements of the fortnight are estimated at 3,700 bales, against 850 bales corresponding fortnight of last season, and 1,300 ditto of season before. The unsold stock is stated at 2,000 bales, against 10,000 same period last season, 10,500 the season before, and 25,000 season 1861-62. The following are the current quotations.

CANTON.—There being very little fine silk procurable except at quite out of the way prices, nothing has been done since the 28th ult.; the inquiry for Bombay has also been of the smallest, and with the exception of a few of the commonest descriptions, there have been no settlements for that market. Prices have advanced during the fortnight very considerably, owing to the scarcity of good quality, and the large requirements of the native manufacturers, and which may be thus given, viz.:—Loongkong, No. 1, $545 to 550; do., No. 2, $530 to 535; Kow-Kong, $515 to 520; Canton Tsatlee none; Re-reeled Cumchuck, none making; waste silk, 1, $57 to 58; waste silk, 2, $47 to 48.

YOKOHAMA.—Settlements to date are 4,500 bales against 8,500 bales o the same time last season, leaving an unsold stock of about 200 bales. The receipts during the month have been good, amounting to 4,000 bales —a large and important improvement upon the previous months of this season. In the earlier part of the month the market for Mybash was opened at $565 for fair parcels; this price soon gave way, and gradually advanced to $585 to 600, and in one or two instances $610 was paid for best quality; several parcels of Koshu have come to hand, and have been readily taken at $530. Hatchojee and Taysaam sorts appear to be very dear, owing to the demand for native consumption.

DRUGS, &c.—Cassia Lignea: 400 pls. have been taken at $15.80, showing at advance of 10 cents, and although the stock has been augmented to 1,400 pls., holders have advanced the asking price to $15 90, it being known that further orders are in the market which must be fulfilled. Cassia Buds: The small stock of 8 piculs is still on the market. China Galls: The report of the failure of the present crop having been confirmed, quotations have advanced to $14.75, at which rate the remaining stock of 100 pls. is firmly held. Vermilion has further receded in value, and is now offered at $34½ per box of 50 catties. Rhubarb: No arrivals and no settlements; the old stock may now be fairly considered unfit for shipment. Musk: About 50 catties of the old inferior stock are reported sold at $85; no fresh supplies. Galangal: As before; say nominal at $2 to 3. Essential Oils: The market is still bare.

COTTON.

(China Trade Report.)

HONG KONG.—The advices from England of the continued depression in the Liverpool market, and the pressure for money in London, have, as may be expected, produced a corresponding effect here. Rates have fallen materially since the date of last report, the small transactions reported being exclusively for native consumption. The settlements of the fortnight amount to 6,000 bags at $20 to 21 for Shantung and Tien-tsin; $21 to 22½ for Shanghai, and $23½ to 24½ for Ningpo. Japan is scarce—no sales reported. During the past few days a better feeling has been manifested by the Chinese, who continue to purchase with confidence. Foreign houses generally are neither buying nor selling, but are simply awaiting the turn of events. Shipments are limited, and all depends on future advices. Stocks are estimated at 20,000 bags.

SHANGHAI.—The last report was dated Oct. 25, at which date the market was steadily declining. Since then we have had the English Mail of the 10th September, advising a decline in the Liverpool and Manchester markets of nearly 3d. per lb. This news, coupled with the probabilities of peace in America, has reduced this and the Ningpo markets to the extreme of inactivity. Rates immediately dropped from tls. 18.40 and tls. 19.50 to tls. 15.50 and tls. 16.50, with few or no buyers. Holders are however evincing firmness, and asking tls. 17.50 to 18.00, though with one exception we hear of no transactions. The latest telegrams confirming the fall of Atlanta may restore some of the confidence so shaken by the anticipations of an early peace, but the gloomy advices of money and trade generally in England will have their effect in checking prices. Much trouble and difficulty is still caused by wet cotton being brought on the market, in fact, to such an extent has this mischief been felt, that many would-be-operators have withdrawn from the market. Large quantities brought forward to supply contracts have been rejected, and though there is a very considerable fleet of shipping laid on for cotton freight, it is to be hoped that the caution evinced against buying damp cotton may have the effect of inducing the Chinese to discontinue the practice. In Ningpo, buyers are holding back for lower rates, but the Chinamen as yet refuse to submit to reduction. $27.00 to 28.00 are talked of but nothing has been done. Sales during the fortnight are put down as 1,600 bales at from $29.40 to 30. Exports to Shanghai 3,536 bales. Hong Kong 1,985 bales. Amoy 1,102 bales. Settlements for Shanghai amount to 10,000 bales for the fortnight.

NINGPO.—The intelligence of the fall in Liverpool has produced the same effect at this port as at Shanghaiand Hong Kong. Stocks are small, and holders are far from panic stricken. The nominal quotation is $26½ to 28 per bag of 118 to 120 catties.

SWATOW.—The supplies of the month amount to 4,250 bags, most of which was placed at $29 to 30. The rate has fallen $3 to 4, but the stock is small.

TIEN-TSIN.—The staple has declined 14 taels to 14.5.0. Shipping is very short; the stock is considerable and the probability is that the port will be blocked with ice ere purchases are shipped off.

YOKOHAMA.—The arrivals, for the lateness of the season, have been fair, and prices well maintained. Buyers are evidently holding off for the new crop, which should have been in the market before this, and which it is anticipated will be an abundant one. Settlements in the aggregate to 1,500 piculs, while the unsold stock may be estimated at 300 piculs.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—From Newcastle: Oct. 27, Minerva. From Cardiff: 29, Arthur. From Sunderland: 31, Sabiso.

At FOO-CHOW.—From Havre: 28, Taffarette.

At HONG KONG.—From Copenhagen: Nov. 5, Savinto. From New York: 2, Fungsuey (str.); 10, Antonia Terry.

At MANILA.—None.

At SINGAPORE.—From Sunderland: Nov. 7, Eastern Queen; 17, Dunelm. From Bordeaux: 7, Hoogly.

At PENANG.—None.

DEPARTURES.

From JAPAN.—For London: Oct. 15, Little Edith and H.M.S. Tartar, for England.

From SHANGHAI.—For London: 26, Agincourt; 27, Beemah and Avondhu; Nov. 7, J. Stanton, jun. For Liverpool: Oct. 27, Southern Empire; 29, Gwallior.

From FOO-CHOW.—For London: 27, Ellenborough and Verbena. For Falmouth: 29, Freya. For New York: 23, Ravensworth; 24, Corea.

From HONG KONG.—For London: Nov. 5, Far East (str.); for Hamburg, Nov. 12, Emily.

From MANILA.—For London: Nov. 1, Sea Belle; for Liverpool, Oct. 31, C.S., Lemon; for Falmouth, Oct. 22, Malvina Vidol; and, Nov. 1, Ocean Home.

From SINGAPORE.—For London: Nov. 17, Maid of the Tyne; 18, Northumberland; 6, for Liverpool, Moneta: for Boston, 14, Borneo.

VESSELS EXPECTED.

At YOKOHAMA.—For London: Mountain Ash, Amelia, Alfred Hawley, and Pembrokeshire.

At SHANGHAI.—For London: Canadian, Countess Russell, David McIvor, Bosworth, Delhi, Spirit of the Deep, Diligentia, Lochleven Castle, Jubilee, Anglo-Saxon, James Russell, Palawan, Queen of the Ocean. Digitized by Google

Faire, Ærolite, Ariadne, Constance, Coringa, Dennis Horton, Her Majesty, Norah Gleame, Roodee. For New York: Clara Bubuyan.

At FOOCHOW.—For London: Carisbrook, Langdale, Blencathra, Prince Alfred.

At AMOY.—For New York: Falcon.

At CANTON.—For London: Xulla, Elizabeth Dawson. For Liverpool: Melbreek, James Vinnicombe. For New York: N. B. Palmer, Magenta.

At MANILA.—For London: Otille. For New York: Windward.

At SINGAPORE.—For London: Edwin Fox. For Liverpool: Heros. For Bordeaux: Marie.

At PENANG.—None.

FREIGHTS AND CHARTERS.

YOKOHAMA.—To London: Cotton and tea, £4 per ton.

SHANGHAI.—To London: £3 per ton nominal.

FOOCHOW.—To London the rate has declined to £3 per ton, and on the arrival of a number of vessels from the South (now considerably overdue) lower rates are expected.

HONG KONG.—The following is from Geo Holmes's circular:—Elizabeth Dawson (310), London (via Macao), £3 per ton; Amur (300), Manila to Europe, £3 per ton sugar, £4. 5s. for hemp, and 5s. extra if to Continent; Magenta (850), Whampoa to New York, at $16; Northfleet (876), Calcutta and back at 95 cents per bag, 20 and 25 cents extra if on to the north—if to London £5 per ton; Hamlin (1,196), Calcutta for orders; if to Hong Kong at 85 cents per bag; if to England £4. 10s. per ton; if from Rangoon, Akyab, or Bassein to Hong Kong 72½ cents per pcl.; or from a rice port to England, at £4. 5s. per ton.

MANILA.—The only vessel fixed has been the Ottilie for London, at £2 for Clayed Sugar, £4. 10s. to £4. 15s. per ton for Hemp, and £4 per 50 cubic feet for tobacco.

SINGAPORE.—The number of arrivals seeking has been very large, making it difficult to find employment for all. For London the Moldavian (385), has been taken up to load at Sarawak at £4 per ton all round, and the Obey (271) for Glasgow at £3. 5s.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA &c.—Oct. 22, Rudolf, Rotterdam to Batavia; 27, A.R. Falck, Amsterdam to Samarang; Nov. 3, Charmer, Sunderland to Singapore; Insulaneren, Cardiff to Singapore; General Michiels, Rotterdam to Singapore.

From CHINA, &c., to ENGLAND and CONTINENT.—Oct. 25, Taeping, Amoy to London; 27, Coulnakyle, Hong Kong to London; 28, Kanagawa, Batavia to Rotterdam; 29, Castleton, Nagasaki to London; Veronica, Foochow to Liverpool; Patna, Shanghai to Liverpool; Maravi, Shanghai to London; 30, Cumberland, Foochow to London; Amoy, Hong Kong to London; Nov. 2, Providence, Shanghai to Liverpool; 2, Jupiter, Hong Kong to Falmouth; 4, Lord Raglan and West Derby, Foochow to London; 6, Olano, Manila to Liverpool; 9, England, Whampoa; St. Oswin, Singapore; Camilla, Shanghai; and Prendt Carbite, Manila to London; 10, Catharine, Macao to Hamburg.

From CHINA, &c., to UNITED STATES.—27 Oct., Rattler, from Manila; Prince of Wales, from Shanghai; and Nov. 9, Corea, Foochow to New York.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—Dec. 20, at Texel, from Batavia, Peeress; 21, at Brouwershaven, from Batavia, Roosendaal; 24, at Queenstown, from Bassein, R. M. Sloman; from Maulmain, Conde de Hainau; 23, off Dover, from Shanghai, Solent; at Falmouth, from Tuticorin and Colombo, Epsom.

DEPARTURES.—Dec. 22, from Cardiff, for Shanghai, Amoy; 24, from London, for Shanghai, Star of China.

LAID ON.—At London, for Batavia, Admiral de Winter; for Colombo, Evelyn.

SPOKEN.—Affghan, Shanghai to Liverpool, Oct. 23, 35 S., 19 E.; Verwachting, Amsterdam to Batavia; Johanna Jacob, Batavia to Halmstad; Susanna and Elizabeth, Rotterdam to Batavia, Oct. 23, 38 S., 6 E.; Jannetje, Batavia to Rotterdam, Nov. 1, 40 S., 25 E.; Cybill, Rotterdam to Batavia, 13 N., 27 W.; Wellington, Liverpool to China, Sept. 10, 9 N., 25 W.; Peiho, Shields to Hong Kong, Oct. 7, 27 S. 25 W.; Franz (ship), Rotterdam to Batavia, July 7, 26 S., 28 W.; Maiden Queen, London to Hong Kong, Sept. 21, 5 S., 106 E.; Richard Cobden, Liverpool to Singapore, 60 days out, 34 S., 9 W.; Catharina Maria, New York to Batavia, Sept. 26, 4 S., 29 W.; Almonde (Dut. barq.), from Batavia; Copernicus (Dut. ship), Batavia to Rotterdam, off St. Helena; Virginia, Amsterdam to Batavia, Sept. 16, 13 N., 25 W.; Antrim, Sunderland to Singapore, Oct. 6, 25 S., 27 W.; Antelope, Hamburg to Hong Kong, Oct. 15, 31 S., 15 W.; Tasman, Shields to Batavia, Oct. 19, 36 S., 6 W.; Thracian, Colombo to London, Nov. 14, 31 S., 12 E.; Hochelaga, Batavia to Amsterdam, Nov. 15; Spitfire, Penang to London, Oct. 23, 29 S., 46 E.; Richard, Foochow-Foo to London, Nov. 19; Hamstadt, Rotterdam to Batavia, Oct. 6, 28 S., 28 W.; Angela, London to Manila, Oct. 20, 37 S., 1 W.; Isaac da Costa, Rotterdam to Padang, Sept. 2, 13 S., 29 W.; Belladonna, Liverpool to Singapore, Oct. 11, 29 S., 12 W.; Continent, from Manila, Sept. 12, 1 N., 114 E.; Franklin, (Amer. ship), from Manila, Sept. 28, off Anjer; Johanna Catharina, Batavia to Rotterdam, Nov. 24, off St. Helena; Bernard (packet), Antwerp to Batavia, Sept. 2, 22 N., 24 W.; Helvellyn, Shanghai to London, Sept. 11, 9 N., 26 W.; Donna Bella, Liverpool to Singapore; Napoleon (Dut. barq.), Amsterdam to Batavia, Sept. 5, 10 N., 26 W.; Sindab (?), Amsterdam to Batavia, Oct. 6, 26 N., 28 W.; Seaforth (ship), Manila to London, Sept. 6; Willy (Eng. brig), Amoy to London, Sept. 7; Henrica, Batavia to Rotterdam, Nov. 4, 30 S., 38 E.; Quintet, Batavia to Amsterdam, Nov. 13, off Cape Agulhas.

At ASCENSION.—Nov. 4, from Singapore, Belle Virginie, and sailed for Marseilles; 7, from Shanghai, General Windham, Forbes, and sailed, 8, for Liverpool.

Off ASCENSION.—Nov. 20, from Batavia, Veronica, for Amsterdam; 28, Mocq, Bailly, for Naples; 30, Ottolina, for Rotterdam.

At ST. HELENA.—Nov. 5, from Shanghai, Affghan, Fisher, and sailed, 9, for Liverpool; from Batavia, Gerard, Peter, and Servatius, Wamsteker, and sailed for Amsterdam; 8, from Zebu, Auffredy, Poupard, and sailed, 13, for Falmouth; from Batavia, Kandanghauer, Zeelt, and sailed, 9, for Amsterdam; 14, from Shanghai, Sea Snake, Popham, and sailed for Liverpool; 15, from Foo-chow-Foo, Philomela, Archer, and sailed for London; 16, Canute, Smerdon, and sailed, 17, for London; from Hong Kong, Roslin Castle, Nicol, and sailed, 18, for New York; 21, from Manila, Jupiter, Hauschild, and sailed, 22, for Liverpool; 24, Voladora, Villabasso, and sailed for Falmouth; from Shanghai, Brockham, Williams, and sailed, 25, for Liverpool; 25, Zodiac, Hopkins, and sailed for London; from Manila, Labrador, Quinn, and sailed for Liverpool; 26, from Penang, Frederik, Hultman, and sailed, 27, for Falmouth; from Samarang, Liberator, Robertson, and sailed for Rotterdam; from Singapore, Tigris, Miller, and sailed for Liverpool; from Colombo, Shallett, Willis, and sailed for London; 27, from Ceylon, Thracian, Tyack, and sailed, 28, for London; 28, from Batavia, Amsterdam, Doekzen, and Hendrika, Valk.

At SIMON'S BAY.—Nov. 13, H.M.'s ship Orontes, sailed for Ceylon.

At NATAL.—Oct. 20 Etienne, Silvers, sailed for Singapore.

At TABLE BAY.—Nov. —, Gemini, Pallot, and Snaresbrook, Wood, and both sailed for Galle.

CASUALTIES.—The Luisita, Gordia, of and from Manila for Cadiz, put into St. Helena, November 20, making 16 inches water per hour; she discharged about 100 tons of her cargo, and stopped the greater part of the leak. She now, November 20, makes but little water, and is about to reload the discharged portion of her cargo.

The Washington (s.) of Boston, from New York to the Cape of Good Hope and China, put into St. Helena, November 25, having been within 500 miles of the Cape, but compelled to put back here for coals. The morning after her arrival, she was discovered to be in a sinking state, with 4½ feet water in her hold. Four pumps were sent off, and by 7 P.M. she was pumded out. She has been surveyed inside and out, but nothing found to account for the quantity of water. On the 28th she was recommended to take in coal and proceed for her destination.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

DEC. 22.

The *Irkutzk Government Gazette* states that the past summer has been a very unfavourable one for the agricultural interest in Eastern Siberia, in consequence of which the prices of all comestibles have considerably risen. Rye cannot be bought under 80 kopeks per pood of 40 lbs., and even at that price is difficult to obtain at all; oats fetched 80 and 75 kop., whilst the price of hay was far above the means of most of the peasant farmers.

A letter from Nertschinsk in the same paper mentions a new article of commerce at Aigoon on the Amoor. Scarcely was the trade opened there when a number of Chinese and Mandschurian dealers made their appearance inquiring anxiously for stags' horns, which they eagerly bought up, paying as much as 200 silver roubles for a pair of antlers of good size. It appears they are in great request in China from a supposed inherent virtue contained in them that they facilitate parturition, and it is asserted that no Chinese parents in easy circumstances ever fail to include a pair of stags' antlers in the dowry and outfit of their daughters when they marry.

From St. Petersburg we learn that Mr. H. Sibley, the President of the American Western Union Telegraph Company, and Mr. Collins, the indefatigable protagonist in the cause of telegraphic extension, have had the honour of being presented to the Emperor, who was pleased to converse long and freely with them on the subject of their important mission to Russia.

About the end of November the British ship *Agincourt*, from St. Petersburg to the Amoor, with a cargo of rye flour, was brought into the port of Revel in a leaky condition, having been severely nipped by the ice. The cargo has been landed and warehoused, and the ship, after undergoing the needful repairs, dismantled and laid up for the winter. The crew, consisting of twenty-one seamen, arrived at Lubeck by the steamer *Hebe* last week *en route* for England, and were forwarded to London from this port by one of the General Steam Navigation Company's steamers.

By Royal Decree, dated Stockholm, December 10, the King of Sweden and Norway has been pleased to appoint Mr. W. Leembruggen, of Tien-tsin, to be His Majesty's Vice-Consul at that port, under the Consulate-General of Shanghai, *vice* Mr. S. H. Pomeroy, jun., resigned.

COMMERCIAL.

COFFEE.—In the face of the approaching holidays, and several days of sharp frost that has already filled the Elbe with floating ice, and renders the navigation impossible for sailing ships, threatening even to stop the arrival and departure of steamers in a day or two, the late brisk demand

Digitized by Google

for coffee has subsided, and the sales have been limited to the execution of the most pressing orders. Holders are by no means anxious to realise their stocks, and, therefore, the absence of extensive buyers has had no influence on the value of any description of coffee.

SUGAR.—Since last report the market for raw has been dull, and in most cases a fall of 4 to 8 sch. bco. was submitted to. Among the sales were 6,000 bags of unclayed Manila at 14 mks. bco. Refined goods were also a shade cheaper, and the dealings were by no means extensive.

RICE.—This market has been in a very lively condition for all descriptions, but chiefly for cleaned grain. The prices, however, are a trifle in favour of purchasers.

SPICES.—As the German Christmas Cookery does not include mince pies and plum-puddings, the approach of the holidays does not affect the spice market. The sales of the week were not larger than usual, and there is no alteration to notice in the value of any one article. Cassia Lignea 9⅛ to 9⅝ sch. bco.

SPELTER.—Unfavourable advices from other markets have shaken confidence in this article, and the sale is heavy. Silesian in slabs offered ex warehouse and for spring delivery at 13½ marks banco without attracting purchasers.

DISCOUNT.—5¼ to 5¾ per cent.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, DECEMBER 15th.

My anticipation that the Budget of the Home Department would soon be passed, has proved correct. After a discussion of little interest respecting educational matters—Mr. Groen being indisposed, and therefore not present—only 19 members voted against the chapter. After the Budget for the construction of the State Railways had been unanimously approved of, the chapter for the Marine Department was put on the table. Some time ago I informed you that the opposition papers were endeavouring to persuade the public that the Minister of Marine was condemned to fall, with the consent of the Premier. The sectional report, since published, favoured this opinion. The result of the debates, however, has shown the contrary, for this chapter was also passed by 47 against 19 votes.

At the sitting of to-day a very animated debate took place between several members and the Minister of Finances, who defended his Budget with so much tact against the very severe attacks on his plans for modifying our system of duties, that he won the day. His chapter passed, as did also that of the National Debt, by 51 against 18 votes. Mr. Betz stated, during the discussion, that the revenues of the State for the current year would surpass the estimate by 4,500,000 guilders. He is soon to lay before the members a new Bill on the sugar duties.

The First Chamber assembled to-day. The debates will begin on Friday next.

In my last letter I spoke of the satisfaction that prevailed in Amsterdam in consequence of the capital necessary for the canal being fully subscribed for; that satisfaction was of a very short duration. Mr. van Nierop, in the Second Chamber, a few days ago, suddenly startled the good people of Amsterdam out of their ease. He asked some information from Mr. Thorbecke respecting this affair, which he called a deception of the worst character. The contractors for the work, Messrs. William McCormick and Sons, of London, who had taken shares for ten millions of guilders, were stated to be going on under a trust, instead of being solvent for that amount. It was also alleged that this firm was now trying to make arrangements with their creditors. On the other side, it is asserted that other contractors would easily be found in England to execute the work. I hope this assertion will prove to be true.

The emancipation of women is now much spoken about here. The celebrated traveller, Mrs. Storm, takes much trouble to bring her ideas in favour with the public, but I very much doubt whether she will be successful in her endeavours to induce the people to follow the example of the Americans.

The Emperor of Russia has conferred on our active and ingenious engineer, Paul Van Vlissingen, the Order of St. Stanislaus.

A detachment of troops, 100 men, has embarked for Java on board of the *Harderwyk*, Captain Loos.

COMMERCIAL.

COFFEE.—The market is not so firm as at our former report; prices are unaltered, but there are less buyers. Only 1,900b. Java, ex Vyfvrienden, were sold at 45 c.

TEA.—In public auction 79½ch. Souchong were partly sold at 101 cents, and 136¼ and 136½ ch. Congo at 103 to 117 cents. The lots retired were afterwards sold at higher prices. The 79¼ ch. Java offered to day were sold: the Congo at 58 to 68 cents, the Thunkay at 51 to 55 cents, and the Hysons at 70 cents. At second hand, business to a fair extent was done.

TOBACCO.—Dull; some auctions are announced for the 21st inst. Stock 4,412 b. Java.

SUGAR.—Dull; the transactions consisted of 2,000 kils., at 2f. under November prices; 1,057 kils., No. 13, ex Alexander, at 33¾f.; and 1,100 kils., No. 16, ex Ajax, at 36½f.

SPICES.—Nutmegs, No. 1, and Cloves are offered at lower prices. Cinnamon with much demand. Ginger: Of the 500 chests in public auction, 400 chests were taken very willingly at the prices of 60 to 74 ct. Vanille: Much inquiry.

COTTON.—The market is in a fair position.

TIN.—Banca: 1,000 bl. were sold at 58f., and 500 bl. at 57½f.

INDIGO.—Without transactions.

HEMP.—Dull.

RICE.—Market inactive; there are no sellers.

DRUGS.—Gum Elast.: Without demand. Cassia Vera (Padang): Much higher in prices. Gum Dammar: With inquiry; 230 chests, ex Koophandel, were sold at higher prices.

HIDES.—508 p. Maroim (dam.) were sold at 20⅛ to 30 ct.

MONEY.—Bank discount, 6½ per cent.; open market, 7 per cent.; N. W. S. Two-and-a-Half per Cents., 60⅜; Three per Cents., 70½; Four per Cents., 95¼; Handelmaatschappy, 137⅝. 'Change on London, 3 mo., f.11.52½; short, f.11.72½; Paris, 3 mo., f.45.86; short, f.46.50; Hambro', 3 mo., f.34.62½; short, f.35.25.

SHIPPING.

ARRIVALS.—Dec. 8, at Texel, from Batavia, Decima, Wilhelmina Maria; 10, at Brouwershaven, from Tjilatjap, Guurtje and Maria; 11, at Brouwershaven, from Batavia, Friendschap; at Texel, from Batavia, Nederland and Oranje; 13, at Texel, from Batavia, Anthony van Hoboken; 14, at Brouwershaven, from Samarang, Ida Elisabeth; at Texel, from Batavia, Tweelingers.

DEPARTURES.—Dec. 8, from Hellevoet for Macassar, Koning Willem III.; from Flushing H.M. corvet Prins Maurits der Nederlanden for Batavia via Rio Janeiro; 10, from Brouwershaven for Melbourne: Susanne; for Batavia: Graaf Dirk III., Patriarch Samhiri, Dorothea Henriette, St. Jan, J. C. Schotel, Koophandel, Æolus; 9, from Flushing to Singapore: Indus; 10, from Flushing to the West Indies: H.M.'s corvet: Pallas; 13, from Brouwershaven for Batavia, Noordbraband, Paul Johan; 13, from Texel for Padang: Maria Agnes. For Japan: Joan Melchior Kemper, Libra. For Samarang: Machtilda and Simonette. For Sourabaya: Sourabaya Packet; 14, from Texel for Samarang: Nicot. For Batavia: Friesland. For Java: Willem and Carel, Francina Wilhemina.

READY TO SAIL.—At Brouwershaven: Baron van Heemstra, for Samarang; S. van Heel, for Sourabaya. At Texel: Christina, for Samarang.

FRIGHTS.—Quotations of Messrs. Fauchey and de Vletter, shipbrokers, Rotterdam:—For Batavia: Fop Smit, 549 tons, 18f. to 20f. For Batavia and Samarang: Whampoa, 462 tons; Marie, 746 tons; Maria Adriana, 718 tons; Catharina Wilhelmina, 1,083 tons, 18f. to 20f. for B., 25f. to 30f. for S. For Batavia and Sourabaya: Delfs, 735 tons, 2f. for B., 25f. for S. For Samarang: Maria Magdalena, 403 tons, 25f. For Padang: Frederick Hendrik, 611 tons, 40f. All per last of 2,000 ks., or 120 cubic feet Amsterdam, and 15 per cent. For Decima and Kanagawa: Japan Packet, 266 tons, 60f. and 15 per cent. per last of 80 cubic feet English.

LOADING.—At Amsterdam: For Kanagawa and Decima, D. T. Visser; for Macassar, Quatre Bras; for Batavia, Ferdinand and Louis, Almelo, Sliedrecht; for Batavia and Samarang, Gabilei; for Batavia and Sourabaya, Willem Hendrik, Anna and Sophia; for Samarang, Johanna, Madura, Stad Leyden, Koning Willem II., Estafette; for Sourabaya, Willem Daniel, Capella, Baltimore.

PASSENGERS OUTWARD.

For Padang, per Maria Agnes, Captain Westenenk, Messrs. J. C. de Wit, and A. H. L. de la Couture; for Batavia, per Noord Brabant, Captain Loos, Captain Hamakers, Mrs. Hamakers, Messrs. de Jonge; for Sourabaya, per Sourabaya Packet, Captain Olivier, Mr. van Reyn and family, Mrs. Nagtglas Versteegh and child, Miss Rombouts, van Crans, Mrs. Niggebrugge and two children, Miss Sybrands,; per Friesland, for Batavia, Mr. J. J. A. Keuchenius and family, Mr. H. Walter and family, Mr. Herckenrath, and Miss Schmidt.

AMSTERDAM, DEC. 26.

COFFEE.—Dull, only some parcels are bought for consumption.

TEA.—Firm, with much doing in the second hand.

RICE.—Quiet.

SPICES.—Nutmegs: No. 1, 84c. No. 2, 75c. Cloves: No. 2, 32c. Ginger: Firm.

COTTON.—An active market at former prices.

BANCA TIN.—1,000 bls. were sold at 57¼f. and 1,000 bls. ditto at 57f. Billiton Tin was paid with 57f. and 56½f.

INDIGO.—Market dull.

SUGAR (Raw).—Marked quiet, prices unaltered.

TOBACCO.—Several parcels Java were sold at former prices.

COCHIN CHINA OIL.—25½f.

MONEY.—Rate of discount at the Bank: for bills 6 per cent., and acceptances, 6½ per cent.; open market discount, 6 per cent. N. W. S., 2½ per cent., 61½ per cent.; 3 per cent., 72⅛; 4 per cent., 95¼. Handelmaatschappy, 139. Change on London, 3 mo. f.11.52½; 2 mo. f.11.57½; short, f.11.69; on Paris, 3 mo., f.45.86; 2 mo., f.46.05; short, f.46.55; on Hambro', 3 mo.; f.34.625, 2 mo., f.34.95; short, f.35.15.

SHIPPING.—DEPARTURES.—Dec. 14, from Texel, for Batavia, Doesborgh, Pollux; 17, from Brouwershaven, for Sourabaya, Fop Smit; 18, from do., for Batavia, S. van Heel; from Texel, for Samarang, Christina; 21, from Zierikzee, for Batavia, Baron van Heemstra.

ARRIVALS.—Dec. 21, at Brouwershaven, from Batavia, Baron van Pallandt van Roosendaal; 20, at Texel, from do., Peeress.

READY TO SAIL.—At Brouwershaven, for Batavia, Nederland; at Texel, for Batavia, Johanna.

FREIGHTS.—Quotation of Messrs. Fauchey and de Vletter, ship brokers, Rotterdam.—For Batavia and Samarang: Whampoa, 462 tons; Marie, 746 tons; Maria Adriana, 718 tons; Catharina Wilhelmina, 1,083 tons; 18f. to 20f. for B., 25f. to 30f. for S. For Batavia and Sourabaya:

Delft, 735 tons; 20f. for B., 25f. for S. For Samarang: Maria Magdalena, 403 tons; 25f. For Padang: Frederik Hendrik, 611 tons; 40f. All per last of 2.000 ks. of 120 cubic feet Amsterdam, and 15 per cent. For Decima and Kanawaga: Japan Packet, 266 tons; 60f. and 15 per cent. per last of 80 cubic feet Eng. For Singapore and Hong Kong: Gouverneur van Swieten, 352 tons; 30f. to 35f. for S., 40f. to 45f. for H., both per ton of 1,000 ks. or 40 cubic feet Eng., and 15 per cent.

LOADING.—At Amsterdam for Kanagawa and Decima: D. T. Visser; for Macassar: Quatre Bras; for Batavia: Ferdinand and Louis, Almelo, Sliedrecht, India Packet; for Batavia and Samarang: Galilei; for Batavia and Sourabaya: Anna and Sophia; for Samarang: Madura, Stad Leyden, Estafette; for Samarang and Sourabaya: Koning Willem II.; for Sourabaya: Willem Daniel, Capella, Baltimore, Petronella, Pauline Consiance Eleone.

SHIPPING is stopped by the ice; the Maas is frozen.

PASSENGERS INWARD.—From Java, per Ida Elisabeth, Capt. Janses: Mr. Teerlink and family.

OUTWARD.—For Samarang, per Christina, Capt. Remeus: Mr. Van Roy, Capt. E. I. Army, and two Javanese ladies. For Java, per Baron Van Heemstra: Mrs. L. Van Hazel and A. Van Reins.

RUSSIAN TRADE WITH CHINA.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, DECEMBER, 14.

At the last weekly sitting of the Russian Imperial Geographical Society several interesting communications were made concerning the Far East. In the first place, the attention of the members present was drawn to a beautiful collection of maritime views of China and Japan taken by Prussian officers during their late diplomatic and commercial expedition to those countries, and presented by the Prussian Minister for the Navy. From papers read to the meeting it appears that during this last summer several interesting expeditions to different parts of Eastern Siberia have been undertaken. Thus, Prince Krapotkin has been making researches in the unexplored country between Tchouroukhaitoui and Blagovessensk, crossing the province of Mergen, in order if possible to discover a land communication between the above-named towns by a shorter route than that by the winding banks of the Amoor and the Argoun, as the bed of the latter river is found to be full of rapids and shallows highly obstructive to steam navigation till Government shall have had time to remove them. As, according to reliable information lately received, some serious errors have been made in the maps in laying down the position of the country in the upper district of the river Onone, Mr. Schichmarew, corresponding member of the Society for the Section of Siberia, has made an excursion to those parts, accompanied by a topographical engineer, for the purpose of correcting those errors and verifying the positions by astronomical observations. From thence he intended to follow up his explorations till he reached the Schilka. And finally, it was mentioned that M. Lapatine had paid a scientific visit to the eastean coast of Siberia to make researches into the mineral resources of those parts, whilst M. Stoukow had been employing his time in studying the manners and customs of the tribes of Bouriates in the province of Tonkin.

A paper was then read by Captain Printz giving an account of a journey made by him to Khobdo, a town in China that has never before been visited by any European traveller. This paper was listened to with deep attention, and caused a great sensation among the Fellows present. The gallant officer started from the south-eastern district of the Government of Tomsk, crossing the Altai range of mountains, and discovered that on the banks of the river Chouya an animated trade is carried on between Russians and Chinese of which nothing was previously known. Captain Printz estimates this trade to amount to 500,000 roubles annually, it being in the hands of Chinese dealers residing at Bysk, a town about 600 versts from the Chouya. On their part, the Russian merchants have to carry their goods to the Chinese frontier, a feat accompanied by a good deal of difficulty and risk in passing the mountain torrents and steep defiles of the Altai range. Captain Printz was accompanied in his visit to Khobdo by three Russian dealers. He describes it as most conveniently situated for an extensive trade, for it lies in the most direct line of communication with China, and is worthy to become a great emporium. It is much nearer Tomsk than the great frontier market of Kiachta, and thus it would lessen by nearly one half the expense and time in the conveyance of merchandise with a little outlay in improving the roads. Besides, he adds, Khobdo is considerably nearer to the tea producing districts in China than either Kiachta or Tchougoutshak.

This opinion was, however, zealously combated by M. Skatchkow, a Fellow of the Society, and formerly for many years Russian Consul at Tchougoutshak, who laboured to prove that the local topographical conditions were unfavourable for a development of the trade with China viâ Khobdo. There are two roads, he said, leading from Khobdo to the interior of China. The first is the commercial route followed by the caravans, but circuitous and crossing a rocky, inhospitable, and almost uninhabited desert tract of country through Western Mongolia in the direction of Oulia-sou-tai. This route could never be made available for large quantities of tea. The other road is shorter, but can only be used for couriers with the post-bags, and is totally impracticable for caravans. According to the theory of M. Skatchkow, in selecting a spot to establish a new commercial emporium in the Celestial Empire the first condition to be observed is, not its proximity to the tea-producing districts, but rather its being within access to one of the principal centres of commerce of that country. There are, he observed, two such centres, one of which is Hang-ho, with its factories and branch establishments at Shanghai in the East; the other being Ourumtsi, in the West. This latter town contains a population of 150,000 souls, and enjoys a reputation similar to that of Nijni-Novgorod, as a concentration of goods and produce of Russia, Turkestan, Bokhara, Chokand, Tachkend, Persia, and Cashemir, are brought thither for sale and barter. There are 140 commercial agencies and 75 Chinese banks permanently established there, besides innumerable stores and warehouses full of valuable commodities; giving the place the appearance of a perpetual fair being held in it. The country around is easy of approach, well watered and well cultivated, with roads and bridges kept in the highest state of repair, and with plenty of towns and villages, containing hotels where travellers find the best accommodation. Therefore, he considers it much more important to cultivate commercial relations with Ourumtsi than with Khobdo, which latter place, however, he has no wish to disparage, though it can never enter into serious competition with the former.

Literature.

The British Arms in North China and Japan: Peking 1860; *Kagosima* 1863. By D. F. RENNIE, M.D., Senior Medical Officer of the Force in the North of China, &c. John Murray, Albemarle-street.—This volume will be eagerly perused both by the general reader and by those who feel a personal interest in that part of the world about which its pages are concerned. One peculiar charm of the book is its perfect unpretentiousness. Every page almost contains its own bit of curious and novel information; but whatever it may be, you have it in the simple language in which it was originally conveyed to the author, or told with the brevity and force of the first impression. Much of this is no doubt owing to the book being but a transcript from the daily entry in the diary; but beyond that there is a singular absence of the "Sir Oracle," tone, which is too much a characteristic of the scientific and professional mind of the present day. A good deal of the freshness that belonged to the mere story of the Chinese war has of course been taken off by the many narratives of its events we have already had; but Dr. Rennie tells us no more than is sufficient to give an intelligible sequence to those bits of detail that passed under his own eye, so that the reader can never justly complain that he is wearied with a "twice-told tale."

Points connected with the health of the soldier form, as might be expected from the position of the author, not the least interesting or instructive portion of the book. Evidently England has much to learn in this respect. The French soldier, it appears, carries his sixty rounds of ball ammunition in a much less fatiguing mode than the Englishman—

> A single belt fastened round the waist carries his bayonet and cartouch box of small size, containing only twenty rounds, the remaining forty being carried in the knapsack—an arrangement which appears to me much superior to ours, which compels the soldier to carry forty rounds in a small portmanteau suspended by a cumbrous shoulder-belt, and further, to fit on to waist-belt, supporting the bayonet, another leathern box, containing twenty rounds, which, from being placed on the right side in front, bumps over the liver every time his movements are accelerated. To modify the pain arising from this, he has to tighten the belt to the utmost, thereby necessarily diminishing the cavity of the chest and abdomen. Reducing the natural space of organs such as the lungs, the liver, and spleen, interferes with the circulation, and predisposes the soldier to heat, apoplexy, and other congestive diseases of warm climates—in a word, subjects the soldier to evils much the same as those which arise from tight lacing in the other sex.

The bell-tent again, twelve feet in diameter, with fourteen men assigned to each tent, was very prejudicial to the soldier's health, though our military authorities are well acquainted with a much superior form in the Indian tent, as used by our forces serving in the Presidencies. We don't seem even to

Digitized by Google

know how to carry cattle for the supply of an army, without entailing disease on the consumer and most extravagant outlay on the commissariat. 250 oxen are shipped at Chusan, but only 85 reach their destination alive, and those so tainted with the atmospheric poison which proved fatal to the others, from over-crowding, that a febrile diarrhœa which ensued is ascribed to this unwholesome animal food, particularly as the Sikhs, who do not use beef at all, were free from it. The mortality among the cattle, indeed, from want of the commonest judgment in their conveyance, involved this result, that "it has been ascertained the fresh beef served out to the army at Talien-whan cost in all about twelve shillings per pound." Horses fared no better—

An officer of the military train mentioned to me that he had just returned from Japan in the *Kate Hooper* with the remnant of some 250 horses that had formed the freight of the vessel, the mortality amongst which had been so great that in one day he had thrown 70 overboard—a wholesale slaughter, attributable to the same cause as that which has produced like results in the cattle-ships, namely, an apparent unacquaintance with the fact that food and water alone are insufficient for the maintenance of animal life, and that similar pestilential diseases are generated by the over-crowding of animals as of men in limited spaces. The fittings of the vessels would appear also to have been in some instances defective, from the fact of horses that survived the voyage being received with their lower jaw-bones laid bare, caused by lurches of the vessel throwing them forward on iron bars that had been injudiciously fitted across the front of the stalls, apparently without reference to the height of the animal they were intended to contain.

So too, of the baggage animals, a large number were soon rendered useless from sore backs, from the injudicious construction of the pack-saddles, made from a pattern determined on by a board of military officers, who did not take the opinion of a veterinary surgeon. A glimpse of the old Crimean "how not to do it" peeps out in the fact that the Indian followers of Fane's Horse suffered severely from frost bite—

No proper provision was made at the commencement of the winter for keeping their feet warm by giving them long boots like those of the troops, and such a delay occurred before Tartar boots were procured for them, that the mischief was done before their feet received adequate protection.

The most lamentable instance recorded of utter want of management is, however, what occurred on the occasion of distributing a sum of 876 dollars collected to relieve the indigent Chinese of Tien-tsin. Dr. Rennie recommended the establishment of a soup-kitchen with the fund; Dr. Gordon, the application of the sum to the support of a hospital for surgical cases. No; whether for ostentation, or for the mischievous fun of seeing a sort of scramble, the amount was to be distributed to claimants in person. The result was that a crowd of five thousand people assembled, and that in the rush for admission nine people were trodden to death, and a large number injured.

Deficiency in administrative organisation was not, after all, the worst fault exhibited by the British army in China. The habit of plundering developed more degrading evils. The men became demoralized by the constant "looting" that had been going on during the expedition, and on the march to Peking both Lord Elgin and Sir Hope Grant were looted of nearly the whole of their wine by the escort of the 60th Rifles that accompanied it—the loss of each amounting to about sixty dozen. The following was, we are sorry to state, not the only instance of far more inexcusable conduct perpetrated by persons disgracing the rank of an officer:—

At a subsequent period of the occupation of Tien-tsin an officer mentioned to me that he was present in a curiosity-shop in the chief street in the suburb when an English officer was bargaining for an article. Failing to get it at the price he wanted, he took it up, and threw down its money value according to his own estimate. The shopkeeper, an old man with grey hair, objected to the amount, and came forward, putting his hand at the same time to take back the article. The officer struck him a severe blow between the eyes, which knocked him down, and he then, after having performed this ruffianly feat, walked deliberately off with the poor man's property.

Of some of our late vaunted improvements in the military art Dr. Rennie speaks very slightingly. The Armstrong gun he considers to possess neither precision of aim nor destructive effectiveness. Our muskets are charged with the same faults—

One of our regiments fired a volley from their "Enfields" at four hundred yards with so little effect that the Tartar cavalry did not move, but complacently looked on, the amount of damage done to them being about the same as if the volley had been one with blank ammunition. So much for weapons of precision!

Many curious notices are interspersed here and there of the secrets in science and manipulation we may yet acquire from the Far East. A Chinese apothecary was found making up a prescription containing camphor reduced to a fine powder, "a pharmaceutical process that we ourselves have not yet been able to arrive at." The Japanese doctors are said to possess a remarkable powder, the application of which externally removes at once muscular rigidity, whether occurring before or after death. The limbs of the dead are stated to be rendered as flexible as during life, immediately after the powder has been rubbed over them. Even a Chinese tallow-candle conveys a lesson. "The outer coat is a thin envelope of wax, which, dissolving more slowly than the tallow, forms a ledge about the fourth of an inch round the tallow in solution, and thus its running down the sides is completely prevented."

A short respite from his military duties enables Dr. Rennie to visit Japan, where he was invited by Colonel Neale, to whom the book before us is dedicated, to take up his quarters at the Legation, so that here also the author was placed in the best possible position for obtaining authentic information on every subject on which he might choose to inquire. One extract will present in a few words the political "situation" in Japan, which is manifestly just what it has been often proclaimed to be in the columns of the *London and China Telegraph*:—

One man in particular, a doctor, spoke with great respect of the power and influence of England. He said that the Tycoon was in trouble, and on bad terms with the Mikado, and had been residing at Osacca, but had lately gone back to Kioto. This statement was at variance with what the Japanese officers had told Mr. Fletcher on the way from Yokohama. In their general conversation they had seemed anxious to convey to him the impression that the Mikado and the Tycoon were on excellent terms. Privately, however, one of the officers informed him that their friendly relations were more apparent than real, as the Mikado was much influenced by evil advice tendered him by Daimios hostile to the Tycoon; but he was in want of money, and therefore inclined to lend a ready ear to the overtures made by certain Daimios who were offering a higher price for the temporal throne on the part of the Prince of Mito than the Tycoon, who held it by law and prescriptive right, was inclined to give. Also that the Daimios as yet were not declared enemies of the Tycoon, only enemies to foreigners, and that nominally; as he believed they had no real objection to them, merely pretending an animosity to them as the most probable and speedy means of involving the Tycoon, and facilitating the downfall of his Government. . . . . The Japanese officers had no hesitation in stating that if the Prince of Mito succeeded in dislodging the Tycoon's Government, he would, in all probability, pursue the same course in reference to foreigners that the latter has done, and throw open the ports to European commerce, jealousy of the advantages which the Tycoon is gaining from his recent treaties with foreign Powers being one of the chief causes of their desire for his dethronement.

Coming so recently from China, Dr. Rennie could hardly fail to make a relative estimate of the two nations, which is balanced greatly in favour of his former acquaintance. He considers that "the Japanese, though more prone to adopt European improvements, are commercially a long way behind the Chinese, also less industrious, more licentious and intemperate, and in the main their inferiors, though on a superficial view the Japanese are much the more attractive nation." The eleven chapters devoted to Japan are remarkably full of observation, as the writer lost no chance of adding to his store of facts by visiting and conversing with the natives. Notes on political matters are intermingled with sketches of the mode of life and social habits of the people, so that the book is at last laid down with longing regret; cheered, we are happy to announce, by the certainty of enjoying a similar treat in the forthcoming work from the same pen—"Pekin and the Pekinese: Journal of a Residence in the Capital of China." For the present, then, we will take leave of the author with an extract containing his opinions on

ENGLISH OFFICIALS AND COMPETITIVE EXAMINATION.

My experience in the East, especially in China, convinces me that it is only by a *bona fide* spirit of conciliation that a real and permanent influence is to be gained over Orientals. The principles inculcated for the carrying out of its Eastern policy by the British Government are conciliatory in the extreme; but its beneficent intentions are in too many instances frustrated by the arrogance, superciliousness, violent temper, want of tact, and general incompetency for the management of men, of those into whose hands the execution of its measures falls. The spirit of conciliation has long appeared to me of all others the most deficient in the English character in the East. . . . . A knowledge of the native language also appears to me too indiscriminately taken as a guarantee for diplomatic capacity, and I think I could state instances where mischief has resulted from the diplomatic employment of injudicious and unconciliating linguists, in place of their services having been restricted within purely interpretorial limits. An intimate acquaintance with an Oriental language, or a brain stuffed full of book learning, by no means implies the possession of that combination of tact, discretion, and judgment which, under the name of common sense, is so essential to success in dealing with Orientals, and hence it is that of all tests of fitness for the public service competitive examination is perhaps the most fallacious. The quality of brain which shines most at one of these ordeals may prove that least practically adapted for the very post that a high class examination has gained for it. The absorbent form of brain, which, like a sponge, readily imbibes whatever is submitted to its action, and also, like a sponge on being squeezed, equally readily lets it out, constitutes the type of mind which is now preferred for the public service to the exclusion of brains that may be infinitely superior.

MR. LAY AND SIR FREDERICK BRUCE.

IN the leading columns of this journal some six months ago we had occasion to animadvert rather strongly on the conduct of Mr. H. N. LAY, C.B., ex-Inspector-General of the Customs, in publishing a letter reflecting on the character of Sir FREDERICK BRUCE, in the failure of the Anglo-Chinese fleet affair; and concluded our remarks in the following words:—"Instead "of adding fuel to the fire of controversy on British policy in "China, it would be more becoming on the part of Mr. LAY to 'remain in silent obscurity." Nearly half a year having elapsed since then, we imagined that he had taken the hint, and the little actor, after struggling his hour on the diplomatic stage, had hid himself away among the old properties and scenery of the forgotten Chinese drama. But no! the *cacoethes scribendi* was tingling his finger ends, and the *animus* against Sir FREDERICK was strong in his breast; so he occupied his time in compiling a pamphlet full of rancour and recrimination against him, wherein he exhibits the unpardonable, not to say contemptible conduct of publishing private notes, conversations, &c., that had passed between them This *brochure* is entitled "Our Interests in China," and purports to be a letter to Earl RUSSELL on the subject; but as far as its principal contents bear out the title it is a misnomer, and would be more appropriately named "My Interests in China, by H. N. LAY." It contains seventy-one octavo pages, the subject-matter being divided into four sections, the first of which relates to *The Authority under which the Naval Force was Organised.* In this section he rakes up all the old notes and memoranda that might reflect upon his adversary, while they were apparently on the most intimate terms, of which the following is an example:—"March 15th, 1861.—My dear LAY,—I hope to God you mean "to come here (Peking) before taking leave to England; I shall "never forgive you if you throw me over, after the trouble I "have had in the custom-house matters, and the system will "go to the wall if you don't take the present opportunity of "presenting yourself at Peking. Don't be guided by SIEH'S "advice; these superintendents of trade hate the foreign system "at heart, as it will interfere with their gains . . . This "climate is splendid. Come up here before you go home. You "are bound to do so, and if you don't, there is an end of you "and your inspectorship. You will be supplanted before your "return, unless you make your footing secure in Peking. I tell "you again I will not forgive you, nor will I assist you, if you "don't come up here before going to England.—Yours truly, "FREDERICK BRUCE." The second part refers to the *Proceedings at Peking, and Reasons for the Dissolution of the Force;* on which he does not throw much new light, that has not already appeared in the Blue-books; but which he has garnished plentifully with his egotistical diction, besprinkled with the personal pronoun "I." The third section is headed *Attitude of Sir F. Bruce, and my Communications with Him*, wherein he recounts minutely his interviews with Sir FREDERICK and the Foreign Ministers, how they discussed Chinese policy over their cigars in an afternoon's "confab." There is something offensive as well as egotistical in these relations o. what every gentleman considers confidential conversations, such as take place at a private table, to divulge which is a breach of honour. In his accounts of such private interviews, we are only surprised that he doesn't inform Earl RUSSELL what style of *pyjamas* Sir FREDERICK wore in the hot weather. In the fourth and last section,—*General Remarks upon our Policy*,—the writer begins for the first time to handle the subject-matter of his pamphlet, so that if it is read *a la Chinois*, from right to left, the reader will gather the best of its contents at once. If Mr. LAY had confined himself to this section, or amplified the text, he would have earned for himself the thanks of every one interested in China; as any new information on the polity and government of that extraordinary country would be valuable from his pen, seeing that few, if any, foreigners ever had such opportunities for examining the secret springs and actions of its Ministers. As it is, this last section saves the pamphlet from utter condemnation, which otherwise would have been our judgment of it.

THE TRANSFER OF THE STRAITS SETTLEMENTS.

SINCE our issue of the 13th inst. *The Times* has published a letter in reply to their leader from J. CRAWFURD, Esq., formerly Resident of Singapore, under the commission of the Indian Government, which we have transferred to the columns of the present issue. It is with some degree of regret that we observe our powerful contemporary treating this grave question in a facetious manner, with a dash of levity that rarely characterises its effusions. To the Indian commissioners who govern these settlements, and who have nothing at stake beyond their salaries in the event of the "Transfer" being shelved, such an easy way of giving this question the go by will be very acceptable. But it is a matter of much more serious import to the merchants and landed proprietors, who have made Singapore and her sister settlements what they are, to find their just demands for [constitutional government refused at the eleventh hour, when, in expectation of the "Transfer," many were preparing large schemes for further improvement of their commercial capabilities. The effect of such an article is to arrest these enterprising projects until it is ascertained precisely what the Government intend to do. In reference to the statements of the Straits papers noticed in our last, that the news came *via* Hong Kong, our readers will perceive by the letter signed "Singapore" that there has been a reference to Sir Hercules Robinson on one point. Both this letter and the one signed "R." fully confirm the views expressed in our last that the transfer is *not* "shelved."

Mr. CRAWFURD'S commentary on the financial bugbear set up as the great obstacle to the "Transfer," is a plain straightforward statement of facts, rather under than over the statistics of the case as given in the extract from the "Proprietors' and Merchant's Memorial." These together we deem a conclusive answer to the statements that the Straits settlements are insolvent, and would become a burthen upon the mother country if taken under the wing of her Colonial Department. Moreover, Mr. CRAWFURD places the obnoxious item for the maintenance of Indian convicts in a forcible light, that should have the best consideration of Her MAJESTY'S Government, before they reject the petition that the Straits be relieved from the evils of their Indian connection. After showing that the fine revenues are exhausted in maintaining a military force—consisting chiefly of inefficient and expensive Sepoy troops—at upwards of treble the charge for Hong Kong, Mr. CRAWFURD goes on to state:—"The "next item of charge is far more monstrous. It is for convicts, "and this means not the convicted felons of the settlements "themselves, but the whole transported felons of Continental "India. This is as if, in the times of transportation, we had "charged the colonies of New South Wales and Van Diemen's "Land with the burden of maintaining the transported felons "of the United Kingdom. The charge on this account was "£22,850; besides demoralising the community by the pre-"sence of some 3,000 felons." Taking this view of one of the grievances put forward by the memorialists, it is adding insult to injury when they are taxed with extravagance of expenditure, while maintaining the worst felons transported from India and China. The injustice of such an item being extracted from the treasury of these settlements is too patent to be passed over, and, according to Mr. CRAWFURD, "has already been "decided on in the negotiation for the transfer to the Colonial "Department." Not only should this be the case, but previous disbursements on that account will be a set off against any claim or deficit charges made by the Indian Government,

Digitized by Google

and in all probability bring them in debtors instead of creditors in the general balance sheet. There is no doubt that a desire to avoid being "brought to book" by independent colonists, who have hitherto had no control over the expenditure, is one of the chief reasons why the Commissioners, and the nabobs at Calcutta, are averse to the transfer. That the question is shelved we do not entertain; but possibly the leader in *The Times* has appeared as a feeler, to ascertain the opinions of all those connected with Singapore and its sister settlements. Under these circumstances we would recommend their representatives now in England to lose no time in coming to the rescue.

SINGAPORE AND ITS SISTER SETTLEMENTS.

To the Editor of *The Times*.

SIR,—I have read with great pleasure your pleasant and playful leader on Singapore and its sister settlements, yet I have to suggest a few corrections in it as to matters of detail. In the official year 1863-64 the joint-public revenue of the three settlements was in round numbers £195,000. This was exclusive of a sum of about £50,000 raised by rates under the name of municipal revenue. The total taxes raised, therefore, amounted to £245,000, which is at the rate of full 20s. a head for each individual of the population, estimated at 225,000. This is full four-fold the taxation of British Continental India, according to the estimate of the late Mr. James Wilson.

The public expenditure of the three settlements, exclusive of the municipal, was in the same year £209,000, which leaves a deficit of £14,000. The cause of the deficit is very easily accounted for in the uncalled-for extravagance of the expenditure. The military charge alone amounts to £63,400—above three-fold the sum with which the Imperial Government charges the local revenue of the important colony of Hong Kong, for that is but £20,000. The garrison which causes this expenditure consists of two companies of European Artillery, the only efficient part of it, and of two regiments of Sepoys, the most expensive and inefficient troops that could be employed, and for whom a well-organised police would be an economical and effective substitute. One-half the military expenditure might easily be saved, and even then it would exceed the amount charged to the revenues of Hong Kong by £11,700. The next item of charge is far more monstrous. It is for convicts, and this means not the convicted felons of the settlements themselves, but the whole transported felons of Continental India. This is as if, in the times of transportation, we had charged the colonies of New South Wales and Van Diemen's Land with the burden of maintaining the transported felons of the United Kingdom. The charge on this account was £22,850. Deducting the value of any services which the forced labour of convicts and the injury done to society by the presence of some 3,000 felons, this sum ought at once to be withdrawn from the charges, and this, indeed, has already been decided on in the negotiation for the transfer to the Colonial Department.

The next item of charge is for public works, but what these are is not stated, and all we know is that they do not consist of roads, bridges, paving, and lighting, for these are all defrayed from the municipal fund of £50,000 already mentioned. The public works consist, in fact, of fortifications and military barracks, neither of which are garrisoned or occupied. By making the deductions from the charges which I have now suggested, it is certain that there would be not only no deficit, but a considerable surplus revenue. Transferred to the Colonial Department they would, in fact, be the only one of more than forty-six colonies that would be no charge to the Imperial revenue.

You seem to think that the East India Company paid a large price for Singapore. It paid a very moderate one, and as I myself negotiated the treaty of cession, I can tell you the particulars. For the sovereignty and fee simple of the island and every islet within ten miles of it, it paid exactly 600,000 Spanish dollars, or, at the exchange of 4s. 6d. to the dollar, the sum of £13,500, not a large sum for a place the joint exports and imports of which reach the sum of £15,000,000. Besides this, there was an annuity of £3,780, but the payment of this has long ceased to be imperative, for the successors of the parties who made the cession are at present their grandchildren. The treaty was not made with one black Sultan, but with two brownish-yellow Malay chiefs. The successor of one of them has by virtue of the prosperity of Singapore the income of a well-to-do English nobleman—about £35,000 to £40,000 a year, and stands no longer in need of his pension.

You state that "Singapore is prosperous," but you add that "she is selfish and extravagant." Her selfishness is, perhaps, on a par with that of other English colonies, neither more nor less; and as to extravagance, it has never been in her power to exercise it, seeing that her inhabitants have never had a voice either in taxation or expenditure. On the contrary, they have in vain petitioned against both.

I am, Sir, your obedient servant,

Dec. 14. J. CRAWFURD.

THE TIMES' LEADER ON SINGAPORE.

To the Editor of *The Times* (not inserted).

SIR,—Owing to a temporary absence I have only this morning seen the article on Singapore which appeared in your issue of the 13th inst., and I regret extremely that the writer of it should not have been better informed on the subject; for however much the witty style may be praised, the conclusions drawn, founded as they are upon very erroneous data, cannot meet with the approval of those who are conversant with the facts of the case.

Without entering into a discussion of the question whether the cutting of a ship canal will take away the prosperity of Singapore, it will be admitted, probably, by unprejudiced minds that Singapore, "the porch of that great Eastern Archipelago," is also the key of the southern part of the China Sea, as well as of the Java Sea—and, to a certain degree, of the Indian Ocean; and you admit that "it is impossible] not to see that "in case of war the occupation of this point in sufficient force would com- "mand for good or for evil the trade with China."

You also very truly observe that "The Government of India no longer "feels any obligation to keep up expensive outlying stations in order to "check the undue advance of foreign Powers in the Archipelago, or to "protect the trade to China;" but does it follow that it is not to the interest of Great Britain to do so?

The importance of Singapore as a "strategic position" and as a "commercial emporium" being granted, the next point is what you are pleased to call that "state of deficit" which is "the normal condition of her finances." It is to be regretted that I cannot agree with you on this subject, since it can easily be proved that Singapore has for many years not only paid all "her" legitimate expenses, but helped to defray those of the sister settlements of Penang and Malacca; and further, that if the cost of the convicts was debited to the countries from whence they are sent, and the military expenses were adapted to the requirements of this place, or estimated in the scale of those charged against Hong Kong or Ceylon, there would be a *very considerable surplus of revenue*, which may be estimated at not less than £30,000.

Considering that "the Islets of the Straits are said to produce pirates, cannibals, flying monkeys, gigantic serpents, and vampire bats, in addition to such expensive delicacies as sharks' fins, sea slugs, and birds'-nest soup" (pray how does soup grow?), it will doubtless be satisfactory to you to be informed that in the ten years between 1852-53 and 1862-63 the trade of the three settlements increased at the rate of 93 per cent.—say from £8,720,000 to £16,907,000; and in the same period the revenue increased 142 per cent.—say from £77,500 to £186,600; a state of prosperity which is equalled by but few of Her Majesty's colonies.

I trust to your spirit of fairness to give insertion to this note. All that the Straits residents require or ask for is a transfer from the India to the Colonial Office, because the interests of the Settlements are Imperial and not Indian; and as there exists a considerable surplus of revenue, after paying all just demands, they cannot surely be blamed if they seek refuge from the torrid amenity of the Governor-General of India, or "the cold propriety of Downing-street."—Your obedient servant,

Paris, Dec. 16. R.

To the Editor of the *London and China Telegraph*.

SIR,—The Government of India desires to get rid of Singapore and its sister Settlements, which it feels it has neither the desire nor the capacity to administer; and the Settlements are even more anxious to get rid of the Indian Government, which rules them extravagantly, inefficiently, and irresponsibly. The Colonial-office is at the same time ready to take charge of them, and, indeed, has already made all the preparatory arrangements with a view to this object. The only hitch is with the Treasury, and even that is confined to a single item of charge—a supposed small public debt. This has been referred for explanation to Sir Hercules Robinson, and his reply is daily looked for. Mr. Gladstone, justly alarmed at the cost to the mother-country of the large number of forty-five colonies, is naturally anxious that it should not be increased by a new annexation; and this is the sole cause of the transfer of the Straits Settlements being deferred. Your obedient servant,

London, Dec. 19. SINGAPORE.

THE HONG KONG MINT AND THE NEW DOLLAR.

THE question whether or not to have the legend round the new dollar for Hong Kong is still undecided. It is also uncertain what quantity of this coin will be sent from England. No further shipment of smaller coin has been made since the one noticed in our issue of August 2.

The *Bengal*, which left London on Oct. 17, had on board a quantity of assorted ironmongery, bullion trucks, tanks, weighing machines, &c. The engine, boiler, marking machine, &c., and a quantity of bricks left in the *Young Lochinvar* on Nov. 24, and by the *City of Aberdeen*, on Dec. 5, the greater part of the chemicals and laboratory apparatus, also a quantity of iron roofing. Very little now remains to be sent out to complete the material necessary for the mint at Hong Kong.

An assistant engineer, Mr. W. White, from the firm of Watt and Co., left by the *Young Lochinvar*. Capt. Kinder and staff, it is expected, will leave England so as to arrive at Hong Kong next September. Two appointments have just been gazetted—viz., Mr. C. Langdon Davis, controller, and Mr. F. L. Allen, coiner.

THE RECAL OF SIR RUTHERFORD ALCOCK.

THE mails arrived this morning announces the recal of Sir Rutherford, but the *Observer* qualifies the matter thus:—

"We are authorised to say that Sir R. Alcock has not been recalled, but has been ordered to come home on leave of absence, in order to confer with Her Majesty's Government on the state of affairs in Japan."

To which we need only add that it is a distinction without any difference. The real solution of the matter no doubt is, that the Foreign-office were alarmed at the attitude assumed by Sir Rutherford some six months since and recalled him, but, finding out now that his policy has been successful, the recal has been softened. No man will forgive *success* sooner than Lord Palmerston, seeing that he has lived on it for so many years.

MERCANTILE CONSULS.

(To the Editor of the *London and China Telegraph.*)

Sir,—In your issue of Nov. 28, I notice a remark by your Hamburg correspondent upon which I think some observations may be usefully offered. Your correspondent says:—"Two years ago the head of one of the German firms in Shanghai offered his services as Austrian Consul at that port without any reward or remuneration; but his *generous offer* has not been accepted," &c. The words which I have italicised your correspondent evidently uses in the most innocent manner, and I am aware that an impression prevails extensively to the effect that, in volunteering to act as Consuls without remuneration, merchants are usually actuated by entirely disinterested motives. In saying a word or two to controvert this opinion, and to point out some of the evils which arise from this practice, I am simply repeating statements which have been frequently urged in all the newspapers in China, and, inasmuch as I am quite ignorant which German firm it was which tendered for the contract to do the Austrian Consulship at Shanghai, my remarks can have no personal bearing of any sort. The fact is, individuals and Governments in Europe too frequently lose sight of the consideration that Consuls in the East, and, above all, in China, are in name only functionaries of a similar class to those who in civilised countries are appointed principally for the purpose of seeing to the due execution of navigation laws. The difference between a Consul—say at Bordeaux or Riga, and an officer bearing the same title at Shanghai or Hankow, is as wide as that existing between an ordinary police magistrate and one of the highest judges in the land. The treaties which in the East place exclusively under Consular jurisdiction the subjects of the respective European States confer necessarily upon the Consuls themselves functions and responsibilities of the most extensive nature, which, in order to ensure their fair discharge, ought most imperatively to be entrusted to independent and disinterested persons. A reference to Lord Elgin's Blue-book will show that in 1858 the Chinese Commissioners protested strongly against the future appointment of mercantile Consuls by any nation, knowing, as they did, that with the exception of England and France, all the European Powers were represented at the ports by merchants, frequently of the most indifferent character; and in the Treaty concluded with Portugal two years ago, there exists an express stipulation that no merchants should, for the future, be appointed as Consuls for Portugal. This clause was probably introduced owing to the knowledge, on the part of Prince Kung, of the atrocities perpetrated by Macaoese at different times and places, who were actually in partnership with the worthies holding Consular commissions from the Portuguese Government; but this clause was entirely disregarded, and merchants continued to act as before in the capacity of Portuguese Consuls. It may be added that these functions having of late years been confided to the representatives of an English house of the highest probity, the Chinese Government has probably not had cause to complain of any injury from this source; but as it has recently refused to ratify the treaty with Portugal, no doubt the violation of the clause in question was made one of the grounds for so doing.

Austria, the country to which your correspondent especially refers, has, as yet, taken no steps to conclude a treaty with China, but her great ally —? antagonist—Prussia, has already followed in the steps of England and France, and obtained recognition at Peking. The Consuls appointed under her treaty are all merchants, and as a fair criterion of the consequences which are inevitable in such appointments, I may repeat a story I have heard from a well-authenticated source, that the first official act performed by one of the principal German Consuls in China was to endeavour to obtain a reduction in the regular duty on sugar, in favour of one of his own shipments of this commodity; and many other instances could be adduced to show that Consular functions, when confided to merchants, are but too frequently made the means of obtaining individual profit. The fact that the national character inevitably suffers by such acts should at least cause a Power which, like Austria, is always distinguished by a certain chivalrous feeling of honour, to prefer incurring a certain amount of expense, if the object in view is at all desirable, rather than to incur odium through an illjudged economy. The interests of Austria, however, can scarcely require an expensive staff in China. It is very doubtful whether she can have a score of subjects at present residing at all the ports put together, and her shipping in the Chinese waters is as yet very insignificant. One *charge d'affaires* to intervene in the rare case of a Customs' dispute, or of any offence committed by or against an Austrian subject, would probably amply suffice for her international requirements, whilst abstinence from the appointment of mercantile Consuls would greatly redound to the credit of her Government. In order further to point out, in conclusion, how awkward may sometimes be the position of a merchant acting as Consul, it is only necessary to suppose the case (which, indeed, has actually happened) of a native firm doing business with the *merchant* having occasion to sue him before the *Consul!* Or let us suppose (what has also more than once occurred) a Consul calling upon the Chinese authorities to take proceedings against a native, against whom he, as a merchant, has a claim. It would be giving too much credit to human nature to suppose that where official influence is necessarily so powerful it would not overbalance strict justice. One of the most amusing cases of this kind I can recall, is in connection with a Peruvian "Consul" at Canton, who had come to China as agent for one of the coolie kidnapping firms at Callao, and had also a duly authenticated commission as Consul for Peru. This ingenious functionary, the only Peruvian at Canton, addressed a despatch to the Viceroy somewhat in the following terms:—"I, the Consul L ——, have received an application from the Peruvian merchant L —— requesting permission for the establishment of a coolie barracoon, and I have the honour to support this application, &c., &c." Fortunately the Viceroy saw through the scheme, and taking no notice of either Consul or coolie agent, the Peruvian functionary one day absconded, leaving nothing but debts behind him. I think that were a few facts such as these duly weighed by the European Governments, they would abstain for the future from making these objectionable appointments.

M. H. L.

London, December, 10.

OUR INTERESTS IN CHINA AND JAPAN.

(DAILY TELEGRAPH.)

The later news from Japan indicates the excellent effect of the little affair at Simonoseki. We have, it is clear, done more than punish a petty Daimio—we have given an indirect lesson to the Japanese Government itself. Sir Rutherford Alcock has visited Yedo, and has found that the news from the Straits had produced the most desirable impression. The great Daimios are even more struck by our power than after the conflict at Kagosima; this second warning coming on them with cumulative force. Nagato has been, it is said, stripped of his titles, while, in accordance with the old ideas of Oriental justice, his metropolitan palace has been razed to the ground, and all his servants put to death. It is also reported that the supplies of silk to the Yokohama market, hitherto interrupted by the jealousy of the local authorities in the interior, have largely increased, and that a deficiency of currency alone checks a great extension of trade. We expressed at the same time anticipations of such results. It is impossible to judge of any affair of the kind by itself; the immediate cause of quarrel may be trivial, the redress sought temporary or local, but we must bear in mind that in the East, long used to the reign of might, a display of force carries irresistible logic, and that conciliatory resignation under outrage as certainly in the long run leads to disaster. The Oriental idea of power always involves vengeance and sacrifice, and a sovereign who does not punish his enemies is an unintelligible anomaly. If it is awkward to have to deal with people who will not hear reason, not believe in our unwillingness to use the "last argument of kings," it is, nevertheless, a consolation that a moderate display of our belligerent resources has considerable influence. In China and Japan a little powder goes a long way. The Daimios are good enough to think us strong, not because they have acquired a knowledge of our history, but because they believe the Power that crushed Satsuma, that brought Nagato to reason, and that overawes the Tycoon himself, must be boundless in its means of avenging wrong. Every action of the kind re-echoing through the East saves us future trouble. The merely mercantile advantage of free navigation of the Inland Sea, though that in itself was a result fully worth the expenditure, is by no means the sole item to be set against the cost of the recent bombardment; for we must also include on the credit side the fact that our pathway has been smoothed at Yedo and in Peking. The money fired off in our Armstrong shells must, therefore, be considered not expenditure of capital, so much as the putting out of money at usurious interest. It will come back to us in long years of peaceful commerce, in wide development of trade, in the fabulous profits which arise when the rich natural resources of the East are brought into contact with the manufacturing and mercantile energy of the West.

In Japan the exercise of European force is likely to have very peculiar results. It will tend to destroy the feudalism which more than anything else has retarded the progress of the nation and prevented the development of foreign trade. The country is now in a condition of society but faintly paralleled by the condition of France and other continental States when several great suzerains held provincial sway, and merely acknowledged the King as Lord Paramount. The chief Daimios, like the Duke of Burgundy and his brother vassals, have immense powers within their own territories; but, beyond their local jurisdiction, collectively they are hereditary rulers of the whole empire. If our Cabinet Council were selected exclusively from the House of Lords, and if each of the selected peers had extreme feudal rights within his own territory, while at the same time he was *ex officio* and by right of birth a Minister of State whenever he came to London, we should have something answering to the council that is practically viceroy over the Tycoon. The Regency of the empire, for instance, is hereditary in one family, and all the high military and civil offices are held by members of the favoured class. Some of the semi-independent Daimios disdain even these posts, much as one of the Kings of Prussia, when he became powerful, disdained the Lord High Stewardship of the Holy Roman Empire, once filled by his ancestor the Elector of Brandenburg; but the enormous wealth of the great non-official Daimios—many commanding revenues over half a million a year in English money—still gives them an overwhelming influence. We see by the recent news that "the Princes are all recalled to Yedo to reside as before the dispute arose, and the Tycoon is said to rule once more supreme." This increase to the power of the central authority will be of great advantage to us, and no less beneficial to the native people. We shall have one accessible Government responsible for outrages and for the fulfilment of treaty rights; and the Tycoon will soon learn to look on us, not as enemies, but as friends who can guarantee his own privileges and power. He avowedly sanctioned our attack on Satsuma; he gave his formal approbation to our recent proceedings at Simonoseki; and he now reaps the advantage of being able to enforce that six months' residence in Yedo each year which is his only hold on the feudal lords. The Japanese are essentially a peaceful and industrious race, long oppressed by the two-sworded swashbucklers, the retainers of the great Princes; and everything that destroys the power of these barons tends to liberate the people from an oppressive yoke. In the Old World history we have many instances of Kings uniting with the commons against the nobility, and that is in all likelihood the policy that our recent action will force on the Tycoon. As our artillery makes progress, we shall every day be enabled to hold our own in those seas with less and less sacrifice of English money or English life. We may still find it difficult to reach those inland Daimios who barred the peaceful travels of our Envoy, even when armed with the Imperial permission under treaty rights; but wherever our ships' guns can reach, English subjects will be safe, and outrages will be promptly put down. Fortunately, the kingdom is composed geographically of narrow islands, and its long coast-line facilitates broadsides from our men-of-war, and favours the operations of our marines.

Our policy altogether in those distant regions of the Far East is at length made pretty clear. Having no immediate end in view, excepting the extension of our commerce, we still cannot forget that our trade is, whether we will it or not, the precursor of our ideas, the pioneer of our civilisation. Hitherto, the true means of attaining this end were not very manifest, and there is no doubt that in those waters, with the best intentions, we have made some lamentable mistakes. But the system of aiding the Peking Government in maintaining order, and of laying a heavy hand on insolent

Digitized by Google

Daimios instead of punishing the poor Tycoon, points out the spirit of our policy, if not its very path. We have wisely abstained from committing ourselves entirely to the support of the Chinese Emperor against his disaffected subjects; but in the degree that his power has been strengthened he has become more immediately responsible to us for acts committed in any part of his dominions. Had the rebellion made progress, we should have been in the embarrassing position of having to appeal in turn to two Powers, both weak, one of them almost inaccessible to foreign remonstrance; and while we should have allowed some of the fairest provinces in the country to be desolated by a barbarian mob, the internal trade of some of our own treaty ports must have been diminished, if not destroyed. We have now shown the Emperor that if we could be formidable foes we can be valuable allies; and ever since the Taeping rebellion has lost power, our relations with Peking have been as satisfactory as, considering the Oriental character, we have a right to expect. Both in China and in Japan our Envoys have pretermitted the fulfilment of several just demands, but now we have fair opportunities of enforcing them. In Japan we have displayed our strength, and have incidentally helped to fortify the Tycoon; we therefore may hope to hear soon that Sir Rutherford Alcock has obtained the opening to foreign trade of Ooaca, the great outlet of commerce, and one of the ports guaranteed to us by treaty right. In China the Taiping rebellion has long been as useful an excuse for delaying the fulfilment of Chinese pledges as the fire at Wolf's Crag was for the poverty of Caleb Balderstone's fare; but with such men as Sir Frederick Bruce at Peking, and Mr. Hart managing the Foreign Customs of the Celestial Empire, we may well believe that English—or rather European—interests are in good hands.

Naval and Military.

Among other military changes about to take place, it is rumoured that Lieut.-General Sir James Yorke Scarlett, K.C.B., and Major-General Lord William Paulet, C.B., are about to exchange positions. Lord William Paulet will go to the Horse-Guards as Adjutant-General, and Sir James Scarlett, will assume the command of the south-west military district and the lieut.-governorship of Portsmouth. If this arrangement should be carried into effect Portsmouth and the south-west district will be raised from a major-general's to a lieutenant-general's command, and Manchester and the north-west district will possibly at the same time be changed from a lieutenant-general's to a major-general's command.

Lieutenant-Colonel Charles George Gordon, some time employed in the service of the Emperor of China, and who has been gazetted to be an Ordinary Member of the Military Division of the third class, or Companion of the Most Honourable Order of the Bath (notified in our last), entered the corps of Royal Engineers as second lieutenant, June 23, 1852, and became first lieutenant February 17, 1854. He served in the trenches before Sebastopol from December, 1854, to the close of the siege, and was wounded June 6, 1855. He accompanied the column under Sir John Campbell at the attack on the Redan, June 18, and accompanied the company of sappers attached to the expedition to Kinburn, and was present at the surrender of that port. He was also present at the demolition of the docks of Sebastopol, and subsequently employed on the Turco-Russian boundary commission in Bessarabia and Asia in 1856 and 1857. He became captain April 1, 1859, and in 1864 was made lieut.-colonel. He has received a medal and clasp, as also the Turkish medal, and is a Knight of the Legion of Honour.

Captain (with the local rank in Japan of major) H. Wray, Royal Engineers, is promoted to the brevet rank of major.

CHINA AND JAPAN (COAST AND RIVER) STEAM NAVIGATION COMPANY (LIMITED).

The ordinary general meeting was held on the 12th inst., at the offices in King's Arms-yard; Mr. J. N. DANIELL in the chair.

The report of the directors, which was taken as read, was as follows:—

"Referring to their circular, dated 3rd of August last, the directors have now to lay before the shareholders a statement of the accounts of the company, made up in England and China, to the 30th of June in the present year. The board regret that these accounts do not show the satisfactory result they could wish, and that they will be unable to distribute a dividend on this occasion. Whilst, however, there is herein cause for disappointment, it must be observed that the ships of the company have not fared worse than their neighbours, in the exceptionally depressed state of the freight market in China, which has continued, more or less, since the date of the last report. *Titan*.—This vessel has during the past year met with a considerable amount of competition in the Shanghai river, where she has been from the first placed; but the board are loth to withdraw her from that station, being led to believe that, under new auspices, she will again in the year now commenced show a satisfactory working. The directors are sorry to report the death of Captain Rousby and Captain Cockerham, successively commanders of the *Titan*, whose loss they have much cause to regret. *Elgin*.—When the *Elgin* was laid down she was constructed for a light draught of water, the best advices at that time being to the effect that a vessel drawing more than ten feet could not safely navigate the river Yangtsze, for which she was intended. The vessel, however, had only arrived in China a short time when fresh channels were discovered in this great river. A fall at once ensued in freights, and the advantages which the *Elgin* otherwise possessed, at the sacrifice of carrying power, were of course lost. Under these circumstances the board resolved to dispose of the vessel, and replace her with one of larger capacity, which their experience of the *Mona's* working satisfies them would prove a profitable investment. The company's agents were accordingly empowered to sell the *Elgin*, at a minimum price, which would leave a handsome profit to the company on her original cost, and they were almost on the point of succeeding in their negotiations to that effect with the Japan Government when the late war broke out. The board, however, are glad to say that their agents inform them in their latest advices that now that the allied fleet has succeeded in forcing the inland sea, they count on being enabled to place the *Elgin* advantageously. There is a general impression, indeed, that the demand for steamers is likely to be very great in those waters. *Mona*.—This vessel reached Shanghai at the commencement of the year, and has since been actively employed. The result of her workings, up to the date of the annexed accounts, shows a moderate balance in her favour. But the directors have much pleasure in stating that since this period the earnings of the vessel have greatly increased, and owing to her large capacity and prompt management—even at comparatively low freights, she has been realising handsome profits, and they are advised that the ship has become an established favourite on the station between Hong Kong and Shanghai. *Vulcan* and *Teen-Chang*.—The board regret that the departure of these two vessels from the Clyde was seriously delayed. The board, however, hope to hear by the next China mail of their arrival at Shanghai, and for these boats the directors are encouraged to expect profitable employment on the stations where it is intended to place them. The directors have also lately made an arrangement with the Labuan Coal Company, whereby they have secured a supply of coal on reasonable terms, and, looking at the importance of coal as an item of their expenditure, owing to the high price at which it generally rules in China, they rely upon being able, by means of this arrangement, materially to reduce the working expenses of the company's steamers. At the same time, the board consider it right to state that they had proposed this contract as a special feature of the projected enlargement of the basis of the company (referred to in circular of 18th July), the accomplishment of which, whilst increasing the working capital at their disposal, will, they have reason to believe, meet with the approval of the shareholders. The directors had hoped to have laid this matter before the meeting on the 12th inst., but the state of the money market has unavaidably produced delay. They now trust to be able to call a special meeting on the subject at an early date. Not wishing, however, to lose any advantages connected with the Labaun agreement, the board have now commenced working the steamship *Stirling*, chartered for a term of years by the Labaun Company, and in terms of agreement transferred to the China and Japan Company. From the conditions of the charter of this vessel, the directors have no hesitation in saying she will prove a valuable and profitable auxiliary to the company's fleet. The board have purchased H.M. frigate *Andromeda*, 1,100 tons, to serve as a storeship in China, for which she is admirably adapted. This will prove an important economy to the company in the saving of landing and godown charges."

The CHAIRMAN expressed regret that the accounts up to the 30th June did not justify the payment of a dividend, owing to the depressed state of the freight market in China; but with regard to the future their prospects were good. The opening of the Inland Sea of Japan promised a large increase of trade in that quarter. Their ships were now working profitably. Since the date of the present accounts the *Titan* had done well, and the *Mona* had done admirably well. The *Elgin* was on a voyage freighted to Bombay and back again. They had received £5,000 clear of coals from the *Mona* since June. If the river hadbeen available only for vessels of a light draft, the *Elgin* would hav proved a very profitable vessel. As it was they hoped to make her profitable by disposing of her to advantage when she returned, of which the agents informed them there was no doubt. They had made an arrangement with the Labuan Coal Company for the supply of 20,000 tons of coals a year, with the right of a monopoly, so that if this company chose to take them no other parties could be supplied except through them. The *Stirling*, which was chartered by the Labuan Company, and transferred in terms of agreement to this company, was engaged upon a service that would produce a considerable profit. There was also a project for the establishment of a China steam-tug company, with which they had a prospect of forming a junction as soon as it was formed. Some difficulties having arisen in obtaining the necessary capital, the issuing of the prospectus of the Tug Company had been delayed, and unless all the shares were subscribed for it would not come out. Several gentlemen of very high commercial standing had, however, now joined it, and there was reason to believe that all the shares would be speedily taken up. He concluded by moving the adoption of the report.

In reply to Mr. VALLANCE, the CHAIRMAN said that the contract price at which the coals were to be supplied by the Labuan Company was one guinea a ton at Labuan.

Mr. VALLANCE asked for explanation as to 1,000 shares which in the accounts, were stated as being held as collateral security. In reply it was stated that these were shares on which £10 each had been paid, and which had been given as collateral security to mortgage creditors. On payment of the mortgage debt, £26,000, those shares would revert to the company.

Mr. VALLANCE held that, as they were in effect unissued shares, they ought to appear in a different form in the accounts. After some further discussion, the report was adopted.

The retiring directors were then re-elected, ten guineas each was awarded to the auditors for their services, and the proceedings concluded with the usual compliment to the chairman and directors.

CEYLON COMPANY (LIMITED).

The half-yearly meeting of this company was held at the offices, No. 12, Leadenhall-street, on the 14th inst.; Mr. L. ACLAND in the chair.

The SECRETARY read the following report:—

"The directors are again able to congratulate the shareholders on the success which has attended the operations of the company during the six month previous to the 30th Sept. The business of the company continues to increase, and the reports received from the managers in Ceylon and Mauritius are very satisfactory. The accounts show that the profit resulting from the operations of the half-year may be justly estimated at £14,200, out of which the directors recommend that an interim dividend, at the rate of 10 per cent. per annum, and a bonus of 2½ per cent. on the capital paid up on Sept. 30, amounting together to 10s. 6d. per share, be declared and made payable, free from income-tax, on the 17th inst. The proposed payments will absorb £9,870, and leave a balance of profit amounting to £4,330 unappropriated. The reserve fund has been credited with interest at 5 per cent., and when the premiums on the new shares allotted in India are added, will amount to £22,650."

The CHAIRMAN said that the only business which they had met to per-

Digitized by Google

form was the declaration of an interim dividend, and the report which had been placed in their hands showed that the amount available for that purpose was £14,200, and they proposed to pay a dividend of 10s. 6d. per share. That must be deemed satisfactory by all the shareholders. (Hear, hear.) The reserve fund now stood at £22,650. Those figures were based on an estimate of profits, and he must say that it was under rather than over the amount. (Hear, hear.) The accounts received from Ceylon were most satisfactory. The coffee crop this year, being picked and cured, was much superior to that of the previous year, especially on the company's estates. They were all aware that the sugar market in London now was, and for some time had been, in a most depressed state; but it was satisfactory to find that the company were able to dispose of their sugars as fast as they came down to Port Louis at better prices than those ruling in this country. Their business was steadily increasing, and the directors had deemed it expedient to send Mr. Braine, the manager, out on a tour of inspection to complete the organisation of the branches, and to ascertain how far it would be desirable to extend the operations of the company in Mauritius, Ceylon, and elsewhere. The 6,200 shares issued in pursuance of the resolutions passed at their last meeting had been all taken up by those who were entitled to them. The full number of their shares—viz., 25,000, were therefore now placed; and, inasmuch as the directors did not think it would be desirable to call up more than £1 per share in addition to the amount already paid, it would become necessary to consider how any additional capital should be received if their business was further increased; and it appeared to the directors that it could best be done by increasing the number of shares, which could only be effected by resolutions passed at a general meeting specially convened for the purpose. He might mention that the call of £1 per share would probably be made before their next meeting in June. The Chairman then referred to a paragraph which had been copied in the London press from a Mauritius newspaper, with regard to the sale of an estate upon which the company had advanced money. He denied the truth of the report, and said that if even it were true it would only show that the directors were conducting their business in a proper manner, and were protecting the interests of the shareholders by foreclosing where it was found the advances were not being repaid. (Hear, hear.) He then moved that an interim dividend at the rate of 10 per cent. per annum, and a bonus of 2½ per cent. on the capital paid up, amounting together to 10s. 6d. per share, be declared payable on the 17th inst.

Mr. ROBERTSON seconded the motion, which, after a few remarks from Capt. Venner, and others, of a satisfactory nature, was put and carried unanimously.

A SHAREHOLDER asked whether the high rate of discount had had any effect upon the issuing of the company's debentures.

The CHAIRMAN said that no doubt it had checked the issue of the debentures without stopping it. It was not to be expected that when people could get 8 or 9 per cent. they would take the company's debentures at 6 per cent.

The SHAREHOLDER asked whether the dividend was paid out of profits arising from a speculative business, or from good, steady, and legitimate transactions.

The CHAIRMAN replied that the profits arose from a purely legitimate business.

A vote of thanks to the chairman and directors closed the proceedings.

CHINA COTTON.

The following is the reply of Messrs. Neill Brothers to a letter which appeared in our last issue:—

(To the Editor of *The Times*.)

Sir,—Although it is not our custom to notice anonymous attacks, the prominence given in your columns to-day to the lengthened criticism by your correspondent "A. M." of a sentence in our circular of the 1st inst. prompts us to request room for a few lines in reply.

In the first place, we put it to you if it be fair to pick out a single sentence—and he does not even give the whole sentence—from the middle of a paragraph in a circular which your readers cannot generally have seen (as it has not appeared in your columns) and to omit the context?

The following is the whole paragraph:—

"As regards China it is impossible to procure trustworthy information, but if last year's prices were offered supplies would probably continue to increase. The dissatisfaction, however, which imports from that country have caused, the recent panic in the trade, and the fact that prices are even now 4d. to 5d. per lb. lower than last year, have already reduced the quantity afloat to a bagatelle, and must materially reduce exports for some time to come. Should fresh supplies be attracted by the recent advance here, they can hardly be received before next midsummer. In the meantime the arrivals at Liverpool must be small, and this will also, without doubt, hold good of the arrivals from India, so that declining stocks in this country must be anticipated throughout the winter and spring."

The fact to be accounted for, and of which your correspondent does not seem to be aware, was that whereas down to the last week in October, the quantity of cotton known to be afloat from China had constantly increased till it amounted to 200,000 piculs, since that date it had declined to 106,000 piculs. It could hardly be explained by the season, as during the same interval last year there had been an increase. After the rapid growth of the export trade from China, and the large expectations lately indulged in, it certainly did appear to us that a supply at sea (the whole of which was not likely to arrive in less than four months), equal to about 30,000 bales of American cotton, deserved to be termed a bagatelle, and required to be accounted for. To the uninitiated this may appear a large quantity; but its true value in meeting the deficiency caused by the American war will be better understood if it be borne in mind that during the past month as much as 30,000 bales of cotton have been sold in Liverpool in a single day, and that the American crop of 1859 exceeded 4,600,000 bales.

The paragraph quoted gives rather loosely, but in the concentrated form necessarily adopted in a trade circular, the only mode in which, with the limited knowledge we possess of Chinese affairs, we were able to account for the disappointing figures. But by "the recent panic" we should have thought that a man possessing the intelligence of your correspondent must have inferred from the connection and the dates that we did not and could not mean that portion of the panic of which the Chinese shippers were not informed, but rather that we referred to its commencement—that is, to the state of feeling engendered in July and August by what passed at Niagara in the former month, of which they were informed, and which had at once shaken confidence in all distant cotton operations.

But we may now be permitted to say that while we have read through your correspondent's letter with interest we have laid it down with disappointment, for we had hoped to find that one who assumed to know so much about the subject as to be competent to criticise others, and who could afford time to bring half a column to bear on an unfortunate sentence of ours, would supply that want of information to which we confessed, or at least give us some plausible theory of his own to explain the anomaly. "A. M." alleges that "prices 1s. per lb under the present currency" (which would give 3½d. per. lb. for China cotton) "are sufficient not only to keep up the present rate of cultivation in every quarter, but to keep it continually on the increase." If this be so, and if the causes to which we attribute the falling off had no influence, is it not remarkable that so shrewd a people as the Chinese proved themselves so callous to the attraction of the comparatively high prices which prevailed at Liverpool throughout the summer? "A. M." will surely not argue that they would prefer 3½d. to 18d.—We are, Sir, your obedient servants

Lime-street, Dec. 10. NEILL, BROTHERS.

SEA WAGES.—THE "BRIDE OF THE SEAS."

Captain William Donald, the master of the ship *Bride of the Seas*, appeared before Mr. Cooke, at the Thames Police-office, to answer four summonses taken out by seamen for the recovery of balances of wages. The same complainants had also taken out summonses against the defendant for assaulting them. Mr. Smith appeared for the complainants, Mr. Young for the defendant.

The first case gone into was that of John H. Butler, a man of colour. Mr. Smith said the four complainants shipped at Foo-chow-Foo, and the defendant had not only assaulted them, but had made them out incompetent. The question arose, not under the Act of Parliament, but under the articles of agreement. The men were charged, among other things, with steering badly. That was owing to bad compasses, which ought to have been a guide to the men, but misled them. This was not all. The defendant had beaten, kicked, and ill-used the men. The defendant had prevented the men doing their duty by intimidation, coercion, and threats. The complainant Butler shipped on the 18th of July last at Foo-chow-Foo for £3. 10s. per month, on a voyage to London, and it lasted four months and twenty days. In the wages account rendered to the complainant the defendant had reduced the wages to £1 per month. The deduction for incompetency amounted to £11. 13s. 4d., the total amount of wages earned under the agreement being £16. 6s. 8d. This was a tremendous deduction, which could not be justified, even supposing the man, who was shipped in a Chinese port, was incompetent. Seamen were scarce in Chinese ports, and indifferent ones fetched good prices. The complainant had been a seaman ten years, and for five years of that time was an able seaman. The complainant was ten days in the ship before she left Foo-chow-Foo, and there was ample time and opportunity to test his qualifications as a seaman. He could not help saying that the reduction of wages from £3. 10s. to £1 per month was most astounding and uncalled for.

Mr. Young said the defendant was obliged to ship men at Foo-chow-Foo, and to take any one he could get. The incompetency of the complainants had imposed additional labour on other men who were competent. The complainant was perfectly useless. It was most essential, for the credit of the merchant service, that such impositions as had been practised by the complainants should be discouraged. The excuse that the compasses were wrong was entirely without foundation. Was it likely that the defendant would navigate his ship on a long voyage without his compasses, chronometers, and charts being correct? The compasses were properly verified before the ship sailed from Foo-chow-Foo, and she was navigated through a narrow part of the China Seas in safety.

The defendant said he lost three men at Foo-chow-Foo, and shipped the complainants. The compasses were in good order and properly verified. He discovered Butler was no seaman when he first took his trick at the wheel. The complainant said he could not heave the lead or keep a proper look-out. When the complainant was spoken to on his inefficiency he said he did not ship as an able seaman.

Mr. Cooke asked if the other cases were similar to Butler's, and the reply being in the affirmative, said the decision in one case ought to govern the others; which was agreed to. Mr. Cooke then said he did not think Butler should have engaged as an able-bodied seaman, as he was not competent to perform the duties. It was stated in the agreement "that if any seaman shall have entered himself as qualified for a duty to which he shall prove to be not competent, he shall be subject to a reduction of the rate of wages hereby agreed for in proportion to his incompetency." He should act on the last answer to the last question put to the mate, and give Butler £2 per month, which would be the wages of an ordinary seaman. He made an order to pay Butler £9. 9s. 7d. and one guinea costs. On the same principle the other men would have their pay reduced in proportion, and he ordered the following sums to be paid to them, with a guinea costs in each case:—Needham, £4. 14s. 4d.; Bright, £6. 12s. 5d.; and Brogden, £16. 12s. 4d.

Mr. Smith said that seamen ought not to be punished twice if they were incompetent. It was enough they should be deprived of a part of their wages, and not ill-used, knocked about, and kicked as well. On that account the summonses for assaults had been taken out. He was happy to inform the magistrate the assault cases had been settled, and he would not be troubled with the discussion of them.

Mr. Cooke: Very well, the assault summonses are dismissed. No evidence is offered.

AN American paper states that the finger nails of the chief priest of the Chinese Joss-house at San Francisco are longer than his fingers, and are twisted like an auger.

NAVAL GUNS—JAPAN EXPERIENCE.

(ARMY AND NAVY GAZETTE.)

"Give us a good gun for the navy" is the cry which week after week is wailed up, not only from our home seaports, but is wafted across the ocean from far off China, the East and West Indies, and Australia, until the Lords of the Admiralty are compelled daily to talk and think about artillery, and nightly to dream on the same subject. We for our own part are endeavouring to the best of our ability to aid their lordships in arriving at a decision on which so much connected with the efficiency of our navy unquestionably hangs. Actuated with this wholesome desire, we are compelled to say that we have been informed by an officer of rank that similar opinions to his own are entertained by the great majority of naval captains, and as a proof of this he asserts that twelve officers of the rank just mentioned were lately assembled for the purpose of discharging a public duty, and they were unanimous in declaring that the 110-pounder breach-loading service gun was undoubtedly unsafe, especially where it would be necessary to fire over bodies of men advancing to an attack, or over boats, from the tendency of the shot to strip, and also from the enormous deflection to the right which occurs after the shot has touched the water at the range at which it was levelled. This we are assured is almost invariably the case with the 110-pounder, and we have been favoured with more than one account of this unfortunate defect. On one occasion, on board a frigate while at anchor, with the wind blowing hard, a heavy sea on, and a good deal of rolling. Whenever the order was given for three rounds of independent firing with shot, distance from 1,200 to 1,400 yards, the Armstrong 110-pounders—of which there were two on the starboard side of the main deck and one (pivot) on the forecastle—were last of all, although they were well manned, and had the sergeant of the Royal Marine Artillery and two "Cambridge" gunnery instructors as captains. It was likewise observed that the deflection after the shot had pitched would have endangered the safety of any vessel several hundred yards to the right of the line of fire. It is also notorious that the attempt to cover the landing of the Marines at Simonoseki resulted in failure. Under these circumstances it is to be regretted that the Admiralty will persevere in ordering guns of this description to be shipped on board our men-of-war, with the well-grounded prejudice which the officers entertain towards them. We find by information which can be relied upon, that within the last few weeks orders have been issued that four of the 10-inch guns, of 87 cwt., which were on the main deck of the steam-frigate *Dores*, now ready for the pendant at Devonport, should be removed, and replaced by four of the 110-pounders. This fine ship has also been reduced from a 32 to a 24-gun frigate, from the fact that all the original upper deck guns have been removed, and four Armstrong 110-pounders substituted in their place. This is, to say the least of it, scarcely wise in the face of representations which have been made on the matter at Whitehall by those who, if any men in the world know their business, are the persons best able to give advice and make suggestions.

Monetary and Commercial.

The biddings for 35,00,000 rupees (£350,000), in bills on India, took place at the Bank of England. The proportions allotted were:—To Calcutta, 17,82,000 rupees; to Bombay, 12,00,000 rupees; and to Madras, 5,18,000. The *minimum* price was fixed at 1s. 11½d. on Calcutta and Madras, and 1s. 11¾d. on Bombay. The applications within the limits amounted to 65 lacs. Tenders on Calcutta and Madras at 1s. 11¾d. will receive about 58 per cent., and on Bombay at 2s. 0⅛d., about 84 per cent. All above these prices in full.

A portion of the Mexican dollars by the French mail steamer *Louisiane* were sold at 5s. 0⅝d. per ounce, being a further fall of ⅛d. The reduction is caused by the flatness of the China exchanges, combined with the prevalence of lower quotations for this coin in that country. The market for bar silver is again flat, owing to the result of the tenders for the Government bills on India.

The directors of the Chartered Mercantile Bank of India, London, and China have just announced a dividend of 10 per cent., free of income-tax, for the half-year ending the 31st current, to be paid on and after the 2nd of January next. This amount, together with the payment made on the 1st of July last, will constitute a distribution of profits at the rate of 20 per cent. per annum on the paid-up capital of the bank.

The half-yearly meeting of the China and Japan Coast and River Steam Navigation Company took place on the 12th inst., when the directors' report was adopted. The chairman, Mr. J. N. Daniell, expressed his regret that the accounts for the six months do not justify the declaration of a dividend, but referred in favourable terms to the prospects of the undertaking. He added that an amalgamation with another company is projected, and if carried out will lead to satisfactory results. A report will be found in another column.

The half-yearly meeting of the Ceylon Company took place on the 14th, when an interim dividend at the rate of 10 per cent. per annum, and a bonus of 2½ per cent., together 10s. 6d. per share, were declared for the six months, free of income-tax. A report will be found in another column.

It has been decided that the estate of Messrs. T. W. Bradley and Co. should be wound up under inspection. The assets are expected to yield about 8s. 6d. in the pound. The estate of Messrs. Carlisle, Parr, and Co., tea brokers, &c., will, we hear, yield a mere trifle. The firm has been remodelled, and is now Parr, Benyon, and Co. We regret that several old residents in China are losers by Messrs. Carlisle, Parr, and Co.

The following note furnishes an important warning to all persons having financial or commercial transactions with the United States. No contract that may be made for payment in gold or its equivalent in that country can be legally enforced, and even if persons on this side should make disbursements in sterling on American account they can only through the American courts recover the same nominal amount in greenbacks:—

"Sir,—We beg to call the attention of *The Times* to the accompanying remarks from our New York correspondents, under date of the 22nd of November, which show that it is now declared by the American law courts that under no circumstances can a contract for any description of goods to be settled for in 'gold currency of the United States' be enforced, save only in 'lawful money of the United States'—*i.e.*, in Greenbacks! and not only so, but where English merchants come under advance on 'goods on consignment' by bills paid in England, they can only recover any balance due at the rate of $4. 84c. per pound sterling in 'lawful money,' the actual rate, at exchange of 250 per cent., being equal to $11 1-9th per pound sterling.

"We know not if the New York Chamber of Commerce sanctions this iniquitous attempt at repudiation under cover of the law courts of America, but we think all business men can have but one opinion on the matter.—"We are, Sir, your obedient servants, A. B. C.

"'The Courts have decided that no contracts can be made for bills of exchange, or property of any description, payable in the gold currency of the United States, which can be enforced at law, otherwise than as for payment of the amount stipulated in 'lawful money of the United States,' the synonym for legal tender-money, commonly called 'greenbacks.' Hence in cases of dispute after the delivery and before payment of bills or other property, the seller must necessarily succumb, as a verdict in his favour for the full amount claimed would saddle him with a loss of upwards of 50 per cent. Sterling bills of exchange returned under protest can only be recovered at $4. 84c. per pound, and the same rule applies to all the other exchanges, and even to contracts made, and maturing abroad in foreign money, if payment is attempted to be enforced through our American courts.'"

At a meeting held of the creditors of Mr. W. J. Morgan, East India merchant, of 15, Leadenhall-street, trading under the firm of W. J. Morgan and Co., who stopped payment on the 24th October, a statement of affairs was submitted by Mr. J. J. Saffery, accountant, showing liabilities to the amount of £14,781, and assets £10,188; the deficiency is thus £4,593. Sympathy with Mr. Morgan's position was expressed, and it was resolved to accept his offer of an assignment. It appears that Mr. Morgan returned from India a year ago with a considerable capital. The engagements which led to the suspension were chiefly in cotton.

The amount of bullion by the P. and O. Company's steamer *Ceylon*, from Southampton on the 20th inst., was—In gold, to

Digitized by Google

Alexandria, £85,000; to Madras, £905: in silver, to Galle, £280; to Calcutta, £20,000; to Hong Kong, £25,250; to Shanghai, £2,300; to Yokohama, £8,800; to Sydney, £1,500: total, in gold, £85,905; in silver, £58,130.

ARTICLES OF IMPORT.

TEA.—The market has been inactive, though sales to some extent have been made out of the late large arrivals; good to fine Teas maintaining their former value, but the fair qualities of black-leaf Congou have been difficult to move, at a decline of fully 1d. per lb. There have been some speculative purchases of Scented Orange Pekoe, at an advance of fully 1d. per lb. In Green teas large sales have been made, but prices have been irregular, showing generally a decline of 2d. per lb. There have been no further public sales, except of Indian teas. Low and dusty kinds of Congou show no material alteration. Fair to good common maintain former value, as also flavoury kinds of old import. There has been rather more inquiry for the fair qualities of new Kaisow kinds. Good to fine have been firmly supported; the finest kinds are only in limited demand. In black-leaf kinds, of old import, but little has been done, but prices remain unchanged. In new Season's those ruling under 1s. 6d. per lb. have been very difficult of sale, even at a decline of fully 1d. per lb.; good to fine qualities show but little alteration in price; the finest kinds in the absence of export demand continue difficult to move. In Tayshans and new-make Canton there have been but few transactions. Oolongs of common to good quality show no improvement; the finer kinds are still in moderate demand. Souchongs have been difficult of sale, and prices must be quoted in favour of buyers. In Flowery Pekoes there is no new feature. Common Scented Capers have been sold from 8d. to 11d. per lb.; fair to good and fine have met with a good demand, and prices may be quoted about 1d. per lb. higher. In Orange Pekoes there have been some purchases for speculation, which, together with a fair demand from the trade, have caused a rise of 1d. to 1½d. per lb. in these sorts. Foo-Chow kinds continue scarce. In uncoloured Japans business has been very small, and prices show no improvement. The public sales of Indian teas passed off with spirit, and very full prices for the finer kinds, but the commoner sorts sold about 9d. per lb. lower. Business in Green teas has been to a fair extent; the supplies from the recent arrivals have been freely offered, and sales made at prices which show a general decline of about 2d. per lb., but they are now ruling at prices which may probably cause a revival of demand for home consumption, the fall from the highest point being from 7d. to 1s. per lb. Canton-made kinds show no material alteration in the fortnight. The public sales closed without further alteration in prices. Out of the 31,184 packages offered 25,011 packages were sold, nearly the whole being without reserve.

COTTON.—The London market has been active during this week, and a large business transacted, with a pretty general advance of 1d. per lb.; though China's have been rather neglected, and are only ½d. dearer than last week. Among the sales up to the 22nd we note 410 bales China, 14d. all faults, 15d. to 15¼d. for fair, and 15¼d. to 15½d. for fully fair; 930 bales Japan, 17d. for fair, 16½d. to 17½d. for fully fair, and 17½d. for good fair. At Liverpool, China and Japan have risen ¼d. to ½d. in cotton of moderate and short staple, and fully 1d. in long stapled parcels.

SUGAR.—The market maintains a steady appearance to the close. Brown refining descriptions are 6d. higher than on the 16th, or 1s. per cwt. above the late lowest point. At public sale, we quote 242 bags Siam, washed, good white, 35s. to 36s. (duty 10s. 6d. to 11s. 8d.); 621 mats Penang, low to middling yellow, 29s. 6d. to 31s. 6d. (duty 9s. 4d. to 10s. 6d.)

COFFEE.—Only 80 casks plantation Ceylon have been offered by auction, which sold freely at firm rates, fine fine ordinary to low middling 81s. to 83s. 6d., and privately a fair amount of business has been transacted at fully previous terms. No native has been brought to public sale, and by private treaty very little has transpired. At auction, 101 bags common Singapore realised from 54s. to 55s. 6d.

RICE.—The market has remained quiet, but full prices have been obtained, especially for Bengal. About 8,000 bags low middling to fine white Bengal have changed hands privately at from 10s. 9d. to 14s.. 500 bags pinky Madras at 10s. 9d., and 100 tons Ballam at 10s. 6d., ex ship, beyond which nothing of consequence is reported. At auction, 500 bags good middling white Bengal, bought in, were afterwards taken at 12s. 6d., and 2,000 bags fair pinky Madras realised 10s. 9d.

CAMPHOR.—This market has become very quiet, and scarcely any business has been done.

CASSIA LIGNEA.—Quiet, but without any further fall: business very limited; 210 boxes at auction all retired. Buds: No auctions held; sales to a fair extent effected privately, at a little recovery in rates.

COCOA NUT OIL.—Market continues very flat, but at a further decline of 10s. to 20s. per ton rather more extended business has been accomplished. 1,168 casks Cochin, 76 casks Ceylon, and 271 casks Sydney at auction.

DRUGS.—Cubebs: Nothing of any interest doing. Dragon's Blood: Quiet; only two cases at auction, sold at £15. 10s. to £17 per cwt. for good drop. Galangal Root: Quiet: Only 5 bags sold at auction at 16s. per cwt. for good quality. Rhubarb: Firm, but without any business of consequence. Only twelve cases at auction, retired.

GUMS.—Benjamin: Steady; and 10 cases Sumatra at auction sold at £12. 7s. 6d to £12. 10s. per cwt. for fair 2nd quality. Damar: Some inquiry for good quality, but no business doing. Gamboge: Remains scarce and firm.

GUTTA PERCHA.—Very flat, and without any transactions whatever being reported. India-rubber: At auction 65 baskets Singapore sold at 1s. 2d. to 1s. 2¼d. per lb., being cheap; of 150 baskets Penang, one-third sold at 1s. 1½d.; and 16 cases Assam retired. Privately moderate business done, chiefly in Penang, at 1s. 1¼d.

HEMP.—Manila: Of 1,050 bales at auction the whole retired, but subsequently quitted at £25. 15s. to £26. 15s. for fair roping.

JAPAN WAX.—Steady, but of 550 cases at auction a few only sold at 67s. per cwt. for good saucers, being the previous value.

OILS.—Anniseed: The advanced quotation of 6s. obtained, and still buyers rather than sellers thereat. Of 25 cases at auction, one-third sold at the same figure. Cassia: Has advanced to 8s. per lb., at which a good many cases have changed hands. Cinnamon, Mace, and Nutmegs: Nothing doing in either of these oils: 10 cases Nutmeg Paste at auction retired. Arrivals of Oil of Cinnamon.

SAGO is again 6d. to 1s. lower, and of 3,522 boxes at auction only about one-fourth sold at 17s. 6d. to 18s. 6d. per cwt. for middling to fair small, and 17s. to 18s. ordinary medium. Flour: Quiet; very little doing; 80 bags at auction retired. Tapioca: 216 boxes fine white Pearl, offered by auction, were realised at 23s. per cwt.; 70 boxes middling have been placed privately.

SHELLAC.—Market continues in a very unfavourable condition, and prices are again lower. Of 830 cases at auction about half sold. Orange at £6. 5s. to £6. 10s. per cwt.; Livery Orange, £6 to £6. 2s. 6d.; Liver, £4. 15s. to £5. 10s.; Dull Garnet, £5. 2s. 6d.; Native, £4. 12s. 6d. to £5; Button, £5. 15s.; and Block and Blocky, £4. 12s. 6d. to £5. 17s. 6d. Private trade very restricted.

SPICES.—Cinnamon: We quote 1st sort, 1s. 10d. to 3s., 2nd sort, 1s. 6d. to 2s. 6d., 3rd sort, 1s. 6d. to 2s., 4th sort and jungle, 1s. 3d. to 1s. 7s. per lb. Little business doing. Cloves: Steady; one case Penang sold at auction at 1s. 1⅞d. per lb. for fair; and 351 bags Zanzibar sold at 3¾d. to 4d. for middling to good. MACE: Steady, and of 29 cases Penang, and 3 cases Singapore at auction, one-third sold at 2s. 2d. per lb. for fair pale, and 9d. to 1s. 2d. inferior red to fair reddish. Nutmegs: Are generally 1d. to 2d. per lb. cheaper; and of 165 cases Penang, 16 cases Singapore, and 55 cases Batavia at auction, the bulk sold at 2s. 8d. and 4s. 1d. per lb. for fair to fine bold, and 11d. and 1s. 9d. ordinary small to good medium. Pepper: Black, Sumatra rather easier, and 2,549 bags at auction mostly sold at and after the sales at 3⅛d. to 3¼d. per lb.: Penang rather dearer; and of 3,128 bags, two-thirds sold at 3d. to 3⅛d., with Trang at 3d. to 3¼d. Similar rates realised privately. White: 1s. ¼d. per lb. dearer; and 658 bags Singapore, and 57 bags Penang at auction mostly sold at 5⅛d. to 5⅝d. for middling.

TERRA JAPONICA.—Cutch Pegue: Has become very flat, with scarcely any business. 1,595 bags at auction, all retired. Gambier: Quiet, with limited trade privately at about the previous currency.

MISCELLANEOUS.—Galls: China and Japan firm; 201 cases China at auction all retired, but 180 bags Japan all sold at 48s. 6d. to 50s. per cwt. for fair to good, rather stalky. Musk: Steady; 51 caddies Tonquin at auction sold at 30s. to 30s. 6d. per oz. for good picked, 19s. 6d. to 26s. 6d. middling rough to good, and 17s. pickings. 3 tins Cabardine sold at 11s. 6d., being cheaper. Moderate sales made privately. Rattans: Rather lower; and 5,453 bundles Penang, and 455 bundles Singapore, sold at auction at 3s. 5d. to 5s. 3d. per 100. Mother-o'-Pearl Shells: Firm; 38 cases Macassar at auction retired at 150s. per cwt. Soy: Firm; little offering; no auctions. Star Anniseeds: Scarce, and rather dearer; of 18 cases at auction one-third sold at £6. 5s. per cwt. Sticklac, Siam: Continues very dull; and of 58 cases a auction, a few blocks alone sold at 25s. 6d. per cwt. Tortoiseshell: Flat; in very partial demand; of 2 cases Penang at auction, one sold at 13s. per lb. for inferior; one case Singapore retired; and one case Sydney sold at 12s. for ordinary. Turmeric: No China offering; nothing doing in Java. Vermilion: Steady, but quiet at the recent reduction.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 15s.; nail rod, £9. 10s.; hoops, £10. 5s.; sheets, single £11; Staffordshire bars, £9. 10s.; rails, £6. 15s. to £7. 5s.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and Sheathing, £98 to £99 per ton; yellow metal, 8½d. to 8¼d. per lb.

TIN.—98s. to 101s. for block; 99s. to 102s. for bar. Tin plates, best charcoal, I.C., 28s. 6d. to 29s. per box.

LEAD, &c.—English pig, £20. 5s. to £20. 10s.; W.B., £21. 15s.; shot, patent, £23. 15s.; sheet, £21. 5s.; spelter, £19 to £19. 10s.; zinc, English sheet, €26 to £27; quicksilver, £8.

The following is from the Circular of Messrs. French and Smith:—There is no alteration in the Iron trade to report since our last Circular, with the exception that Scotch Pig Iron is rather lower in price. Copper remains steady as to price, but with not much business. Tin: Foreign is again lower; a large sale of Straits has been made; 87s. cash is the present quotation, 91s. for Banca. Tin Plates continue dull. Lead is firm. Spelter: Forced sales have been made as low as £19 per ton.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

MANCHESTER MARKETS.

The quotations in Mr. Mendel's Circular are—Grey Shirtings, 7lb. 16s. 6d. to 17s., and 9lb. 23s. Cotton Yarn, Nos. 16 to 24, are 2s. 4d. to 2s. 6d. The following is a report on last market day:—We have had a better market for shipping yarns, and compared with last week a considerable amount of business has been done. Yarns are now very scarce, as spinners will only work to order, refusing to go into stock. The consequence is that any demand instantly hardens prices.

FREIGHTS AND CHARTERS.

The amount of tonnage on the different loading berths has slightly accumulated during the past week, causing a further depression in all outward freights. Homeward charters are very scarce, but business can still be done from Manila and Java.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £35 and £1. 15s. For Shanghai: £45 and £2. 5s. For Manila: £1. 10s. For Ceylon: £24 and £1. 2s. For Batavia: £25 and £1. 2s. 6d. For Singapore: £25 and 22s. For Penang: £27. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

CASUALTIES.

According to a telegram received in London on the 19th inst. from Lisbon, news had been received there from Rio Janeiro, under date Nov. 24, to the effect that the Thos. Royden (Brit. ship), from Liverpool to Manila, was burnt at sea in lat. 7 N., long. 22 W.; and that the crew had been brought to Rio Janeiro by a vessel arrived there.

The Diamond, Wheatley, from Newcastle for Hong Kong, was towed into Harwich, Dec. 18, from Yarmouth Roads, with damage, having been in collision.

The Alicia Anne, brig, Fraser, from Manila, struck on Daunt's rock, Queenstown, Dec. —, when in charge of a pilot, but has since been towed in, and placed on bank full of water, she is now discharging hemp, all of which will be saved, but the sugar will wash out.

AT TABLE BAY.—Nov. 12, from Macassar, for Rotterdam, Elizabeth and Jacoba, with rudder-head gone; 14, from Amoy, Willie, Issel, and sailed, 16, for London; 15, from Foo-chow-Foo, Queensland, Young, and sailed, 16, for New York; from Singapore, Queen of India, Thornton, and sailed, 16, for London; 17, from Manila, Frederick, Bridger, and sailed for Liverpool; from Penang, Rutlandshire, Farley, and sailed for London; 10, L. A. Bang, sailed for Batavia; 11, Nancy Brisson, sailed for Singapore.

AT MAURITIUS.—Nov. 14, from Singapore, Alfred Burgoyne; 16, from Queenstown, for Ceylon, Theresa.

CHINA AND JAPAN (COAST AND RIVER) STEAM NAVIGATION COMPANY (LIMITED).

AT the THIRD ORDINARY GENERAL MEETING of the Shareholders of this Company, held by adjournment at 10a, King's Arms-yard, in the City of London, on Monday, the 12th December, 1864; JAMES NUGENT DANIELL, Esq., in the Chair,

The advertisement convening the meeting was read and the common seal of the Company affixed to the Register of Shareholders.

The Report being taken as read,

It was proposed by the CHAIRMAN, and seconded by HARRY BORRADAILE, Esq., and resolved unanimously,

That the Report now read be received and adopted, subject to the rectification of the accounts in respect of the 1,000 Shares issued and deposited as collateral security.

It was moved by HENRY VALLANCE, Esq., and seconded by JOHN HICKIE, Esq., and resolved,

That the Hon. Thomas Charles Bruce and James Nugent Daniell, Esq., be re-elected Directors of the Company.

It was moved by the CHAIRMAN, and seconded by THOMAS KING, Esq., and resolved,

That Benjamin Dawson and Ellis Clowes, Esqs., be re-elected Auditors, and a remuneration of 10 guineas each voted to them for their services.

The Chairman having vacated the Chair,

It was proposed by J. POSTLETHWAITE, Esq., seconded by JOHN HICKIE, Esq., and resolved unanimously,

That the thanks of this Meeting are due, and hereby given, to the Directors for their attention to the interests of the Company.

(Signed) J. N. DANIELL, Chairman.
J. S. PRICE, Secretary.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, of all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot is 12, RUE RICHER, PARIS.

MARSEILLES, 9, RUE PARADIS.

Dr. Curtis on Marriage, Nervous Debility, Spermatorrhœa &c, with Plates. Post free by the Author 12 stamps; sealed ends, 20.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Infallible Lotion, the result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albermarle-street, Piccadilly, London.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Curtis on Manhood should be in the hands of young and old. It is an ably-written medical treatise on diseases of error and effects of climate."—Sunday Times, March 23, 1856.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the source of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.

HOLLOWAY'S PILLS.—THE BEST FRIENDS.—When bad health overtakes mankind what would not be given to be freed from it! Holloway presents to all the means of recovering their health and renewing failing strength for a mere trifle. His Pills invariably produce the most satisfactory results where the digestion, circulation, or nerves are at fault. The Pills purify the blood, balance its circulation, strengthen the stomach, induce healthy action in the liver, and overcome all painful affections of the intestines, upon which they gently but effectually operate as aperients. Illnesses of the most alarming character, which have withstood all other treatment, have gradually yielded to a course of Holloway's Pills, which will ever prove the invalid's safest friend.
